Goodwin College Calendar

September 2012–September 2013

Fall Semester 2012

Monday, August 27	Community Day - Full-time faculty returns to campus
Tuesday, August 28	New student orientation
Friday, August 31	Last day to DROP at no tuition
Monday, September 3	Labor Day. School Closed
Tuesday, September 4	Fall semester begins
Monday, September 10	Last day to ADD a first module or 15 week course
Monday, September 17	Last day to ADD a second module course
Monday, September 17	Last day to DROP any course
Tuesday, September 18	Faculty Census Day (first module and 15 week courses)
Monday, October 8	Columbus Day. No classes
Wednesday, October 10	Last day to WITHDRAW from first module course
Tuesday, October 23	First module ends
Wednesday, October 24	Second module begins
Wednesday, November 7	Faculty Census Day (second module courses)
Monday, November 12	Veteran's Day (observed). No classes
Thurs-Sun, November 22-25	Thanksgiving holiday weekend. No classes
Sunday, December 2	Last day to WITHDRAW from a 15 week or a second module course
Sunday, December 16	Fall semester ends

Winter Break

December 17-January 6, 2013 Winter break for students

Spring Semester 2013

Wednesday, January 2	Community Day - Full-time faculty returns to campus
Thursday, January 3	New student orientation
Friday, January 4	Last day to DROP at no tuition
Monday, January 7	Spring semester begins
Sunday, January 13	Last day to ADD a first module or 15 week course
Sunday, January 20	Last day to ADD a second module course
Sunday, January 20	Last day to DROP any course
Monday, January 21	Martin Luther King Jr. Day. No classes
Tuesday, January 22	Faculty Census Day (first module and 15 week courses)
Wednesday, February 13	Last day to WITHDRAW from first module course
Monday, February 18	Presidents' Day. No classes
Tuesday, February 26	First module ends
Wednesday, February 27	Second module begins
Wednesday, March 13	Faculty Census Day (second module courses)
Fri-Sun, March 29-31	Good Friday and Easter weekend. No classes
Sunday, April 7	Last day to WITHDRAW from a 15 week or a second module course
Sunday, April 21	Spring semester ends

Spring Break

April 22-May 5 Spring break for students

Summer Semester 2013

Monday, April 29	Community Day - Full-time faculty returns to campus
Tuesday, April 30	New student orientation
Friday, May 3	Last day to DROP at no tuition
Monday, May 6	Summer semester begins
Sunday, May 12	Last day to ADD a first module or 15 week course
Sunday, May 19	Last day to ADD a second module course
Sunday, May 19	Last day to DROP any course
Monday, May 20	Faculty Census Day (first module and 15 week courses)

4 Goodwin College

Monday, May 27	Memorial Day. No classes
Wednesday, June 12	Last day to WITHDRAW from first module course
Tuesday, June 25	First module ends
Wednesday, June 26	Second module begins
Thursday, July 4	Independence Day. No classes
Wednesday, July 10	Faculty Census Day (second module courses)
Sunday, August 4	Last day to WITHDRAW from a 15 week or a second module course
Sunday, August 18	Summer semester ends
Summer Break	
August 19-September 2	Summer break for students

Introduction

Mission Statement

The mission of Goodwin College is to educate a culturally diverse student population in an environment that builds bridges between education, commerce, and community. Our degree and certificate programs prepare students for professional careers while encouraging life-long learning and promoting civic responsibility. As a nurturing college community, we challenge students, administration, faculty, and staff to realize their academic, professional, and personal potential.

Purposes:

1. To create an educational environment that blends professional preparation with the development of critical thinking skills and an appreciation of the humanities, arts and sciences.
2. To educate students in an environment that celebrates diverse cultures, ages, experiences and opinions.
3. To develop and refine methods to recruit and retain students who have the potential for success in both selective and open enrollment academic programs.
4. To adapt our programs to the changing needs of our student body, the marketplace and society.
5. To enrich our local and global communities by forming collaborative relationships that create educational, economic and cultural benefits.
6. To assist our graduates with identifying and securing career and growth opportunities.

Institutional-Level Student Learning Outcomes:
(adopted 2009)

Institutional level outcomes are what every student learns across all our academic programs.

- Students will demonstrate proficiency in their chosen field of study.
- Students will possess effective communication and analytical skills.
- Students will acquire the desire and skills necessary to engage in lifelong learning.
- Students will demonstrate civic responsibility.

General Information

History

Goodwin College was founded in East Hartford, Connecticut in 1999 and received accreditation by the Board of Governors for Higher Education in January 2001. In July 2004, the college became a non-profit entity. Goodwin College is legally under the control of the Board of Trustees of Goodwin College, Inc., a 501(c) (3) not-for-profit corporation. In December 2008, the College was licensed to grant baccalaureate degrees.

Goodwin College is located on Riverside Drive along the Connecticut River in East Hartford, CT. It is designed as a self-contained campus hub, providing all of the college's services in one location. The campus includes 39 technologically advanced classrooms, six state-of-the-art science labs, three computer labs, an 800-seat auditorium, a third-floor outdoor roof patio, two community rooms, a bookstore, a student lounge, a range of study areas, and a two-story library and media center with sweeping views of the Connecticut River. Deep-water docks on the river and expansive riverside grounds provide a scenic environment for students to study and socialize. The campus is easily accessible from several major highways, including I-91, I-84, and Route 2. All of Goodwin College is handicapped-accessible and located on a bus line.

Statistics show that we are a college community that includes racial and ethnic minorities, economically disadvantaged students, and undergraduates of traditional age as well as older students who work and are raising families. One of this College's greatest strengths is its ability to react quickly to changes in the marketplace and the needs of the community. This interdependence between education and enterprise contributes to building a strong foundation for students to pursue meaningful careers and advanced studies, to become responsible citizens, and to enhance their quality of life, as well as that of the community. Another strength is our culture of personal attention provided to each student. Students are challenged to reach their personal and academic potential through academic advising, a comprehensive orientation program, and academic support offered through the Learning Resource Center, along with a strong Career Services department that assists students in their transition to the workforce. A dedicated faculty, committed to excellence in teaching, allows for the individual attention so necessary to our students. Our faculty embraces change, pursues academic achievement and is passionate about teaching. But our greatest strength is not a thing—not our programs, our faculty, our facilities—but a culture of interconnectedness, service, and innovation in support of our mission.

Office Hours

The Admissions and Administrative Offices are open daily from 8:00 a.m. to 7:00 p.m. Monday through Thursday and from 8:00 a.m. to 5:00 p.m. on Friday, and Saturday 9:00 a.m. to 1:00 p.m.

Accreditation & Approvals

Accreditation Statement

Goodwin College is accredited by the New England Association of Schools and Colleges, Inc. through its Commission on Institutions of Higher Education.

Accreditation of an institution of higher education by the New England Association indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the New England Association is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or of the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the New England Association should be directed to the administrative staff of the institution. Individuals may also contact:

Commission on Institutions of Higher Education
New England Association of Schools and Colleges
209 Burlington Road
Bedford, MA 01730-1433
(781) 271-0022
E-Mail: cihe@neasc.org

Programmatic Accreditation

Early Childhood Education, Associate in Science

The Early Childhood Education program is accredited by the National Association for the Education of Young Children (NAEYC), located at 1313 L Street, NW, Suite 500, Washington, DC 20005. Telephone 202-232-8777 or, toll-free, 800-424-2460.

Histologic Science, Collegiate Certificate

The Histologic Science Certificate Program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences. NAACLS is an independent nonprofit accrediting agency ensuring the quality and integrity of educational programs that prepare professionals to work in the laboratory. The address for the National Accrediting Agency for Clinical Laboratory Sciences is 5600 N River Rd, Suite 720, Rosemont, IL 60018. Ph: 773.714.8880 Fax: 773.714.8886. Web: www.naacls.org.

Medical Assisting, Collegiate Certificate

The certificate program in Medical Assisting at Goodwin College is accredited by the Accrediting Bureau of Health Education Schools (ABHES), 7777 Leesburg Pike, Suite 314, North Falls Church, VA 22043, (703) 917-9503. ABHES is listed by the U.S. Department of Education as a nationally recognized accrediting agency under provisions of Chapter 33, Title 38, U.S. Code and subsequent legislation.

The certificate program in Medical Assisting at Goodwin College is programmatically accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Curriculum Review Board of the American Association of Medical Assistants Endowment (AAMAE). The address for CAAHEP is 35 E. Wacker Drive, Suite 1970, Chicago, IL 60601-2208, (312) 553-9355.

Nursing, Associate in Science

The program is in compliance with all of the accreditation standards of the National League of Nursing Accrediting Commission (NLNAC) and was awarded an initial, five (5) year accreditation in March 2006. For more information contact National League for Nursing Accrediting Commission, 3343 Peachtree Road, N.E., STE 500, Atlanta, Georgia 30326, www.nlnac.org, (404) 975-5000.

Occupational Therapy Assistant, Associate in Science

The Occupational Therapy Assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220. ACOTE's telephone number c/o AOTA is 301-652-AOTA. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. When you apply to sit for the certification exam, you will be asked to answer questions related to the topic of felony convictions. For further information on these limitations, contact NBCOT. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain licensure. Connecticut requires a license in order to practice occupational therapy and the

license is based on the results of the NBCOT Certification Examination.

Respiratory Care, Associate in Science

The Goodwin College Respiratory Care Program is accredited by the Commission on Accreditation for Respiratory Care (www.coarc.com).

Commission on Accreditation for Respiratory Care, 1248 Harwood Road, Bedford, Texas 76021-4244, (817) 283-2835.

Veterans

The State Approving Agency, Connecticut State Department of Higher Education, has approved Goodwin College for the education and training of veterans and their qualified dependents under the provisions of Section 1775, Chapter 36, United States Code, Veterans Benefits. Please contact the Financial Aid office for further information.

The Yellow Ribbon Program

The Yellow Ribbon GI Education Enhancement Program (Yellow Ribbon Program) is a provision of the Post-9/11 Veterans Educational Assistance Act of 2008. This program allows institutions of higher learning (degree granting institutions) in the United States to voluntarily enter into an agreement with VA to fund tuition expenses that exceed the highest public in-state undergraduate tuition rate. The Post-9/11 GI Bill pays up to the highest public in-state undergraduate tuition and fees. Goodwin College is proud to participate in the Yellow Ribbon Program.

Student Services

Student services offered at Goodwin College provide students with the support needed to assist them to succeed in the college experience from orientation through graduation. The range of services available to students includes: applicant advising, academic advising, program planning, orientation, tutoring services, support services, counseling, disability services, library services, career services, student leadership, activities and clubs, and the Hartford Consortium Cross-Registration Program.

Academic Advising and Counseling Center

Applicant Advising

Goodwin College helps students achieve their academic and career goals by fostering partnerships between students and faculty, and by providing them with accurate information regarding registration, academic planning, and school policies. Placement evaluations and school records help to build student profiles that are used to assist students with the process of course selection and degree planning. The initial applicant advising contributes to the success of each student by establishing a plan of study for all new students and following up several weeks into the semester to assure a

strong start. During the admissions process, all students are given the opportunity to meet with an applicant advisor to begin designing a plan of study.

Academic Advising

All students are assigned to an academic advisor upon his or her enrollment in Goodwin College. Assignments are made based upon a student's academic program. If a student changes his or her academic program, the advisor will likely change. Academic advisement plays a critical role in fulfilling the mission of Goodwin College. The advisement process fosters a continuous advisor/student relationship that begins in the first semester and continues throughout the time a student is at Goodwin College.

All students are encouraged to meet with their Academic Advisor throughout their college career. Students planning to transfer credit from an accredited institution or who wish to be considered for an award of credit for experiential learning should also meet with an Academic Advisor before registration to discuss options. In addition, students planning to continue their education should meet with their Academic Advisor to discuss transfer requirements, admission requirements and course planning. Advisors are available to:

- Advise students on course selection;
- Develop plans of study;
- Add, drop and withdraw students from classes;
- Answer academic questions regarding courses and plans of study;
- Counsel students if they are having academic difficulties; and
- Serve as a support system for enrolled students.

Career Services

Career counselors at Goodwin College help students develop professionally as they continue on their journey toward their chosen career. The Mission of Career Services is to support and empower Goodwin College students in developing, evaluating and effectively implementing their career plans. To fulfill this mission, Career Services provides opportunities for students to become the best possible career-ready candidate that they can be.

Students are encouraged to develop a relationship with a career counselor early in their academic career. Our counselors assist students with every stage of the career planning process. We offer a variety of information and resources to help students achieve their career goals including:

- Individualized career counseling;
- Interest inventories and assessments to help relate their strengths to career objectives;
- Career workshops (resume and cover letters, interviewing practice, job-search skills);
- Information on internship opportunities;

- Job listings for off-campus employment;
- Recruitment activities including on-campus interviews; and
- Additional career planning and research resources.

Although every effort is made to assist graduates in securing employment, no guarantee or representation of placement is made or implied. More information about these resources can be found on the Career Services website at http://www.goodwin.edu/career_services.asp or call 860-727-6768.

Counseling Services

The mission of Counseling Services is to provide students with opportunities for personal, emotional, and academic development and to help guide students towards successful completion of their college education. Additionally, in accordance with Goodwin College's mission, Counseling Services seeks to foster life-long learning and to promote civic responsibility. Our counselors will:

- Provide a safe and nurturing environment where students can identify and align their personal goals with their academic goals;
- Collaborate with faculty and staff to help students develop self-knowledge, strategies, and coping skills necessary to succeed personally, academically, and professionally; and
- Provide individual counseling for any issue including, but not limited to bereavement support, emotional difficulties, and domestic violence in the home.

Students who take advantage of these services will enjoy a one-on-one relationship with a counselor. Counselors also offer small group sessions and workshops on a variety of issues.

Referrals to the Counseling Center can be made by faculty, staff or self-referral. Every referral remains confidential. More information about these resources can be found on the Counseling Services website at http://www.goodwin.edu/counseling_services.asp or call 860-913-2072 or 860-913-2043.

Foundational Pre-Collegiate Studies

Goodwin College uses the ACCUPLACER™ Placement Test to evaluate a student's competency in reading, grammar and mathematics. Based on these scores, students are placed into appropriate course levels. For those students who need to increase their skills and competencies, Goodwin College offers three levels of foundational course work in English and mathematics. In addition, foundational students must enroll in a college experience course designed to help them acquire college success skills such as time management, test-taking techniques, information literacy and use of other college resources. Health Sciences students also enroll in an Introduction to Laboratory Sciences course to prepare them for college-level science courses.

Course numbers beginning with "O" are considered foundational. The credit earned is institutional credit only and cannot be used to fulfill any degree or collegiate certificate requirements; it is usually not transferrable to other institutions.

Goodwin Achievement Program (GAP)

A new student may qualify for participation in the Goodwin Achievement Program (GAP) based on his/her interview and pre-registration testing. This first-semester program consists of college readiness courses to refresh basic skills and learn additional skills necessary for core, college-level work. GAP offers a student:

- A learning community—a group of students completing courses together, creating opportunities to make friends and build supportive relationships for success.
- A tuition waiver—no tuition requirement for the first semester, indicating the college's investment in the student's future.
- Small classes—limited enrollment of fifteen (15) students, providing more support for learning and more time with instructors.

The pre-collegiate courses that support the GAP program are:

- English 088 Foundations for College Reading and Writing and
- ASD 088 Tools for Success

The student's financial investment is the cost of books and supplies; in addition, the student must meet the academic requirements of the Goodwin Achievement Program or they will be dismissed from the college.

Orientation

All new students must plan to attend one of the scheduled orientations. New student orientation is designed to provide students with the resources needed to be successful at Goodwin College. During orientation, students meet college administrators and faculty and are provided with valuable information about key campus services.

Student Organizations

The Student Activities Coordinator, in collaboration with the Dean of Students, faculty, staff and alumni, provides leadership and support to a broad array of student activities and recreational opportunities. As a non-residential campus, Goodwin ensures that its diverse student body has numerous opportunities for enhancing growth and development.

The goals of the student organizations are: (I) to ensure that the educational potential of the extra curriculum is realized; (II) to facilitate cohesion and social interaction; (III) to enable students to maximize their college experience; (IV) to instill a sense of civic responsibility; and (V) to help students harness transferrable leadership skills.

The Student Council, which meets monthly, serves to oversee or to provide general supervision of all student activities. It also provides a forum for the expression of student views and interests. Its officers provide official representation of the student body to the Board of Trustees, the Administration, faculty, staff and the broader community.

Students are encouraged to organize activities that provide leadership, leisure and fitness. Some of the special interest organizations are affiliated with departments, such as Early Childhood Club, Respiratory Care Club, and Student Nursing Association. Other organizations include the Veteran's Club, the Goodwin Karaoke Club, Paranormal Psychology Club, Journalism Club, and Goodwin GoodNews Singers. Student volunteers support sponsored activities organized by recognized community-based agencies such as FoodShare, CPTV and the American Red Cross. Recreational opportunities include basketball, flag football, soccer and several new activities that are being planned.

The institution has a Beta Rho Delta Chapter of Phi Theta Kappa International Honor Society. It was developed to recognize and encourage high scholarship. A Faculty Advisor confers membership on selected students who meet the criteria for eligibility to this distinguished organization. The inductees are expected to maintain their academic performance and to contribute to the institution through service-learning activities.

The Learning Resource Center

The mission of The Learning Resource Center (LRC) is to provide assistance to all students to enable them to develop needed study skills and to reinforce knowledge aimed at improving classroom performance. As a resource center, the LRC offers opportunities to all students by providing additional sessions in study and critical thinking skills as well as test-taking strategies. Students also learn how their acquired skills and knowledge impact their program completion and continued enrollment. The LRC includes the Writing Center, Peer Tutoring assistance, and the Math lab.

Writing well is important in all academic disciplines and careers. Located in the Learning Resource Center (Room 209), the Goodwin College Writing Center provides resources and support for writers of all levels and abilities and across all academic disciplines. Students receive assistance with writing assignments and papers from an essay in the first year to more advanced writing in later terms. The Writing Center helps students from brainstorming an idea to polishing and perfecting the final draft, including: determining the controlling idea or focus; structuring evidence for the most effective presentation of ideas; expanding an argument; creating effective introductions and conclusions; using APA or MLA styles with confidence; and gaining confidence as a writer. Students do not need an appointment to visit the writing center. Instructors and Peer Tutors are available

throughout the scheduled hours. Appointments are available outside regularly scheduled hours to accommodate students whose work or school schedule do not allow them to attend during regular times. To schedule an appointment or speak with a staff member in the Learning Resource Center, call 860.913.2064, e-mail writingcenter@goodwin.edu or send a text message to 860.816.1848.

The LRC is staffed by trained Peer Tutors and Professional Tutors who enhance their teaching skills and strategies through in-service training sessions. Students who utilize the peer tutoring services are either self-referred or are referred by their instructors. Students may request tutoring by contacting the Assistant Dean of Student Services. The standards maintained by the Peer Tutoring program are consistent with those of the New England Peer Tutor Association (NEPTA), a regional organization in which it has membership. The LRC is also committed to the principles of the national organization, College Reading and Learning Association (CRLA), which processes all applications for Certification/Re-Certification.

eTutoring

Goodwin College offers eTutoring services through an agreement with the Connecticut Distance Learning Consortium (CTDLC). Students using the eTutoring platform may work with an eTutor in a live session or may submit a question or course assignment for an instructor to correct and/or provide feedback. eTutoring offers instruction, guidance and resources to help each student succeed. Specific information concerning eTutoring is available by contacting the Assistant Dean of Student Services.

Disability Resources

The Disability Resources Office assists students with disabilities in securing accommodations and services that will promote success and integration into the College. Goodwin College complies with the mandates created by the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. Students who have a documented disability are strongly encouraged to contact the Disability Coordinator in advance of their enrollment so that accommodations are in place on the first day of matriculation. Guidelines and policies are provided to students who request this information. If you have any questions, please contact Joe Cary at 860-727-6718 (jcary@goodwin.edu). Information is available on the Goodwin College website.

College Transfer Advising

Goodwin College has formal articulation agreements with many private and public colleges and universities in Connecticut. Credits earned at Goodwin College may be eligible for transfer to another accredited college or university. However, each receiving institution has special degree program requirements that will determine

the specific transfer credit it will grant. Goodwin College does not promise or guarantee the transferability of any course, credits or credentials earned at this institution to any other educational institution. Students who plan to transfer are advised to check with the intended transfer institution concerning the number of credits that the institution will accept. It is the student's responsibility to seek advice early in the program.

Library Services

Facility

The Hoffman Family Library is the intellectual hub of Goodwin's community. Its signature two-story space, overlooking the Connecticut River, combines the best of traditional design with the latest technological tools. The Library's collaborative learning spaces provide leisure seating and research tables on each floor, group-study rooms, study carrels, book stacks, periodical and newspaper areas, and 34 computer work stations. Wireless connectivity is available for Goodwin's 50 laptop computers and students' personal laptop computers. Located on the second floor of the library, the Hoffman Family Library Learning Commons brings together library and technology using a Media Scape that fosters informal, collaborative and creative work. Wireless connectivity is available for Goodwin's 50 laptop computers and students' personal laptop computers.

Other resources include a photocopier, printer, audiovisual hardware and software. Laptops are available for checkout to students and faculty. Current faculty, staff and students can also check out digital cameras, Kindles or Nooks. The staff assists users with software and hardware, printing and copying, and other technical issues.

Staff and Hours

The library staff now includes the director, three librarians, an administrative assistant, and student workers. The library is open seven days a week with extended hours during exam weeks. Real time reference assistance is available using Ask a Librarian page that includes: in person, by phone, e-mail, instant messages through Meebo, and the Text-a-Librarian platform.

Library Without Walls

The library's home page at www.goodwin.edu/Library is our library without walls. The gateway to the library's resources, the home page, includes access to and information about using all of the library collections. The home page features reference services and news of interest to the Goodwin community on the library's blog and Twitter pages. Staff and students can access the library's e-books and research databases off-campus by using their SonisWeb username and password. Print resources are accessible using the library's online catalog.

Collections

The development of resources in the library targets the baccalaureate programs supported by the College, promotes reading, and makes available ideas that develop staff, faculty, and students as advanced thinkers. The library program endeavors to provide all its patrons with the tools needed to become successful scholars and lifelong learners

The collection continues to expand with additional in-house subscriptions, books, audio-visual materials, and artifacts. Currently, there are over 15,000 print titles, 130 journal and newspaper subscriptions, and more than 450 audiovisual materials. However, the library has responded to user demands for more electronic resources that include 66 research databases with online access to over 45,000 full-text journal and newspaper titles. Other databases give students and faculty on and off-campus access to more than 70,000 full text academic and reference books and 1000 films online. Membership in the Connecticut Interlibrary Loan System, a consortium of over 400 libraries in the state, allows library users to borrow materials not in the Hoffman collection. Users create their library accounts, view their circulation records, place holds and renew materials, create reading lists, recommend book, write reviews, and more.

Services

The library provides a variety of services for staff, faculty, and students including those in the Distance Education program. The library home page provides faculty and staff with forms for information literacy instruction, material requests to expand the collection, and reserve requests.

The staff is actively involved in curriculum support services and has developed faculty partnerships to strengthen learning outcomes for students. Web and video tutorials on all aspects of metaliteracy reinforce faculty instruction for students. Students and faculty use Guides for Citing and Writing and Subject Resources available in the library and on the home page.

The library put strong emphasis on teaching Information literacy and technology skills. All freshmen are introduced to the library resources and information literacy through several courses. New students who enter the college with 6 or more transferable collegiate credits take ASD 110. All students who do not have 6 or more transferable collegiate credits take college experience courses. Further, the library staff is available to faculty and their classes to introduce and reinforce information literacy skills to provide their students with effective research techniques. Particular skills are introduced in the foundational courses and customized instruction is provided in advanced courses. One-on-one consultations are also available for students who need more assistance. All students and members of the Goodwin Community can receive help on daily basis during the library's operational hours. Professional development workshops are also provided to introduce new resources and metaliteracy tools.

Special Collections

The Hoffman Family library is honored to house and maintain The Alex Haley special Collection Archive. Items from the collection are in continuous display on the second floor. Items from this expanding collection are available for classroom and offsite presentations. The library also continuously displays art in many formats, including unique sculptures from Zimbabwe, hand-crafted historical ship models, paintings, and other local collections.

WTIC-AM	1080 AM	Channel 8	WTNH-TV
WZMX	93.7 FM		

Students may also access school closing information by calling 860-528-4111 or by checking the Goodwin College website (<http://www.goodwin.edu>).

Educational Opportunities Through the Hartford Consortium

As a member of the Hartford Consortium for Higher Education, an alliance of area colleges and universities, Goodwin College participates in the Consortium's Cross-registration Program. Full-time undergraduates are eligible to enroll in selected courses in environmental studies, languages, urban studies, women's studies, international studies and religious studies at other local campuses. The Cross-registration Program offers eligible students full credit at usually no extra charges. For more information, please contact the Registrar or call the Hartford Consortium at (860) 906-5038. You also may visit the Consortium website at www.hartnet.org/hche. The other members of the Hartford Consortium are Capital Community College, Manchester Community College, Central Connecticut State University, Hartford Seminary, Rensselaer at Hartford, Saint Joseph College, Trinity College, University of Hartford and University of Connecticut. The associate and affiliate members are Charter Oak State College, Saint Thomas Seminary and Connecticut Public Television and Radio.

Housing

Goodwin College does not provide housing accommodations on campus. A variety of off-campus housing units are available nearby.

Campus Security Act Information

The Vice President for Physical Facilities and Information Technology also serves as Goodwin College's contact person for purposes of The Campus Security Act. All verified cases of on-campus crime, as stipulated by The Act, are collected by the Vice President. The complete annual report, available to all current and prospective students and staff upon request, is on file in the Library and in the Office of the Dean of Students. It may also be found on the college's web site [www.goodwin.edu].

School Closings

Unscheduled school closings due to inclement weather or unforeseen circumstances will be announced on the following stations no later than 7:00 a.m. for day classes and 3:00 p.m. for evening classes.

Admissions

General Admission Policy

Goodwin College has an open enrollment policy; however, a personal interview with an admissions officer is required for all interested applicants. Acceptance into the College requires the attainment of a high school diploma or a General Education Diploma and successful completion of the interview. Admission into the College does not guarantee admission into programs with selective admission requirements. After acceptance into the College and successful completion of all prerequisites, students may apply to the selective admission programs.

Prior to registration, placement evaluations in reading comprehension, sentence skills, mathematics, and algebra are administered to all incoming students enrolled in degree or certificate programs. Matriculating students entering with a Bachelor's Degree or higher from another accredited institution are exempt from the placement evaluation. Transfer students meeting the program requirements for English and mathematics are exempt from the placement evaluation.

Prospective students are encouraged to call the Admissions Office to schedule an appointment with an admission officer and visit the campus.

Admissions Requirements

Admission Requirements

Applicants to Goodwin College are required to:

1. Interview with an admission officer.
2. Complete an Application for Admission to the College.
3. Submit proof of high school graduation or equivalent OR sign a Certification of Attainment of a high school diploma or equivalent.
4. Pay the \$50 non-refundable application fee.
5. Arrange to take the ACCUPLACER™ placement evaluation prior to registration.

Students entering a direct enroll certificate program in Medical Office Management, Non-profit Management, or Property Management and Acquisition must take the ACCUPLACER™ assessment if they have not successfully taken 6 college credits, including a college level English or math. The ACCUPLACER™ is used for assessment purposes only and not for determining prerequisites for program enrollment. Students who have completed the equivalent of ENG 101, MATH 098 and CAP 110 are more likely to find success in these certificate programs. Students not meeting the recommended ACCUPLACER™ levels are encouraged to take tutorials in English, math

and computer literacy before starting course work in a certificate.

All applicants will be informed of their acceptance or rejection within two weeks of application.

Once enrolled for classes, students are required to:

1. Submit official high school transcript. Students graduating from a high school located in the United States are required to submit an official high school transcript before the end of the first semester of enrollment. Students who do not submit the official high school transcript by that time, will not be allowed to register for the subsequent semester.

Students graduating from a foreign high school will complete a high school transcript request to be mailed to their high school. In those cases where the high school no longer exists (due to various circumstances) the attestation by the student that he/she has graduated, along with the name, address, and date of graduation will suffice. Students graduating from foreign high schools may also submit a copy of their high school diploma.

2. If applicable, submit an official transcript of GED test results issued by the State before the end of the first semester of enrollment.
3. Submit documentation of measles, mumps, rubella and varicella (chicken pox) immunization/immunity at time of registration, if required.

Selective Admission Programs

The following programs have selective admission requirements:

1. Bachelor of Science in Nursing (RN-BSN Completion Program)
2. Associate in Science in Nursing
3. Associate in Science in Respiratory Care
4. Associate in Science in Occupational Therapy Assistant
5. Histologic Science Certificate Program
6. Paramedic Studies Certificate Program
7. English as a Second Language Certificate Program

Admission to these programs requires the completion of a special application as well as fulfilling all the requirements for admission as listed in the catalog. Please reference the individual program pages for complete admission requirements.

Transfer Students

Students may transfer into Goodwin College for any term. In addition to the admission policy noted above, and before completing their first semester, transfer students must have all previously-attended collegiate institutions submit official transcripts to: Transfer Counselor,

Goodwin College, One Riverside Drive, East Hartford, CT 06118. The Transfer Counselor will evaluate the transcripts and send a copy of the evaluation report to the student.

Transfer of Collegiate Credit

Collegiate credit may be granted for credit courses successfully completed at other accredited collegiate institutions in accordance with the following policies:

1. The student's Academic Advisor in consultation with the Department Chair or Program Director determines whether transferred courses and experiential credit satisfy Goodwin College degree requirements.
2. Only courses completed with grades of "C" or higher may be eligible for transfer.
3. Officially transferred credit will not be posted to the student's transcript until 12 credits have been completed at Goodwin College.
4. Once a student is matriculated at Goodwin College, no additional credits earned at other institutions will be transferred.
5. Credits earned at international institutions may be considered for transfer. It is the student's responsibility to have his/her international transcript evaluated by an evaluation service that is a member of the National Association of Credential Evaluation Services (NACES) and to have an official copy of the results sent to Goodwin College for evaluation and assessment of credit.
6. Credits awarded are given the grade of TR and are not included in the calculation of the GPA. These credits will count both as credits attempted and as credits earned in determining satisfactory academic progress.
7. Residency requirement: All students are required to take a minimum of 25% of all coursework toward a credential at Goodwin College. Students should consult the catalog pages that pertain to their major for any additional degree requirements. The last 12 credits posted to a student's transcript must be taken at Goodwin College.

Credit for Lifelong Learning

The Board of Trustees believes that college-level learning occurs in many settings. Accordingly, the College adopted a policy for the assessment and awarding of credit for experiential learning. Collegiate credit may be awarded based on verification that the non-traditional learning is equivalent in level and nature to the learning acquired in approved college courses and programs.

There are several assessment methods available for students who want to earn collegiate credit for their college-level, non-traditional learning. Goodwin College accepts credit recommendations from the American Council on Education (ACE), Charter Oak State College Connecticut Credit Assessment Program (COSC CCAP) and the United States military in awarding college credit

to adult learners for classroom based training experiences.

In addition, the college evaluates student performance on standardized tests such as the College Level Examination Program (CLEP), CEEP Advanced Placement tests, DANTES, and DSST.

When a standardized test is not available, the Goodwin faculty may offer a Credit-by-Exam (CBE) test or laboratory evaluation designed and administered by the College. Students must achieve a 73% in order to pass a CBE and students may only attempt each exam one time. There is an assessment fee charged by the College for CBEs; however, no charge is assessed for the credits awarded.

Portfolio review consists of the creation of a portfolio that documents student learning from work, volunteer, and other significant life experiences and relates the learning to specific college course outcomes. There is a development fee associated with portfolio review that is covered by the mandatory Portfolio Review for Experiential Learning course and a fee associated with the number of credits assessed.

A student may elect to have their experiential learning assessed by any of these methods, only if the student is registered at the College during the semester the assessment is completed. No more than 50% of the credits required for a degree or certificate shall be awarded for prior experiential learning.

Credit awarded for experiential learning may not be transferable to other institutions of higher learning. As with transfer credit, experiential credit is not officially awarded or posted to the transcript until the student has successfully completed at least 12 credits at Goodwin College. Credits awarded are given the grade of EC and are not included in the calculation of the GPA. These credits count both as credits attempted and as credits earned in determining satisfactory academic progress.

Immunization

Students born on or after January 1, 1957, must submit evidence of immunization against mumps, measles, and rubella in compliance with Connecticut State Law Public Act 89-90 unless proof of a medical or religious contraindication is submitted. All students born on or after January 1, 1980, must also provide proof of adequate immunization against varicella (chicken pox). Students born in the United States before January 1, 1980, do not have to show proof of varicella vaccination. Adequate immunization for mumps, measles, rubella, and varicella consists of two doses of vaccine separated by at least 28 days with dose number one given on or after the first birthday.

Second Chance Program

Goodwin College has a special program called "Second Chance" which allows students who have a poor academic record to refresh their GPA and work toward

developing a more favorable academic record. Current students may request this program when transferring to another program of study. Returning students may request this program upon reenrollment in the College. Students enrolling under the "Second Chance" program will be on academic warning for the first semester.

Under this program, students may request the calculation of a new cumulative GPA. Academic forgiveness will be applied to all courses taken during the semesters for which the "Second Chance" option is invoked. These courses will remain on the transcript, but will have zero quality points and will not be calculated in the new grade point average. Only the credits attempted and the credits earned that count toward the new program of study or option will be used in the determination of the student's satisfactory academic progress standing.

This option is available only once to each student and cannot be applied to any completed degree or collegiate certificate program. In accordance with the College's policy on transfer grades, if the "Second Chance" program is approved, the student may receive credit for all courses with a "C" or better that were previously taken and that apply to the new program. A returning student must complete a minimum of 15 credits after returning under the "Second Chance" program to be eligible for a degree or certificate.

For additional information on the program, please contact the Assistant Dean/Registrar at (860) 727-6708.

Non-Matriculated Students

Applicants may enroll in a single course in a non-matriculated status. Non-matriculated students may take up to 12 credits before matriculating at the college.

Readmission

Former Goodwin students who wish to re-enroll at the college must apply for readmission through the Admissions Office.

Financial Aid

The purpose of financial aid is to provide financial assistance to students who would otherwise be unable to attend college. A majority of financial aid, including aid funded through federal and state agencies, is granted on the basis of need. A student's financial need is the difference between the total cost of one academic year (two semesters) of study at the College and the total resources available to the student and, if dependent, to his/her family.

The Goodwin College Financial Aid Office is dedicated to giving students the personal attention needed to help them find the financial means to pay for their college education. A variety of financial aid is available to qualified individuals in the form of grants, loans, part-time employment, and scholarships. Some of these funds originate from federal and state agencies and some originate from local government and community-based organizations. Scholarships and grants do not have to be repaid. Loans have to be paid back. Many loans are repaid after the student graduates or leaves the College.

Sources of Financial Aid

Grants

Connecticut Independent College Student Grant Program (CCICS) - This grant is available to Connecticut resident undergraduate students enrolled in a degree granting program. The student must be registered for 6 or more credits per semester to qualify. It is a grant, so it does not have to be repaid. Go to www.ctdhe.org for more information on other types of financial aid programs for State of Connecticut residents.

Federal Pell Grants (PELL) - Eligibility is based on financial need. Only those students who have not earned a bachelor's degree and are not in default on Title IV funding are eligible for this grant. A Pell Grant is not a loan, so it does not have to be repaid. It can be used for tuition, books, and living expenses.

The maximum annual award for 2012-2013 is \$5,550 based on 12 credits (full time status). The Pell Grant is prorated for less than full time attendance.

Federal Supplemental Education Opportunity Grants (FSEOG) - Students who receive the Pell Grant and have the lowest expected family contribution are the first people considered for the FSEOG. Awards range from \$200 - 4,000 per academic year depending upon the college funding levels. Only those students who have not earned a bachelor's degree are eligible. This grant does not have to be repaid.

Rhode Island Higher Education Assistance Authority (RIHEAA) - The Rhode Island State Grant Program is designed to offer help to those students whose family resources are not sufficient to meet the costs of

higher education. Student's legal state of residency must be Rhode Island.

Loans

Federal Direct Stafford Loan Subsidized Program - The U.S. Department of Education pays interest while the borrower is in school and during grace and deferment periods; students must be attending at least half-time and have financial need; fixed rate is set annually for new borrowers. Effective July 1, 2012, subsidized loans first dispersed after this date will only have the interest subsidized while the borrower is in school. The borrower will be responsible for the interest that accrues during the grace period and periods of deferment. Loans must be repaid.

Federal Direct Stafford Loan Unsubsidized Program - The borrower is responsible for all interest; must be at least half-time; financial need not required; fixed rate is set annually for new borrowers.

Federal Direct Parent Plus Loan - For parents of dependent students; students must be enrolled at least half-time; financial need not required. Repayment begins 60 days after the disbursement of funds.

Direct or Additional Unsubsidized Stafford Loan - This loan is available to dependent students whose parents have been denied a PLUS loan. This is non-need based. Interest and repayment terms are similar to the Unsubsidized Stafford Loan as described above.

Nursing Student Loan Program (NSL) - The Nursing Student Loan program provides long-term, low interest rate loans to full-time and part-time financially needy students pursuing a course of study leading to a degree in nursing. This loan is sponsored through the Department of Health and Human Services. Goodwin College is responsible for selecting loan recipients and for determining the amount of assistance a student requires.

Employment

Federal Work-Study Program (FWSP)

The Federal Work Study Program provides part time jobs for undergraduate students who have financial need. The job can be on or off campus. Students may use these funds to offset their educational and personal expenses. Students can work up to 15 hours per week.

Scholarships and Institutional Grants

Scholarships for Disadvantaged Students Program (SDS) - The Scholarships for Disadvantaged Students Program provides aid to financially needy students who are enrolled in nursing programs. This grant is sponsored through the Department of Health and Human Services. Goodwin College is responsible for selecting the

recipients and providing scholarships that do not exceed the cost of attendance.

Hartford Foundation for Public Giving - The Hartford Foundation builds partnerships with donors and nonprofit organizations to enhance the quality of life for people in the greater Hartford region and to help students from the community afford a college education. As part of this mission, the Foundation provides block grants to Goodwin College for scholarships.

Besides living in the greater Hartford region, the selected recipients must have demonstrated financial need, as determined by the financial aid office; must be matriculated in a degree-granting program or a certificate program; and the recipients may be a traditional or non-traditional age, first-time or returning students and be a high school graduate. Awards range from \$500 - 1,500 per student. The Foundation publishes a directory of scholarships available in searchable format at www.hfpg.org/scholarships.

First Niagara Bank Foundation Scholarship - First Niagara Bank has generously given Goodwin College \$100,000 to award as scholarships to deserving students. The money is to be spent at the rate of \$25,000 per year for the next four years. There is no formal application process; the financial aid department will determine which students, based on financial need, will receive the funds.

Institutional Grants

Institutional grants are awarded to students each academic year on the basis of need. Determination of need is based on the Estimated Family Contribution (EFC) as calculated on the Institutional Student Information Records (ISIR). The award amount is disbursed equally over the two semesters. To qualify, the student must be registered for 6 or more credits per semester. There is no formal application process. Students automatically apply by completing the FAFSA form and submitting all required documentation. Students will be notified of the grant amount through receipt of the Financial Aid Award Notice.

Students may reapply each academic year by completing a new Free Application for Federal Student Aid (FAFSA). Students in good standing (based on Satisfactory Academic Progress) will automatically be awarded a new grant for the second academic year based on the revised Estimated Family Contribution (EFC) as calculated on the Institutional Student Information Records (ISIR).

Institutional Scholarships

Dean's Scholarship

Awarded to continuing students entering a new academic year who have attained a 4.0 GPA for the prior academic year. There is no formal application process. Students completing at least 18 credits their first academic year will receive a \$2000 award. Students completing at least 12 credits their first academic year will receive a \$1000 award. The award amount will be disbursed equally over the next

two semesters.

President's Scholarship

Awarded annually to graduates of Hartford area high schools who apply to Goodwin College. Applicants must be in their senior year, have a GPA of 2.8 and document 100 hours of community service. Five \$2000 scholarships are available at each area high school. Students must apply by completing the scholarship application form and submitting it along with an application for admission to Goodwin College by August 1 following their senior year. Winners will be chosen by the individual high school guidance counselor. Recipients will be notified before the start of the fall semester.

Goodwin College Matching Scholarship Program

Whenever any enrolled student receives a scholarship from any non-profit agency, service club, or similar private organization, Goodwin College will match the amount up to a maximum of \$250. Goodwin College will award up to \$20,000 per year in aggregate for this program. To apply for this scholarship, students are required to provide proof of the outside scholarship award to the Financial Aid Office prior to the registration date for classes. Acceptance will be noted on the Financial Aid Award Notice.

Goodwin College Alumni Scholarship

The Alumni Scholarship is designed for Goodwin College student who have graduated from their matriculated program of study and either continue at the college or return to Goodwin College at a later date to pursue a higher degree. The scholarship is directed to graduates with a cumulative grade point average of 3.0. Students who meet the initial eligibility requirements are awarded \$1000, (\$500 in each of the first two semesters) as long as the student is attending on at least a half-time basis. There is no special application process. The scholarship award will be noted on the Financial Aid Award Notice. The Alumni Scholarship is funded by Goodwin College. A maximum of 200 Alumni Scholarships may be awarded in any single academic year.

RN to BSN Scholarship

The RN to BSN scholarship is awarded to graduates of Goodwin's Associate degree in Nursing program who matriculate in the BS Nursing program. Students may receive up to \$17,000 over the life of their time in the BS Nursing program.

BS Organizational Studies Scholarship

Graduates of any Goodwin certificate or Associates degree program who enroll in the Bachelor of Science Organizational Studies program may receive up to \$10,000 over the life of their time in the program. Awards will not exceed \$1,430 per semester for a maximum of seven semesters.

Additional Scholarships and Grants

Goodwin College Foundation Scholarships

Several privately funded scholarships are awarded each year through the Goodwin College Foundation, thanks to the generous support of donors. Recipients

are selected by the Scholarship Committee during the financial aid award process or through an application process, which is made available to students throughout the year via the Financial Aid office.

Goodwin College Foundation Scholarships

Several privately funded scholarships are awarded each year through the Goodwin College Foundation, thanks to the generous support of donors. Recipients are selected by the Scholarship Committee during the financial aid award process or through an application process, which is made available to students throughout the year via the Financial Aid office.

Alternative Loan Programs

Students needing to borrow additional funds to offset the cost of their education may do so through the following preferred lenders:

- Goodwin College Payment Plan
- Connecticut Higher Education Supplemental Loan Authority (CHESLA)
- Discover Loans
- Wells Fargo Bank
- Citizens Bank
- First Marblehead Corporation

Additional Resources

- Community Scholarships
- Employer Tuition Reimbursement
- Veteran's Benefits and the Yellow Ribbon Program

Students may elect to receive tuition and fee payments under the Post-9/11 GI Bill, also known as Chapter 33. To qualify, the veteran must have served at least 30 consecutive days on active duty after September 10, 2001. Certain qualifying dependents may also receive this benefit. The veteran must be enrolled at least half time.

The Yellow Ribbon Program allows degree granting institutions to enter into an agreement with the VA to fund tuition expenses that exceed the highest public, in-state undergraduate tuition rate. Goodwin College is pleased to participate in the Yellow Ribbon Program and has guaranteed to fund tuition costs exceeding the highest public, in-state undergraduate tuition rate.

Other Funding Sources

Regional Workforce Development Board

This entity provides funding under the Workforce Investment Act (WIA). WIA assists dislocated workers in funding their education through contracts and custom-made programs.

Connecticut Bureau of Rehabilitation Services (BRS)/Workers Compensation Commission

This department provides direct and supportive funds for disabled students attending Goodwin College. Funds have been received through WIA offices in Hartford, East Hartford, Manchester, Enfield, Middletown, Meriden, New Britain, Bristol, Willimantic, Waterbury, and others.

Division of Workers Rehabilitation Services

This state agency provides funds for re-training for those individuals who were hurt on the job and can no longer perform that job due to accident/illness.

Connecticut Department of Labor

This entity provides funding for students under the Trade Adjustment Act (TAA).

Job Connection, State Department of Social Services

This program has provided childcare and transportation funds for eligible students during enrollment at Goodwin College. Goodwin College meets the institutional definition of an Approved Provider under the Workforce Investment Act.

Eligibility for Financial Aid

Students receiving financial aid must meet these eligibility requirements:

- Be enrolled in an eligible degree or certificate program;
- Be taking 6 or more credits per semester;
- Demonstrate financial need;
- Maintain satisfactory academic progress;
- Register with the Selective Service (For males between the ages of 18 and 25) If registration has not been completed, contact the Financial Aid Office for assistance;
- Be a citizen or eligible non-citizen of the United States or Trust Territories with a valid Social Security number;
- Not be in default in the repayment of any educational loans or owe a refund on any Title IV grant program at any institution; and
- Have a high school diploma or General Educational Development (GED) certificate.

Applying for Financial Aid

The Free Application for Federal Student Aid (FAFSA) is available on-line at www.FAFSA.ed.gov. With the pin#, a student can apply for all sources of financial assistance awarded by the College as well as all Title IV Programs. A financial aid counselor is available to assist each student in explaining the process of applying online. Upon submitting the online application, the applicant will have applied for all sources of aid available through the Financial Aid Office. Please note that the FAFSA application must be submitted even when applying solely for a Federal Stafford Loan.

Complete the FAFSA correctly and truthfully. There are severe penalties for falsifying information on a FAFSA such as fines and imprisonment. The College is required to return Title IV aid to the Department of Education in these situations. The payments of tuition and fees incurred will be the responsibility of the student.

Applications for Federal Stafford Student Loans (subsidized and unsubsidized) are available from the Financial Aid Office as well as from www.studentloans.gov.

The total financial aid application process may take several weeks to complete. To facilitate their official registration into individual classes, applicants should make every effort to complete the process as outlined below in a timely fashion.

To be considered, all applicants must complete the following steps:

- Complete the process for admission into a degree or certificate program at Goodwin College.
- Complete and submit the Free Application for Federal Student Aid (FAFSA).
- Effective for the 2012-2013 award year, those FAFSAs that are selected for verification by the Department of Education must provide IRS tax transcripts to verify income. Tax returns are no longer acceptable (per the Department of Education). See your financial aid counselor for options in obtaining the transcript.

Notification of Awards

Students are advised of grants and institutional scholarship amounts in award notices given to the student when processing is complete. These awards are based on information from the FAFSA application, which may be estimated and subject to change. Students are encouraged to view their award for the current semester by accessing the NetPartner website. Federal and State awards are not final until the information reported on the FAFSA application has been verified as accurate by the Financial Aid Office. The award notice is for one academic year (2 semesters) and outlines the types and amounts of aid offered. All new and revised award notices must be signed by the students. This notification represents the most equitable offer based upon the information provided and the funds available to the College. The availability of funds from Federal and State programs is subject to federal and state appropriations and to changes in Federal and State legislation and regulations.

When their financial circumstances change, students are expected to notify the Financial Aid Office so that adjustments on the award package can be made. When outside awards are received, the student is required to notify the Financial Aid Office to assure that these awards are credited to the student and to adjust need-based aid where mandated by Federal and State law.

Students should direct any questions related to financial aid at Goodwin College to the Financial Aid Office. The Financial Aid Office has extensive information on specific financial aid programs and federal and state regulations. *Before adding or dropping a course, transferring programs, withdrawing from a program or beginning a leave of absence, students must check with the Financial Aid Office regarding any financial charges or penalties involved.*

Questions regarding procedure or awards should be directed to the Financial Aid Office, Goodwin College,

*One Riverside Drive, East Hartford, Connecticut 06118.
(860) 727-6723.*

Tax Credit Programs

The American Opportunity Tax Credit amends the Hope Scholarship effective for 2009 tax year. It allows the credit to be claimed for four post-secondary education years. Many of those eligible will qualify for the maximum annual credit of \$2,500 per student.

The Lifelong Learning Program helps students pay tuition for upgrading job skills or career training. The Lifelong Learning tax credit is 20% of qualified tuition and fee expenses up to \$10,000 per year, for a maximum credit of \$2,000 per year.

For more information on these programs, consult a tax advisor or the IRS Publication 970, Tax Benefits for Education.

Satisfactory Academic Progress

THIS POLICY APPLIES TO ALL STUDENTS WHO RECEIVE FEDERAL FINANCIAL AID

Federal Regulations (General Provision CFR 668.16 and 668.34) require Goodwin College's Office of Student Financial Aid to review the Satisfactory Academic Progress of students who apply for and/or receive title IV financial aid. **Generally, all periods of the student's enrollment count when assessing Satisfactory Academic Progress, even periods in which the student did not receive financial aid. Please note: Satisfactory Academic Progress (SAP) evaluations cannot take place until final grades have been posted each semester. Therefore, any financial assistance awarded prior to the academic evaluation is subject to cancellation if the minimum SAP standards are not met.**

All students must maintain Satisfactory Academic Progress, achieve minimum academic standards, progress at a satisfactory rate toward program completion, and complete the program of study within the maximum time frame in order to remain enrolled in the college. Additionally, students receiving federal financial aid must meet SAP standards to remain eligible for title IV program funds. Satisfactory Academic Progress is determined by measuring the student's cumulative grade point average (CGPA) in their current academic program and the student's rate of progress toward completion of his/her academic program at each evaluation point. Students must complete all requirements for graduation within the maximum time frame and have a CGPA of 2.0 or higher.

Maximum Time Frame

Maximum time frame is defined as 150 percent of the length of an academic program, measured in semester hours attempted, as published in the Goodwin College catalog. For example, using the 150% maximum, students enrolled in a program that is 60 semester hours in length must complete the program with a CGPA of 2.0

by the time they have attempted 90 semester hours. Successful course completion standards at each evaluation point ensure that the student can successfully complete the program of study within the maximum time frame with a minimum of a 2.0 CGPA.

Evaluation Points

A student’s academic progress toward meeting SAP requirements is evaluated at the end of each semester or payment period, whichever is less. The student’s cumulative grade point average, the cumulative number of credits attempted, and the cumulative number of credits earned are reviewed to determine satisfactory academic progress.

Cumulative Grade Point Average (CGPA) Requirements

Students must meet a minimum CGPA requirement at each evaluation point in order to be considered making satisfactory academic progress. These requirements are:

Number of Semesters	Minimum CGPA Required
1st semester of attendance	1.6
2nd and 3rd semester of attendance	1.8
4th semester of attendance and greater	2.0
Programs 3-semester in length	
1st semester of attendance	1.6
2nd semester of attendance	1.8
3rd semester of attendance	2.0
Programs 2-semester in length	
1st semester of attendance	1.6
2nd semester of attendance	2.0
Programs 1-semester in length	
1st semester of attendance	2.0

Rate of Completion Requirements

Students must progress through their educational program at a pace that ensures that they will complete the program within the maximum time frame. Therefore, in addition to the CGPA, a rate, or percentage of completion, is calculated and reviewed at the end of each semester. Rate of completion is calculated by dividing the cumulative number of semester credits the student has successfully completed by the cumulative number of semester hours the student has attempted. The rate of completion requirements are:

Certificate programs*:

One-year Certificates

Number of credits attempted:	Minimum cumulative successful percent completion required:
0 - 12	50%

13 - 24	60%
over-24	66.6%

*Certificates less than one-year require a 66.6% successful completion at each evaluation point.

Associate Programs:

Number of credits attempted:	Minimum cumulative successful percent completion required:
0 - 30	50%
31 - 90 & over	66.6%

Bachelor Programs:

Number of credits attempted:	Minimum cumulative successful percent completion required:
0 - 30	50%
31 - 60	60%
61 - 180	66.6%

Foundational Courses

Based on testing, degree-seeking students may need to take foundational or remedial course before enrolling in college-level English or math courses. These courses carry no academic credit hours but, for purposes of establishing enrollment status for Title IV eligibility, each foundational course equates to three credits. Students may not attempt a foundational course more than three times. Foundational courses may be eligible for financial aid, however, students are eligible for financial aid for only a maximum of 30 credits (10 attempted courses) as long as the student maintains Satisfactory Academic Progress.

Foundational courses are all pass/fail courses. For SAP calculations, these courses do not count as credits attempted or credit earned in determining the student’s rate of completion.

Foundational courses are not calculated into the student’s GPA or CGPA. Foundational courses are measured qualitatively by limiting the number of foundational course repeats. For the SAP qualitative calculations, the institution also reviews the successful completion of these courses. After attempting four foundational courses, a student must receive a Pass grade on a minimum of two courses. After completing more than four foundational courses, a student must receive a Pass grade on at least 50% of foundational courses attempted. If the student fails to meet this criterion, he/she is considered not to be making Satisfactory Academic Progress and will be placed on Financial Aid Warning. At the point that the institution determines that a student cannot complete all required foundational courses within attempting 30 credits, the student will no longer be eligible for Title IV financial aid for foundational courses.

Withdrawn Courses

If a student withdraws from a course and receives a grade of "W", the credits will count as credits attempted but not as credits earned in the rate of completion calculation. The "W" grade will not be calculated in the CGPA. Withdrawing from a course can have an adverse effect on the student's rate of completion calculation and may affect the student's ability to meet SAP requirements.

Incomplete Grades

"INC" grades that are converted to an "F" will count as credits attempted and may adversely impact the student's ability to meet SAP requirements. "INC" grades count as credits attempted but not as credits earned in the rate of completion calculation.

Repeated Courses

Any repeated course that is designated as an "R", whether repeated because of a failed grade or to receive a better grade, will be counted as credits attempted but not as credits earned for SAP calculations to determine rate of completion. Financial aid regulations permit students to repeat a course that has been passed (not an "F" grade) only once in order to earn a better grade. Any additional repeats of previously passed courses are not eligible for Title IV financial aid nor will they be used to calculate the student's enrollment status for determining Title IV eligibility. When a course is repeated, the grade of the most recent repeat will be used for the purposes of calculating CGPA. The "old" grade will remain on the transcript and will be followed by an "R". "R" grades are not used in calculating the CGPA. Repeating courses can have an adverse effect on the student's rate of completion calculation and may affect the student's ability to meet SAP requirements.

Transfer Credit

From another institution: All transfer credit that is accepted towards a student's academic program or major will be counted as both credits attempted and credits earned for purposes of the rate of completion calculation. Grades for these transfer courses are not used to calculate CGPA.

Change of Major (Internal Transfer): Students may transfer programs up to three (3) times during any one period of enrollment at the college. In order for courses to transfer to the new major they must be applicable to the new program, be completed with a grade of D or better, and meet program requirements for successful course completion. The SAP is calculated using all courses transferred into the new major. In all cases, the starting GPA for the new program, if any courses are transferred in, must be at least a 2.0. Transfer grades will be used in calculating the CGPA for the new program and for the completion rate. These courses will count as both credits attempted and credits earned for the SAP calculation.

Financial Aid Warning/Academic Warning

At the end of each semester, each student's CGPA and rate of completion is reviewed to determine whether the student is meeting the above Satisfactory Academic Progress requirements. Students who are not making SAP at the end of a semester will be placed on Financial Aid Warning for the next semester. Financial Aid Warning status is assigned to the student by the Academic Progress Office without the need for any appeal or further action by the student. All students placed on Financial Aid Warning will be notified via Goodwin College e-mail before the start of the next semester. Students with a status of Financial Aid Warning are eligible to continue to receive Title IV HEOA program funds for the semester.

Financial Aid Probation/Academic Probation

At the end of the semester during which the student was on Financial Aid Warning status, the institution will evaluate the student's Satisfactory Academic Progress to determine if the student is meeting the minimum standards of SAP. Students on a Financial Aid Warning who raise their CGPA and rate of completion at or above the minimum SAP standards will be returned to regular status. If the institution determines that the student does not meet the minimum SAP requirements at the time of evaluation, the student is no longer eligible to receive Federal financial aid funds, unless the student successfully appeals the determination and is placed on Financial Aid Probation. Students not meeting SAP requirements will be notified via Goodwin College e-mail before the beginning of the next semester..

Appeal Process

Students who lose their eligibility to receive Federal financial aid funds, may appeal to the institution for reinstatement of eligibility. A written appeal must be initiated by the student and must be received by the Academic Progress Coordinator by the Thursday immediately preceding the start of the next semester. The appeal must be based on mitigating circumstances, such as the death of a relative, injury or illness of student or family member, or other special circumstances that prohibited the student from making SAP. It must provide information regarding why the student failed to make SAP and what has changed in the student's situation that will allow the student to demonstrate SAP at the next evaluation point. Furthermore, the student must demonstrate that such circumstances will not continue to adversely impact student performance. Faculty and student service representatives will review all appeals.

If received in a timely fashion, all appeals will be responded to before the beginning of the next semester. Students will be notified via Goodwin College e-mail. If the school accepts the appeal and determines that the student should be able to meet SAP standards at the end of the subsequent semester, the student will be assigned the status of Financial Aid Probation and will have his or her eligibility to receive Federal financial aid funds

reinstated for the next semester. If the student does not meet SAP requirements at the end of the subsequent semester while the student is on Financial Aid Probation, or if he or she fails to meet his or her objectives under the Academic Plan, the student is no longer eligible to receive Federal financial aid funds.

Appeal Process, Financial Aid Probation, and Academic Plan

In some cases, the college may accept the student's appeal, place the student on Financial Aid Probation and require the development of an Academic Plan that the student agrees to follow that would allow him or her to meet SAP requirements over a specific time frame greater than the one semester. The college will evaluate the student's progress toward completing the requirements of the Academic Plan at the end of each semester in which the student is on Financial Aid Probation. The Academic Plan may require the student to fulfill specific terms and conditions such as a reduced course load or enrolling in specific tutoring or mentoring programs provided by the college. The student will be eligible to receive Federal financial aid funds for an extended period as long as the college determines, at the end of each semester, that the student has met the requirements specified by the college in the Academic Plan for the student, and otherwise meets all Title IV eligibility requirements. At the point where the student fails to meet the requirements of the Academic Plan the student will no longer qualify for further Federal financial aid funds.

Reinstatement of Eligibility

Once a student loses eligibility for Federal financial aid funds, he or she may continue to enroll in classes but will not receive any financial aid. Once a student meets the minimum SAP requirements, he or she may apply through the Financial Aid Office for a reinstatement of eligibility to receive Federal financial aid funds.

Students may be reinstated for eligibility for financial aid and/or continue as a student as long as it is determined that the student can complete the program within the maximum time frame with a CGPA of a minimum of a 2.0.

Dismissal

At the point that the Academic Progress Coordinator determines that a student cannot achieve the minimum 2.0 CGPA needed for graduation, the student may be dismissed from the college. At the point that it is determined that a student cannot complete the required credits needed for graduation, within the maximum time frame, the student will be similarly dismissed. Students who are dismissed may be notified in writing by the Registrar's Office.

Tuition and Fees

Tuition

Full-time Students (12 – 18* credits per semester)	\$9,450/ per semester
Three-quarter Time Students (9-11 credits per semester)	\$6,600/ per semester
Half-time Students (6-8 credits per semester)	\$4,615/ per semester
Students taking less than 6 credits per semester	\$590/per credit

*Students taking over 18 credits in any semester will be charged \$590 for each additional credit.

Continuing Education Programs ESL	\$10,050
--------------------------------------	----------

Fees

Application Fee	(non-refundable)
Degree & Certificate Programs	\$50.00
ESL	\$25.00
General Student Fee (Non-refundable once student begins classes)	\$500/Academic Year
Credit By Exam	\$100/course \$150/course with practical
Graduation Fee (Assessed regardless of participation in graduation ceremonies. Must be paid by all graduates of the Associate in Science Degree programs.)	\$200
Science Lab Fee	\$300/course
Nursing Clinical Fee	\$700/course
Respiratory Care Clinical Fee	\$700/course
Medical Assisting Clinical I Fee	\$400
Paramedic Fee	\$300
Histology Laboratory Fee	\$750/course
Official Transcript of Academic Work (One free copy provided at graduation; thereafter, per copy)	\$10
Late Registration fee	\$100
Late Payment fee	\$50

Returned Check fee	\$25
Portfolio Review	
Course fee of \$590 plus \$300 portfolio development fee	\$890
portfolio assessment fee:	
less than 6 credits	\$50
7 to 12 credits	\$100
over 12 credits	\$100 plus \$100/credit above 12 credits

This schedule of fees is comprehensive and is expected to prevail during the 2012-2013 academic year. The Board of Trustees of Goodwin College reserves the right, at any time, to authorize changes.

Refund Policy

Institutional Refund Policy

- When students register for courses, they become liable for all tuition and fees associated with those courses unless they officially withdraw from the College or drop the courses before the first day of the semester. The Refund Policy below applies to all students who have an active registration on record with the College on the first day of the semester. The Refund Policy applies even in situations where the student may not have attended a class.
- A registered student wishing to withdraw from school must submit a written withdrawal request to the Registrar. The effective date of withdrawal is the date the request is received by the Registrar.
In counting calendar days, if the latest date for acceptance of a withdrawal falls on a Saturday or Sunday, the following Monday shall be the effective date. If the latest date for acceptance of a withdrawal falls on a legal holiday, the next business date shall be the effective date.
- For notice of withdrawal from the College received prior to the first day of the semester, a refund of 100 percent of total tuition received (excluding fees & tuition deposit) will be granted for both full-time and part-time students.
- For notice of withdrawal from the College received on the first day of the semester and through the 14th calendar day of that semester, a refund of 50% of total tuition, (excluding fees) applicable to the course(s) for which the student registered, will be granted for both full-time and part-time students.
- No refund of tuition will be granted for either full-time or part-time students beyond the 14th calendar day after the first day of classes for that semester.

6. For withdrawal from a course prior to the first day of the semester (including mid-term or second module classes), 100% of the tuition for that course will be refunded.
7. For a reduction in load that occurs on the first day of the semester through the 14th calendar day of that semester, 50% of the difference of the tuition applicable to the original and revised course schedule will be refunded.

Withdrawing from one or more classes after the end of the second week of the semester will not affect a student's enrollment status, tuition cost, or financial aid status for that semester, unless the student officially withdraws from the College or takes an official leave of absence.

Single Course/Workshop Refund Policy

For all single courses and workshops, the College will retain 100% of the tuition once the student has attended class.

Refund Policy for Students Participating in Federal Title IV Student Aid Programs

If a student participates in Federal Title IV Financial Aid, the College will first calculate the Return to Title IV and then apply the Institutional Refund Policy. For those students not participating in Federal Title IV Financial Aid, only the Institutional Refund Policy will apply. Federal Title IV funds include Federal Pell Grants, Federal College Work-Study, Perkins Loans, Supplemental Educational Opportunity Grants, and Direct PLUS Loans. A student's Title IV monies are adjusted when the student drops a course or earns an NS (no show) grade.

Return of Title IV Funds: The school must return any unearned portion of monies received under any of the Title IV programs. This calculation is based on the parameters set forth in section 668.22(e)(1) of the Higher Education Act of 1965, as amended. This is a proportional calculation based upon the student's date of withdrawal. Students will be notified of any balance owed to the college as a result of the refund calculations.

This is a synopsis of the Return to Title IV calculation and not the entire policy. The student may see the entire policy along with work sheets and examples in the Financial Aid Office's Policies and Procedures Manual. Students who withdraw and reenter are subject to all the regulations and policies in effect at the time of reentry.

Academic Regulations

Academic Placement Evaluation

The purpose of placement evaluation is to ensure that the skills of incoming students are uniformly evaluated, that students are placed in courses appropriate to their academic preparation, and that courses and other academic and student support services which allow students to develop to their full potential are made available. Goodwin College uses the ACCUPLACER™ test for placement evaluation. ACCUPLACER™ scores are good for one year from the date they were taken.

Challenge/Retakes - One Time Only

Students may challenge their English or math scores only once for any reason. Students wishing to challenge their English placement may take the WritePlacer. This score will decide the final placement decision. Please note that WritePlacer scores tend to lower a placement, not raise it. A student may challenge math by retaking either the Math or Algebra portion of the test.

If a student retakes a test and scores lower, the highest score can be used in placement.

Test Waivers

Students do not have to take the ACCUPLACER™ if they produce an official college transcript that indicates that they:

- Already completed a transferable English composition and a mathematics course higher than elementary Algebra (e.g., earned a C or better.) OR
- Have at least a four-year degree from an accredited college.

Or if they are a recent high school graduate and can produce:

- A recent, documented SAT Writing or Critical Reading score of 450 or higher.
- Have a recent, documented SAT Math score of 500 or higher.
- A recent (within 3 years) documented ACT composite score of 20.

SAT and ACT scores can be used for three years; after three years a potential student must take the ACCUPLACER™. Certificate programs do not require the use of the ACCUPLACER placement test.

Re-Enrollment and Accuplacer Expiration

Student ACCUPLACER™ scores can be used for one year from the official withdrawal date. After one year, a student must retake the test and be placed according to the current college guidelines.

Please note: Students placing into Foundational English courses will need permission from their advisor to register for any college level course work.

Registration

Incoming students register for classes by visiting with an applicant academic advisor as part of the Admission process.

Returning students officially register for the upcoming semester in week 10 of their current semester. Specific information about each registration period is available on the college website beginning week 4 of each semester, and course offerings are available at www.goodwinsonisweb.com. Students are encouraged to access the Goodwin College website home page for registration details. Students should also check their Goodwin College e-mail for registration reminders.

Before official registration begins, students should :

1. Meet with their program director or an advisor to choose courses
2. Make sure that their FAFSA is current
3. Check for registration holds in SonisWeb
4. Clear up holds

Students who do not register during the official two week registration period will be charged a \$100 late registration fee to register during the late registration period which begins three weeks prior to each semester. Students may revise their registrations during late registration and through the add/drop period. Students who want to add a second module course must register for the course no later than the end of week two of the current semester. Changes made during the add/drop period may result in changes in tuition and/or fees. Students should reference the institutional refund policy for any financial penalties that may occur because of a change in registration during the add/drop period. All changes made to registrations are subject to review by the Financial Aid Office and the Registrar before they are considered final.

Wait List Management Policy

When a student wishes to register in a course that has reached its cap enrollment and cannot be overridden, the student may request to wait list his/her preferred course section in Sonisweb.

Students can wait list up to three courses and must understand that the wait list is a good faith offer to seat students in a fair and equitable manner SHOULD a course open up. The wait list does not guarantee a seat; it is best to register for another section or course in order to ensure that the students will qualify for financial aid.

When a seat becomes available, students will be contacted by the Assistant Registrar via their Goodwin College e-mail. To manage the wait list fairly, students are offered seats in sequential order only. Students will have 24 hours to accept the open seat; if there is no response after the 24 hour time frame has expired, the seat will be offered to the next student on the wait list and the previous name will be removed.

The wait list is available until the first day of the semester class start. At this time, the wait list is turned off until the following semester registration period.

If a student is no longer interested in wait listing a course, he or she should notify the Registrar's Office to request that his or her name be removed from the list.

Double Major and Dual Degree Enrollment

Many of the degree programs at Goodwin offer different options within the discipline that will accommodate the student with complex career objectives. There are instances, however, where a student will choose to matriculate in one major or degree program and also request courses in a second major or degree program.

Double Majors

A double major is (1.) the concurrent matriculation into two programs at the same academic level (e.g. Associate and Associate or Bachelor and Bachelor) or (2.) the graduation from one major and then matriculation into a second major at the same or different academic level where there is less than a full-year of study beyond the first degree to earn the second (a minimum of 30 unique credits).

To pursue a double major, the student must complete a minimum of 15 credits in their original major with a grade-point-average of 2.3 or better before requesting admission into a second major. Enrollment into the second major requires the approval of the Department Chair of that program. The student must complete a "Declaration of Second Major" form which is obtained from the Department Chair or from the Registrar's Office. If the student elects one option within their original program, and subsequently decides to take an additional option within that same program, the above criteria will apply.

In order to earn a double major, students must complete all requirements for both majors as outlined in the catalog. At least 25% of the core coursework in each program must be unique to each major. Selective admissions requirements must be satisfied before the student enrolls into a second major.

Dual Degrees

Concurrent dual degree – matriculation into two degree programs at different academic levels (e.g. Bachelor and Associate).

Separate dual degree – graduation from one degree program and then matriculation into a second degree program at the same (Associate and Associate or Bachelor and Bachelor) or different academic levels where there is at least a full-year of study beyond the first degree to earn the second (a minimum of 30 unique credits).

In instances of concurrent pursuit, the student must complete a minimum of 15 credits in their original degree with a grade-point-average of 2.3 or better before requesting admission into a second degree program. Enrollment into the second degree requires the approval of the Department Chair of that program. The student must complete a "Declaration of Dual Degree" form which is obtained from the Department Chair or from the Registrar's Office.

In order to earn the credential they are striving for (the degrees and/or certificate), students must complete all requirements as outlined in the catalog. Selective admissions requirements must be satisfied before the student enrolls into a second degree.

The exception to this policy is that all students enrolled in the Associate in Science in Medical Assisting are dually enrolled into the Certificate in Medical Assisting.

Minors

Goodwin College offers those students pursuing a bachelor's degree an opportunity to choose a minor program of study to serve as a secondary area of interest that may extend a student's scope of study in a related field or balance their major through study in a completely different field.

Minors are 15 credits. Completion of a minor requires that a student earn a C (2.0) grade or better in each of the required courses for that minor. No more than 9 credits may be used to meet both major/general education/concentration and minor course requirements. Students can substitute up to six credits with permission of the Department Chair or Program Director. A maximum of 6 transfer credits may be applied toward the minor. At this time a student may not earn more than one minor.

Refer to the appropriate Academic Department page for specific minor curriculum requirements

To be considered for a minor, students entering their last semester must apply for a minor through the Registrar's Office when submitting their application for award of credential. After completion of requirements the minor will be recorded on the student's final transcript.

Foundational Courses

Course numbers beginning with a "0" are considered foundational courses and count as institutional credit only. Grades received for foundational courses are not calculated in the student's cumulative GPA. For purposes

of satisfactory academic progress these courses do not count as credits attempted or as credits earned toward any degree or certificate. Students who are required to take foundational courses must do so within their first 15 credits at the college; they will not be able to enroll in any other academic courses until this requirement is met. Foundational courses may be repeated only once without departmental permission under no circumstance will a student be permitted to attempt a foundational course more than three times. Students enrolled in the Goodwin Achievement Program (GAP) are not allowed to repeat any course.

Foundational courses may be eligible for financial aid; however, students are eligible for financial aid for only a maximum of 30 credits (10 attempted courses) in foundational course work.

Independent Study

Independent Study is an alternative instructional strategy. Students work independently, according to a written agreement and under the supervision of a faculty member. Independent Study offers flexibility to meet individual student needs, interests, and styles of learning.

Students may request an independent study through their department chair. Tuition for these courses is charged at the same rate as all other courses. In each independent study, a contract containing specific course objectives and curriculum requirements of the course will be agreed upon and signed by the instructor and student. Requirements may vary according to specific courses, but all must meet the following:

- Student/instructor meeting once a month
- Final summary report of assigned project
- Final paper and/or examination

The request, contract, and final paper are submitted to the Registrar's Office to become part of the student's permanent file.

Student Teaching/Internship/Externship Requirement

Students enrolled in programs requiring student teaching, or an internship/externship must have a 2.0 cumulative grade point average before attempting to fulfill this requirement. Registrations into these courses are not considered final until the roster has been reviewed and approved by the department chair or program director.

Attendance & Tardiness

Goodwin College believes that regular attendance in, and prompt arrival to, all classes optimizes each student's educational experience. Therefore, students are encouraged to attend every class, to arrive on time, and

to stay for the entire class period. Although the College does not administer a uniform system of attendance, instructors report attendance on Census Day which occurs at the end of the second week of each semester/module. Students who have not participated in their course by Census Day will be withdrawn from the course at the end of the second week, but will remain financially responsible for the course.

Each instructor sets his or her own attendance and tardiness policies. These policies are given to the students on the first day of each class as part of the course syllabus. Students are responsible for familiarizing themselves with each of their instructor's attendance policies. Students are bound by the college's refund policies even if they choose not to attend classes. Students receiving Title IV funds should reference the Financial Aid pages on the the Goodwin College website for any financial consequences related to non-attendance.

Prerequisite Course Waiver and Course Substitution

Under special circumstances, with permission from the appropriate department chair or program director, students may receive a waiver for a prerequisite for a specific course. Students who wish to pursue a prerequisite waiver should contact their department chair or program director.

Course substitutions also require permission of the department chair or program director.

All approvals for prerequisite waivers and course substitutions must be sent to the Registrar's Office.

Credit System

Each course listed in this catalog is described in semester credit hours. A credit is a unit of academic achievement that is awarded upon successful completion of a course and not necessarily an indicator of transferability of credit. A credit hour is defined as: (1.) one hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for one semester hour of credit, or the equivalent amount of work over a different amount of time; or (2.) at least an equivalent amount of work as required in (1.) of this definition for other academic activities as established by the institution.

Goodwin College offers three semesters in a calendar year beginning in January, May, and September. Each semester is 15 weeks in length. Two semesters constitute an academic year for purposes of financial aid. Day and evening courses are usually either 7 1/2 or 15 weeks in length.

Student Classification

A full-time student is one who registers for 12 or more credits per semester. A three-quarter-time student is one who registers for 9 to 11 credits per semester. A half-time student is one who registers for 6-8 credits. Students taking less than 6 credits per semester are considered less than half time and may not be eligible for financial aid. For purposes of designating bachelor degree students by class, Goodwin College uses the following standards:

- < 30 collegiate credits earned=Freshman
- 30-59 collegiate credits earned=Sophomore
- 60-89 collegiate credits earned=Junior
- 90+ collegiate credits earned=Senior

Grading System

Grades are an indication of the standard of academic work performed. Throughout their program of study, students will be continually apprised of their academic progress. Students' grades are provided at the end of each course. Students may view their unofficial transcript by logging into their SonisWeb account. Requests for official transcripts must be made in writing, accompanied by a \$10.00 administrative fee which is submitted to the Accounting Office. Official transcripts are released by the Registrar's Office only after all other offices have issued clearances for the student.

Goodwin College uses the following academic grading system. The chart also describes the impact of each grade on a student's academic progress.

Grade	Quality Points	Explanation	Included in Credits Earned	Included in Credits Attempted
A (93-100)	4.0	Excellent	Yes	Yes
A- (90-92)	3.7	Excellent	Yes	Yes
B+ (87-89)	3.3	Good	Yes	Yes
B (83-86)	3.0	Good	Yes	Yes
B- (80-82)	2.7	Good	Yes	Yes
C+ (77-79)	2.3	Satisfactory	Yes	Yes
C (73-76)	2.0	Satisfactory	Yes	Yes
C- (70-72)	1.7	Below Average	Yes	Yes
D+ (67-69)	1.3	Poor	Yes	Yes
D (63-66)	1.0	Poor	Yes	Yes
D- (60-62)	0.7	Poor	Yes	Yes
F (below 60)	0.0	Fail	No	Yes

Grades followed by an "R" on transcripts indicate that the course has been repeated.

Grades not used in the calculation of Grade Point Average:

Grade	Quality Points	Explanation	Included in Credits Earned	Included in Credits Attempted
P	N/A	Pass	Yes	Yes

TR	N/A	Transfer Credit	Yes	Yes
DP	N/A	Dropped Course	No	No
NS	N/A	No Start	No	No
UG	N/A	Ungraded	No	Yes
CBE	N/A	Credit by Examination	Yes	Yes
AU	N/A	Audit	No	No
W	N/A	Withdrawn	No	Yes
INC	N/A	Incomplete	No	Yes
EC	N/A	Credit Awarded for Experiential Learning	Yes	Yes
EXT	N/A	Continuing Education Credit	No	No
AP	N/A	Advance Placement	Yes	Yes

Grade points are calculated by multiplying the number of quality points of each grade total by the total number of assigned credits for that course. The GPA is obtained by dividing the total number of grade points earned by the total number of credits attempted.

A student's transcript identifies two different Grade Point Averages (GPA). The first is the Semester GPA, which is based on the courses taken only for that semester. The second is a Cumulative GPA (CGPA) that consists of all the courses a student has taken at the College and the grades received for those courses unless grades fall under the GPA Forgiveness Policy listed below. See Course Repeats for further information.

Course Repeats

Repeating courses can have an adverse impact on satisfactory academic progress (SAP). In addition to the standards set for minimum credits earned and grade point average in the evaluation of SAP, repeated courses will be counted as credit hours attempted when calculating the quantitative component.

Students are required to repeat any course in which they have received an "F", a "UG", or a "W" if that course is required in the student's program, or if they have not earned a grade that meets program or major grade requirements. They may repeat a course only once without permission. Only with the permission of the Department Chair or Program Director may students take a course for a third time. Students may also choose to repeat a course to qualify for graduation status (2.0) or generally to improve their CGPA. **Students receiving Financial Aid should check with that office regarding re-takes of courses in which they have already earned a satisfactory grade. A student is not eligible to receive financial aid for repeating a course for the third time in order to achieve a better grade. The credits associated with the third repeat are not used in determining the student's enrollment status for purposes of financial aid. In all cases, a student can only receive Title IV funds for one repeat of a previously passed course.**

In all cases, every course taken counts as credits attempted when calculating the quantitative component the maximum time frame for program completion. When a course is repeated, the new grade will be used in place of the original grade for the purposes of calculating the CGPA. The old grade will remain on the transcript and will be followed by an "R" to indicate that the course was repeated. "R" grades do not affect the CGPA. Under no circumstances will students be permitted to take a course four times.

Adding a Course

Students who wish to add a 15 week or first module course must do so by the end of the first week of the semester. Students who want to add a second module course, must do so by the end of the second week of the semester. No courses will be added to a student's schedule after the second week of the semester. Prior to the beginning of the semester, students may add courses by accessing their Registration on SonisWeb and registering for the course(s) that they wish to add. Once the semester begins, students must add courses by visiting their Departmental Advisor to complete an add form. All adds must be signed by the student and sent to the Registrar's Office for processing. Add forms are then sent to the offices of Financial Aid and Accounting. Students are notified by those offices if the add changes their enrollment status, and an additional visit to Financial Aid and/or Accounting may be required. Students may print their new schedules on SonisWeb.

Dropping a Course

Prior to the beginning of the semester, students may delete courses from their registration by accessing their registration page on SonisWeb and deleting the course(s) they are no longer interested in taking. When students delete courses prior to the first day of the semester, no tuition charges are assessed for the deleted course(s). On or after the first day of the semester, and until the end of the second week of the semester, students must drop courses by visiting their Departmental Advisor and completing a drop form. All drops must be signed by the student and sent to the Registrar's Office for processing. Dropped courses will not appear on the student's transcript nor will count as credit hours attempted. These courses will be charged at the rate of 50% tuition if the drop is initiated between the first day of classes and the last day of the drop period as published in this catalog. This policy applies even if the student has not attended a class.

It is important for students to understand that the **drop period is the first two weeks ONLY** of each semester. There is no other drop period during the semester. Students must drop second module courses within this drop period to qualify for the 50% tuition refund.

All deadlines are published in the college catalog and are also available on the Current Students page of the

college website. Deadlines will be strictly enforced. A student's enrollment status for the semester will be determined on the first day of the third week of the semester and shall be considered final for that semester unless the student withdraws from school or is granted a leave of absence.

Students should check with the Financial Aid Office to determine what financial penalty will be assessed as a result of dropping a course.

Withdrawing From a Course

Students may withdraw from a course beginning week 3 through the end of week 13 of a 15-week course and through the end of 5 1/2 weeks of a 7 1/2-week course. Students enrolled in a second module course may withdraw once the course has begun.

To withdraw from a course, the student must complete a Course Withdrawal Form with their Departmental Advisor. The signed withdrawal form will be sent to the Registrar's Office for processing and a copy will be forwarded to the Financial Aid Office. A "W" will be assigned to the course and will appear on the transcript. The "W" will not be used in the calculation of the GPA, but will count as credits attempted. Students who withdraw from a course will be charged 100% tuition. Excessive withdrawals can impact satisfactory academic progress and jeopardize financial aid eligibility, so students are strongly encouraged to get both academic and financial aid advice before withdrawing from courses.

Course withdrawal deadlines are published in the college catalog and are available on the website on the Current Students page. Deadlines will be strictly enforced. Withdrawals are not permitted beyond the deadline. After the deadline, students will receive an earned grade as determined by the instructor.

Failure to attend class is not an appropriate method of either dropping or withdrawing from a course. Non-attendance does not cancel the financial obligation to pay fees and tuition incurred at the time of registration for classes. Students will remain liable for any outstanding payments of tuition and fees due the college.

For financial consequences of withdrawing from a course after the start of a semester, refer to the institutional refund policy. Students should check with the Financial Aid Office to determine what financial penalty will be assessed as a result of withdrawing from a course.

Course Incompletes

An Incomplete is a temporary grade assigned by the faculty member. Course Incompletes are counted as credit hours attempted but not earned. Generally, if a student receives an "Incomplete," (s)he has two (2) weeks from the end of the course to complete all course requirements in order to receive a grade for that course. If requirements are not met, the incomplete will be converted to an "F". Academic standing will be

recalculated after the "INC" is replaced with a grade. In both cases the final grade will then be included in calculating the student's GPA and count as credits attempted. In cases where the Incomplete has been issued for a pre-requisite course, the student may not be allowed to move on to the higher level course if the Incomplete has not been replaced with a satisfactory grade.

Appeal of Grades

Grades are part of the student's permanent record. In rare instances, there can be situations in which course grades may need to be changed. These include computational errors, clerical errors, or the discovery of overlooked components in a student's body of work. Students are able to view their final grades on SonisWeb and are responsible for checking their grades at the end of each semester. Students must appeal a final grade within one semester of the grade's issue date.

A student who believes that an error in grading has occurred may request a review by the instructor of record until the end of the semester following the one in which the grade in question was earned. Students may appeal a grade by submitting a completed Grade Review Request available in the Registrar's Office. If the instructor believes the change is justified, the instructor will initiate the grade change, and the student will be notified. If the instructor does not agree with the grade change, the student may appeal the decision to the Department Chair within 15 days of the instructor's decision. If this process results in agreement that the grade should be changed, the instructor will initiate the grade change and notify the student. If the agreement is that a grade change is not justified, the Department Chair will notify the student in writing with a copy to the instructor. All grade changes must be reported to the Registrar's Office. If the problem is still not resolved, the student may appeal the grade to the Academic Review Committee, the final arbitrator of all grievances.

Program Transfers or Program Option Transfers

Students wishing to change majors or options within a degree program must file a written request with the Registrar's Office.

Students wishing to transfer to programs with selective admission requirements should meet with the appropriate Department Chair/Program Director and complete the application process. Please refer to Selective Admission requirements.

Students are allowed only three program transfers during any one enrollment period. Students who change academic majors are advised that their courses and semester credit hours will be reviewed for applicability to the new major. **Only courses applicable to the new major and completed with a grade of "D or better" will be eligible for**

transfer into the new major. The cumulative grade point average and rate of completion will be recalculated for purposes of determining Satisfactory Academic Progress (SAP) requirements for the new major.

Withdrawing From the College

Conditions may arise requiring the student to withdraw from the College. A student who wishes to withdraw from the college should:

1. Obtain the necessary withdrawal forms from the Registrar's Office;
2. Complete an exit interview in the Registrar's Office and complete all appropriate forms;
3. Meet with a Financial Aid Officer to determine all financial obligations;
4. Meet with an Accounting Officer; and
5. Return the completed forms to the Registrar.

The official withdrawal date is the date the student officially initiates the withdrawal process.

Official notification to the college of a student's intent to withdraw must be made to the Registrar. Notification of intent to any other school official is not recognized as an official notification of intent to withdraw.

If applicable, a revised tuition charge or refund will be calculated by the Accounting Office. If a student who withdraws has received financial aid, he/she may be subject to the loss of some, or all, of the financial aid award. This may also result in the student having personal responsibility for repayment of financial assistance. Please refer to the College's Refund Policy.

Withdrawn students must reapply to the College. Re-admitted students must complete the academic requirements in effect in the catalog under which they are returning.

Leave of Absence

At Goodwin College, there are two types of leaves of absence that students may request. Both represent a temporary interruption in a student's program of study.

An Official Leave under the Family and Medical Leave Act (FMLA) can only be granted by the Registrar's Office and are subject to strict conditions for approval. Student requests must be in writing and need to be supported with documentation. An Official Leave can only be granted for the following reasons:

1. Serious health condition of student;
2. Jury duty;
3. Birth of a child;
4. Placement of a child with student for adoption or foster care;
5. Need to care for an immediate family member due to serious health condition or day care issue.

By federal regulations, official leaves of absence cannot exceed 180 days in a twelve-month period. All requests for an Official Leave must be submitted to the Registrar's Office by the end of the thirteenth week of the semester. Official leaves that have been approved by the Registrar's Office must also be signed by a Financial Aid Officer. The entire Leave of Absence Policy, including all conditions for approval, may be obtained from the Registrar's Office. Students who fail to return from an Official Leave will be placed on unofficial leave by the Registrar's Office as of the date the LOA began. The Official Leave then becomes null and void and students will resume responsibility for any tuition charges incurred during the official leave period following a return to Title IV calculation. In rare cases, students may be eligible for an extension as long as the extension does not create an absence of more than 180 days. Students who wish to apply for an extension should contact the Registrar's Office.

Students who are being deployed for military duty should contact the Registrar's Office to withdraw from the college. Tuition rates and other college fees will be frozen at the time of withdrawal. Students will return under the catalog that was in effect when they first enrolled in the college.

Students may be granted an unofficial leave of absence if they do not meet the conditions for an official leave of absence as outlined above. Paperwork for unofficial leaves is available in the Registrar's Office. Students may not request an unofficial leave after the two week drop period at the beginning of each semester. Students who are granted unofficial leaves of absence will be refunded 50% tuition if they have an active registration in the student database at the time of the request. Unofficial leaves may be up to two semesters long. Students who do not register for three consecutive semesters will be administratively withdrawn from the college by the Registrar's Office and will need to apply for readmission if they wish to return. Please note: students requesting an unofficial leave of absence should see the Financial Aid Office to review any possible changes to their financial aid status.

Course and Program Changes

Goodwin College reserves the right to change curricula, schedules, prerequisites and requirements for all courses and programs in order to enhance the employability of the student, provided this change does not affect the overall purpose of the program. Students will be subject to the requirements listed in the catalog in effect when they enrolled. Goodwin College reserves the right to add or cancel classes at any time due to an increase or decrease in enrollment.

Graduation and Degree Conferral

The Board of Trustees of Goodwin College is authorized to confer Bachelor in Science and Associate in Science degrees and award Collegiate Certificates to qualified

candidates who have met all requirements. Students nearing the completion of their program must complete an Application for Award of Credential for each credential they believe they are qualified to receive prior to their last semester of study. The Application for Award of Credential is available on the college website only and must be electronically submitted to the student's Department Chair or Program Director and to the Registrar for the purposes of a final degree audit. Candidates' transcripts will be evaluated under the catalog in effect at the time of admission. If the candidate changed programs, the catalog used shall be the one in effect at the time of the program change. Candidates who have not met all of the requirements for graduation will be notified by the Registrar's Office.

For purposes of clarity, the term "graduation" refers to program completion. Students are assigned a graduation date based upon the semester in which program requirements were completed. The term "conferral" refers to the actual bestowal of the degree which happens twice a year, once on the date of our Commencement Ceremony and once at the end of the Summer Semester.

Goodwin College's Milestone policy allows students to receive credentials and participate in commencement as those credentials are earned. Students who are enrolled in a Bachelor's program who believe they have met requirements for a collegiate certificate or an Associates Degree are encouraged to apply for the award of that credential. Students enrolled in Associate Degree programs who believe they have met the requirements for a certificate may also apply.

Because the College confers degrees at Commencement once a year, students who anticipate completing their program at the end of the summer semester following commencement are invited to walk in the ceremony. Walkers must have their last nine or fewer credits in progress to be included in the ceremonies, and are not eligible to receive any academic honors at Commencement. Degrees and academic honors are conferred to August graduates at the end of the summer semester.

General Graduation Requirements

1. Official enrollment in a certificate or degree program;
2. Completion of the minimum number of semester credit hours for the degree or certificate program with an academic average of at least 2.0 within the maximum time frame;
3. At least 25 percent of the graduation credit requirements must be granted by Goodwin College;
4. The last 12 credits posted to the transcript must have been granted by Goodwin College;
5. Satisfactory completion of all courses required in the student's program;
6. Fulfillment of all financial obligations to the College;

7. Electronic submission of an Application for Award of Credential to program director and Registrar; and
8. Completion of all specific program requirements for graduation.

Additional requirements for Bachelor of Science degrees:

1. A minimum of 15 credits in the major core must be completed at Goodwin College;
2. Completion of a minimum of 45 credits at the 200 level or above;
3. Completion of a minimum of 30 credits at the 300 level or above;
4. Completion of 20 hours of documented community service and required submissions.

Students with a CGPA less than 2.0 in required courses or in attendance for more than the Maximum Time Frame will not be considered as graduates and will only receive a certificate of completion.

Information Literacy Requirement

All students are required to complete an Information Literacy tutorial before the end of their first semester. This requirement can be fulfilled either through enrollment in ASD 120 - The College Experience, or as a separate tutorial - ASD 110, given through the Goodwin College Library.

Computer Literacy Requirement

Students at Goodwin College, and later as employees, will be called upon to demonstrate competency with an increasing variety of computers and computer software. Because computers and their applications are so diverse and change so rapidly, no one is completely computer literate. However, the term "computer literacy" usually refers to basic skills of use to the students and graduates, no matter what their field of study. Goodwin College is committed to providing its students with these basic computer competency skills. Therefore, all students at Goodwin College must demonstrate basic computer competency prior to graduation.

Students may fulfill this requirement in one of two ways:

1. Successfully complete with a "C-" or better, either CAP 110 Computer Applications or CAP 230 Database Applications.
2. Demonstrate existing computer competencies through a skills certification Credit by Examination (CBE) test provided by the Department offering the approved course. Students fulfilling the requirement by exam will earn credit for CAP 110.

Regardless of the means used to satisfy the computer literacy requirement, all students must demonstrate:

1. Basic familiarity with computer hardware, operating systems, and file concepts;
2. Working knowledge of Microsoft Word, Microsoft Powerpoint and Microsoft Excel; and

3. Working knowledge of the Internet, social media and electronic mail.

Students are encouraged to complete the computer literacy requirement early, preferably in the first semester.

Community Service Requirement

Goodwin College Bachelor of Science degree students and Associate in Science in General Studies students are required to perform 20 hours of community service through our Community Service and Explorations initiative (CSE) before graduation. The mission of the community service requirement is to create lifelong learners who develop civic responsibility. Students are given the opportunity to become part of a larger community beyond the college, to experience the personal fulfillment of service, to develop leadership skills and self-esteem, to experience the benefit to others of service and hard work, and to develop creative contributions in their future communities. At the close of the 20 hours of service, each student is required to submit a five-page paper describing the service experience, how it affected both themselves and the community. Community service hours must be completed no later than two months prior to expected graduation date.

Student's Right to Know

Section 485 (a) of the Higher Education Act requires colleges that participate in any of the Title IV financial assistance programs to disclose information about completion rates to current and prospective students. Goodwin College's four-year average Student-Right-To-Know Graduation Rate is 42%.

Notification of Rights Under the Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) is a Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

FERPA provides these rights:

1. Parents have the right to inspect and review the student's education records within 45 days of the day Goodwin College receives a request for access. These rights transfer to the student when he or she reaches the age of 18.
2. Parents and students have the right to request that a school correct records which they believe to be inaccurate. They should write to the Vice President for Academic Affairs, identify the part of the record they want changed, and specify why it is misleading.

If Goodwin College decides not to amend the record as requested by the student, the school will notify the student of the decision and advise the student of his/her right to a hearing regarding the request for amendment.

Generally, schools must have written permission from the parent or the eligible student in order to release any information from a student's education record. However, FERPA allows schools to disclose records, without consent, to school officials with legitimate educational interest. A school official is a person employed by the school in an administrative, supervisory, academic, or support staff position; a person or company with whom the school has contracted (such as an attorney, auditor, or collection agency); or a student serving in an official capacity, or assisting another school official in performing his/her tasks.

In addition, schools may disclose without consent, "directory" information such as a student's name, address, telephone number, date and place of birth, honors and awards, and dates of attendance. Students age eighteen and older may request to restrict the release of directory information by filing a "Request to Restrict" form in the Registrar's Office. Students age 18 and older who wish to have information shared with parents, legal guardians, and/or significant others must file a "Permission to Release" form in the Registrar's Office. Goodwin College notifies parents and students annually of their rights under FERPA.

Parents and students have the right to file a complaint with the U.S. Department of Education concerning alleged failures by Goodwin College to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Ave., SW
Washington, DC 20202-4605
(202) 260-3887

aggrieved, students may request to appear in person at an ARC meeting.

Suggestions and Grievances

When questions or concerns arise which must be discussed and resolved, it is important to know the person with whom to speak and the procedure for obtaining resolution of issues.

Goodwin College treats its programs as a form of on-the-job training for its students. For that reason, any complaint or suggestion regarding a class should be discussed first with the instructor. If a student is unable to satisfactorily address the problem, (s)he should make an appointment with the appropriate Department Chair or Program Director. After that, appeals may be made, in writing, to the Academic Review Committee (ARC). All appeals should be sent to Ann Clark, Executive Vice President/Provost and Chair of the ARC. Decisions will be rendered in writing within two (2) weeks. If still

General Policies

The Board of Trustees and the administration of Goodwin College are committed to provide educational opportunities to all who seek and can benefit from them. They recognize that an important part of providing opportunity is creating a welcoming environment in which all people are able to work and study together, regardless of their differences.

Goodwin College recognizes that it has an obligation to provide programs which promote pluralism and diversity and encourage the college community to respect and appreciate the value and dignity of every person and his/her right to an atmosphere not only free of harassment, hostility, and violence, but supportive of individual academic, personal, social, and professional growth.

Acts of racism or harassment directed against individuals or specific groups of individuals will not be tolerated and will be dealt with according to employee and student grievance and disciplinary procedures.

Academic Integrity

At Goodwin College, we value integrity as an essential component in our interactions with each other. We believe that the purpose of a college education is for students to learn to think critically and to express their own opinions using their own ideas. The concept of academic integrity in all intellectual pursuits is a value that is fundamental to academic life and scholarly practice. Students at Goodwin College are obligated to uphold high standards of academic integrity in their scholarship and learning. It is expected that students take personal responsibility for their work and acknowledge the ideas of others. Academic integrity means doing one's own work and giving proper credit to others whose ideas and work a student is utilizing. It is the responsibility of each student to become familiar with what constitutes academic dishonesty and plagiarism and to avoid all forms of cheating and plagiarism.

Goodwin College defines academic dishonesty as including, but not limited to, (a) plagiarism: presenting, as one's own, the ideas or words of another person or persons for academic evaluation without proper acknowledgement and (b) cheating: providing or receiving assistance in a manner not authorized by the instructor in the creation of work to be submitted for academic evaluation including papers, projects, and examinations.

The entire Policy on Academic Integrity is available through the office of the Vice President for Academic Affairs and on the college website.

Nondiscrimination Policy

Goodwin College is an affirmative action/equal opportunity educator and employer, fully committed to the goal of providing equal opportunity and full participation in its educational programs, activities, and employment without discrimination because of race, color, religious creed, sex, age, national origin, political affiliation, marital status, veteran status, sexual orientation, disability, or any other consideration not directly and substantively related to effective performance. This policy implements Federal and State laws, regulations, and executive orders.

To file a discrimination complaint, or for inquiries concerning Goodwin College's Nondiscrimination Policy, Title IX and the Rehabilitation Act of 1973, and the Americans with Disabilities Act, contact Ann Clark, Executive Vice President and Provost, (860) 528-4111.

Intolerance Policy

The staff, faculty, student body, and administration of Goodwin College form a multicultural community of individuals from diverse race, ethnic, and class backgrounds, national origins, religious and political beliefs, physical abilities, and sexual orientations. The College maintains that activities, programs, and everyday interactions are enriched by acceptance of one another in an environment of positive engagement and mutual respect.

AIDS and Other Communicable Diseases Policy

Any person who has been identified as having HIV or AIDS is treated in the same manner as any other student or employee. Goodwin College does not recognize HIV, AIDS or other communicable disease status as a criterion for denial of admission or employment.

Drug and Alcohol Policy

Goodwin College is dedicated to providing quality educational services to its students and a quality work environment for its employees. In keeping with this commitment, Goodwin College maintains a campus free from drug and alcohol abuse. The manufacture, possession, distribution or use of illegal drugs or alcohol is prohibited on campus. Any violation of this policy will warrant disciplinary actions up to and including dismissal and may result in local, state, and/or federal criminal charges.

The Drug Free Schools and Communities Act Amendment of 1989 (Public Law 101-226) requires that all

institutions of higher education implement a program that prevents the use of illicit drugs and the abuse of alcohol by students and employees. Goodwin College's program is as follows:

- A. **Standards of Conduct:** all students, faculty and staff are prohibited from the unlawful possession, manufacture, use or distribution of illicit drugs and alcohol on Goodwin College's campus and parking lots, or as part of any of the school's activities.
- B. **Legal Sanctions:** all drugs are controlled by Federal Law. (Most drug offenses are prosecuted under state law, which may be more severe.)
1. Unlawful possession of all controlled drugs: First offense: Up to one-year imprisonment and/or fines up to \$5,000. Second offense: Twice the imprisonment and fines for first offense.
 2. Unlawful distribution or possession with intent to distribute:
 - a. Narcotics (i.e. cocaine and the opiates). First offense: Up to 15 years imprisonment and/or fines up to \$25,000, plus three-year mandatory special parole. Second offense: Up to twice that of first offense.
 - b. Amphetamines, barbiturates, hallucinogens (including marijuana). First offense: Up to five years imprisonment and/or fines up to \$15,000 plus two-year mandatory special parole. Second offense: Up to twice that of first offense.
 3. Unlawful distribution of all controlled drugs by someone over 18 to someone under 21. First offense: Up to twice the fine and imprisonment otherwise authorized. Second offense: Up to three times the fine and imprisonment otherwise authorized.
- C. **Health Risks:** Materials describing the health risks associated with the use of illicit drugs and the abuse of alcohol are kept in the library in separate special files marked Drugs/Alcohol/AIDS Information.
- D. **Counseling:** Students, faculty or staff members seeking drug or alcohol counseling, treatment or rehabilitation should speak to the Dean of Students who will refer them to the proper agency. Each state has a single agency for the various drug abuse prevention, treatment and rehabilitation programs. In Connecticut, this is the Connecticut Alcohol and Drug Council, Department of Mental Health and Addicted Services, 460 Capitol Avenue, Hartford, CT 06115.
- E. **Violation of the Standards of Conduct:** Students and employees found using, possessing, manufacturing or distributing illicit drugs and/or alcohol will be given a written warning for a first offense. If a student or employee further abuses the standards of conduct, he/she can be terminated from Goodwin College for one year or permanently depending on that person's desire to obtain rehabilitation, etc.

Any questions concerning the legal sanctions under state law for unlawful use or distribution of illegal drugs or alcohol should be directed to the U.S. Attorney's Office, 450 Main Street, Hartford, CT, 860-947-1101.

If a student is convicted locally or within the state for the use, possession, manufacture, or distribution of illicit drugs or alcohol, he/she will be terminated from Goodwin College and will be held liable for his/her financial obligations to the school.

If an employee is found guilty by a local or state enforcement agency, employment will be terminated until such time the employee has completed the penalties and has indicated his/her commitment to be rehabilitated.

Persons with Disabilities Policy

Goodwin College is committed to the goal of achieving equal educational opportunity for individuals with disabilities and actively seeks to develop and maintain reasonable accommodations for all students. Persons with disabilities are encouraged to apply for admission. With appropriate documentation, students may request reasonable accommodations through the Student Services Center.

Goodwin College is accessible to people with disabilities. Accessible parking is located in the front of the school in designated areas. A ramp is located at the entrance of the college. All campus buildings have been built to handicapped specifications.

Sexual Harassment Policy

Students and employees have the right to study and work in an environment free of sexual harassment. Title VII of the 1964 Civil Rights Act, as amended, makes sexual harassment unlawful and further states that the employer is responsible for enforcing the law. Section 31-126 of the Connecticut State General Statutes characterizes sexual harassment as an unlawful labor practice.

Sexual harassment is defined as "any unwelcome sexual advances or requests for sexual favors or any conduct of a sexual nature." This includes verbal or nonverbal sexual innuendos, suggestive comments, threats, insults, jokes about specific traits, sexual propositions, suggestive or insulting noises, obscene gestures, physical body contact, or coercing of any sexual activity.

Complaints of sexual harassment should be directed to Ann Clark, Executive Vice President and Provost, (860) 528-4111.

Weapons Policy

Any weapon, or anything that is determined to be a weapon by the Vice President for Academic Affairs or the Vice President for Physical Facilities and Information Technology, is not allowed anywhere on campus. Any such weapon will be confiscated and the violator will be subject to reprimand, probation, suspension, or dismissal.

Department of General Education

General Education Mission Statement

The goal of general education at Goodwin College is to create competent, productive problem solvers who appreciate the diversity of our society, maintain inquiring minds, and embrace life-long learning. Cutting across all our programs and classes are writing requirements. These include research papers through which students become skilled, perceptive, analytical readers, and proficient writers adept at doing research and using inductive as well as deductive reasoning. Beyond the oral communications course required for degree students, all courses include goals to develop effective oral communicators and logical critical thinkers. Participation requirements include discussions, teamwork and communication experiences through which students gain respect for each other.

In courses in mathematics and the natural sciences, as well as in technical courses in certificate and professional degree programs, students are encouraged to develop inquiring minds by gaining facility in handling and appreciating basic principles and processes, logical thinking, and use of the scientific method. General education courses such as history, psychology or sociology, as well as courses in medical law and ethics and clinical procedures, as required in professional degree programs, prepare students to understand the relevance of the humanities and social sciences to contemporary local and world conditions. All courses at Goodwin College aim to encourage students to be dedicated to life-long learning and committed to making positive contributions to society by exploring their own talents, experiencing personal growth, and increasing their ability to be of value to their community.

Learning Perspectives

In fulfilling the mission of the college, students in the degree programs take general education courses within five major learning perspectives: Communications Systems; Cultural; Analytical; Social Sciences and Global. These perspectives represent areas of learning which develop students' knowledge considered essential for the well-educated person.

Communications Systems Perspective

Communications courses require extensive student preparation and practice in building the skills needed for written, oral or technological modes of communication and provide built-in application opportunities for students to demonstrate communication competency. These courses provide student experiences, materials and assignments relating to listening skills and to gaining proficiency in using various models of self-expression and rhetoric. Standards in grammatical English, clarity and appropriateness of style are maintained. Technological

communication courses focus on developing proficiency in computer skills needed for functioning in today's academic, business and social arenas, and on keeping current on the latest developments in the electronics communication fields. Additionally, all baccalaureate students are required to complete one course designated as a research course.

Analytical Perspective

To develop methods of critical thinking, including the scientific method, inductive and deductive reasoning, comparative analyses, and the application of statistical techniques, science and mathematics courses are required in this perspective. Mathematical processes and general paradigms of logical thinking focus on developing ability to analyze and synthesize data, use quantitative methods to solve problems and draw inferences, recognize sources of errors, prejudices or stereotypes and apply evidence for valid argumentation. Analytical Perspective courses provide opportunity to question, hypothesize, collect data, plan solution strategies, experiment, analyze and draw conclusions.

Social Sciences Perspective

Social Sciences courses include studies in sociology, psychology, anthropology or multiculturalism. These focus on active participation in class discussions regarding social, cultural and cross-cultural norms and sanctions. Courses provide activities such as attending films, lectures or dramatic presentations of social and/or cultural issues to help understand and analyze the importance of human behavior and cultural forces on society.

Emphasis is on analysis of social, political, economic, cultural and cross-cultural factors and their impact upon the individual and society. The impact of these forces as they affect human behavior and mental processes are examined in this perspective.

Cultural Perspective

Cultural Perspective courses encompass the study of philosophy, humanities, fine arts, languages or literature. Students read and analyze academic, philosophical, and literary texts from classical and modern sources. Discussions center on philosophical inquiry into morals and ethics, religion, life choices, the fine arts and the performing arts, as well as the influence of politics and society on human values. Upon completing a cultural perspective course, students will understand the underlying values of a culture, recognize differences in relationships among cultures, and respect various cultural perspectives.

Global Perspective

Global Perspective courses in history, politics, or economics examine historical events and social, cultural,

and political forces that shape societies and individuals. These courses strongly emphasize cause-and-effect relationships of the past and present in national and world politics and economics. Factual information to provide a chronology of significant persons, events, and trends in the periods is covered in these courses. Attention is given to examination of the individual's relationship to history and politics.

Courses engage students in active participation in class discussions and simulations; courses emphasize observation of political and economic trends, provide out-of-classroom course-pertinent activities such as working for a candidate, attending town council meetings, writing appropriate letters to the editor of local newspapers, or visiting museums to observe objects relevant to a historical or political period. Focus of written essays is based on assigned readings in which students demonstrate knowledge, awareness of others' opinions, critical thinking, and logical presentations of their reflections.

General Education Requirements for Bachelor Degrees

All students enrolled in bachelor degree programs must complete a minimum of 46 credits in general education. 40 credits in the general education college core and 6 credits in programmatic general education courses.

General Education Core Requirements - 40 Credits

Communications Systems Perspective "CS" - 15 Credits

ENG 101	English Composition	3
	Writing elective (comp)	3
	Oral Communications (comm)	3
	Computer Literacy (cl)	3
	Advanced Writing elective (aw)	3

The code (comp, comm, cl, aw) found at the end of the course description identifies courses that fulfill the requirement.

Analytical Perspective "A" - 7 credits

	Math elective	3
	Physical or Natural Science elective	4

Social Science Perspective "S" - 6 credits

PSY 112	Introduction to Psychology	3
	Elective	3

Cultural Perspective "C" - 6 credits

	Literature, Humanities, Fine Arts or Language	3
	(Spanish or Sign Language) elective	
	Ethics / Philosophy elective	3

Global Perspective "G" - 6 credits

	United States focus elective	3
	World focus elective	3

General Education Requirements for Associate Degrees

Students in the associate degree programs must complete at least 24 credits in the following general education perspectives:

Communications Systems Perspective "CS" - 12 credits

ENG 101	English Composition	3
	Writing elective (comp)	3
	Oral Communications (comm)	3
	Computer Literacy (cl)	3

The code (comp, comm, cl, aw) found at the end of the course description identifies courses that fulfill the requirement.

Analytical Perspective "A" - 6 - 7 credits

	Math elective (Math 125 or higher)	3
	Physical or Natural Science elective	3-4

Social Science Perspective "S" - 3 credits

	Elective	3
--	----------	---

Cultural Perspective "C" - 3 credits

	Elective	3
--	----------	---

Competencies

In addition to perspectives, students enrolled in bachelor degree programs are required to take courses to fulfill the following competencies. These are skills which the institution considers necessary to deal effectively with academic and intellectual endeavors:

Multiculturalism – mc

A course to provide students with opportunities to gain a better understanding of their own culture while forming or increasing awareness and sensitivity to other cultures. Through a variety of delivery strategies and effective communication strategies, the multicultural course demonstrates the contribution of each studied culture from a societal standpoint and concentrates on the similarities of each culture while respecting and embracing differences.

Focus is on developing student skills to recognize and shape, if necessary, a preconditioned attitude or pattern of behavior into new actions and responses that encourage cooperation and harmony in professional, sociological, clinical, national, and global spheres.

Advanced Writing – aw

Advanced writing courses build on the general college-level rhetorical reading and writing strategies students have learned in earlier courses (i.e., persuasion, logic, research methods, diction, language usage, sentence combining, and editing). Advanced writing courses should prepare students to do advanced level critical analysis and writing.

Advanced writing courses must involve writing assignments that (a) demand analysis, synthesis, and application of the subject matter of the course; (b)

require substantial original composition (i.e., essays students have written to meet the requirements of one course, and essays that total at least 20 to 30 pages over the course of a semester); (c) involve multiple drafts of writing assignments throughout the course of the semester; and (d) count for at least 40% of the course grade.

Ethics/Philosophy – e/p

A course to provide students with the substantial opportunity to examine the bases for ethical conduct, ethical standards in the real world of daily human dealings, and the relationship of ethics and morals; to weigh a variety of philosophical answers to questions such as the purpose of human existence, freedom versus determinism, and the nature of aesthetics; and finally to develop logical and critical thinking skills in analyzing and evaluating arguments in ethics and philosophy.

Research - r

Research designated courses introduce students to research methods that are specific to particular disciplines. In research designated courses, students will learn to (a) understand discipline-specific methods for conducting research; (b) examine trends and patterns in the use of various research methods within a discipline; (c) analyze and evaluate important discipline-specific research terms, concepts, and techniques; and (d) articulate informed opinions about the value of research in a specific discipline.

Associate in Science in General Studies

The Associate in Science in General Studies (ASGS) provides students the opportunity to gain broad, as well as deep academic knowledge and the competencies expected of an educated person. This degree is available both on-ground and on-line.

With Goodwin College's strong departments in psychology, English, sciences, and humanities, the General Studies student can experience a strong, in-depth, academic education and develop the skills essential in today's educated individual: ability to communicate effectively, think critically, interact in a multicultural environment, and be adept in reading comprehension, reasoning and research. General Studies students can select electives from existing programs of study such as health sciences, early childhood education, homeland security, business and human services. Students at the completion of their programs will be able to enter professional, academic or career paths with confidence in their knowledge and ability to pursue their personal goals.

In keeping with our Mission and core values, students in the General Studies program will experience an intimate environment, small classes, personal attention and interaction with faculty. The ASGS program will provide a secure atmosphere where students can develop their interests and feel confident of academic progress and

increased readiness for the next step – a four year degree, a career path or a vocational path.

This program will provide graduates with the skills needed for entry-level positions in today's business, industry, and health-related fields which seek self-motivated individuals with excellent oral and written communication skills, critical thinking skills and analytical skills.

Because of the great flexibility in course selection, students are advised to work closely with their academic advisor to assure that all the requirements of the curriculum are met.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Express themselves clearly in written, oral and electronic modes of communication using Standard English; read and comprehend information; organize ideas and demonstrate competency in research modes including use of information technology.
2. Understand mathematical and scientific principles; apply the scientific method of inquiry in problem solving; demonstrate logical inductive and deductive thinking, as well as qualitative and quantitative reasoning.
3. Analyze and synthesize ideas; apply critical thinking skills in professional and personal problem solving; understand and respect a multicultural society.
4. Understand the impact of cultural, economic, political and social events on global civilization; have appreciation of diversity and the impact of multiculturalism in the U.S. and around the world.
5. Understand and employ opportunities for personal enrichment through their knowledge and appreciation of the humanities, literary, fine and performing arts.
6. Experience a variety of elective courses and academic disciplines that contribute to a greater understanding of opportunities that will lead to future education or careers.

Graduation Requirements

Students must complete the Information Literacy and Community Service requirements in addition to all of the general requirements for graduation as listed in the catalog.

Curriculum - Associate in General Studies

General Education Core Requirements – 25 credits

ENG 101	English Composition	3
ENG 1XX	Writing Elective (comp)	3
COM 1XX	Communications Elective (comm)	3
CAP 1XX	Computer Literacy Elective (cl)	3
PSY 112	Introduction to Psychology	3
MATH	Math 102 or higher	3
SCI	Science Elective with lab	4
	Cultural Elective - Literature/Fine Arts	3

Programmatic General Education Requirements - 15 credits

ASD 120	The College Experience OR General Education Elective	3
	Social Sciences Perspective - Multicultural focus	3
	Cultural Perspective - Philosophy/Ethics focus	3
	Global Perspective - U.S. focus	3
	Global Perspective - World focus	3

General Education Electives - 6 credits

Total Credits in Program **61**

Psychology Minor

Psychology is the scientific study of behavior and mental processes. A minor in psychology is useful for students who plan careers in business, education, health services, human services, or in any of the various fields involving human relations. Students are encouraged to work closely with their Advisors to design a psychology minor that fits with their career and educational goals.

Curriculum - Minor in Psychology

Students must complete 15 credits of the Psychology courses offered at Goodwin College. Of the 15 credits a minimum of 6 credits must be at a 200-level or higher and a minimum of 3 credits must be at a 300-level or higher.

Department of Health and Natural Sciences

Bachelor of Science in Health Science

Bachelor of Science in Environmental Studies

Associate in Science in Health Science

Associate in Science in Environmental Studies
and Related Certificate Programs

Associate in Science in Medical Assisting and
Related Certificate

Associate in Science in Occupational Therapy
Assistant

Associate in Science in Respiratory Care

Certificate in Medical Billing and Coding

Certificate in Paramedic Studies

Certificate in Phlebotomy and Laboratory
Services

Department Mission Statement

The mission of the Health and Natural Sciences Department is to train professionals in a variety of healthcare and science-based disciplines. Programs offered by the department include Health Science, Respiratory Care, Medical Assisting, Environmental Studies, Medical Billing and Coding, Paramedic Studies, Histologic Sciences, and Phlebotomy. The department also assists in training students enrolled in the Business Studies programs with focuses in Medical Office Management. In addition to the programs offered, the Health and Natural Sciences Department serves the college community through its science courses that enable students to expand their analytical skills.

Graduates will possess a unique set of skills and knowledge that will allow them to obtain entry-level positions in their chosen fields, advance in a current position and lay the foundation for advanced learning throughout their careers. The programs offered by the department are designed to create career and educational opportunities for students to build upon, thus allowing students who complete these programs the opportunity to apply their credits towards advanced

degree programs. Students enrolled in the Bachelor Degree program who plan to apply to graduate school should notify their academic advisor early in the program to ensure proper course selection.

Health Science

Bachelor of Science

The bachelor degree in health science is an interdisciplinary program designed to provide career advancement opportunities for entry-level health profession practitioners as well as individuals who wish to begin their careers in health care. This program embraces students with different backgrounds and interests; the program helps student achieve their educational goal through four different tracks: Environmental Health, Health Care Administration, Bachelor Degree completion or the Health Exploration track. Students are closely advised throughout the program to determine their professional goals and develop and follow a plan of study to meet those goals. Graduates of degree or certificate programs, such as Histologic Science, Medical Assisting, Medical Billing and Coding, Paramedic Studies, Phlebotomy, Occupational Therapy Assistant, Respiratory Care and Environmental Studies can enroll in this program as a step toward career advancement and apply previous credits earned toward their baccalaureate degree.

Four available tracks:

1. **Environmental Health** track is for those students who are interested in pursuing a career in environmental health and the impact of environmental conditions on human health.
2. **Health Care Administration** track is designed for those students who are interested in pursuing careers in health care management. Students will gain and understanding of the business challenges specific to the healthcare delivery system. Students will gain an appreciation of the manager's role in this complex system.
3. **Bachelor Degree Completion** track allows the creation of career paths and advancement opportunities for individuals already possessing a certification, licensure, or registry through a professional organization but lacks a collegiate degree. Likewise, it will provide students who possess an associate degree and wish to pursue a bachelor degree the opportunity to do so. The program would allow these students to apply their professional experience and complete the bachelor degree required to advance or remain in their chosen profession.

4. **Health Care Career Exploration** track provides student with the opportunity to explore various careers and aspects of health care. This track is intended to serve students who have not yet decided on a specific healthcare profession but are interested in pursuing a career in healthcare. Students may also choose this option with the intent of fulfilling the pre-professional requirements for specific health care programs or graduate school.

Upon successful completion of all program requirements, graduates will be able to:

1. Demonstrate a strong foundation in basic behavioral, natural, social and health sciences appropriate to entry level positions in health care;
2. Communicate and present verbal, visual and written ideas and information clearly and accurately in a way that represents competence and professionalism in the health care field;
3. Interpret and explain policy within the ethical, legal and regulatory framework of the healthcare industry;
4. Identify and analyze bioethical issues facing healthcare practitioners and the health care environment;
5. Identify and describe the different roles of healthcare professionals and develop skills to become an effective team member;
6. Demonstrate accurate problem-solving abilities when working as a health care professional while at an internship;
7. Appreciate diversity, differing belief and value systems, as well as appreciate individual opinions;
8. Develop self-directed and engaged learning skills needed for independent and lifelong learning;
9. Demonstrate the knowledge and skills necessary to successfully enter specific health care fields or areas of study;
10. Analyze and apply information technology to successfully participate in learning activities;
11. Be an educator and promoter of healthy living; and
12. Utilize administrative and organizational skills for planning and implementing health and health care programs.

Graduation Requirements

All Health Science major core requirements must be completed with a cumulative G.P.A. (grade point average) of 2.0 or higher and complete all general graduation requirements as stated in the catalog.

Curriculum - Bachelor in Health Science

General Education Requirements - 46 Credits

General Education Core: 40 credits

ENG 101	English Composition	3
ENG 1XX	Writing elective (comp)	3
ENG 3XX	Advanced Writing elective (aw)	3

CAP 1XX	Computer Literacy elective (cl)	3
COM 1XX	Oral Communication elective (comm)	3

ACC 121	Budgeting and Planning	3
HSC 320	Health Administration	3

Senior Year

HSC 302	Public Health and Personnel Administration	3
HSC 312	Organization and Administration of Long-Term Care	3
BUS 210	Business Planning and Development	3

Environmental Health Track - 18 credits

Junior Year

ENV 252	Human Health in the Environment	3
ENV 250	Environmental Contaminants and Sanitation	3
HSC 220	Environmental Health Law and Public Policy	3

Senior Year

HSC 340	Physical Agents/Ergonomic Hazards in the Workplace	3
HSC 330	Principles of Environmental Health Science	3
HSC 410	Epidemiology	3
Total credits in program		120

Associate in Science

Recognizing that common program objectives can be achieved in a variety of ways, this program is designed to allow students the flexibility to plan a course of study that best suits their educational and professional needs through five available areas of emphasis: billing and coding, health care career exploration, pre-professional, associate degree completion and transfer to a baccalaureate degree. Students work closely with an academic advisor in order to determine their individual professional goals and develop a plan of study to meet those goals.

Students interested in pursuing careers in Histologic Science, Medical Billing and Coding, and Paramedic Studies can simultaneously pursue a certificate in these areas, while earning an Associate in Science degree in Health Science. In addition, students who complete their certificate in Medical Assisting can also apply those credits toward the Associate in Science degree in Health Science. Students should see their academic advisor for more information.

Billing and Coding option allows students who complete the Certificate in Medical Billing and Coding to apply these credits towards completion of the associate degree.

Health Care Career Exploration option provides students pursuing a general degree in Health Science the opportunity to explore various careers and aspects of health care. This track is intended to serve students who have not yet decided on a specific healthcare profession but are interested in pursuing a career in healthcare.

Pre-professional option allows students interested in pursuing professional careers, such as nursing or respiratory care, to complete all of their general education and science prerequisites before transferring to these selective admission programs.

Associate Degree Completion option allows individuals who have already obtained a nationally recognized certification or license the opportunity to gain collegiate credit and work towards the completion of an associate degree. Additionally, students completing certificate program requirements in Paramedic Studies, and Histologic Science may apply these credits towards completion of this associate degree.

Transfer option allows students to complete the degree program with the intention of pursuing a bachelor degree in Health Science or a related field.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Demonstrate effective written and verbal communication skills that represent competence and professionalism in the healthcare field;
2. Identify the ethical, legal and regulatory framework of the healthcare industry;
3. Identify and analyze bioethical issues facing healthcare practitioners and the healthcare environment;
4. Identify and describe the different roles of health professionals;
5. Demonstrate accurate problem-solving abilities when working as a health professional while at an internship;
6. Appreciate and embrace diversity, differing belief and value systems, as well as appreciate individual opinions;
7. Develop self-directed learning skills needed for independent and lifelong learning and
8. Effectively use information technology to participate in learning activities.

Graduation Requirements

All Health Science major core requirements must be completed with a cumulative G.P.A. (grade point average) of 2.0 or higher and complete all general graduation requirements as stated in the catalog.

Curriculum - Associate in Health Science

The curriculum consists of the College's 21-credit general education core, a minimum 9 credit Health Science core and 12 Health Science electives, a minimum of 9 credits in the social and physical science, and an additional 9 elective credits. A minimum of 60 credits is needed for degree completion.

General Education Core - 24-25 credits

ENG 101	English Composition	3
ENG 1XX	Writing elective (comp)	3
CAP 1XX	Computer Literacy elective (ol)	3
COM 1XX	Oral Communication elective (comm)	3
PSY 112	Introduction to Psychology	3
MATH 1XX	Math elective	3
SCI 1XX	Science elective	3-4
	Humanities elective* (literature/fine arts/ethics/philosophy)	3

Non-Major Core Requirements - 6 credits

ASD 120	The College Experience OR Psychology or Sociology Elective	3
SCI 1XX	Science elective	3

Health Science Major Core - Minimum of 9 credits

HSC 101	Introduction to Healthcare	3
HSC 105	Medical Terminology	3
HSC 110	Medicine and Society	3
HSC 111	Medical Law and Ethics*	3
HSC 120	Health and Wellness	3
HSC 205	Plague, Epidemics, and Society	3

HSC 240	Introduction to Alternative and Complementary Medicine	3
HSC 299	Health Science Internship Experience	3

Health Science Electives - Minimum of 12 credits

Twelve (12) credits from the courses offered by the Department of Health and Natural Sciences.

Open Electives – Minimum of 9 credits

Total credits in the program **60-61**

Students opting for the Health Care Career Exploration option choose electives based on individual goals and needs. Students opting for the Associate Degree Completion option may be awarded credit for licensure, certification, or registry in a healthcare profession. This credit can be applied to the Health Science or open elective credit requirement.

*With permission of the Program Director, HSC 111 - Medical Law and Ethics may be used to fulfill the Humanities elective. Nine (9) additional credits must still be taken from the health science major core.

Environmental Studies

Bachelor in Science

The mission of the Environmental Studies Bachelor of Science program is to provide a learning experience that encourages students to explore and appreciate their natural world and, at the same time, develop the skills necessary to be effective advocates for environmental protection. It is essential that students leave Goodwin with an understanding of how the human condition is directly related to the health of our environment and the availability and limitations of natural resources.

Goodwin College strives to ensure that all of its programs, like the Bachelor of Science in Environmental Studies, provide professional preparation, community outreach and an appreciation of the humanities, arts and sciences in a culturally diverse academic community. This will be accomplished with curriculum that provides a focused core component along with a general education foundation that promotes personal development. The existing two-year Environmental Studies program will be enhanced through the addition of advanced courses in environmental health and river studies. Existing courses offered by the Health and Natural Sciences, as well as the General Education Department, will be utilized to broaden critical thinking.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Evaluate human activities and their impact on global environmental systems.
2. Understand interdisciplinary/multidisciplinary approaches to environmental protection.

3. Evaluate environmental contaminants, pathogens and other vectors that affect environmental health.
4. Apply assessment and mitigation methods that are protective of environmental health and natural resources.
5. Apply professional standards required for effective environmental management.
6. Understand the relationship between human activities, water availability, and river system sustainability.
7. Understand ecological processes.
8. Implement and understand the development and implementation of natural resource protection public policy.
9. Apply experimental design and analytical methods to scientific research.
10. Apply practical and professional skills related to environmental protection and health safety.
11. Apply written and oral skills required for effective scientific research and community engagement.
12. Information technology and its practical application in assessment and mitigation of environmental impacts.

Curriculum

Associate in Science and Related Certificates

Goodwin College's Environmental Studies program provides an innovative multidisciplinary approach for 2-year students interested in the broad span of environmental topics while providing a strong foundation for entering the workforce, or continuing into the 4-year degree program. Goodwin's program is designed to meet pressing needs in the workforce and the urban community, producing graduates who are broadly educated in issues of the environment and who can communicate effectively. The program's core consists of a unique blend of required courses supplemented by key electives, dependent upon the particular interest and needs of students. Required courses span the fields of biological, physical, computer, social and environmental sciences as well as the humanities. Course laboratory components emphasize field techniques monitoring environmental impacts associated with air, water and soil resources and their subsequent influence on flora, fauna and society.

The goal of the Environmental Studies program is to provide a broad-based contemporary program of study,

which will provide the necessary technical and intellectual skill sets needed to work as an environmental technology professional in the 21st century. Based on the student's choice of electives, the program can be structured to meet any of the following objectives:

- Preparation for further academic studies within the environmental disciplines;
- Development of a rigorous environmental science background from which to pursue a career as an environmental technology or environmental health professional or transfer to a 4-year degree; and
- To provide a thorough foundation in a basic discipline as a principal component of an environmental science education.

Based on their choice of electives, students may design their own concentration to emphasize riverine ecology, water management, or environmental health.

Students interested in pursuing a Bachelor of Science in Environmental Studies or Health Science can apply the majority of their credits towards this degree. Students should contact the Environmental Studies or Health Science Program Directors for more information.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Demonstrate effective written and verbal communication skills that represent competence and professionalism in the environmental science field;
2. Apply knowledge of computer applications including basic word processing, Excel spreadsheets, internet and e-mail, as well as software related to the environmental discipline;
3. Perform mathematics related to the field of study including applied statistics;
4. Exemplify competence as skilled, entry-level environmental technicians;
5. Demonstrate a knowledge of human systems and their interaction with global systems;
6. Apply basic environmental monitoring skills in the field and laboratory; and
7. Work with others as part of a multi-disciplinary team to resolve environmental issues.

Curriculum

	Elective**	3

**Students may choose their electives from the following:

- STAT 167 - Principles of Statistics
- CAP 230 - Database Applications
- ENV 200 - HAZWOPER

The **Certificate of Achievement in Water Management** prepares students for the Connecticut Department of

Health Services water treatment and distribution, and, small water systems operator management examination(s).

Achievement in Water Management - 16 Credits

ENV 103	Introduction to Environmental Science	4
ENV 140	Water Utility Management	3
ENV 142	Water Treatment Systems and Operations	3
ENV 146	Water Distribution and Operations	
ENV 240	Special Topics in Water Treatment OR	3
ENV 242	Special Topics in Water Distribution	3

Medical Assisting

Associate in Science and Certificate Program

The Medical Assistant is a respected, multi-skilled health professional who performs diverse duties in medical offices, clinics and health centers. The varied skills offered by the program provide the opportunity to work either in the front medical office or in a hands-on clinical environment.

The goal of the Medical Assisting program is to prepare competent entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. This program develops the student's knowledge base and skills by providing a theoretical foundation and by developing the student's ability to perform clinical as well as office and administrative procedures. Courses combine lectures, laboratory sessions, simulations, and assignments to provide students with the knowledge and skills needed to be an effective member of the health care team. Hands-on practice, along with clinical and work experience is gained during a supervised internship component. All courses are offered on-ground. Select courses are offered in a hybrid or on-line format.

Students are simultaneously enrolled in the Certificate and Associate Degree programs. Students complete the certificate first and are awarded a Certificate in Medical Assisting. Students then continue in the Associate Degree program. Graduates of the Collegiate Certificate program are eligible to sit immediately upon graduation for the Certified Medical Assistant (CMA) examination administered by the American Association of Medical Assistants (AAMA) and for the Registered Medical Assistant (RMA) examination administered by the American Medical Technologists (AMT).

Students enrolled in the Day Division can complete the certificate program attending school full-time in 45 weeks or 700 hours. Students enrolled in the Evening Division can complete the certificate program attending school part-time in 60 weeks or 700 hours.

Students interested in pursuing a Bachelor of Science in Health Science can apply the majority of their credits towards that degree. Students should contact the Health Science Program Director for more information.

Accepted Students

Medical Assisting students are required to receive the Hepatitis B inoculation series or sign a waiver of inoculation during the program. Students will be required to have documentation of a Physical Exam and immunizations on file before the start of their second semester. Immunizations must remain current throughout the program.

Students should refer to the Goodwin College and Medical Assisting Program Handbooks for additional information and program specific regulations.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Utilize medical terminology appropriately;
2. Describe the anatomy and physiology of the human body, as well as the related disease processes;
3. Describe legal and regulatory frameworks of healthcare as they relate to the Medical Assistant;
4. Demonstrate computer literacy skills;
5. Effectively engage in written and oral communication as demonstrated through charting and communication with patients and other health professionals;
6. Prepare patients for examination or procedures, and assist the physician with the examination or procedure;
7. Collect and prepare laboratory specimens, as well as perform basic laboratory testing;
8. Perform phlebotomy and other invasive specimen collection techniques; and
9. Perform electrocardiograms and respiratory testing.

Graduation Requirements

Major core requirements (with the exception of MED 115) and BIO 101 and HSC 111 must be completed with a grade of a "C" or higher and students must complete all of the general graduation requirements. Additionally, graduates of the Associate in Science will complete the comprehensive learning outcomes of the General Education components.

Curriculum - Associate in Medical Assisting

General Education Core - 24 credits

Occupational Therapy Assistant

Associate in Science

The Occupational Therapy Assistant associate degree program prepares graduates to care for clients who are limited by a physical illness or injury, an emotional disorder, a developmental disability or the aging process. Working under the supervision of an occupational therapist, an occupational therapy assistant uses functional activities and therapeutic modalities as methods of treatment. Therapy focuses on assisting clients in regaining or maintaining independence in everyday life skills. Specific techniques that an occupational therapy assistant may utilize include training in activities of daily living, fabrication of splints, adapting home, work and school environments, vocational, training and therapeutic use of functional activities.

Accreditation

The Occupational Therapy Assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220. ACOTE's telephone number c/o AOTA is 301-652-AOTA. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. When you apply to sit for the certification exam, you will be asked to answer questions related to the topic of felony convictions. For further information on these limitations, contact NBCOT. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain licensure. Connecticut requires a license in order to practice occupational therapy and the license is based on the results of the NBCOT Certification Examination.

Admission Criteria

The specific admission requirements are outlined below. It is important to note that not all qualified candidates can be offered admission to the Occupational Therapy Assistant program due to the limited number of places available.

1. Complete the application for admission into Goodwin College. Applicants to the Occupational Therapy Assistant program must first meet the requirement for admission and be accepted into Goodwin College.
2. Complete the Occupational Therapy Assistant Program application. An official high school transcript or proof of GED and official college transcripts must accompany this application.
3. You must also have a cumulative 2.5 GPA in the last twelve college credits taken or on high school transcripts if no college courses have been taken.
4. Complete the College Placement Evaluations. Applicants must qualify for ENG 101 and MATH 101 in order to enter the Occupational Therapy Assistant program. Any remedial courses required as indicated by the test results must be completed before entering the Program.
5. Provide documentation of observation of occupational therapy in any specialty area. Observation must include 8 hours in prior 12 months.

Occupational Therapy assistant applicants who have satisfied all of the admission criteria also require an interview with the Program Director before admission.

Please note: Applicants are encouraged to apply early as there are limited number of seats and a rolling admissions process.

Accepted Students

Once accepted, students must submit:

1. A medical examination report by a physician which describes the student's physical and emotional health, two weeks prior to starting program. All required immunizations, including the Hepatitis B vaccine series, must be completed before the start of the first advanced fieldwork OTA 250 (FWII).
2. Documentation of a background check. The background check must be completed before students can start the first advanced fieldwork OTA 250 (FWII). Background checks are not covered by tuition and the student will be responsible for the fees. A felony, loss of license, administrative disciplinary proceeding for negligence, malpractice, recklessness, or willful or intentional misconduct may effect eligibility to sit for the NBCOT certification exam. Contact NBCOT at (301) 990-7979 or www.nbcot.org for an Early Determination Review.

Additional documentation required by the program includes proof of:

- CPR certification prior to first FW II rotation
- Physical exam within one year of start of FW II rotation
- Fingerprinting (if required by FW site) prior to start of FW II

Program Outcomes

The goal of the Occupational Therapy Assisting Program is to provide meaningful and appropriate educational experiences that enable students to develop knowledge and achieve competency in entry-level skills. The program leads to certification as an occupational therapy assistant (COTA). Upon successful completion of all Occupational Therapy Assistant degree program requirements, graduates will be able to:

1. Sit for the National Certification Exam;
2. Upon completion of the program, the student will demonstrate the ability to comprehend, apply, and evaluate clinical information relevant to their role as an occupational therapy assistant;
3. The student will demonstrate the clinical skills and proficiency in all relevant practice areas necessary to fulfill the role as an occupational therapy assistant;
4. The student will demonstrate professional behavior consistent with employer expectations for the occupational therapy assistant;
5. Demonstrate professional skills to begin work in any one of the specialty areas of occupational therapy practice with the general and specific tools necessary to complete the job requirements;
6. Comprehend the scope of occupational therapy practice;

7. Complete the comprehensive learning outcomes identified within each syllabus; and
8. In addition, the graduate will complete the comprehensive learning outcomes identified with the General Education Component.

Graduation Requirements

All Occupational Therapy core courses must be complete with a grade of "C" or higher. Human Biology must be completed with a grade of "C" or higher. All Advanced Clinical Practicum Level II fieldwork must be completed with a grade of "C" or higher within 18 months of completion of academic course work. Additionally, student must meet general education requirements as listed in the catalog.

A student is not considered a graduate until (s)he completes their general education, occupational therapy assistant course work and fieldwork requirements.

Curriculum

Associate in Occupational Therapy Assistant

General Education Core - 25 credits

ENG 101	English Composition	3
ENG 1XX	Writing Elective (comp)	3
CAP 1XX	Computer Literacy Elective (cl)	3
COM 1XX	Oral Communication Elective (comm)	3
PSY 112	Introduction to Psychology	3
MATH 1XX	Math Elective	3
BIO 120	Human Biology	4
	Humanities Elective: literature/fine arts/ethics/philosophy	3

Non-Major Core requirements - 6 credits

ASD 120	The College Experience	3
PSY 212	Life Span Development	3

Occupational Therapy Assistant Major Core - 36 credits

Freshman Year

OTA 100	Foundations of Occupational Therapy and Task Analysis	3
OTA 101	Foundations of Movement and Function	3
OTA 102	Clinical Fieldwork I (FW I)	1
OTA 103	Group Dynamics in Occupational Therapy	3

Sophomore Year

OTA 200	Occupational Therapy Assistant and Adult Populations	4
OTA 201	Occupational Therapy Assistant and Pediatric Populations	4
OTA 202	Occupational Therapy Assistant and Geriatric Populations	4
OTA 203	Case Studies and Practical Applications in Occupational Therapy Assistant	3
OTA 220	Occupational Therapy Assistant Seminar	1
OTA 250	Advanced Fieldwork Level IIA (FW II)	5
OTA 260	Advanced Fieldwork Level IIB (FW II)	5

Total credits in the program **67**

Respiratory Care

Associate in Science

The objective of the Respiratory Care Associate Degree Program is to prepare graduates who are qualified and eligible to take the entry-level examination and the advanced practitioner level examination for Respiratory Care Practitioners given by the National Board of Respiratory Care and to assume entry-level positions as competent respiratory care practitioners. Upon completion of the program and licensure, graduates will have the necessary skills and knowledge to secure employment as registry-eligible respiratory care practitioners. Students interested in pursuing a Bachelor of Science in Health Science can apply the majority of their credits towards these degrees. Students should contact the Health Science Program Director for more information.

Admission Requirements

The following are the admission requirements for students applying to the Respiratory Care program. Meeting minimum requirements does not guarantee admission into the program due to the limited number of places available. Admission is based upon completion of respiratory care prerequisites and other requirements. If courses are in progress, acceptance will be conditional upon submission of an official transcript immediately upon completion. All requirements must be completed before enrolling in RSP 112.

1. Complete the application for admission into Goodwin College. Applicants to the Respiratory Care program must first meet the requirements for admission and be accepted into Goodwin College.
2. Complete the Respiratory Care Program Application. This application must include an official high school transcript or General Equivalency Diploma and official college transcripts. A signed attestation that applicant possesses the ability to perform the tasks as stated in the Essential Functions of a Respiratory Therapist must also be included.
3. Earn a minimum GPA of 2.5 in the most recent course work. College GPA is based on a minimum of 12 completed credits.
4. Complete the required College placement evaluations. Applicants must test into ENG 101 and Math 102. All remedial courses must be completed before entering the program.
5. Complete the following prerequisite courses:
 - a. Chemistry - Four credit elective with lab.
 - b. Biology - BIO 211, Anatomy & Physiology I, and BIO 212 Anatomy & Physiology II (Goodwin College) or equivalent completed within the last five years. (BIO 120 or BIO 121 (Goodwin College) or equivalent with a laboratory component is the prerequisite for BIO 211. (Note: Applicants meeting all other requirements can be admitted conditionally without completing BIO 212. However, this course must be

successfully completed prior to starting the respiratory program).

6. Interview with the Program Director.

Biology, Chemistry, Anatomy & Physiology I & II, and Microbiology taken at Goodwin College must be completed with a "C" or higher.

Biology, Chemistry, Anatomy & Physiology I & II, and Microbiology courses taken at other accredited colleges must be equivalent to Goodwin College courses to meet these admission requirements. Courses must have been completed with a "C" or higher. Satisfactory scores on the CLEP are also acceptable in meeting these requirements.

Respiratory Care applicants who have satisfied all of the admission criteria will be selected according to the point system as specified below:

	Score
Previous College Education	
Associate Degree (60 Credits)	2
Bachelor's Degree	3
Master's Degree	4
Completion of courses at	
Goodwin College	
1 course	1
2 courses	2
3 courses	3
4 courses	4
5 courses	5
6 courses	6
7 courses	7
Cumulative GPA (applicable for Goodwin College courses only, based on a minimum of 12 credits)	
2.7 - 3.0	1
3.1 - 3.4	2
3.5 - 3.8	3
3.9 - 4.0	4
Personal Essay	up to 5 points
Interview	up to 5 points
Community Service	
15 - 29 hours	1
30+ hours	2
Total possible points	27

Accepted Students

Admitted students must submit a medical examination report by a physician which describes the student's physical and emotional health, two weeks prior to starting program. All required immunizations must be current before the start of the first clinical rotation and remain current throughout the program.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Demonstrate proficiency as a respiratory care practitioner, as described by the National Board of Respiratory Care and the Commission on Accreditation for Respiratory Care;
2. Assist physicians in diagnosis, management, and treatment of patients affected by cardiopulmonary disorders;
3. Demonstrate the ability to apply and evaluate information relevant to his/her role as a respiratory care practitioner;
4. Demonstrate technical proficiency in all skills necessary to fulfill the role as a respiratory care practitioner;
5. Demonstrate professional behaviors consistent with employer expectations for a respiratory care practitioner; and
6. Demonstrate basic competencies in alternate care sites (i.e., homecare, rehabilitation centers, and long-term mechanical ventilator centers).

Graduation Requirements

All Respiratory Care core courses must be completed with a minimum grade of "C". Anatomy and Physiology I, Anatomy and Physiology II, and Microbiology must be completed with a "C" or higher. Additionally, students must meet general graduation requirements as listed in the catalog.

Curriculum

Associate in Respiratory Care

General Education Core - 22 credits

ENG 101	English Composition	3
CAP 1XX	Computer Literacy Elective (cl)	3
COM 1XX	Oral Communication Elective (comm)	3
PSY 112	Introduction to Psychology	3
MATH 1XX	Math Elective	3
BIO 211	Anatomy and Physiology I	4
	Humanities Elective: literature/fine arts/ethics/philosophy	3

Non-Respiratory Core - 8 credits

BIO 212	Anatomy and Physiology II	4
BIO 235	Microbiology	4

Respiratory Major Core requirements - 40 credits

PHY 110	Medical Physics	3
RSP 110	Cardiopulmonary Anatomy and Physiology	3
RSP 112	Principles of Respiratory Care	4
RSP 120	Applied Pharmacology	3
RSP 121	Integration of Respiratory Care Skills	4
RSP 132	Mechanical Ventilation	6
RSP 221	Principles of Critical Care	5
RSP 231	Cardiopulmonary Pathophysiology I	3
RSP 233	Respiratory Care Capstone	2
RSP 261	Comprehensive Respiratory Care	7

Total credits in the program **70**

Histologic Science

Certificate

The primary objective of the Histologic Science certificate program is the education of students to become competent histotechnicians who not only have a thorough understanding of theory but who can also utilize such information in a laboratory situation, sometimes relying on her/his own judgment. Qualified by academic and applied science education, histotechnicians provide service and research in histotechnology and related areas. Upon successful completion, graduates will be able to pursue entry-level positions in hospital laboratories, private or pharmaceutical laboratories, research laboratories and state laboratories. Graduates of this program will be eligible to take the national examination given by the American Society of Clinical Pathology (ASCP), which leads to certification as a Histotechnician (HT). Graduates possessing a baccalaureate degree may be eligible to sit for the Histotechnologist (HTL) national examination. For more information please contact the program director or academic advisor.

Students interested in pursuing an Associate or Bachelor in Health Science can apply the majority of their credits towards these degrees. Students completing both the certificate and the Bachelor degree will be eligible to sit for the Histotechnologist (HTL) exam. Students should contact the Health Science Program Director for more information.

This program is offered both on-ground and via distance education. Due to the high demand for trained Histology professionals, the Board of Trustees has allocated institutional aid to offset program tuition. Prospective students are encouraged to contact Bill Mangini, Director of Financial Aid, at 860-913-2005 or via e-mail to bmangini@goodwin.edu.

Admission Requirements

The specific admission requirements are outlined below. It is important to note that not all qualified candidates can be offered admission to the Histologic Science program due to the limited number of seats available.

Only students admitted to the Histologic Science program may enroll in HLT courses.

1. Complete the application for admission into Goodwin College. Applicants to the Histologic Science program must first meet the requirements for admission and be accepted into Goodwin College.
2. Complete the Histologic Science Program Application. An official high school transcript or proof of GED and official college transcripts must accompany this application. A signed attestation that applicant possesses the ability to perform the tasks as stated in the Essential Functions of a Histotechnician must also be included.

3. Complete the required College Placement Evaluations. Applicants must qualify for ENG 099 and MATH 101.
4. Complete the following prerequisite courses with a "C-" or better:
 - a. Chemistry - High School chemistry or college equivalent.
 - b. Biology - High school biology or college equivalent

Satisfactory scores on the CLEP examinations are also acceptable in meeting these requirements.

5. Interview with the Program Director.
6. **For students enrolled in the distance learning program, acceptance and continued enrollment is contingent upon continued affiliation with a histology laboratory. For prospective students, not employed by a histology laboratory, please contact the Program Director at zdurkin@goodwin.edu for information on establishing an affiliation with a histology laboratory.**

All required immunizations must be current before the start of the Histology Clinical Experience, HLT 290. All required immunizations for online students must be current before the start of the program.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Receive and accession tissue specimens;
2. Prepare tissue specimens for microscopic examinations, including all routine procedures;
3. Assist with gross examination and frozen section procedures in histopathology;
4. Identify tissue structures and their staining characteristics;
5. Perform preventive and corrective maintenance of equipment and instruments or refer to appropriate sources for repairs;
6. Recognize factors that affect procedures and results, and take appropriate action within predetermined limits when corrections are indicated;
7. Perform and monitor quality control within predetermined limits;
8. Demonstrate professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals, and with the public;
9. Exercise principles of management, safety, and supervision;
10. Recognize the responsibilities of other laboratory and healthcare professionals and interact with them with respect for their jobs and patient care; and
11. Recognize and act upon individual needs for continuing education as a function of growth and maintenance of professional competence.

Graduation Requirements

Students must complete all HLT courses with a "C+" or higher and complete the general graduation requirements as stated in the catalog.

Histologic Science Program Policies

Policies specific to the Histologic Science program may be found in the Histologic Science Program Handbook.

Medical Billing and Coding

Certificate

Medical Billing and Coding is a challenging and rapidly growing area of healthcare. With today's advancements in medicine and technology and increasing government regulations, this field offers many career avenues for the individual with a medical coding and billing education.

Medical Coding is the practice of assigning specific numeric codes to medical services, procedures, and diagnoses in order to submit claims to insurance companies or the U.S. government, specifically Medicare and Medicaid, in order to receive payment for services provided by a licensed healthcare professional. Medical Billers and Coders function as medical reimbursement consultants to medical practices, physician billing services, insurance companies, software companies, healthcare agencies, consulting firms, and State and Federal Government Agencies.

The objective of a degree and related certification in Medical Billing and Coding is to provide students with a solid academic foundation in the areas of procedural and diagnostic coding, utilization of medical software, accounts receivable, insurance claims submission and management, electronic medical records (EMR), HIPAA

compliance, health insurance guidelines and insurance fraud issues.

Graduates of the program are eligible to sit for the Certified Professional Coder (CPC) exam given by the American Academy of Professional Coders (AAPC).

Students interested in pursuing an Associate or Bachelor of Science in Health Science can apply the majority of their credits towards these degrees. Students should contact the Health Science Program Director for more information.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Demonstrate the ability to successfully process medical insurance claims both manually and electronically;
2. Demonstrate the ability to analyze all medical reports to properly identify all procedures and diagnoses;
3. Demonstrate accurate coding of procedures and diagnoses utilizing resources such as, CPT-4, ICD-9-CM, and HCPCS;
4. Apply knowledge of the medical insurance industry by accurately recording co-payments, deductibles, coinsurance, and risk withholds;
5. Demonstrate knowledge and adherence to HIPAA regulations;
6. Demonstrate coding skills by qualifying to take the Certificated Professional Coding exam through the American Academy of Professional Coders (AAPC);
7. Effectively engage in written and oral communication between patients and other health professionals; and
8. Appreciate diversity, differing beliefs, value systems, and individual opinions.

Curriculum

Course No.	Title	Credits
First semester		
CAP 1XX	Computer Literacy elective	3
HSC 105	Medical Terminology*	3
BIO 101	Concepts in Human Biology*	3
MED 115	Introduction to Insurance and Coding*	3
MCD 213	CPT @-4 Coding I*	3
Second semester		
MCD 214	CPT @-4 Coding II*	3
MCD 215	ICD-9-CM Coding*	3
MED 250	Medical Office Management	3
HSC 1XX	Health Science elective	3
MCD 220	Medical Coding Capstone*	3
Total credits in the program		30

Students have the option of completing a 3-credit elective internship (MCD 299) as part of their program.

* These courses must be completed with "C" or higher in order to graduate from the program.

Paramedic Studies

Collegiate Certificate

The primary objective of the Paramedic certificate program is to prepare students to sit for licensure as a paramedic in the state of Connecticut. Providers will learn to perform a comprehensive evaluation of that patient's condition and apply life-saving care, as necessary. The student will be exposed to a wide variety of victim situations, including direct patient care in local hospitals and on emergency vehicles. This program follows the National Standard Paramedic Curriculum published by the Department of Transportation, National Highway Traffic Safety Administration. The program utilizes state of the art technology for a perfect blend of classroom, laboratory, clinical and field education. Upon successful completion, graduates will be eligible to take the state licensure exam as approved by the Department of Public Health, Office of Emergency Medical Services (OEMS). Graduates of this program are trained to provide the most extensive pre-hospital care and may work for fire departments, private ambulance services, police departments, aeromedical care, or hospitals.

Graduates of the Paramedic Program can apply credits earned towards an Associate Degree in either Health Science or Homeland Security. Students interested in pursuing a Bachelor of Science in Health Science can also apply the majority of their credits toward this degree. Students should contact the Health Science Program Director for more information.

Admission Requirements

The specific admission requirements are outlined below. It is important to note that not all qualified candidates can be offered admission to the Paramedic Studies program due to the limited number of places available.

1. Complete the application for admission into Goodwin College. Applicants to the Paramedic Studies program must first meet the requirements for admission and be accepted into Goodwin College.
2. Complete the Paramedic Studies Program Application. Application must include the following:
 - a. Copy of high school transcript. Upon acceptance, student must submit an official transcript for their record.
 - b. Copy of college transcript(s). Upon acceptance, student must submit an official transcript for their record within first 16 weeks.
 - c. Proof of current EMT-B or EMT-I Certification (State of Connecticut or National Registry of EMT [NREMT]). This license must be maintained throughout the program.
 - d. Proof of current certification in Cardio-Pulmonary Resuscitation (CPR) by the American Heart Association or CPR for the Healthcare Provider by the American Red Cross. Applicants will be considered without CPR documentation, however students must complete CPR certification prior to starting program.

3. Complete the required College Placement Evaluations. Applicants must qualify for ENG 099 and MATH 099.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Sit for the state examination for licensure;
2. Perform all of the duties included in the Paramedic program, after successfully completing State of Connecticut/National certification exam;
3. Demonstrate knowledge of the legal aspects of emergency medical service;
4. Prepare for and deal with disasters, including those involving hazardous materials;
5. Demonstrate effective interpersonal skills with supervisors, peers and the public;
6. Explain the complexity of emergency medical service;
7. Recognize and act upon individual needs for continuing education as a function of growth and maintenance of professional competence;
8. Safely and adequately perform all cognitive, affective, and psychomotor objectives outlined in the 1999 Paramedic National Standard Curriculum, as published by the National Highway Transportation Safety Administration; and
9. Incorporate problem-solving, procedural and interpersonal skills with technical knowledge while rendering patient care.

Graduation Requirements

To successfully graduate from this program, students must pass all courses with a "C" or better and complete all of the general graduation requirements as listed in the catalog.

Curriculum

Course No.	Title	Credits
First semester		
EMT-P 101	Paramedic I	4
EMT-P 110	Paramedic Clinical I	2
BIO 108	Human Anatomy and Physiology I for Paramedics	3

Phlebotomy and Laboratory Services

Certificate

Today's healthcare system relies heavily on the results of laboratory tests to direct patient care. Accurate laboratory test results are essential for physicians and other health professionals to make appropriate clinical decisions. Phlebotomists and other laboratory professionals play a key role in ensuring the quality and accuracy of those laboratory tests.

Phlebotomists are skilled health professionals who specialize in the collection of specimens, particularly venous blood specimens. Phlebotomists must be able to quickly establish trust with the patient, as many people find blood collection to be an unpleasant experience. Phlebotomists must possess good communication skills; have a working knowledge of medical terminology, anatomy and physiology; as well as good venipuncture techniques.

In addition to teaching all of the skills and knowledge needed to function as a phlebotomist, the program also includes instruction in specimen processing, orientation to the laboratory, quality control testing and introductory laboratory testing. The internship provides the student with the opportunity to apply knowledge and skills learned in the classroom to real-life experiences.

Graduates of the program will have the knowledge and skills required to gain employment as a phlebotomist or in the specimen processing department of a laboratory.

Graduates of the program are eligible to sit for the Registered Phlebotomy Technician (RPT) exam offered by the American Medical Technologists (AMT).

Students interested in pursuing an Associate or Bachelor of Science in Health Science can apply the majority of their credits toward these degrees. Students should contact the Health Science Program Director for more information.

All required immunizations must be current prior to the start of the program. Immunizations must be kept current throughout the program.

Please note: Applicants are encouraged to apply early as there are limited number of seats and a rolling admissions process.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Demonstrate effective communication that represents competence and professionalism in the healthcare field;
2. Develop an understanding of medical terminology, anatomy and physiology;
3. Describe HIPAA and its implications in the laboratory setting;
4. Perform phlebotomy and capillary specimen collection;

5. Determine which collection is most appropriate based on the patient's condition and the specimen required.
6. Collect and prepare a variety of laboratory specimens;
7. Perform basic laboratory testing and associated quality control; and
8. Demonstrate laboratory safety techniques when collecting specimens and performing laboratory testing.

Graduation Requirements

Students graduating with this certificate must complete PHB 120 and PHB 121 with a grade of "C" or better in order to qualify for PHB 299 and meet the general graduation requirements as stated in the catalog.

Curriculum

Course No.	Title	Credits

PHB 104	Medical Terminology/Anatomy and Physiology	3
PHB 103	Introduction to Laboratory Services	3
PHB 120	Principles and Practices of Phlebotomy	3
PHB 121	Advanced Phlebotomy Skills	3
PHB 299	Phlebotomy Internship/Seminar	3
Total Credits in Program		15

Department of Social Science, Business and Education

Bachelor of Science in Business Administration

Bachelor of Science in Child Study

Bachelor of Science in Organizational Studies

Associate in Science in Business Administration
and Related Certificates

Associate in Science in Early Childhood Education
and Related Certificate

Associate in Science in Criminal Justice

Associate in Science in Homeland Security

Associate in Science in Human Services

Department Mission Statement

The mission of the Department of Social Science, Business and Education is to educate dedicated and caring individuals looking to make a significant difference within their communities through a career in the service professions or through the establishment of small businesses or non-profit organizations that create economic and service opportunities while building community. Each program within the Department strives to build challenging curriculum that will prepare students to assume the job responsibilities specific to their chosen profession. Recognizing the high demand for professional and organizational knowledge in employees who seek to advance their career opportunities, each program has a primary focus of helping students develop the core skills and knowledge within their area of focus, as well as critical thinking skills and personal development that will enable them to make an impact in their organizations and in the lives of individuals throughout their communities. A culminating experience in all programs is designed so that students can apply the skills learned throughout their academic course work in real work environments. Successful graduates will be prepared for entry-level positions in their chosen field or for transfer to another institution to pursue advanced degrees.

Early Childhood Education

Early Childhood is the study of children ages birth through 8 years old. Students will gain knowledge of how to work with children and their families in a variety of settings based on child development and age-appropriate practice. Early Childhood professionals have a deep knowledge of child growth, development and learning,

are able to apply this knowledge into their practice. They can communicate effectively with children, colleagues and families. The Early Childhood professional has the commitment to work collaboratively and in partnership with others in order to deliver the most optimal services to children and their families.

Goodwin College students have many options for study within this major. Goodwin College offers both an Associate degree and a Bachelor degree in this major as well as two certificate programs. Both the Bachelor and Associate degree programs are rooted in child development theory and research and are a balance of major specific course work and general education courses. Professional and general education courses provide the necessary training and skill development to utilize principles of child development, curriculum planning and observation and assessment in the classroom. The general education courses provide the opportunity to develop the ability to think critically, embrace diversity, expand cultural and intellectual interests, and communicate effectively.

Job possibilities in this field with a Bachelor degree in Child Study include, but are not limited to:

- Childcare center administration
- Private-sector teaching
- Child Specialist or entry-level social worker with the Department of Children and Families
- Licensing specialist with the Department of Public Health
- Camp Director
- Family Resource coordinator and advocate

Additionally, graduates are eligible to apply for the Alternate Route to Certification for public school teaching. Job possibilities in this field with an Associate degree in Early Childhood Education include but are not limited to:

- Infant and toddler teacher
- Paraprofessional
- Family resource worker
- School Readiness teacher

To assist our community in providing trained child-care professionals, the Board of Trustees has allocated institutional aid to offset program tuition. Prospective students are encouraged to contact Bill Mangini, Director of Financial Aid, at 860-913-2005 or via e-mail to bmangini@goodwin.edu.

Early Childhood courses, transferred into the program must have been completed with a "C" or better. Students entering with a valid CDA credential will be awarded 9 credits (ECE 102 and one 6-credit practicum) towards the 30-credit certificate program, Associate degree, or Bachelor degree.

Students should be aware that a background check is required during the spring term before enrolling in ECE 251 - Student Teaching I. Another background check may be required in the summer term before enrolling in ECE 450 - Capstone Experience. Students who have criminal records may be prohibited from completing these courses and thus completing the degree. If a student is currently working in the field and it has been determined by the program director that they can use their worksite for their course work, they would not need to complete these items. For any questions, students should speak with the program director before enrolling in the college.

Bachelor of Science in Child Study

The objective of the Bachelor of Science in Child Study is to prepare competent and dynamic professionals who have:

- advanced skills in designing multidimensional and effective curriculum activities;
- the ability to implement developmentally-appropriate practice;
- a thorough understanding of child development from birth through age eight; and
- possess a strong foundation in how to create and manage high quality diverse programs for young children.

This degree program is grounded in developmental theory and emerging educational trends in early childhood education. Upon completion of the program students will have developed ethical decision-making abilities and the skills to foster relationships through creative problem-solving techniques. Early Childhood professionals must acquire these skills in order to lead high quality programs for young children.

There are many program goals linked to this major. Throughout coursework in this major, students will work towards achieving these goals in order to be fully prepared to enter into the field. The goals of this major are as follows:

- To provide students with comprehensive and professional education that has an intense focus on child development and learning to prepare them to assume mid- to upper-level positions in early childhood;
- To promote critical thinking and creativity that challenges students to reach their personal, academic and professional goals;
- To provide a learning environment that promotes tolerance and acceptance of diverse cultures, beliefs, experiences and opinions so that students understand the multiple influences on development and learning;
- To deepen students' understanding of child growth and development and the influence on this development from society. In addition, to connect with the child as a function within the family unit so that they can make innovative and realistic decisions about environments and programs created to guide and link children and their families to valuable resources;

- To have competence in making decisions related to ethical dilemmas facing early childhood professionals and to come to see their role as a child advocate;
- To strengthen students' commitment to ethical decision making and other professional guidelines governing the field of early childhood education; and
- To promote and facilitate upward educational and career mobility within the field of early childhood.

Program Outcomes

Upon successful completion of the Bachelor Degree program, graduates will be able to:

1. Show an understanding of and commitment to the values of early childhood education professionals, including upholding the Profession's Code of Ethics at all times and becoming an advocate for children and the profession;
2. Demonstrate a commitment to life-long learning for themselves and those whom they serve by engaging in continuous learning in order to inform practice;
3. Exemplify competence as skilled providers in the field of early childhood education and use developmental knowledge to create safe, healthy, respectful, supportive, and challenging learning environments;
4. Utilize critical thinking skills to assess children's needs, possible interventions, and community resources in a comprehensive fashion while taking into consideration individual, family, and/or community values, practices, and beliefs;
5. Demonstrate knowledge of curriculum planning and evaluation necessary to be effective with young children by using developmentally appropriate learning objectives to drive the planned curriculum and learning environments;
6. Utilize the process of responsible observation and assessment techniques and strategies as applied to teacher and classroom practices; understand the benefits of observation and appropriate uses of the information collected; and know how to analyze the documentation for effective classroom planning and/or linking to appropriate outside services and referrals;
7. Serve as a positive role model within early childhood education settings and the community by adhering to the professional standards set forth by the College while in the Student Teaching and Capstone experiences;
8. Utilize a process of self-evaluation that fosters personal and professional growth and contributes to life-long learning;
9. Understand effective methods to support, involve, and empower families and communities through the creation of respectful relationships and effective communication;
10. Demonstrate effective written and verbal communication skills, higher order thinking skills, and flexibility in problem solving techniques that represent competence and professionalism in the field of early childhood education;

11. Apply knowledge of computer applications including basic word processing, spreadsheets, Internet and e-mail and other software related to the field; and
12. Perform mathematics related to the field of study including applied business mathematics, budgeting, and other related skills.

Graduation requirements

All Child Study major core requirements must be completed with a cumulative G.P.A. (grade point average) of 2.5 or higher and meet the general graduation requirements as stated in the catalog.

ECE 251 Student Teaching I and ECE 252 Student Teaching II is transferrable into the program only if the student has completed an Associate degree in Early Childhood Education and completed student teaching in order to complete their degree. The ECE 450 Capstone is not transferable into the program from another institution.

Associate in Science in Early Childhood Education

The objective of the Associate in Science in Early Childhood Education is to provide students with a solid academic foundation and hands-on experience in the field of early childhood education. Following completion, students will have the necessary skills and knowledge to become gainfully employed in an entry- to mid-level position in the field of early childhood education and/or to continue their education towards a bachelor degree in Child Study or related fields.

The paraprofessional option in this degree program prepares students to fill a variety of roles within the public and private school systems as a paraprofessional. This option is designed to meet the training requirements for paraprofessionals now required by the "No Child Left Behind" federal legislation.

Accreditation

The Early Childhood Education program is accredited by the National Association for the Education of Young Children (NAEYC), located at 1313 L Street, NW, Suite 500, Washington, DC 20005. Telephone 202-232-8777 or, toll-free, 800-424-2460.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Show an understanding of and commitment to the values of early childhood education professionals;
2. Demonstrate a commitment to life-long learning for themselves and those whom they serve;
3. Exemplify competence as skilled providers in the field of early childhood education;
4. Utilize critical thinking skills to assess children's needs, possible interventions, and community resources in a comprehensive fashion while taking into consideration individual, family, and/or community values, practices, and beliefs;
5. Demonstrate knowledge of curriculum planning and evaluation necessary to be effective with young children;

6. Utilize the process of observation and assessment techniques and strategies as applied to teacher and classroom practices;
7. Serve as a positive role model within early childhood education settings and the community;
8. Utilize a process of self-evaluation that fosters personal and professional growth and contributes to life-long learning;
9. Demonstrate effective written and verbal communication skills that represent competence and professionalism in the field of early childhood education;
10. Apply knowledge of computer applications including basic word processing, spreadsheets, internet and e-mail, and other software related to the field; and
11. Perform mathematics related to the field of study including applied business mathematics, budgeting, and other related skills.

Additionally, graduates of the Associate in Science will complete the comprehensive learning outcomes of the General Education core requirements.

Graduation Requirements

All Early Childhood major core requirements must be completed with a cumulative G.P.A. (grade point average) of 2.3 (grade of a "C") or higher and complete all general graduation requirements as stated in the catalog.

ECE 251 Student Teaching I and ECE 251 Student Teaching II are the capstone experiences for graduation and are not transferable into the program from another institution.

Total credits in program **60 - 61**

* Students may choose ECE 220 Multicultural Aspects of Early Childhood for the Humanities Elective.

Paraprofessional Option

To complete this option, students will take the following courses in place of ECE 102, ECE 110, and ECE 120.

PAR 110	Becoming a Paraprofessional	3
PSY 210	The Psychology of Learning	3
EDU 240	Language and Literature for School Age Children	3

Certificate Programs

The Early Childhood Education 30-credit certificate program is designed for students who are currently working in the field and are in need of obtaining formalized education. The Early Childhood Education certificate is a 30-credit program consisting of a combination of early childhood education and general education courses.

The Child Study 18-credit certificate program is a two-semester program designed to meet the current state requirements for early childhood staff working in state funded preschool programs. The practicum classes give students a unique opportunity to work directly with young children under the guidance of their professor. The two 3-credit courses give the student an introductory foundation to early childhood education and equip students with knowledge in child development, educational theory, curriculum planning, state and federal guidelines, and involvement of families in an early learning setting.

Additionally, upon completion of this program, students will qualify to apply for the Child Development Associate (CDA) national credential. The candidate that receives a CDA is able to demonstrate competence in areas such as children's social, emotional, and intellectual growth and the ability to work well with parents and co-workers in an effort to deliver high quality childcare to young children. Students can transfer 12 credits (ECE 101, ECE 102, and one Practicum) into the other early childhood programs at Goodwin College.

Successful completion of this certificate program requires either placement in Math 099 or higher OR a completed grade of a "C" or better in Math 089.

Child Study Certificate Program

This 2-semester introductory certificate program is for working professionals and those new to the field of early childhood who need to meet federal and state educational requirements in a short amount of time. The practicum classes give students a unique opportunity to work directly with young children under the guidance of their professor. The two 3-credit courses give the student an introductory foundation to early childhood education and equip students with knowledge in child development, educational theory, curriculum planning, state and federal guidelines, and involvement of families in an early learning setting. Additionally, this program meets all the requirements to allow graduates to apply to the Council For Professional Recognition for the Child Development Associate (CDA).

Organizational Studies

Bachelor of Science

The Bachelor of Science in Organizational Studies is a comprehensive response for the high demand for organizational knowledge in employees who may seek career opportunities in government, corporate and non-profit entities. Participants develop skills and knowledge that transcend organizations, whether private or public, service or manufacturer, corporate or non-profit, which helps develop competent personnel in any organization through the understanding of organizational structures and best practices for contemporary organizational success. Through the exploration of individual, group and

organizational behaviors, students integrate knowledge of human action, communication and change in the organization. As participants in organizational life, students in this program develop the knowledge and competencies to become contributors to their organization's success. They may even exercise formal or informal leadership roles in their respective organizations and are thus well versed in contemporary organizational theories and practices to make their integration into an organization more effective. Participants may further seek to pursue administrative, supervisory or advanced roles within their organization.

This program is designed to meet the needs of traditional students moving through a 4-year program or as a degree completion program for adults who desire to better position themselves in their respective organizations consistent with industry expectations. This program of study integrates analysis of theory, case studies, service learning and research while encouraging thoughtful and creative approaches to understanding organizational structure that are assessable, measurable and observable. This degree program is focused on realistic, accurate, and sound interpretations of the complexity and diversity found in different organizational settings. The program strives to be consistent in scope with college standards, and consistent with industry outcomes.

Admission Requirements / Degree Completion Students

All general admissions requirements for Goodwin College must be fulfilled. Since this program also serves as a degree completion program, all previous courses taken outside of Goodwin College ought to be submitted for programmatic review at the time of application and before acceptance into the program to assess the students overall academic status. Transcripts from other institutions submitted after matriculation may not be accepted. Degree completion students may transfer in up to 90 credits provided that they were earned from accredited institutions of higher education; not all transfer credits may be applicable to the degree; only credits earning a grade of "C" or higher will be accepted. Relevant CLEP exams, other recognized standardized tests for college credit and CBEs are acceptable at anytime during the course of study.

Program Outcomes

In addition to the general program outcomes expressed by the Department of General Education, participants who successfully complete of all program requirements will be able to:

1. Express contemporary leadership theories and best practices in organizations;
2. Describe organizational structure, culture, strategy and change;
3. Develop collaborative critical thinking and problem-solving skills to address organizational functions and dynamics;

4. Utilize contemporary talent management practices to advance their organization's value;
5. Demonstrate proficiency in oral and written communication;
6. Demonstrate an understanding of workplace diversity;
7. Demonstrate paradigms for ethical decision-making;
8. Practice interpersonal and group dynamics;
9. Define the roles of human resources in organizations;
10. Understand the complex and interrelated roles of leaders, managers and followers within organizations;
11. Understand performance management and the talent development process;
12. Explain the foundations of managing projects;
13. Build and function successfully within teams;
14. Develop personal mastery in the skills requisite for successful organizational life;
15. Contribute to their organizations and ready them for organizational success.

Graduation Requirements

In addition to the general graduation requirements of Goodwin College as published in this catalog, BSOS students must maintain a GPA of 2.5 in the major and 2.0 overall.

Students must earn a minimum of 30 credits or 25% of the graduation credit and a minimum of 15 credits (5 courses) in the major core at Goodwin College. Students must also complete a minimum of 45 credits (15 courses) at the 200 level or higher, which includes a minimum of 30 credits (10 courses) at the 300 and 400 levels.

Additionally, 20 hours of documented community service must be completed prior to graduation. The requirement is intended to foster lifelong learners who develop civic responsibility. This service may be incorporated by the student as part of a particular course experience or completed during any semester. Students identify a community service project and submit same to the instructor of the course if the project is course related and/or to the BSOS program director. At the close of the 20 hours of service, each student is required to submit a five-page paper describing the service experience, how it affected both themselves and the community. Community service hours and documentation must be completed in compliance with the college policy and submitted to their program director no later than two months prior to expected graduation date.

Business Administration

Bachelor of Science

The Bachelor of Science in Business Administration provides the business competencies that employers look for in their work force. Students prepare to meet the challenges of a changing marketplace in a wide variety of local and global industries while preparing for leadership roles within the business arena. The Bachelor of Science in Business Administration is focused on developing students to understand and support organizational missions. The program serves multiple purposes for traditional students moving through a 4-year program, or as a degree completion program for adults who desire a better position for themselves in their respective organizations consistent with industry expectations or to prepare them for venturing out on their own. This degree program is focused on realistic, accurate, and sound interpretations of the complexity and diversity found in today's global economy. The program strives to be consistent in scope with college standards, and consistent with industry outcomes. This program of study integrates analysis of theory, case studies, simulations and research so students may apply these to practical situations in the daily workplace. Students are further encouraged to develop thoughtful and creative approaches to understanding business models that are assessable, and observable.

The Bachelor of Science in Business Administration is thus a comprehensive response for the demand for business skills in an ever increasing global market and competitive workplace. Many people in the work place may seek career opportunities in small to mid-size businesses, explore their own start-up or franchise business or assume a role in a community oriented non-profit. Participants develop the requisite skills and knowledge that are needed for small business employers and non-profit organizations. The skills and knowledge taught in this program relevant to the business arena help develop competent personnel in any organization through the understanding of marketing, operations, organizational structures and best practices for contemporary small businesses whether profit driven or not. As participants in business life, students in this program develop the knowledge and competencies to become contributors to their organization's success. They may even exercise formal or informal leadership roles in their respective organizations and are thus well versed in contemporary business theories and practices to make their inculcation into an organization more effective.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Understand contemporary theories and best practices in operating small businesses and non-profit organizations.

2. Develop critical thinking and problem solving skills that address operational and management concerns.
3. Demonstrate proficiency in oral and written communication.
4. Structure the workplace to embrace the complexities and competencies of a diverse work force.
5. Demonstrate strategies of corporate social responsibility while exercising ethical and professional leadership.
6. Foster sound fiscal practices through analysis of financial statements and establishment of accounting procedures to ensure effective managerial decision making.
7. Assess the global and domestic economic environment through the interpretation of economic data analysis as it relates to small businesses and non-profit organizations.
8. Define the roles and responsibilities of human resources in small business and non-profit organizations.
9. Create sound marketing strategies that ensure sustainability for the modern business in traditional and on-line environments where social media is an integral part of the marketing plan.
10. Develop skills to manage operations and strategically plan for the long-term viability of a small business or non-profit for the purpose of promoting the mission, vision and core values.
11. Demonstrate competency in the research process as it applies to business.

Additionally, graduates of the Bachelor in Science will complete the comprehensive learning outcomes of the General Education components.

Associate of Science

The associate degree program in Business Administration provides a foundation in business that will prepare students for direct entry into the workforce or to pursue a baccalaureate degree. The Business Administration curriculum helps students comprehend the underlying business principles and develop an ability to analyze and solve problems faced by managers of all kinds - in corporations, small businesses, government agencies and nonprofit organizations.

The program provides an introduction to business and its global connections. It addresses business law and ethics, corporate social responsibility, business planning and development, effective leadership, and the fundamentals of accounting, budgeting, and marketing principles. Students also explore the basics of business communication, economic theories and effective forecasting.

Each student builds a business plan relevant to their career aspirations that integrates the skills and knowledge learned in the various courses. The final culmination of the program is a 180-hour internship capstone, undertaken at the end of the student's program where classroom experiences will be applied in a real business environment. Wherever possible, the specific business chosen for the internship will reflect the student's desired career goal.

Entrepreneurship Option

Entrepreneurs are people who would like to start and grow their own business. Their satisfaction comes from creating, advancing, and ultimately transforming an idea into a thriving business. Success demands knowledge of and experience in a number of factors, including initiating

the start-up process, maintaining a competitive edge, gaining market share, making financial decisions, adapting to change, and developing products and services. In the United States, approximately 600,000 - 800,000 new businesses are started each year. These businesses form the basis of our economy. They allow their owners to work for themselves and to be self-sufficient. Many entrepreneurs build on their success by taking personal and financial risks to introduce new types of businesses based on current and projected needs.

The purpose of the Entrepreneurship/Small Business Program is to provide students with the general knowledge to launch, operate, and grow their own business or operate and grow an existing business. This program focuses on innovative, hands-on business practice and small business management. Foundation and advanced courses expose students to the principles of business development, including strategic planning, marketing, advertising, business law, accounting, and information systems.

The cornerstone of the program is the Portfolio, an organized folder that contains all of the documentation students need to start their own business. The Portfolio's primary document is the business plan, which is developed in class. As students progress, they gradually add to the Portfolio a marketing plan, funding proposals, financial projections, loan applications, and employer identification number; and, if applicable, a patent, trademark, and copyright filings. By graduation, the Portfolio has become the bridge to success.

Human Resource Option

The management of human resources is a growing field. With increasing legal issues pertaining to employment and the need for organizations to carefully select, develop and maintain their workforce, this field will continue to present excellent opportunities for both employment and advancement. The Human Resource Management associate degree and related option prepares students to effectively deal with the complexities and challenges of managing today's workforce.

Successful students will be prepared for positions as human resource assistants or specialists whose work contributes to the growth and success of organizations and their employees. Graduates will be able to obtain human resource positions in business, government and non-profit organizations. Students will learn to identify staffing needs and develop skills for recruiting, interviewing, hiring, and developing employees. They will also learn the policies, procedures, and legal aspects of human resource management. They will round out their program with studies in business management, ethics, and cultural awareness.

Students who complete this program will possess the skills necessary for a many career options at entry and mid-level positions in a wide variety of organizations.

Medical Office Management Option

As part of a growing field of health related occupations in the United States, the medical office management profession offers positive economic opportunities and personal satisfaction. As our population rises and technology advances, the need for high quality healthcare services becomes increasingly great. The medical office administration field is an integral part of this expansion.

Medical Office Management is a multi-skilled allied health profession. Managers work primarily in doctors' offices, hospitals, clinics, and government health organizations. Duties may include word processing, data entry, reception, database management, billing and coding, as well as interaction with vendors and patients.

This associate degree and related certificate option provides the student with a unique blend of courses needed to obtain the skills and knowledge necessary to gain entry-level positions in medical office management. Students will learn Microsoft Office, as well as medical office management software. In addition to the computer skills, students will develop a solid medical background that includes medical terminology, human biology, medical billing and coding, and medical insurance. The program includes classroom instruction, lab, and an optional internship, giving students both a traditional academic education and "real world" hands-on experience.

Non-profit Management Option

Students pursuing an Associate in Science in Business Administration may choose to concentrate their studies in the field of Non-profit Management. The range of nonprofit organizations includes those which provide basic human needs such as food and shelter and medical care; as well as treatment, educational and arts settings. Non-profit organizations account for approximately 10% of employment in the United States and are the primary mechanism by which the basic human needs of traditionally underserved and disempowered populations such as the poor, immigrants, and those with mental and physical disabilities are met. Non-profit managers must be well-versed in a range of areas, including financial and human resources management, grant writing, working effectively with client populations, working with nonprofit boards, and maintaining standards of ethical practice. The non-profit manager must also be able to work on the individual, group, and community level in order to be effective.

Office Management Option

To maintain a competitive edge in today's global marketplace, many companies are becoming high performance organizations. As a result, companies are upgrading the skills required to perform entry-level administrative and supervisory responsibilities. This unique program, with a dual focus in business management and computer applications, is based on job qualifications identified by local area employers.

The program provides students with an advanced level of skills in using Microsoft Office, planning and organizing, working as part of a team, communicating across cultures, and coordinating operational tasks. The program emphasizes the development of the students' problem solving, decision making and project management skills. Students who graduate from this program will be qualified to work in companies across all industry sectors.

Property Management and Acquisition Option

The field of property management has a growing need for knowledgeable, skilled professionals. To the typical homeowner, a well-managed property looks good and preserves its intrinsic value. For the individual who owns property as an investment or to the business that specializes in managing other people's property, properly managed real estate results in greater income and profits. It also enhances the lives of the renters and adds to the value of the community in which it resides. Students who complete this associate degree option or the related certificate may find opportunities in property management companies, community associations, and corporate venues. Students will learn the operation of income-producing commercial and residential properties, the assessment and application of green technologies as they relate to income properties, develop the skills and knowledge requisite to real estate licensure and develop the skills for financing properties. Students may also choose to intern at a property management or real estate firm to complete this course of study.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Describe and discuss the global dimensions of business, including socio-cultural, political, legal, technological and economic environments.
2. Identify and examine major theories in management and their use in organizational contexts;
3. Understand and apply business concepts related to workforce and customer diversity.
4. Effectively communicate in a business setting;
5. Understand and evaluate ethical issues and situations;
6. Research, critically evaluate, and interpret information to solve problems and make business decisions;
7. Demonstrate teamwork and leadership skills;
8. Demonstrate proficiency in the use of information technology;
9. Perform mathematical procedures to analyze and solve business problems; and
10. Create a professional development plan that fosters personal and professional growth and contributes to life-long learning.

Additionally, graduates of the Associate in Science will complete the comprehensive learning outcomes of the General Education components.

Option specific outcomes:

Students will demonstrate knowledge of the core concepts of the particular option chosen.

Graduation Requirements

In addition to the general graduation requirements of Goodwin College as published in this catalog, students in the Associate of Science in Business Administration degree must maintain a GPA of 2.3 in the major and 2.0 overall.

BUS 146	Green Technologies in Real Estate	3

Sophomore Year

BUS 242	Financing Principles of Property	3
BUS 246	Principles and Practice of Real Estate	3

Certificate Programs

Students entering a direct enroll certificate program in Medical Office Management, Non-profit Management, or Property Management and Acquisition must take the Accuplacer assessment if they have not successfully taken 6 college credits, including a college level English or math. The Accuplacer is used for assessment purposes only and not for determining prerequisites for program enrollment. Students who have completed the equivalent of ENG 101, MATH 098 and CAP 110 are more likely to find success in these certificate programs. Students not meeting the recommended Accuplacer

levels are encouraged to take tutorials in English, math and computer literacy before starting course work in a certificate.

Criminal Justice

Associate in Science

Modern criminal justice professionals must be educated in a vast array of subject matter that reaches far beyond what is learned in the academy. Goodwin College developed the Criminal Justice program with the intent of offering students a hands-on experience as well as a traditional class room education. The combination will make them well-rounded and capable of understanding today's changing criminal justice system.

The Associate Degree in Criminal Justice provides students the opportunity to experience and learn about all aspects of the criminal justice system. The program will develop the critical thinking skills necessary for modern law enforcement, security, emergency response and investigative professions. Students will be exposed to contemporary policing issues as well as the historical development and future of criminal justice. The Criminal Justice program offers a unique opportunity to focus elective courses on homeland security, computer crime, forensics or law enforcement, in addition to the contemporary law enforcement subjects.

Upon completion of the program, students should be prepared for entry-level positions or advancement in a criminal justice profession. These career opportunities may be in areas such as federal, state, or municipal law enforcement, corrections and security, and include jobs such as Customs and Border Protection (CBP), Drug Enforcement Agency (DEA), Immigration and Customs Enforcement (ICE), Transportation Security Administration, Federal Bureau of Prisons, and private and personal security agencies.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Explain the basic structure and functions of the American Criminal Justice System, including the juvenile justice system.
2. Discuss the development of the corrections system in the United States, including the systems of probation, parole and community supervision.
3. Identify the structure and function of the Federal and State court systems.
4. Demonstrate knowledge of the development of criminal law and criminal procedure.
5. Discuss the effects of a culturally diverse society on the development of the Criminal Justice System.
6. Understand the ethical and legal issues of criminal justice professionals.
7. Assess the basic issues and problems in policing, the courts, and corrections in America.
8. Identify the major sociological theories that may explain criminal behavior and delinquency

Additionally, graduates will complete the comprehensive learning outcomes of the General Education components.

Graduation Requirements

Students must complete the Criminal Justice major core courses with a minimum grade of "C-" in each course and a cumulative GPA of 2.3. Students must complete all portions of the Portfolio. The Portfolio documentation will include a Self-Assessment for each course and Self-Reflection for each major project. Students can not complete the courses without submitting the related Portfolio documentation. In addition, students must complete all of the general graduation requirements as stated in the catalog.

Curriculum

Homeland Security

Associate in Science

Before the terrorist attacks of September 11, 2001, there was no career field called "homeland security" and no need for a collegiate level program. Our safety and security were entrusted to the well-recognized public

safety agencies such as law enforcement, fire service and the myriad of local, state and federal criminal justice agencies.

Today, homeland security is a composite of many different fields that individually respond and manage natural and man-made disasters. The mitigation, preparation, and response to disasters require due diligence, training, and a certain amount of expertise in order to ensure the safety and security of our communities.

The Associate in Homeland Security program provides an understanding of a wide range of topics including aspects of emergency planning and security, fire service, corrections, emergency management, first responders, private and personal security, computer security, and cyber-crime investigation and prevention. The program provides students with the necessary skills and academic knowledge to gain entry-level positions in various law enforcement, fire service, federal, state or municipal law enforcement agencies, diplomatic security, and customs border protection.

Criminal Justice Option

Law enforcement and Criminal Justice professionals are often the first line of defense against disasters in our communities. Unlike traditional Criminal Justice curriculums, students will be exposed to the basics of homeland security as well as specific criminal justice courses. It is our belief that this will make graduates more well rounded, more capable of addressing the threats in today's society, and more valued as a result of their receiving a background in this area as well as contemporary policing subjects.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Provide the students with knowledge and skills of the Homeland Security fields of concentration, including impact upon local communities and society, and organizational structure and operations;
2. Display an understanding of contemporary issues affecting national, state, and local community security;
3. Present a basic understanding of operational requirements, social and economic impact, and legislative consequences of Homeland Security;
4. Emphasize the processes necessary for successful implementation of Homeland Security programs;
5. Examine the ethics and responsibilities of professionals in Homeland Security and related fields; and
6. Prepare for further academic pursuits and careers in public and private sectors.

Additionally, graduates will complete the comprehensive learning outcomes of the General Education components.

Graduation Requirements

Students must complete the Homeland Security major core courses with a minimum grade of "C-" in each course

and a cumulative GPA of 2.3. Students must complete all portions of the Portfolio. The Portfolio documentation will include a Self-Assessment for each course and Self Reflection for each major project. Students can not complete the courses without submitting the related Portfolio documentation. In addition, students must complete all of the general graduation requirements as stated in the catalog. Associate in Homeland Security.

Human Services

Associate in Science

The field of human services offers a wide variety of career opportunities for people who have a strong desire to help others. Professionals provide a broad range of services that assist people to meet basic human needs, enhance their quality of life and address issues

pertaining to human growth and development. Human Service professionals promote positive change in individuals, families and communities and, by providing services and enhancing opportunities, assist them in overcoming challenges and barriers that they face in their daily lives.

All students in the Human Services program take courses that build core competencies utilized in the vast majority of human service occupations, among them: performing intakes and assessments; conducting interviews and counseling; providing case management; practicing with professionally recognized ethics, values and cultural competence; understanding the psychology of individuals and groups; and, performing effective advocacy.

As students progress through their program they are exposed to a wide array of populations typically served by human service professionals. Through coursework, interactions with professors who are also practitioners, guest lecturers and field trips to local human service organizations, students will begin to focus their degree on the specific population(s) they choose to work with when they begin their career. This could include children, youth, older adults, families; people with mental illness, developmental, intellectual or physical disabilities; substance abusers and families of those individuals; people with learning disabilities; individuals in the criminal justice system; persons with hearing or visual disorders; disabled veterans; at risk populations such as those who are homeless, abused and neglected children, and people in abusive relationships. Students may also choose to focus their degree on assisting people to meet basic human needs such as securing food, housing and employment; or, by performing advocacy work on behalf of the people they serve. New careers in human services are emerging every day and successful graduates of the program will be prepared to meet the challenges and experience the rewards that they offer.

The culminating course for human service students is a 180-hour internship where they will apply their learning at a local human service organization. This is a comprehensive yet focused experience that is based on specific learning objectives developed in collaboration with the student, faculty and the cooperating human service organization. With our extensive connections to the regional human service community, we seek to match students with organizations that offer the services that they would ultimately like to provide during their careers.

During the final semester before graduation students will sit for a "presentation of competence" before faculty members and representatives of the Human Services Program Advisory Board. At the presentation, students will submit documentation and be asked questions designed to assess their mastery of the Human Services program outcomes.

Students completing an Associate in Science in Human Services may choose to continue their studies in a range of baccalaureate programs including Human Services, Social Work, Psychology, Rehabilitation, Counseling,

Youth Development, Gerontology, Criminal Justice, Recreation Therapy and Education among many others.

The certificate program is designed for students who are currently working in the field who want to develop additional skills for the profession. It is also a good option for students who are unable to pursue an associate degree at this time but who wish to develop basic competencies that might enable them to secure an entry-level position at a human services organization.

Prospective students should be aware that some human services organizations require background checks prior to making an offer of employment.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Discuss the history and scope of human services;
2. Understand various human systems, including individual, interpersonal, group, family, organizational, community and societal and apply appropriate skills when working with those systems;
3. Demonstrate effective communication and critical thinking skills;
4. Plan services, facilitate interventions and evaluate the outcome of services for those served;
5. Perform professional responsibilities in accordance with the values, ethical and legal standards of the human services profession; and
6. Successfully apply the knowledge, skills and competencies of entry-level human services professionals.

Additionally, graduates of the Associate in Science will complete the comprehensive learning outcomes of the General Education components.

Graduation Requirements

Students must complete the Human Service major core courses and PHIL 105 with a minimum grade of "C-" in each course and a cumulative GPA of 2.3. In addition, students must complete all of the general graduation requirements as stated in the catalog.

Department of Nursing

Bachelor in Science in Nursing (RN to BSN Completion Program)

Associate in Science in Nursing

Mission Statement

The Mission of the Department of Nursing is derived from the Mission of Goodwin College. It has as its focus the educational preparation of students to become Nurses who are life-long learners. The Department is responsible for the implementation of two nursing programs; the RN to Bachelor of Science in Nursing Degree and Associate in Science in Nursing. The Department provides an atmosphere whereby its diverse student population can grow intellectually by promoting critical thinking skills, personal development, and community involvement. The Nursing Department's curriculum provides for a technical education foundation upon which each student of nursing may continue to build their professional nursing career by integrating theory and research into professional nursing practice.

Bachelor in Science - RN to BSN Completion Program

Program Description

The RN to BSN Nursing Program at Goodwin College is specifically designed for the Registered Nurse student who wants to complete the baccalaureate degree in nursing. Classroom and clinical experience are designed to meet the RN student's adult learning needs. Up to thirty-five (35) nursing credits may be awarded through the Connecticut Articulation Agreement upon satisfactory (C+ or better) completion of NUR 300 Foundations of Professional Nursing.

Only students with an RN license may register for NUR 300-400 level courses.

Baccalaureate Nursing Education

Baccalaureate nursing education prepares nurses to practice in a variety of settings by providing them with knowledge and skills that are generalizable and transferable to multiple settings.

The faculty believes that baccalaureate nursing education is built upon a foundation in the arts and sciences that provides an appreciation for diverse perspectives and experiences as well as an understanding of values and ethics and an understanding of the physical world and the scientific

method. Liberal education provides a grounding that ensures that nurses practice with a broad-based knowledge that enables them to function as educated persons.

Baccalaureate nursing education:

- Facilitates the development of professional values and value-based behaviors that guide the nurse's interactions with patients, families, peers and society. This education emphasizes the provision of compassion and appropriate care, a concern for human dignity and the welfare of others, a respect for patients' rights to make decisions and a concern for social justice;
- Provides opportunities for the development and clarification of values, the development of assessment, evaluative, teaching and communication skills, the development and refining of technical skills that are required for delivery of quality nursing care and the development of problem solving and critical thinking skills;
- Prepares nurses to function as active and knowledgeable participants in the health care delivery system. Students learn about organization and finance of health systems and how to participate in and influence political and other processes that affect health care delivery; and
- Prepares nurses to function as global citizens with an understanding of transportation and information technologies that link parts of the world. This education prepares the graduate with knowledge and skills relating to effects of disease transmission and treatment within a global context.

Admission Requirements

Admission is based upon the following requirements:

1. Applicants must have received a nursing diploma or associate degree from an institution accredited by an agency recognized by the Department of Education or the Council for Higher Education Accreditation.
2. For acceptance into the RN to BSN program, the applicant must hold a current Registered Nurse license in the state where the clinical experience will be completed.
3. **Completion of the application for admission into Goodwin College.** Applicants to the nursing program must first meet the requirements for admission and be accepted into Goodwin College.
4. **Completion of the Bachelor in Nursing Program Application.**
5. A professional resume
6. An interview with the Program Director or a faculty member.

Accepted Students

All required immunizations must be completed before the start of the clinical nursing courses. If a student has

declined the Hepatitis B vaccination series, a signed declaration form must be in their file. Successful documented completion of health examination prior to beginning clinical courses.

Students are required to maintain current certification in Cardio-Pulmonary Resuscitation.(Health Provider or Professional Rescuer by the American Heart Association or the Red Cross. Proof of certification must be maintained in the student's file.

Program Outcomes

Graduates of the Bachelor of Science in Nursing Degree Program are prepared to practice professional nursing as a generalist with skills that are applicable across all health care settings. They are also prepared to enter graduate study.

At the completion of the program, the graduate will be able to:

1. Practice professional nursing from a holistic, visionary, culturally competent, fiscally responsible base, as they design, manage, and coordinate care for individuals, families, groups, communities and populations;
2. Synthesize and apply knowledge from nursing theory, practice, research, and the liberal arts and sciences to professional nursing practice;
3. Integrate and demonstrate beginning leadership and management skills utilizing critical and creative thinking, ethical decision making, and evidenced-based practice;
4. Design, manage and coordinate care to patients, families, groups and communities utilizing communication skills honed by self-awareness and self-evaluation;
5. Advocate for patients, families, groups and communities based on a respect for cultural diversity and an understanding of the impact of political and regulatory process on health care;
6. Collaborate and communicate, using a variety of modalities, with patients, families and interdisciplinary team members to maximize patient's level of wellness; and
7. Make a commitment to life-long learning by assuming responsibility for professional career planning, advanced education and active membership in the profession.

Program Highlights

- Students are assigned a nursing advisor upon receipt of application;
- Program is designed to meet the needs of the adult learner;
- Selected courses are offered in 7.5 week terms;
- Clinical experiences are individually arranged in collaboration with student, faculty, and clinical facility;
- Nursing courses may be taken while the student is completing general education courses; and
- Select courses are offered online or in "hybrid" format.

The RN to BSN curriculum can be completed full-time in 16 months, part-time in 32 months or uniquely designed to meet the specific student's needs.

Requirements for Graduation

To complete the BSN degree, the student must achieve a cumulative GPA of 2.0 or higher and a minimum of a C+ in each NUR course. In addition, the student must meet all general graduation requirements as stated in the catalog. A minimum of thirty credit hours including all upper division nursing courses must be completed at Goodwin College. A minimum of 120 credits is required for the BSN degree.

* HSC 310 U.S. Health Care Delivery Systems and HSC 350 Continuous Quality Improvement may be substituted for the nursing elective.

** A minimum of 7 credits

Students may receive up to 35 credits for previous nursing course work via the Connecticut Articulation Model. Students who do not receive 35 credits will take additional nursing elective credits to reach the required thirty-five credits.

Associate in Science in Nursing

The Goodwin College Associate Degree in Nursing (ADN) Program consists of class work and clinical practice in a variety of healthcare facilities, which will provide nursing graduates with the skills to function effectively in today's healthcare industry. It includes the opportunity for personal growth through the inclusion of liberal arts and science courses. The general education courses are supportive to the nursing courses.

This program is an organized program of studies that combines general education courses from the biological, social and behavioral sciences and the humanities, with courses in the theory and practice of nursing. The program develops the student in the process of nursing, promotes critical thinking, fosters the development of moral and ethical professional behaviors, and promotes continued self-development and personal and professional growth.

The program is designed as a progression of courses of increasing complexity that build upon one another. Therefore, the courses should be taken in the prescribed sequence. If a student fails a nursing course (s)he may repeat it one time. However, only one course may be taken twice. If a Students' clinical attendance and/or performance are deemed unsatisfactory by the faculty they are at risk for failing the course.

Admission Requirements

These admission requirements are in effect for students applying to the nursing program for the January 2011 cohort and later.

Only students admitted to the program may enroll in nursing courses. It is important to note that not all qualified candidates can be offered admission to the nursing program due to the limited number of places

available. Prospective nursing applicants are strongly advised to attend a Health Science Information Session conducted by the college. Please call the Admissions Department for dates and times of upcoming sessions. Students may enter the College at any time to complete the prerequisites required for admission.

Admission is based upon completion of nursing prerequisites and other requirements. All requirements must be completed before enrolling in Nursing 100. Final selection is based on a Selection Point System as presented at the end of this section. Students may apply to the nursing program as many times as they wish. Any submitted applications that do not meet the minimum required GPA and the required score on the National League for Nursing (NLN) examination being utilized as the pre-admission exam will not be counted as an application.

1. Complete the application for admission into Goodwin College. Applicants to the nursing program must first meet the requirements for admission and be accepted into Goodwin College.
2. Complete the Nursing Program Application.
3. Take the NLN Exam being used for pre-admission. This examination is administered at Goodwin College three times a year, (January, May and September) The cost of the Exam is the responsibility of the applicant. Students may only register for the Exam when they are submitting an application or reactivating an application that is already on file. It is the students responsibility to follow the deadlines and instructions posted on the application. All questions regarding Exam registration must be directed to the Nursing Department or refer to Goodwin College web site [www.goodwin.edu] for Exam dates and deadlines. Students may take The Pre-Entrance Examination as many times as they wish. Students must score at **50 percent or higher on this exam** to be considered for admission.
4. Earn a minimum GPA of 2.7 in the most recent course work (college). College GPA is based on a minimum of 12 completed credits at Goodwin College.
5. Complete the required College Placement Evaluations. Applicants must qualify for ENG 101 in order to enter the nursing program. Any remedial courses required as indicated by the placement evaluation results must be completed before entering the nursing program.
6. Complete the following prerequisite courses with a minimum grade of "C":
 - a. MATH 125 (Goodwin College) or higher or score into a college level math on the college placement test.
 - b. Chemistry - CHEM 101 (Goodwin College) or equivalent.
7. Complete the following prerequisite courses with a minimum grade of "C+" or better:
 - a. Biology - BIO 211, Anatomy & Physiology I, (Goodwin College) or equivalent completed within the last five years.
 - b. BIO 212 Anatomy & Physiology II (Goodwin College) or equivalent completed within the last five years.

c. BIO 120 or BIO 121 (Goodwin College) or equivalent with a laboratory component is the prerequisite for BIO 211. (Note: Applicants meeting all other requirements can be admitted conditionally without completing BIO 212. However, this course must be successfully completed prior to starting the nursing program)

91 - 95% 9
96 - 99% 10

Community Service

15 - 29 hours 1
30+ hours 2

Total possible points 27

Any pre-requisite courses transferred from another college must be equivalent to Goodwin College courses and must meet the grade requirement of C+ as previously stated.

Applicants are strongly advised to complete Microbiology (must be completed with a C+ or better) prior to entering the Nursing program. If a student takes NUR 100 and Microbiology together and then decides to withdraw from NUR 100 they will need to reapply to the nursing program. Microbiology must be completed by the end of NUR 110 in order for students to advance to NUR 200.

Applicants will be notified of acceptance approximately two (2) months prior to the start of the semester.

Nursing applicants who have satisfied all of the admission criteria will be selected according to the point system as specified below:

	Score
Previous College Education	
Associate Degree (60 Credits)	2
Bachelor's Degree	3
Master's Degree	4
Completion of Nursing Curriculum Requirements at Goodwin College or courses relevant to Nursing or transferable for a BSN

86 - 90%	8

Accepted Students

Once accepted, students are required to submit a \$500 non-refundable tuition deposit to hold their place in the class. Students must obtain their own Mal-practice Insurance and also become members of the National Student Nurse Association (NSNA).

Admitted students must submit a medical examination report by a physician which describes the student's physical and emotional health, two weeks prior to starting the program. All required immunizations must be completed before the start of the first Nursing course excluding the Hepatitis B vaccine series which may be in progress. If a student elects to not have the Hepatitis B vaccine series, a signed declination form must be in their file.

Students are required to become certified in Cardio-Pulmonary Resuscitation (Health Provider or Professional Rescuer) by the American Heart Association or the Red Cross before entering the Nursing program and must maintain certification throughout the nursing program. The cost related to obtaining and maintaining CPR certification is the responsibility of the student. Proof of certification must be submitted annually.

The Connecticut Articulation Model

The Connecticut Articulation Model, developed by the Connecticut League for Nursing (CLN), provides the mechanism for licensed practical nurses (LPNs) and registered nurses (RNs) to continue their education.

LPNs who currently hold a CT license and are accepted into the Goodwin College nursing program may take a 3-credit "Bridge" course developed by the CLN and administered through Charter Oak College via distance learning. This is followed by a 1-credit course at Goodwin College to validate clinical and other skills. The LPN who successfully completes both these courses is awarded 12 credits and will begin the nursing courses with Nursing 200. LPNs apply in September for the January semester and in January for the May semester. LPNs adhere to the same admission point system as other applicants.

For more information on the Connecticut Articulation Program and how it is implemented at Goodwin College, please contact the Nursing Department.

Nursing Department Policies

Policies specific to the Nursing program may be found in the Nursing Department Student Handbook.

Requirements for Graduation

Seventy-one (71) semester credit hours are required for graduation from the nursing program. A student needs to complete all required Nursing courses and science courses with a "C+" or better and meet all other general graduation requirements as stated in the catalog.

For students who entered the nursing program prior to 2012, any nursing courses taken in September 2012 or after, must be completed with a C+ or better.

For students entering the nursing program in September of 2012 or after, a C+ or better will be required for ALL nursing courses.

For students entering the college in September 2012 or after, who are seeking admission to the nursing program, BIO 211, BIO 212 and BIO 235 must be completed with a C+ or better.

A student is not considered a graduate until (s)he scores at least "69" on the National League for Nursing Exit Exam. The exam may be attempted twice. If the student is not successful, (s)he must work with faculty and achieve an 80 percent on three (3) practice National Council Licensure Examination (NCLEX) exams. These students may then re-attempt the exam twice. If they still do not achieve the desired score, they will have failed out of the program.

Program Outcomes

Upon successful completion of all program requirements, graduates will be able to:

1. Practice within the ethical, legal and regulatory frameworks of nursing and the professional standards of nursing practice;
2. Demonstrate accountability for nursing care given by self and/or delegated to others;
3. Utilize critical thinking to assess client status, needs, responses and resources in a comprehensive fashion while considering the client's values, customs and culture;
4. Utilize therapeutic and professional communication skills and channels when interacting with clients and families to achieve positive client outcomes and communicate essential information throughout the nursing process;
5. Plan and implement client care that is accurate and safe in diverse healthcare settings and utilize information technology to support the planning and provision of client care;
6. Perform nursing skills competently and in ways that protect and promote the dignity of the client and maintain client physical and psychological safety;
7. Identify the contribution of social, political, economic, and other forces on the healthcare environment and

client care, and provide comprehensive care based on an understanding of these forces;

8. Serve as a positive role model for the nursing profession within healthcare settings and the community at large;
9. Collaborate with clients and families and other members of the healthcare team and work cooperatively with others to achieve client and institutional goals;
10. Effectively and efficiently manage client care by coordinating the implementation of individualized client care plans, facilitating the continuity of client care across various healthcare settings, delegating and supervising aspects of client care provided by assistive personnel, and adapting client care to changing settings and systems; and
11. Utilize a process of self-evaluation that fosters personal and professional growth and contributes to life-long learning.

Additionally, graduates will complete the comprehensive learning outcomes of the General Education components.

Curriculum

Associate in Nursing

General Education Requirements - 25 credits

ENG 101	English Composition	3
ENG 1XX	Writing Elective	3
CAP 1XX	Computer Literacy Elective	3
COM 1XX	Oral Communication Elective	3
PSY 112	Introduction to Psychology	3
SOC 101	Introduction to Sociology	3
BIO 211 *	Anatomy and Physiology I	4
HUM	Humanities Elective	3

Non-Nursing Core - 11 credits

BIO 212	Anatomy and Physiology II	4
BIO 235 *	Microbiology	4
PSY 212	Lifespan Development	3

Nursing Major Core - 35 credits

NUR 100	Nursing Skill Development	6
NUR 110	Adults and Wellness Continuum I	6
NUR 200	Adults and Wellness Continuum II	7
NUR 210	Families and Wellness Continuum Across the Lifespan	7
NUR 220	Integration of Nursing Skills: Adults with Complex Health Problems	9

Total Credits in Program **71**

* There may be a pre-requisite course that must be successfully completed prior to taking the course. Please see course descriptions in this catalog. This table reflects core credits of the ADN Program per state regulation.

Online Studies

Goal of the Online Studies Department

To provide our online students with interactive educational online experiences that are engaging and stimulating for strong learning.

About our Online Programs

Our online programs offer a wealth of multimedia-driven content, providing the authentic skills employers are looking for.

These online courses offer the identical level of interactivity and engagement that students receive in a traditional classroom setting.

Online Studies System Requirements

Students enrolling in online studies programs use Blackboard for delivery of all courses and services. Online students complete an extensive online orientation course prior to starting their first online course.

In order for students to successfully access Blackboard from their home computers, they should have access to Microsoft Office 2007 or higher and will need the following:

System Requirements

In order for students to successfully access Blackboard from their home computers, they will need the following:

1. **Operating Systems:** (Any of the following): Windows XP, Vista, or 7; Mac OSX 10.5 or 10.6
2. **Browsers** (Any of following): Internet Explorer 6, 7 or 8 for Windows, Firefox 2, 3 or 3.5, and Safari 2.0 and 3.0. Must have Java 5 and JavaScript & Cookies must be enabled.
3. **Media plugins:**(Free Adobe Flash, Acrobat Reader).
4. **Additional Items:** Certain courses require students to record themselves using a form of video and audio.

Books can be ordered online at <http://www.bkstr.com/>

Continuing Education Programs

English as a Second Language Certificate

The objective of the stand-alone ESL program is to enhance the English-language proficiency of individuals who have pre-existing vocational knowledge, training, or skill, but cannot use that knowledge, training, or skill because of their English speaking deficiency.

All ESL students will take the CASAS appraisal test during orientation to determine the entry level of ESL instruction. ESL courses are sequenced and delivered in four levels consisting of four courses each. The four courses of each level are taken concurrently. Students are placed in levels according to their scores on the CASAS Survey Achievement Pre-test.

If a student enters the program at Level 2, 3, or 4, he/she will receive Advanced Placement credit for the lower level courses.

Students completing Level 2, 3, or 4 are administered the CASAS Survey Achievement Post-test as an exit examination to measure competency.

The 24 institutional credits received for the ESL program cannot be applied or transferred to any degree program at Goodwin College.

Admission Requirements

Applicants may self-certify that they have obtained a high school diploma and are not required to submit an official high school transcript.

Program Sequence of Courses

Course No.	Title	Credits
Level 1		
ESL 010	Beginning English I	1.5
ESL 011	English Vocabulary Studies I	1.5
ESL 012	English Conversation Practice I	1.5
ESL 013	ESL Survival Skills I	1.5
Level 2		
ESL 020	Beginning English II	1.5
ESL 021	English Vocabulary Studies II	1.5
ESL 022	English Conversation Practice II	1.5
ESL 023	ESL Survival Skills II	1.5
Level 3		
ESL 030	Intermediate English I	1.5
ESL 031	Reading Skills and Strategies I	1.5
ESL 032	Oral Communication Techniques I	1.5
ESL 033	English Writing I	1.5

Level 4

ESL 040	Intermediate English II	1.5
ESL 041	Reading Skills and Strategies II	1.5
ESL 042	Oral Communication Techniques II	1.5
ESL 043	English Writing II	1.5

Total: 24 institutional credits; 16 courses; 32 Weeks - Day Classes; 52 Weeks - Evening Classes

Course Descriptions

The course numbering system has two parts that identify both the discipline and the level of difficulty of the course.

For example: XXX – 000

XXX are the letters of the course specialty such as CAP for office Computer Applications, MED for medical science, CST for computer systems, etc. 000 are the numbers of the course – courses beginning with the digit “0” are foundational courses. These are 0-credit courses and do not count towards the credit requirement for a degree. Courses beginning with the digit “1” are credit courses at the introductory level, and courses beginning with the digit “2”, “3”, and “4” are advanced level courses.

The following codes found at the end of course descriptions denote the perspectives, competencies and requirements the course fulfills:

CS - Communications Systems perspective; **C** - Cultural perspective; **A** - Analytic perspective; **S** - Social Sciences perspective; **G** - Global perspective; **mc** - multicultural competency; **e/p** - ethical/philosophical competency; **aw** - advanced writing competency; **comm** - communications requirement; **comp** - writing course requirement; **cl** - computer literacy requirement; **r** - research paper requirement, **w** - global perspective world requirement; **us** - global perspective United States requirement.

The symbols **F**, **Sp**, and **Su** (Fall, Spring and Summer) indicate which semester courses will be offered.

The * indicates the course is offered every **odd** year. The ** indicates the course is offered every **even** year.

Courses are offered in three modalities. Almost all are offered as traditional residential courses. Many are also offered online or in a hybrid or blended format. Hybrid courses usually meet four to five times on campus during the semester. The remainder of the course work is done in an online format. Course offerings for each semester are published approximately twelve weeks prior to the beginning of the semester and are listed. Courses are designated in this publication as (H) for hybrid or (O) for online. Course with no designation are offered in the traditional residential format.

Please note: Students placing into Foundational English courses will need permission from their advisor to register for any college level course work.

ACC 101 - Principles of Accounting I **3 credits** (PREREQUISITE: MATH 098; CAP 110)

This course is an introduction to accounting using the double-entry system with journals, ledgers, worksheets, and financial statements. Students will learn to journalize transactions, post to the general ledger, prepare financial statements and prepare the closing process. This course

will prepare students to account for receivables and uncollectible accounts. Through the use of prepared statements and a corporate annual report students will learn the Calculation of Current Ratio, Debt Ratio and other financial statement ratios. **(F, Sp)**

ACC 110 - Applied Accounting **3 credits** (PREREQUISITES: MATH 098; CAP 110)

This course is designed to introduce the basic principles of accounting analysis to the non-accounting major. Focusing on the knowledge and skills a manager needs to understand standard financial documents produced by accountants, students will develop an understanding of financial topics including current assets, plant assets, depreciation and amortization of intangible assets. This course will also discuss accounts receivables, payables, inventory and cost of goods sold. Students will prepare and perform analysis of financial statements. Financial ratios will be introduced as an integrated analysis. Students will learn to read and understand an annual report. **(F, Sp)**

ACC 210 - Principles of Accounting II **3 credits** (PREREQUISITE: C- or BETTER IN ACC 101)

This course is designed to further the study of generally accepted accounting principles. Accounting for inventory, plant and intangible assets, depreciation and amortization, accounts receivable, long-term assets, partnerships, and corporations will be covered. Students will be assigned a project involving analysis of an annual report of a corporation. **(Sp, Su)**

ACC 220 - Managerial Accounting **3 credits** (PREREQUISITE: C- or BETTER IN ACC 101)

This course provides a basic understanding of the role of accounting information in the business decision-making process. This course is designed to provide students with a focus on accounting from the management perspective. Students will improve their decision-making skills, and to assist them in understanding how to use accounting information to make quality business decisions. Students will learn to calculate break-even point, target net income, job-order and process costing and to use accounting in a manufacturing environment. Students will learn to prepare reports with recommendations to management regarding financial decisions. **(Sp)**

ASD 088 - Tools for Success **0 credits** (COREQUISITE: ENG 088)

This course is designed to support students as they develop the skills necessary to transition to college. Students will discuss the benefits of higher education, become familiar with a college setting, and learn the technology needed to access instructional and support services. Emphasis will be placed on self-assessment, goal setting and the creation of a life and career plan. Course

activities will reinforce skills learned in other classes as well as help students develop personal networks, problem solving skills and effective study habits that will better position them to take control of their future. **(F, Sp, Su)**

ASD 120 - The College Experience

3 credits (PREREQUISITE: NONE)

This provides students with the skills and knowledge required to succeed in college. The course engages students in the college community and prepares students to become leaders, self-advocates and active participants in their education. Topics covered include time management, critical thinking, test preparation strategies, information literacy and technology skills. Students will demonstrate civic responsibility by completing a community learning project. **(F, Sp, Su)**

ASL 101 - Beginning American Sign Language

3 credits (PREREQUISITE: NONE)

This course introduces students to the fundamentals of American Sign Language (ASL). ASL is a conceptual language with its own grammar and structure and not merely encoded or fingerspelled English. Students will experience and acquire ASL skills through conversations, group activities, role play and interpreted music. This class will also address the various aspects of Deaf culture, such as sociology, education and theater, with weekly readings and discussions. **(C, F, Sp)**

ASL 201 - Sign Language II

3 credits (PREREQUISITE: ASL 101)

This course is a continuation of Beginning American Sign Language I. Students will continue to acquire the fundamentals of ASL, but with more nuanced usage. Unique conceptual grammatical elements such as classifiers, that are hand shapes representing a specific subject, will be explored and emphasized during this semester. Students will experience and acquire ASL skills through conversations, group activities, role-play and interpreted music. This class will also continue to address the various aspects of Deaf culture, such as current issues, sociology, education and theater, with weekly readings and discussions. **(C, Sp, Su)**

BIO 101 - Concepts in Human Biology

3 credits (PREREQUISITE: NONE)

This 45- hour course provides an overview of the organ systems of the human body and basic concepts of cell biology and structure, including the study of anatomical and physiological interrelationships; organization of cells, tissues and body systems; and structure and function of muscular, skeletal, endocrine, lymphatic, digestive, respiratory, urinary, nervous and reproductive systems. The course covers examples of diseases of each body system as well as the relationship of nutrition and metabolism to the digestive system. This course does not fulfill the requirements for the Nursing and Respiratory Care programs. **(A, F, Sp, Su)**

BIO 108 - Anatomy and Physiology I for Paramedics

3 credits (PREREQUISITE: NONE)

This course is a study of the human body and its biological organization specifically designed for students entering the emergency medicine service fields. Students will learn the basic function of living organisms; identify the cellular levels of organization and the organ systems of the human body. Emphasis will be placed on homeostasis as well as disease process. **(A, F)**

BIO 109 - Anatomy and Physiology II for Paramedics

3 credits (PREREQUISITE: BIO 108)

This course expands upon the knowledge acquired in Human Anatomy and Physiology I for Paramedics, BIO 108. Students will concentrate on a systematic approach to the human organism, including the body as a whole, its major organ systems, their inter-relations and how they change throughout a person's life. Additional emphasis will be placed on clinical and health related topic as they apply to the care of the patient in the emergency medical services field. **(A, Sp)**

BIO 120 - Human Biology

4 credits (PREREQUISITE: High school science with a lab, placement in ENG 101 and MATH 099 or completion of SCI 110, placement in ENG 101 and MATH 099 or DEPARTMENTAL PERMISSION)

This course introduces the basic principles of human biology. Lectures topics include: chemical basis of life, cellular organization and function, physiological regulations, genes and the basis of heredity and evolution. In addition, various organ systems and their interrelationships will be explored. The laboratory portions of the course are coordinated with lecture content and involves some dissection. Formerly listed as BIO 100. **(A, F, Sp, Su)**

BIO 121 - General Biology

4 credits (PREREQUISITE: High school science with a lab, placement in ENG 101 and MATH 099 or completion of SCI 110, placement in ENG 101 and MATH 099 or DEPARTMENTAL PERMISSION)

This course introduces the principles and concepts of biology. Emphasis is placed on basic biological chemistry, cell structure and function, metabolism and energy transformation, DNA, genetics, evolution, classification, and other related topics. Laboratory exercises are integrated with material offered in lecture. No dissection is required. **(A, F, Sp, Su)**

BIO 211 - Anatomy and Physiology I

4 credits (PREREQUISITES: BIO 120 or BIO 121)

This course is a comprehensive study of the structure and function of the human body. Emphasis is on the chemical, anatomical and physiological principles of cells and tissues of the human body as well as the integumentary, muscular, skeletal, and nervous system. Laboratory sessions are coordinated with the lectures and emphasize experimentation and application of the lecture content.

Experiments are supplemented by microscopic analysis of selected slides, specimen dissection, chemical experimentation and review of anatomical models. Formerly listed as BIO 110. **A (F, Sp, Su)**

BIO 212 - Anatomy and Physiology II

4 credits (PREREQUISITE: BIO 211)

This course is a comprehensive study of the structure and function of the human body. Emphasis is on the anatomy and physiology of the sensory, endocrine, cardiovascular, respiratory, immune, lymphatic, gastrointestinal, renal, and reproductive systems. Discussion will also include the diseases of these systems. Laboratory sessions are coordinated with the lectures and emphasize experimentation and application of the lecture content. Experiments are supplemented by the dissection of the fetal pig, microscopic analysis of selected slides, and review of anatomical models. Formerly listed as BIO 111. **A (F, Sp, Su)**

BIO 235 - Microbiology

4 credits (PREREQUISITE: BIO 120 or BIO 121)

This course explores the role of microorganisms in disease and health. Coverage includes the structure, function, growth and transmission of viruses, bacteria, fungi, protozoans, and helminths as well as vectors of pathogenic agents. Laboratory activities include study of the growth, detection, and analysis of various microbial and parasitic organisms. Formerly listed as BIO 210. **A (F, Sp, Su)**

BUS 101 - Introduction to Management

3 credits (PREREQUISITE: NONE)

This course provides an introduction to the basic principles of management and its relationship to customer expectations. An overview of major topics and concepts including planning and decision making, organization, staffing and leading, Information Systems, and ethics and social responsibility will be covered. **(F, Sp, Su)**

BUS 107 - Introduction to Non-profit Management

3 credits (PREREQUISITE: NONE)

This course provides students with an understanding of the basics on non-profit organizations that are driven by a purposeful mission yet founded on the principles of sustainable business models. It provides an overview of the non-profit sector and explores best practices in contemporary non-profit organizations. It examines the structures of non-profits, with consideration of each component as building blocks to a successful organization, including governing and leadership structures; accountability and performance measurement; strategies for building capacity and planning for change; and managing paid staff and volunteers. Students also explore areas of marketing, communication, fiscal management and acquiring resources in the non-profit venue. **(F, Sp, Su)**

BUS 110 - Business Law and Ethics

3 credits (PREREQUISITE: NONE)

This course is designed to introduce the legal and regulatory environment in which businesses must operate, as well as the ethical considerations which are a part of the business environment. The rule of law, laws regarding property, public and private as well as civil and criminal law will be covered. State laws regarding incorporation, licensing, tax and regulatory filings and legal recourses to public acts will be discussed. Federal and State employment and labor laws will also be an important part of this course. **(F, Su)**

BUS 115 - Human Resource Management

3 credits (PREREQUISITE or COREQUISITE: BUS 101, or BUS 107)

This course provides an introduction to the basic principles of human resource management including recruiting, hiring, training and developing the workforce. In addition, issues of performance improvement, compensation and benefits, collective bargaining and labor relations and legal aspects of human resource management will be explored. **(Sp, Su)**

BUS 121 - Personal Finance & Insurance

3 credits (PREREQUISITE: MATH 098 or equivalent)

This course presents an analysis of the many financial situations and decisions confronting an individual that will raise consumer awareness. Students learn the proper management of personal income and expenses. Additional topics include cost of credit, budgeting, and individual tax preparation. A focus on financial and retirement planning includes concepts of life, health, homeowners and auto insurance. Students also learn about the various financial products offered by banks, credit unions and financial institutions. Students become aware of the laws that effect them as employees or small business owners. **(Su)**

BUS 125 - Sales and Service I: The Fundamentals

3 credits (PREREQUISITE: NONE)

This course covers the fundamentals of sales and customer service. Students are introduced to the concepts of having a positive attitude, the importance of listening, communication styles and skills, the basic steps of the sales and the importance of quality service. They will understand the importance of developing and personal selling philosophy, understanding their product and developing a basic presentation strategy. Students will also learn the importance of ethics in selling. **(F)**

BUS 126 - Sales and Service II: Customer Focus

3 credits (PREREQUISITE: BUS 125)

This course will address the relationship between customer service and effective sales. Students will learn how to present products and services to their customers in a manner that meets their identified and unidentified needs. In addition, students will learn how customer satisfaction enhances sales success by cultivating satisfied and return customers. This course will address the importance of

listening skills, understanding customer behavior, recognizing cultural diversity in the sales environment and methods of developing customer loyalty. (Sp)

BUS 132 - Budgeting and Planning

3 credits (PREREQUISITES: C- OR BETTER IN ACC 101 or ACC 110; CAP 110)

This course provides an overview of QuickBooks accounting software. The course will cover the major points of using the software. The focus of the course will be to use the planning and budgeting tools QuickBooks has to offer. This course will include budget set-up and forecasting, and using budgeted financial statements to plan for analysis. Comparing budgeted vs. actual using QuickBooks reporting mechanisms will also be covered. Use of these tools in analysis and planning will be stressed. (F, Sp)

BUS 135 - Customer Relations in a Multi-cultural World

3 credits (PREREQUISITE:NONE)

This course takes an in-depth look at working with individuals, organizations, and communities that have varying forms of language and value systems. Students will examine personal cultural competencies, values, and communication approaches that are required for quality customer service. Strategies to understand and meet the customer's needs across cultures are discussed and analyzed. (F, Sp)

BUS 140 - International Business

3 credits (PREREQUISITE: BUS 101, or BUS 107)

This course provides an introduction to the theory and practice of international business including such topics as the global market place, the role of culture, ethics and social responsibility in international business, national trade policies, international monetary systems, managing international business and international marketing and operations management. (Sp)

BUS 142 - Introduction to Property Management

3 credits (PREREQUISITE: NONE)

This course provides a foundation in property management services and an exploration of investing in real estate. Students learn the process of developing a real estate/property management company which includes the duties of evaluating properties for investment; marketing properties; selecting tenants; contracting with owners, vetting tenants and vendors. Additionally, the role of a property manager's responsibilities and day to day duties are developed, which includes a knowledge of environmental and hazardous substance risks; the servicing and maintenance of properties; property accounting/bookkeeping and risk mitigation pertaining to property management. Students develop an understanding of fair housing and civil rights laws concerning property. (F)

BUS 146 - Green Technologies in Real Estate

3 credits (PREREQUISITE: BUS 142 or DEPARTMENTAL PERMISSION)

This course provides a foundation in facility and property management technologies with a concentration on the latest building techniques and products such as geo-thermal heating, HVAC, and solar. Students develop a knowledge of increasing energy and water efficiency, zero energy buildings; waste reduction strategies as well as demolition and waste requirements. Assessment of costs and return on investment of these technologies is stressed. Students become familiar with government regulations and other related technologies to inform the student of options in the development and maintenance of properties with an eco-friendly focus. (F)

BUS 150 - Small Business and Entrepreneurship

3 credits (PREREQUISITE: BUS 101)

This course will provide an introduction to exploring fundamental business principles with an emphasis on a practical approach to the entrepreneurial process and the skills for starting a small business. The course will include studying ethics, the global environment, forms of business ownership, starting a small business, an entrepreneur's acquisition of capital, small business management, networking, and managing financial resources. The course further explores issues with franchiseing and other business opportunities. (F, Sp)

BUS 210 - Business Planning and Development

3 credits (PREREQUISITE: BUS 101, or BUS 107)

This course covers the aspects of creating a successful business plan. The foundations for each section of the business plan developed in this class will be enhanced through the knowledge gained in other courses. This class will provide an understanding of how all the pieces; the marketing plan, the financial plan, and organizational plans - integrate into the overall business plan. The plan created will provide a practical description of the future direction of the business. (F, Su)

BUS 212 - Grant Writing

3 credits (PREREQUISITE: ENG 101)

This course is designed to provide students with a general introduction to the field of grant writing. Instruction provides information on types of grants, common requirements of grant applications, and elements of a grant application. Students will learn to convey grant needs, assess resources, design a management plan, develop a budget, and conduct evaluations. Study in this course includes common grant applications, letters of inquiry, introductory letters, written contracts, formal reports and common correspondence. Students will learn how to search for grant availability and then develop an original grant application for a project or organization of their choice. Formerly listed as ENG 110. (Cross-referenced to ENG 212). **CS comp (F, Sp, Su)**

BUS 215 - Marketing**3 credits** (PREREQUISITE: NONE)

This course examines marketing principles, strategies, and methods practiced by modern businesses and organizations including product/service distribution, promotion, and pricing. Topics include evaluating market opportunities; buyer behavior; market segmentation, targeting, and positioning; market strategy and planning; development of marketing mix; and marketing organization and control. The role of ethics, corporate social responsibility, and public policy that are intrinsic to marketing efforts will also be explored. (F, Sp, Su)

BUS 218 - Event Management**3 credits** (PREREQUISITE: BUS 101)

This course introduces the student to the underlying theoretical and practical foundations of event management. Students will learn about the historic roots of celebrations, and the four pillar approach to event leadership (time, finance, technology and human resources). Students will learn how to determine the target market and niche of an event and how the event connects to a company's strategic mission and goals. Case studies and hands on experience will further student knowledge and will promote the practice of successful event management. (F, Su)

BUS 226 - Sales and Service III: Advanced Strategies**3 credits** (PREREQUISITE: BUS 126)

This advanced course will build on the fundamental of sales and customer service. It focuses on sales language, verbal visualization, mental visualization, listening skills, follow up and service, prospecting and using telephone skills to enhance sales success. Students will also develop strategies for dealing with difficult customers. The course will also help students to recognize different market segments and how to customize their sales approach to meet the needs and expectations of those various segments. (Su)

BUS 230 - Workforce Planning and Staffing**3 credits** (PREREQUISITE: NONE)

This advanced course will examine strategies for staffing the workplace. Students will study human resource processes used to recruit and retain a workforce that will enable an organization to meet its business objectives. The process of on-boarding through assessment of performance and then to career develop are examined in light of the strategic staffing requirements of an organization. Specific duties of developing job descriptions from job analysis, forecasting and managing work flow are emphasized. (S, Su)

BUS 240 - Current Topics in Management**3 credits** (PREREQUISITE: NONE)

In this course, students will research, discuss, and analyze current trends and issues in management. A seminar in design, students will explore such contemporary topics as

the role of leadership and management in organizations, work place bullying, and discrimination in the work place. Other "hot" topics include corporate social responsibility, pay equity and work-life balance. (F, Sp, Su)

BUS 242 - Financing Principles of Property**3 credits** (PREREQUISITES: BUS 142)

This course explores a variety of financing techniques concerning the acquisition or disposal of personal and commercial real estate. Students develop a working knowledge of primary and secondary mortgage markets and review loan programs. Consideration is also given to the various costs involved in property financing, including tax and insurance structures, and closing costs, document and process fees. Federal and state financing legislation is explored. The duties of the mortgagor are included as are strategies for avoiding the default of a mortgage. Maintaining relevant financial documents for business and tax purposes is also featured. (F, Su)

BUS 246 - Principles and Practice of Real Estate**3 credits** (PREREQUISITE: BUS 142 or DEPARTMENTAL PERMISSION)

This course provides the student with all the skills necessary to buy and sell properties within the state and industry specific guidelines. Students will understand various principles of real estate such as real property, home ownership, agency, brokerage, buyer representation, interests, ownership and liens. Students will examine legal descriptions of properties and property titles; and differentiate among contracts, titles and leases. Students further learn to evaluate the quality of assessments and appraisals. Laws pertaining to fair housing and environmental issues are explored. Successful completion of this course prepares students to sit for state licensure as a real estate agent if that credential is desired. (F, Su)

BUS 257 - Institutional Development and Fundraising**3 credits** (PREREQUISITE: BUS 107 or DEPARTMENTAL PERMISSION)

This course explores both the art and science of successful revenue-building through the development of charitable contributions, grants and sponsorships. It examines the best practices in building sustainable non-profit organizations through smart development and fundraising. All facets of fundraising are addressed including the structuring of different types of gifts, endowments, capital giving campaigns, donor relations and special events. The processes for development are also examined including the use of technology and social networking to advance the sustainability of the organization. The management process of institutional development is also addressed along with the ethical implications of the profession. (F, Sp)

BUS 265 - Principles of Finance

3 credits (PREREQUISITE/CO-REQUISITES: C- or better in ACC 220)

The focus of this course is the fundamentals of sound financial management. Students will study the time value of money, risk/return analysis, cash flow management, the basics of capital budgeting, working capital management, financial forecasting, inventory management and basic financial ratios. (F, Sp)

BUS 285 - Managerial Economics

3 credits (PREREQUISITE/CO-REQUISITES: BUS 101; ECN 110)

This course covers the study of managerial decision-making using tools and principles of economic analysis. Topics such as production and cost; market structure; profit maximization; forecasting techniques; consumer behavior, and; business behavior will be stressed. Students will be expected to apply managerial economic principles in a course project. (F, Sp)

BUS 289 - Independent Study

3 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

This course enables students to conduct an in-depth study/project within their major field of study under the direction of a faculty mentor. Students requesting an independent study must demonstrate good writing and synthesis abilities. For students already gainfully employed in their field of study, and after consultation with the business program director, this course may be substituted for the cooperative work assignment as the culminating experience for the program. (By arrangement)

BUS 299 - Cooperative Work Assignment

4 credits (PREREQUISITE: COMPLETION OF ALL REQUIRED COURSES)

During a 180-hour cooperative assignment, students are provided with hands-on training and career related experience. This course provides extensive on-site experience which utilizes previously studied subjects and related skills. It gives the student the opportunity to put his/her class knowledge to practical use and to practice and enhance acquired skills. It provides the student with valuable employment experience, increasing their marketability. (By Arrangement)

BUS 310 - Targeted Marketing and Social Media

3 credits (PREREQUISITE/CO-REQUISITES: BUS 101, ENG 101)

This course covers important aspects of online marketing in the social media age with emphasis on developing targeted marketing strategies using social media. Topics will include: search engine optimization; online advertising; pay-per-click advertising; e-mail marketing strategies; mobile marketing; online reputation management; web public relations, web development, and how social media works. (F, Sp)

BUS 330 - Operations Management

3 credits (PREREQUISITE/CO-REQUISITES: BUS 101, ECN 285)

This course will lead the student through the concepts, principles, problems, and practices of operations management; an area of management focused on overseeing and designing business operations in the production of goods and services. Participants will examine best practices for the efficient use of resources to meet customer requirements and related activities including purchases, inventory control, quality control, storage, logistics and evaluation of the processes. Understanding the process that turns inputs (design, material and labor) into outputs (goods/services) is central to effective operations management. Participants will learn strategies for adding value to the process in consort with marketing activities. (F, Sp)

BUS 350 - Small Business Finance and Taxation

3 credits (PREREQUISITES: BUS 101, BUS 265, ENG 101)

This course will cover the various debt and equity financing sources available for new and existing small business ventures. The day to day financial decisions of a small business and the development of a financial plan to acquire various financing instruments will be discussed. Avoiding common mistakes in attempting to acquire funds will also be covered. Additionally, various filing options, tax entity, federal and state tax laws and payroll tax requirements of the federal and state governments will be stressed in this course. Tax implications of managerial decisions will also be discussed. (F, Sp)

BUS 355 - Financial Management for Non-profit Institutions

3 credits (PREREQUISITES: BUS 101, BUS 265, ENG 101)

This course will provide an overview of the skills required for financial planning and management of a nonprofit organization. Preparation and use of budgets and financial reports will be covered. Compliance with reporting requirements of government agencies and funding sources will also be addressed. Interpretation of financial reports and audit results will be discussed as well as how to safeguard assets, manage resources and ensure financial solvency with adequate cash flow. (F, Sp)

BUS 389 - Independent Study

3 - 6 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

This course enables students to conduct an in-depth study/project within their major field of study under the direction of a faculty mentor. Students requesting an independent study must demonstrate good writing and synthesis abilities. Through a work or defined academic experience, students will demonstrate in-depth familiarity with related concepts and techniques appropriate to the business field while demonstrating a willingness to create outcomes with minimal direction from the instructor. Outcomes may be based upon material researched and/or

experienced and appropriately documented to verify learning. Learning must be connected to legitimate business objectives. **(By arrangement)**

BUS 410 - Theory and Practice of Business Research

3 credits (PREREQUISITES: BUS 101, ECN 285, ENG 101)

This course brings the student through the research process as it applies to business. Participants learn the process of research in anticipation of entering the business arena or in preparation for advanced degree work. They explore the various research approaches and the review of existing literature. The foundations of research, from data collection to the measurement process and design, help students understand the factors behind business trends and conceptualize new possibilities for future trends and practices through the analysis of data. Reporting of research findings is also critical in the research process. **(F, Sp)**

BUS 430 - Small Business in a Global Environment

3 credits (PREREQUISITES: BUS 101, BUS 310, ENG 101)

This course explores the impact of economic issues of global significance on the small business economy. Students will examine financial events and trends in the U.S. national economy and in the local economy as they pertain to small business. Small business connections to the global economy are explored through the management of international supply-chain processes and how small business networks sell in the global market. Additionally, students will study how small businesses engage in the emerging markets as they adapt to the appropriate customs when doing business with an international client base. Legal, political, and economic issues related to conducting business across national boundaries will be stressed. **(F, Sp)**

BUS 435 - Non-profit Auditing Procedures

3 credits (PREREQUISITES: BUS 101, ACC 1XX, BUS 265, ENG 101)

This course will introduce auditing practices and procedures to non-profit management students. Policies and procedures will be analyzed to determine if they are in compliance with non-profit auditing standards. Focus of the course will be on the role of the auditing committee. Internal control, risk assessment, proper documentation and assurance of proper accounting are discussed. **(F, Sp)**

BUS 490 - Capstone: Strategic Planning

3 credits (PREREQUISITES: ALL CORE BUSINESS COURSES)

This is a capstone course in which students learn how business leaders formulate strategies for business that are global and dynamic. This course examines the process of developing vision for an organization and defining its goals in light of the organization's mission. Students will learn the process of strategic planning for long-term viability of an organization and the dynamics that drive the strategic planning process. Understanding the role each member plays of the organization plays in developing and executing

a strategic plan is explained. Developing critical decision making skills are a focal element of this course. Students also practice the skills critical to this process through team projects, strategic plan case analysis, and oral and written reports. **(F, Sp)**

CAP 110 - Computer Applications

3 credits (PREREQUISITE: NONE)

This course is designed to enhance student knowledge, usage and skills with computers and Microsoft Office software. This is not compatible with MAC. This includes creating documents in Word, spreadsheets and charts in Excel, e-mail functions in Outlook and presentations in PowerPoint. Students will also learn about the world-wide web, Internet usage and the effects of social media on society. Formerly listed as CAP 100 **CS cl (F, Sp, Su)**

CAP 230 - Database Applications

3 Credits (PREREQUISITE: CAP 110 OR DEPARTMENTAL PERMISSION)

In this course, students will develop expertise using spreadsheets and databases to prepare to take the Microsoft Office Specialist Certification exam for Excel. In addition to reviewing basic Excel skills, students will learn how to apply advanced formulas and functions, create PivotTables, manage large worksheets and analyze data to solve business or scientific problems. Students will also learn how to manage an Access database table, create forms, run queries and design reports. Students will practice using the current Microsoft Office suite efficiently by integrating data from Word, PowerPoint, Access and Excel to create integrated business documents. **CS cl (F, Sp, Su)**

CHEM 100 - Introduction to Chemistry

3 credits (PREREQUISITE: MATH 099)

The course is a survey study of chemistry. Emphasis is laid on the aspects of general, organic, and biological chemistry. The course will provide basic information about the metric system, measurements, conversions, matter and energy, nuclear radiation, chemical reactions, solutions, gas laws, acids and bases, as well as general concepts of organic chemistry, and the major organic compound groups essential for life (carbohydrates, lipids, and proteins). This course does not fulfill the requirements for the Nursing and Respiratory Care programs. **A (Su)**

CHEM 101 - Chemistry

4 credits (PREREQUISITE: High school science with a lab and placement in ENG 101 and MATH 125 or higher, or completion of SCI 110 and placement in ENG 101 and MATH 125 or higher)

This course is a survey study of chemistry. Emphasis is on the aspects of General, Organic, and Biological Chemistry. These concepts will include interactions of matter and energy, nuclear radiation, measurement, chemical reactions, solutions, gas laws, acid and bases, as well as general concepts of organic chemistry, and the four major

organic compound groups essential for life (Lipids, Carbohydrates, Proteins, and Nucleic Acids). Laboratory sessions are coordinated with the lectures and emphasize experimentation and application of the lecture content. **A (F, Sp, Su)**

CHEM 110 - General Chemistry I

4 credits (PREREQUISITE: High school science with a lab and placement in ENG 101 and MATH 125 or higher, or completion of SCI 110 and placement in ENG 101 and MATH 125 or higher)

The first semester of a two semester sequence that is an introduction to fundamentals and principles of chemistry including, but not limited to: atomic and molecular structure, measurement, chemical bonding, stoichiometry, states of matter, chemical reactions, kinetic molecular theory, chemical thermodynamics and chemical equilibrium. **A (F)**

CHEM 111 - General Chemistry II

4 credits (PREREQUISITE: CHEM 110)

The second semester of a two semester sequence that is an introduction to fundamentals and principles of chemistry including, but not limited to: intermolecular forces, chemical kinetics, acid-base equilibria, thermodynamics, redox reactions, nuclear chemistry, organic chemistry and biochemistry. **A (Sp)**

CJS 101 - Introduction to Criminal Justice and the Law

3 credits (PREREQUISITE: NONE)

This course provides a general introduction to the Criminal Justice system and the career opportunities that exist in this field. In addition students will be presented with an overview of the history, purposes, and effectiveness of Federal and State criminal law the various aspects of criminal justice. Topics include identification of the elements of a crime and an examination of specific types of crimes and their assigned penalties. **(F, Sp, Su)**

CJS 106 - Investigative Report Writing

3 credits (PREREQUISITE: ENG 101 OR DEPARTMENTAL PERMISSION)

This course combines the basics of two disciplines— investigation and report writing, and bridges the gap between them in order to teach the basics involved in writing an investigative report. Fundamental guidelines for investigative reports are established through a set of rules that are easy to understand and apply in any type of report writing scenario. Topics include note taking, describing persons and property, crime and arrest reports, search warrants, and issues in writing. (cross-referenced as HSM 106) **comp (F, Sp)**

CJS 111 - Contemporary Issues in Crime and Prevention

3 credits (PREREQUISITE: NONE)

This course will examine the cause and effect relationship between contemporary problems in our society and how

they relate to crime and prevention. Issue such as substance abuse, domestic violence, DNA testing, the ACLU and the widespread use of the Internet will be discussed in their relation to the criminal justice system and Homeland Security. (Cross-referenced to HSM 111) **(Su)**

CJS 112 - Criminal Procedures

3 credits (PREREQUISITE: NONE)

This course presents an in-depth look at the United States Constitution as it relates to the rights of victims and offenders. Due process and the procedures to protect guaranteed rights within the criminal justice system are examined. **(Sp)**

CJS 115 - Principles of Criminal Investigation

3 credits (PREREQUISITE: NONE)

This course examines the investigative process from the initial introduction at the crime scene to the in-court testimony describing the investigation as well as an in-depth study of crime scene procedures including recognition, protection, documentation, and collection of physical evidence; scene documentation, scene search procedures; and reconstructions from evidence and scene pattern. **(Sp)**

CJS 125 - Introduction to Law Enforcement

3 credits (PREREQUISITE: NONE)

This course presents an overview of law enforcement as a profession. Topics will include: patrol operations, ethics and deviance, civil liability, police-community relations and personnel systems. Students will be exposed to the fundamental aspects and current trends in law enforcement. **(Su)**

CJS 130 - Introduction to Computer Crimes and Security

3 credits (PREREQUISITE: NONE)

This course offers an introduction to information systems used within the national security system. A framework is provided for understanding the needs, types, capabilities and applications of management information systems. An overview of existing security information systems is presented with implications for the future requirements. This course will provide an overview of computer crime and the procedures forensic computing specialists, law enforcement investigators, and prosecutors must invoke to prosecute computer criminals successfully. Finally, the impact of science and technology upon security agencies and how information management systems will prepare for the latest challenges will also be analyzed and discussed. (Cross-referenced to HSM 130) **(F)**

CJS 131 - Data and Information System Security Protection

3 credits (PREREQUISITE: NONE)

This course provides a comprehensive introduction to computer security, including computer networks, issues, concepts and technologies. The core technologies of access control, cryptography, digital signatures,

authentication, network firewalls and network security services and programs are reviewed. Issues of security policy and risk management are considered. (Cross-referenced to HSM 131) (Su)

CJS 132 - Forensic Science

3 credits (PREREQUISITE: NONE)

This course is an introduction to forensic science. Students will have hands-on exposure to crime scene investigation and evidence preparation. Topics will include: fingerprinting, document evidence, blood splatter, firearm evidence and arson evidence. (F)

CJS 135 - Forensic Photography

3 credits (PREREQUISITE: NONE)

This course is an introduction to the basic principles, equipment and techniques of forensic photography. Students will learn the importance of photography and how it is used to document, preserve, and identify evidence. Students will develop skills through practical experiences. Emphasis will given to skills pertaining to photographing a crime scene and specific areas of a crime scene, such as fingerprints, blood splatter, firearms, people and vehicles. (Su)

CJS 140 - Introduction to Corrections

3 credits (PREREQUISITE: NONE)

This course examines the nature and application of corrections and punishment and provides an overview of criminological, historical, legal, and policy-oriented works. This course discusses the foundations of corrections and relates them to contemporary correctional issues. This course encourages critical thinking about the future direction corrections should take. (F, Sp, Su)

CJS 150 - Criminology

3 credits (PREREQUISITE: NONE)

This course places special focus on contemporary areas and issues such as feminist theories and feminist criminology; biological and genetic theories of criminal behavior; violence in the media; family assault and its criminalization; crimes of violence against women in America and abroad; mass murder in the United States; school violence and shootings; hate crimes and terrorism in America. Society's response to crime is covered and addresses the question of how security & freedom interface in an age of increasing globalism. (F)

CJS 210 - Criminal Law

3 credits (PREREQUISITE: CJS 101)

This course provides students with an introduction to the theory, history and purposes of statutory law. Topics will include major elements of statutory and common law offenses. The Federal and State penal code will be discussed. (F)

CJS 220 - Victimology

3 credits (PREREQUISITE: CJS 101)

This course presents an overview of victimization, to include patterns of victimization. Topics will include

victimization and the victim's perspective on crime, its causes and effects. Students will be exposed to the consequences and roles of the victim in today's criminal justice system. (Su)

CJS 225 - Basics of Interview and Interrogation Techniques

3 credits (PREREQUISITE: CJS 101)

Students will be provided the study of basic principles of all types of investigations utilized in the criminal justice system. There will be an introduction to specific knowledge in handling crime scenes, interviews, evidence, surveillance, follow-up, technical resources and case preparation. (F)

CJS 230 - Cyber Crime: Identity Theft and Internet Vulnerabilities

3 credits (PREREQUISITE: CJS/HSM 130 OR DEPARTMENTAL PERMISSION)

This course will introduce and discuss the fastest growing crime - theft of a person's identity, the techniques and various ways criminals use to steal personal information. Prevention and ways to protect one's identity will be discussed. This course will also focus on the theories and techniques for tracking attackers across the Internet and gaining forensic information from computer systems. This course includes case studies of Internet-based computer crimes and addresses limits of forensic techniques. (Cross-referenced to HSM 230) (Sp)

CJS 231 - Information System Threats/Attacks/Defense

3 credits (PREREQUISITE: CJS/HSM 130 OR DEPARTMENTAL PERMISSION)

This course provides an overview of the actors, motives and methods used in the commission of computer-related crimes and describes the methods used by organizations to prevent, detect, and respond to these crimes. (Cross-referenced to HSM 231) (Su)

CJS 232 - Computer Crime Forensics and Investigative Procedures

3 credits (PREREQUISITE: CJS 130 OR DEPARTMENTAL PERMISSION)

This course presents an introduction to modern criminalistics and investigative techniques to solve crimes. The course includes an examination and evaluation of crime scenes with scientific analysis of physical evidence. Individual and group activities relating to professional practices of forensic science and computer science will be explored throughout the semester. (Cross-referenced to HSM 232) (Sp)

CJS 235 - Principals of Personal and Physical Security

3 credits (PREREQUISITE: CJS 101)

This course will provide the student with a basic knowledge and understanding of personal and physical security to include the definitions, the need, the requirements, and review of the controls, techniques and tools. This course

introduces participants to a broad, in-depth look at security planning and procedures. Students will develop skills in intelligence collection, surveillances, perimeter and crime scene security, principles of crowd and riot control, substance abuse recognition, theft, sabotage, and espionage. Additional topics may include computer security, electronic criminal investigations, firewalls and security software, as well as crime prevention techniques. (Cross-referenced to HSM 235) (Sp)

CJS 242 - Probation, Parole, and Community Corrections in the United States

3 credits (PREREQUISITE: CJS 101)

This course offers a comprehensive look at the probation and parole process. It includes discussion of offender needs and risks, a variety of supervision programs, inmate re-entry issues and solutions, and theories of crime and rehabilitation. controversial issues are addressed and capture the conflict between the need to maximize community safety and the need to control the cost of operating prisons. Additional attention is paid to both the juvenile and adult populations and the book considers how the probation officers work with each. (F)

CJS 243 - Juvenile Justice in America

3 credits (PREREQUISITE: CJS 101)

Students will focus on the important issues, emerging trends, contemporary research, and special challenges facing juvenile justice today. This comprehensive exploration of the American juvenile justice system covers the history and philosophy of juvenile justice, the current practices for processing youthful offenders, the detention of juveniles, and the diversion of youth from the juvenile justice system. This course gives students an "up-close and personal" view of the fascinating and sometimes tragic world of the juvenile offender—and the personal, psychological and thinking processes that characterize juvenile misbehavior. (Sp)

CJS 250 - Service Learning Project

3 credits (PREREQUISITE: Departmental permission)

This course combines learning objectives with service objectives. Students will be actively involved in a community oriented service provider with an emphasis on providers related to the criminal justice field. Students will develop skills and knowledge in a learning environment and apply them to real-life situations. This course extends the learning beyond the traditional classroom and brings the students into the community. Transportation to internship sites is the responsibility of the student. (Sp)

CJS 260 - Constitutional Law

3 credits (PREREQUISITE: CJS 101)

This course provides students with the basic principles of due process, as defined by the U.S. Constitution and Bill of Rights. Students will review landmark decisions from the U. S. Supreme Court and their impact on the criminal justice system throughout history. (Su)

CJS 290 - Research Project in Criminal Justice

3 credits (PREREQUISITE: ENG 101 AND DEPARTMENTAL PERMISSION)

This course will require the student to identify an acceptable topic in Public Safety, to conduct extensive research involving the identified thesis and result in a validated conclusion. With the instructor's approval, students may work individually or in small groups toward completion and presentation of the project. (By Arrangement)

CJS 299 - Internship

3 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

This course provides a supervised internship of at least 150 hours in order to gain practical field placement experience in the homeland security area including law enforcement, fire service, corrections, public/private sector safety or security, protective services environments, or other Public Safety areas. Transportation to internship sites is the responsibility of the student. (F, Sp, Su)

COM 101 - Public Speaking

3 credits (PREREQUISITE: NONE)

This course is designed to develop public speaking and listening skills so that students may become more effective communicators. Students will learn research techniques; and how to organize, deliver, and adapt their message to an audience. They prepare and deliver several major speeches. Students also apply interviewing and group discussion techniques. CS comm (F, Sp, Su)

COM 105 - Interpersonal Communications

3 credits (PREREQUISITE: NONE)

This course introduces students to effective communications in work settings. Topics include communicating in one-on-one conversations; participating in and leading meetings; creating e-mail, phone, social media, and written communications; making presentations; and resolving conflicts. Students learn how to be active listeners, interpret body language, tailor communications to different audiences, and other skills. CS comm (F, Sp, Su)

ECE 101 - Introduction to Early Childhood Education

3 credits (PREREQUISITE: successful completion of ENG 099 & MATH 099 or equivalent or CO-REQUISITE ENG 099 & MATH 099)

This course is designed to acquaint students with the field of early childhood education. Students will be introduced to the history and philosophy of early childhood educators and programs that have laid the foundation of early childhood education and curriculum development. Students will have an understanding of social and psychological factors that influence a child overall. This course will provide students with an introductory understanding of how to develop a daily schedule in order to run an effective classroom. It emphasizes practical information that can be used in working with young children. It will help the student become aware of teacher's responsibilities and the importance of accountability. Students will learn how to observe children

and write goals and objectives. They will also learn ways that are effective in working with other early childhood professionals in the day to day running of an effective program. Students will study the family and understand the importance of making connections to family members. Modern development, research, administration, curriculum, and trends in early childhood education will be covered. This course requires an observation in an early childhood environment in order to complete assignments. (F)

ECE 102 - Health, Safety and Nutrition for Early Childhood Programs

3 credits (PREREQUISITE: successful completion of ENG 099 & MATH 099 or equivalent or CO-REQUISITE ENG 099 & MATH 099)

This course introduces students to the licensing and NAEYC requirements for creating healthy and safe environments. This course provides guidelines for establishing safe environments, room arrangement, accident prevention procedures, and sanitation guidelines. Students will examine the liability issues in childcare. This course provides objectives for developing health policies, controlling disease, solving ethical dilemmas related to health and safety, establishing proper nutrition, and responding to children's special health concerns. This course will examine legal and state guidelines governing licensed childcare programs. Students will explore ways to incorporate cooking activities into curriculum and create warm friendly settings for positive mealtime experiences. This course requires an observation in an early childhood environment in order to complete assignments. (Sp)

ECE 110 - Creativity and the Young Child

3 credits (PREREQUISITE: NONE)

This course is designed for students to become aware of the importance of creativity in the early childhood classroom and be able to design and implement activities in the classroom to foster this development. Students will review theories of early childhood education and determine how these theories relate to creativity development. Students will explore music and movement, art, sand and water, blocks, dramatic play, and more as they plan developmentally-appropriate activities for young children. This course requires an observation in an early childhood environment in order to complete assignments. (F)

ECE 120 - Math and Science for Young Children

3 credits (PREREQUISITE: NONE)

This course is designed for students to develop an understanding of early math and science concepts. Students will explore and develop materials that can be used throughout the early childhood environment. Students will become familiar with the CT. Framework and the goals and objectives related to early math and science development. Students will design developmentally-appropriate math and science explorations for young children. Students will also explore developmentally-appropriate materials and literature for young children that

foster early math and science skills and discuss the importance of the teacher as facilitator. This course requires an observation in an early childhood environment in order to complete assignments. (Sp)

ECE 140 - Early Childhood Practicum I

6 credits (PREREQUISITE or COREQUISITE: ECE 101 or ECE 102)

This course serves as a practical 240 hours of field experience that is based on the theories and learning outcomes associated with the overall Early Childhood curricula. Students will engage in project-based learning within an actual early childhood classroom that allows further exploration of professional work associated in early childhood. The course will integrate experiential learning, supervision, and reflection as students engage in defined projects within the work setting. This course will provide opportunities to practice early childhood theories, strategies, and techniques under the supervision of early childhood teachers, directors, and the instructor. It will also provide students the opportunity to return to the classroom in a seminar to discuss and evaluate their experiences. This class will enable students to learn effective methods of working in an early childhood setting. In this course, students will begin coursework towards their CDA resource file. Formerly listed as ECE 210. Not open to students who have complete ECE 210. (F)

ECE 141 - Early Childhood Practicum II

6 credits (PREREQUISITE: ECE 140)

This course serves as a continuation of the practical 240 hours of field experience learned in Early Childhood Practicum I. Students will continue to engage in project-based learning within an actual early childhood classroom that allows further exploration of professional work associated with early childhood. The course will again integrate experiential-learning, supervision, and reflection as students engage in defined projects within the work setting. This course will provide opportunities to practice early childhood theories, strategies, and techniques under the supervision of early childhood teachers, directors, and the instructor. It will enable students to learn effective methods of working in an early childhood setting. Students will be required to attend three seminars to discuss and evaluate their experiences. Students will complete their resource file for CDA at the culmination of this course. (S)

ECE 201 - The Exceptional Child and Learner

3 credits (PREREQUISITE: NONE)

This course focuses on working with exceptional students, including children who are gifted and talented and those who require special education. Students will learn methods for identifying, planning for and working effectively with such children in a regular classroom. Students will become familiar with various materials and how to adapt materials so that they are effective with working with the exceptional learner. Formerly listed as EDU 121 and ECE 201. Not open to students who have completed EDU 121 or ECE

201. This course requires an observation in an early childhood environment in order to complete assignments (Su)

ECE 210 - Observation and Assessment in the Early Childhood Classroom

3 credits (PREREQUISITE: NONE)

This course is designed for students to develop an understanding of the process and importance of observation and assessment of classroom environments, young children, and of teacher performance. Students will learn how to take appropriate observation notes and explore a variety of methods for collecting and analyzing this data. Students will learn how to create individual portfolios for young children and explore how to use the information contained in these portfolios for individual and group curriculum planning. Students will visit programs and use observation tools presented in class to assess the quality of the assigned early childhood environment. Students will practice using information to develop appropriate action plans and next steps as part of the evaluation process. Four 4-hour visits are required. (Sp)

ECE 220 - Multicultural Aspects of Early Childhood

3 credits (PREREQUISITE: NONE)

This course introduces multicultural theory as it relates to the early childhood classroom. Students will explore various pioneers in this field including Sonia Nieto and James Banks. Students will create activities that encourage acceptance and promote an anti-bias climate in the classroom. Students will explore programs that have implemented various anti-bias approaches in their classrooms. This course requires an observation in an early childhood environment in order to complete assignments. mc (Su)

ECE 221 - Social and Emotional Development in Young Children

3 credits (PREREQUISITE: NONE)

This course is designed for students to gain knowledge and understanding of social-emotional development in young children, ages birth-age 8. Students will explore attachment theory as it relates to children's development and examine how children develop socially throughout early childhood. Creating supportive environments, building relationships, facilitating transitions, and identifying children's feelings will be examined during this course. This course requires an observation in an early childhood environment in order to complete assignments. Formally listed as Social and Emotional Development for Young Children. (F)

ECE 231 - Early Language and Literacy Development

3 credits (PREREQUISITE: NONE)

This course introduces students to the language and literacy development of children from birth-age 8. Students will examine the importance of adult interaction as a way to facilitate children's early literacy skills consisting of reading, writing, speaking, and listening. Students will also

explore the various components of language: oral, written, and nonverbal. Students will learn how to plan purposeful literacy activities in the classroom where children are active participants in their learning. This course requires an observation in an early childhood environment in order to complete assignments (F)

ECE 251 - Student Teaching I

3 credits (PREREQUISITE: Departmental Permission and minimum CGPA of 2.0)

Students will participate in 113 hours of training at an approved early childhood site. Students will work closely with the mentoring teacher and assume appropriate responsibilities within the classroom. In addition to the 113-hour classroom experience, students are required to attend a 3-hour per week seminar. (F)

ECE 252 - Student Teaching II

3 credits (PREREQUISITE: Students must successfully complete ECE 251 with a C or better)

Student Teaching II is an extension of student Teaching I. In this course, students will work to complete their 112 hours of student teaching at their approved site. A student teaching experience is defined as direct involvement in a non-college classroom setting, sponsored by an institution of higher education, and jointly and cooperatively supervised agency and college personnel. Students will work closely with the mentoring teacher and assume appropriate responsibilities. In addition to the 112-hour training, students are required to attend a 3-hour weekly seminar. The completion of 112 hours and attendance at the seminars are required in order for successful completion of this course. (Sp)

ECE 270 - Supervision and Administration in Early Childhood Programs

3 credits (PREREQUISITE: None)

This course is designed to provide students with an opportunity to understand the importance and application of developmentally appropriate practices and examine the role and responsibilities of the early childhood administrator. This course will provide an overview of the policies, procedures, and leadership practices vital to the early childhood administrator's position. This course addresses planning for high quality child care and education facilities, including but not limited to staffing, financing, licensing, scheduling, policies, NAEYC accreditation, and organizing staff professional development. (Su*)

ECE 302 - Infant and Toddler Growth and Development

3 credits (PREREQUISITE: PSY 115)

This course is an in-depth study of the growth and development of young children from conception through three years old. Students will examine developmental milestones and educational theory. Students will have an opportunity to connect theory and developmental milestones to curriculum and environmental planning.

Students will learn about various approaches to working with infants and toddlers such as the R.I.E. approach and responsive caregiving. This course will also focus the many ways in which to connect with the families of our youngest children. Students will examine the findings of current brain research that impact the work with infants and toddlers. (Cross-referenced to PSY 302) (Sp*)

ECE 315 - Family-School-Community Partnerships

3 credits (PREREQUISITE: Departmental Permission)

This course explores the role of relationships between families, schools, and the communities in which families reside. Students will deepen their understanding of the importance of family involvement in the school system and examine creative strategies for including parents and families in the school. Students will also analyze contemporary family patterns and composition in order to more effectively connect with the families in their communities. Students will recognize that children are highly impacted by the environments in which they live. Topics in social studies will be explored as students have opportunities to discuss the importance of involving community partners, culture and diversity in the school system. Major theorists will be studied. This course also includes a 20-hour community volunteer project of the student's choice. (Cross-referenced to SOC 315)(F)

ECE 320 - Technology and Education

3 credits (PREREQUISITE: Departmental Permission)

This course is designed to familiarize students with the technology possibilities in education. Students will identify and locate educational technology options and evaluate their efficiency and purpose. Students will design classroom curriculum where technology is an essential component for both the teacher and the children. Students will have opportunities to observe the use of technology in education programs and will also have opportunities to use technology themselves in various programs. Students will become familiar with the National Educational Technology Standards (NETS) as developed by the International Society for Technology Education (ITSE). Students should have access to Microsoft Office and media player to be successful in this course. (Sp**)

ECE 330 - Teaching Social Studies in Early Childhood

3 credits (PREREQUISITE: Departmental Permission)

This course was designed to expose students to the broad concepts involved in teaching social studies to young children. Social Studies encompass a wide array of topics that affect individual's lives, group dynamics and the community at large. It is imperative that early childhood teachers understand the numerous influences that impact social studies in the field of early childhood education. In this course, students will examine many topics, such as but not limited to, people, places and environments, culture, community and individual development. While grasping an understanding of how to plan for student learning and

creating environments that will enhance children's knowledge of social studies concepts. This course requires an observation in an early childhood environment in order to complete assignments (Su**)

ECE 340 - Exceptional Child II

3 credits (PREREQUISITE: ECE 201)

This course is designed to promote child development and learning by familiarizing students with the characteristics and needs of all exceptional learners. A continual introduction of terms and concepts within a more narrowly defined topic area with discussions of videos, case studies, and presentations of the review of related literature pertaining to exceptional children will be engaged. These activities will add to the emergence of terms and concepts associated with special education. The concept of Inclusion as a means of educating students with special needs will be deeply discussed and students will become familiar with the historical events and social reform that laid the background for this method of instruction. Students will have opportunities to ponder opposing viewpoints on special education issues. Students will investigate the use of drugs as a means of curbing inappropriate conduct of students with special needs and recognize symptoms, modify environments, and plan appropriately so that children can be successful. A large focus of this course will be on community outreach and family involvement. (Cross-referenced to PSY 340) (Su)

ECE 370 - Leadership in Early Education

3 credits (PREREQUISITE: Departmental Permission)

This course offers students the opportunity to expand their comprehension of leadership and what it means to be a leader and mentor within education. This course will provide in-depth knowledge and understanding of leadership and advocacy within early childhood education and beyond. The goal of this course is to encourage individual leadership development and to support and nurture each student in developing and achieving their personal leadership goals. (Sp**)

ECE 402 - Children's Literature

3 credits (PREREQUISITE: ECE 101 & ECE 231)

This course is designed to acquaint students with the variety of literature available to for young children. Criteria for selecting books will be reviewed as well as the most appropriate methods for selecting books for young children. Students will review the importance of building books into the classroom curriculum and have opportunities to create lesson plans linked to various forms of children's literature. This course requires a 5-hour volunteer experience. (F**)

ECE 406 - Advanced Curriculum Planning

3 credits (PREREQUISITE: Departmental Permission only)

This course is designed for those students who have a high interest in curriculum planning. This course concentrates on individualizing curriculum to meet the needs of all children in the classroom and on building a holistic and

creative curriculum using the CT State grade level expectations for young children, the CT Preschool Curriculum and Assessment Frameworks and the Early Learning Guidelines for Infants and Toddlers. Students will explore methods of curriculum planning while focusing on the Reggio Emilia approach to young children's learning. The course is designed for students to develop an in-depth comprehension of the Cycle of Intentional Teaching and to be able to do so in a variety of early learning settings. Connecting environments with curriculum and providing evidence of their relationship to each other will be a primary focus in this course. **(Su*)**

ECE 410 - Education Research

3 credits (PREREQUISITE: STAT 167)

This course was designed to familiarize students with research reports. Students will read, analyze and critique research reports. The reports read will include experimental, descriptive, qualitative, and historical approaches. Students will learn how to write their own research report and collect the appropriate supporting data. Students will discuss the difference between qualitative and quantitative research and determine how each can be used as complementary approaches to educational research. **r (F)**

ECE 430 - Ethical Trends and Issues in Early Education

3 credits (PREREQUISITE: Departmental Permission)

This course is designed for students to take a deeper look into the field of early childhood education. Students will examine current trends and laws impacting the profession. They will analyze circumstances concerning parents, communities, and schools and discuss the ethical responsibilities and legal aspects of these situations. Students will have opportunities to ponder where the field is headed and what implications it will have on the children in our care. **(F*)**

ECE 450 - Child Study Capstone

6 credits (PREREQUISITE: 42 credits in child study and departmental permission. Minimum CGPA requirement of 2.0)

This course is designed to give students hands-on learning experiences in the field or in performing action research, at the culmination of their bachelor degree. Students will examine issues in education and advocacy during the seminar as well as share their experiences and insight. Students will use reflective practice and critical thinking techniques in this course by reflecting on readings as well as in formal debates on current issues in education. Students will have the opportunity to choose the type of final project they would like to engage in based upon their career interests. **(Sp)**

ECN 101 - Macroeconomics

3 credits (PREREQUISITES: (MATH 098 or equivalent)

This course covers a broad range of macro-economic topics in American and global economies. Topics focus on

aggregate economic activity including gross national and domestic product and national income, price levels and inflation, supply and demand, employment and unemployment, domestic savings and investment, fiscal and monetary policy, and international trade. **G w (F)**

ECN 102 - Microeconomics

3 credits (PREREQUISITES: MATH 098 or equivalent)

This course examines the segment of the economy which includes individual businesses or industries, individual consumers, and individual products. It will examine the production, allocation and distribution of goods and services in a world of scarce resources. The course will explore basic concepts of opportunity, cost, supply and demand, taxation, cost theory, perfect competition, monopoly and other types of market structures. **G us (Sp)**

ECN 110 - Principles of Economics

3 credits (PREREQUISITES: MATH 098 or equivalent)

This course provides an introduction to macroeconomic and microeconomic fundamental principles. Supply and demand, market equilibrium, scarcity and choice, factors of production, unemployment and inflation, gross domestic product and its relationship to business cycles will be covered. Price ceilings, price floors, costs and profit maximization and market structures will also be stressed. Students will understand the influence of economic principles on the domestic and global business environment. **(F, Sp)**

EDU 122 - Instructional Skills and Strategies

3 credits (PREREQUISITE: NONE)

This course will demonstrate to students how the art and science of teaching come together in an effective classroom. Students will learn the methodology of instructional techniques, including observation, evaluation, and reporting skills. Students will be introduced to the elements of teaching, including educational goals and objectives, the components of an effective lesson plan, how to manage small and large group instruction and the techniques for observing and recording students' performance. This course provides guidelines for establishing safe environments, room arrangement, accident prevention procedures, and sanitation guidelines. Students will examine the liability issues associated with childcare. This course will provide objectives for developing health policies, controlling disease, establishing proper nutrition, and responding to children's special health concerns. Emphasis is placed on writing objectives, activities goals, program goals, lesson plans, and creating thematic ideas. This class will provide an up-to-date review of teacher planning, teaching methods, and assessments. **(Sp)**

EDU 240 - Building Language Arts for Elementary Classrooms

3 credits (PREREQUISITES: NONE)

This course is designed to introduce students to topics and areas of instruction of a Language Arts curriculum for

elementary-age children. Students will explore language acquisition theory and will gain experience in planning for children's development of such language skills as comprehension, vocabulary, and beginning reading and writing. Students will learn about the process of language acquisition for English Language Learners and how to plan appropriately for their learning. (Su)

EMT-P 101 - Paramedic I

4 credits (PREREQUISITE: NONE, COREQUISITE: BIO 108)

This course introduces students to the world of advanced life support (ALS) emergency medical services (EMS), as well as provides the students with a more comprehensive view of EMS systems and careers. This course covers most of the national standard curriculum's "Preparatory" module and some of the "Operations" module. Additionally, this course introduces students to some advanced life support skills and seeks to lay the foundations required for students to develop advanced operational and clinical decision-making skills. A laboratory component provides students with an opportunity to practice and develop required competencies. (F)

EMT-P 102 - Paramedic II

4 credits (PREREQUISITE: EMT-P 101, EMT-P 110; COREQUISITE: BIO 109)

This course instructs students in the proper techniques for advanced patient assessment. After completing the assessment portion, students are introduced to advanced trauma care, reviewing concepts related to traumatic injury patterns, and paramedic trauma procedures. The course challenges students to refine their operational and clinical decision-making skills with an emphasis on clinical decision-making in trauma settings. The course covers the "Patient Assessment" and "Trauma" modules of the paramedic national curriculum, as well as one component of the "Special Considerations" module. A laboratory component provides students with an opportunity to practice and develop required competencies. (Sp)

EMT-P 103 - Paramedic III

4 credits (PREREQUISITE: EMT-P 102)

This course teaches students advanced pre-hospital care for medical emergencies. With a particular emphasis on assessments, recognition, and life-saving interventions for acute medical disorders, students will apply learned concepts and be challenged to refine their operational and clinical decision-making skills, with an emphasis on clinical decision-making in medical settings. This course covers the "Medical" module of the national standard curriculum. A laboratory component provides students with an opportunity to practice and develop required competencies. (Su)

EMT-P 110 - Paramedic Clinical I

2 credits (COREQUISITES: EMT-P 101)

The paramedic "clinical" provide opportunities for students to apply what they are learning in their classroom

and laboratory in a controlled clinical environment. The clinical courses provide a vital link between the classroom and real-world patients. Students work under the direct supervision of assigned clinical preceptors in a variety of settings, but primarily in the emergency department. Clinical experiences are taken concurrently with paramedic classroom work during respective semesters of the program. Students are required to spend 8 hours per week in the clinical setting. (F)

EMT-P 120 Paramedic Clinical II

2 credits (COREQUISITES: EMT-P 102)

The paramedic "clinical" provide opportunities for students to apply what they are learning in their classroom and laboratory in a controlled clinical environment. The clinical courses provide a vital link between the classroom and real-world patients. Students work under the direct supervision of assigned clinical preceptors in a variety of settings, but primarily in the emergency department. Clinical experiences are taken concurrently with paramedic classroom work during respective semesters of the program. Students are required to spend 8 hours per week in the clinical setting. (Sp)

EMT-P 130 - Paramedic Clinical III

2 credits (COREQUISITE: EMT-P 103)

The paramedic "clinical" provide opportunities for students to apply what they are learning in their classroom and laboratory in a controlled clinical environment. The clinical courses provide a vital link between the classroom and real-world patients. Students work under the direct supervision of assigned clinical preceptors in a variety of settings, but primarily in the emergency department. Clinical experiences are taken concurrently with paramedic classroom work during respective semesters of the program. Students are required to spend 8 hours per week in the clinical setting. (Su)

EMT-P 201 - Paramedic IV

4 credits (PREREQUISITE: EMT-P 103, COREQUISITE: EMT-P 210)

This course is designed to refine the skills and knowledge of the advanced paramedic student. The course covers special situations and special populations the paramedic faces in the field. The course is designed to run concurrently with EMT-P 210-Field Internship, allowing students to take advantage of the opportunity to integrate their field experience with the classroom. This course covers the "Special Considerations" and portions of the "Operations" modules of the paramedic national standard curriculum. A laboratory component provides students with an opportunity to practice and develop required competencies. (F)

EMT-P 210 - Field Internship

2 credits (COREQUISITE: EMT-P 201)

This field internship provides students an opportunity to practice as entry-level paramedics under the direct

supervision of approved field mentors. This course provides the opportunity for students to practice their skills and application of learned knowledge, while allowing for twice-weekly opportunities to share their experience with course faculty and peers, allowing for guided reflection, modification during practice and vicarious learning from peers. (F)

ENG 088 - Foundations for College Reading and Writing

0 credits (PREREQUISITE: PLACEMENT EVALUATION SCORE)

This course is designed to enhance students' competence in reading, writing, listening, and speaking in preparation for college-level assignments. Emphasis is on developing the cognitive strategies applicable to reading and writing as interactive processes. Students analyze a variety of readings through class discussions and written responses that focus on reading comprehension as well as on accurate sentence, paragraph and essay structure. The goal of this course is to provide enriched opportunities to improve reading comprehension, vocabulary, and fundamental writing skills. Note: Students must complete the GAP program by demonstrating competency by passing the final exam and earning an overall grade of C to move into ENG 089. Class: 6 hours per week for 15 weeks. GAP Students Only. Formerly listed as Reading Dynamics. (F, Sp, Su)

ENG 089 - Introduction to College Reading and Writing

0 credits (PREREQUISITE: PLACEMENT EVALUATION OR "C" OR BETTER IN ENG 088)

This course is designed to enhance students' competence in reading, writing, listening, and speaking in preparation for college-level assignments. Emphasis is on applying cognitive strategies to the reading process as students analyze a variety of readings and rhetorical patterns through class discussions and written responses. Students utilize the writing process to develop accurate sentence, paragraph and essay structures in response to readings and assigned rhetorical patterns. The goal of this course is to engage students in developing analytical and interpretive reading and writing skills and mastering grammar, mechanical, and syntactical concepts of writing. Note: Students must complete the GAP program by demonstrating competency by passing the final exam and earning an overall grade of C to move into ENG 099. GAP Students Only. Formerly listed as Fundamentals of Reading and Writing. (F, Sp, Su)

ENG 099 - Reading/Writing Connection

0 credits (PREREQUISITE: PLACEMENT EVALUATION OR "C" OR BETTER IN ENG 089)

This course builds on students' previous reading and writing practices through completion of sequence of critically reflective reading and writing assignments. Through this sequence, students develop multiple ways of

interpreting texts, critically connecting ideas from one text to others as well as to their own experiences. The course focuses on the writing and editing process needed to shape the meaning of a text in order to meet readers' expectations and to enhance students' fluency with academic writing conventions. Varied reading samples are used for class discussion and written responses. Note: Students must earn a grade of C or better to take ENG 101. (F, Sp, Su)

ENG 101 - English Composition

3 credits (PREREQUISITE: PLACEMENT EVALUATION OR "C" OR BETTER IN ENG 099)

This course is designed to develop clear and effective college-level writing. Emphasis on the composing process including topic selection, drafting, editing, and proofreading of final drafts. Focus is on organization of ideas, effective sentence and paragraph structure, grammar and usage. Students will learn the techniques for writing major essays and research papers. CS comp (F, Sp, Su)

ENG 102 - Composition and Literature

3 credits (PREREQUISITE: ENG 101)

This course provides additional composition skill-building. Students are required to write extensively on topics related to various genres of serious literature and are expected to explain and support their ideas in writing. Focus is on learning how to read, interpret and critically analyze literary selections. CS comp (F, Sp, Su)

ENG 103 - Writing a Life: Biographies and Personal Narratives

3 credits (PREREQUISITE: ENG 101)

Biographies, autobiographies, diaries, and personal narratives are all ways of telling the narrative of a life. In this course, students will examine how writers take a life lived and turn it into a story. They will read biographies, autobiographies, and biographical narratives. The focus will be on reading widely and on intense engagement with the texts. Students will have the opportunity to create book lists, book talks, and/or web pages to explore their interpretations of biographical materials. CS comp (Sp, Su)

ENG 104 - News Writing

3 credits (PREREQUISITE: ENG 101)

This course introduces students to news gathering and writing. Topics of exploration include collecting research, conducting interviews, news format, and ethics. Students learn elements of print and online reporting. (F)

ENG 115 - Writing for the Human Services Professional

3 credits (PREREQUISITE: ENG 101)

This course will review the writing, documentation and recordkeeping skills required in human service professions. The course will prepare students to accurately and effectively document service delivery in a variety of organizational settings. Students will learn to create and maintain case records and progress notes as well as

prepare professional reports and discharge summaries. In addition, the course will examine legal and ethical issues pertaining to documentation and recordkeeping. **CS comp (F, Sp, Su)**

ENG 201 - Introduction to Literature

3 credits (PREREQUISITE: ENG 101)

This course provides students with a broad overview of literary genres, history, and analysis. Students will read, discuss and write about stories, poems, and plays. They will develop strategies for reading with optimal comprehension and will also probe more deeply into the themes, symbols, and other forms of significance that can be found in rich and complex texts by such authors as Shakespeare, Poe, Dickinson, Faulkner, and Morrison. **C (Sp)**

ENG 212 - Grant Writing

3 credits (PREREQUISITE: ENG 101)

This course is designed to provide students with a general introduction to the field of grant writing. Instruction provides information on types of grants, common requirements of grant applications, and elements of a grant application. Students will learn to convey grant needs, assess resources, design a management plan, develop a budget, and conduct evaluations. Study in this course includes common grant applications, letters of inquiry, introductory letters, written contracts, formal reports and common correspondence. Students will learn how to search for grant availability and then develop an original grant application for a project or organization of their choice. Formerly listed as ENG 110. (Cross-referenced to BUS 212). **CS comp (F, Sp, Su)**

ENG 225 - Creative Writing

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course explores writing as a creative art, with a specific focus on writing for children. Students will read, discuss, and write poetry, fiction, essays, and plays that are adapted for children from birth to 5 years. **C (Su)**

ENG 230 - American Literature I

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course explores early American literature spanning centuries beginning with the European settlement through the early twentieth century. Students read, discuss, and write about the poetry, fiction, essays, and plays that represent the themes and perspectives of these centuries. **C (F)**

ENG 235 - American Literature II

3 credits (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course introduces students to selected works of literature that represent major trends in American literature since the end of World War II. This course will help students

understand the relationship between literature and life in contemporary America.. **C (Sp)**

ENG 240 - The American Short Story

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

In this course students will read and analyze a selection of American short stories from the nineteenth and twentieth centuries. Study will be chronological and historical with emphasis on the development of the genre. Authors may include Poe, Melville, Crane, Hawthorne, Twain, Gilman, Welty, Porter, and O'Connor. **C (F)**

ENG 245 - Contemporary American Poetry

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course provides an introduction to contemporary poetic voices and reviews the predecessors and progresses to our modern poets: Lowell, Plath, Wilbur, Ginsberg, Bishop, and Brooks. The course culminates in an in-depth survey of some of the newest voices of the exploding Multicultural Renaissance, including Komunyakaa, Ai, Marilyn Nelson, and Lucille Clifton. Students will have discussions on the emergence of poetic movements such as the Beats, Language and Confessional Poetry, Feminism, Multiculturalism and Urban Poetry. **C mc (Sp)**

ENG 250 - English Literature I

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course explores various genres and periods of English literature, from Anglo-Saxon England to the Renaissance and into the contemporary period, analyzing for both literary content and historical context. Readings selected from a list of authors whose works have been recognized for their literary merit. **C (F)**

ENG 255 - English Literature II

3 credits (PREREQUISITE:ENG 101 & 3 additional credits in composition)

This course explores various genres and periods of English literature, from the Restoration and Eighteenth-Century Literature to modern times, analyzing for both literary content and historical context. Readings will be selected from a list of authors whose works have been recognized for their literary merit. **C (Sp)**

ENG 260 - Stage, Screen and Television Drama

3 credits (PREREQUISITE: ENG 101)

Dramatized scenarios play out around us all of the time. Because our culture avidly consumes plays, films, and scripted television shows, we rely on dramatic conventions in commercials, concerts, political demonstrations, and religious rituals . This course investigates these conventions through discussions of dramatic texts, including (but not limited to) plays, movies, and television shows. The course will provide students with an introduction to performance studies, media theory, and techniques of visual literacy, and will investigate various

types of dramatic performance within a historical context. **C (Su)**

ENG 265 - Caribbean Literature and Culture

3 credits (PREREQUISITE: ENG 201, ENG 250, and ENG 255)

This course will explore the literature of the Caribbean from the nineteenth century to contemporary times. The course will focus on fiction and poetry of writers of the Diaspora and incorporate the history, politics, and culture that have helped shape the literature of the region. Themes addressed are: colonialism, language, migration/immigration, identity, and spirituality. **C (Sp)**

ENG 300 - Advanced Composition

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course is an introduction to reading and writing as critical inquiry, focusing on the rhetoric of written argument. Students will examine the various elements of argument such as claims, evidence, and language to discover and investigate the meaning of a text. Students will read a number of interesting and thought-provoking essays, deconstruct them, and then write essays based on their readings. Students will learn to critique an essay thoughtfully and knowledgeably, as well as evaluate, analyze, synthesize ideas and evidence. **CS aw (F, Sp, Su)**

ENG 305 - The Modern Novel

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

For hundreds of years, novels have played an important role in representing the diversity and complexity of modern civilization. In our dynamic and global contemporary world, the power of the novel to bring together different voices is more important than ever. In this course, students will read, analyze, and discuss representative novels from the twentieth and twenty-first centuries by authors such as Laura Esquivel, Khaled Hosseini, Kurt Vonnegut, and Toni Morrison. Course includes a research paper. **C (F)**

ENG 310 - Great Books of Western Literature

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course explores works of Western literature that have significant impact on modern writing covering a sampling of ancient philosophers, poets, dramatists, and historians from Homer to St. Augustine. The focus will be on literary works from the Middle Ages to the nineteenth and twentieth centuries. Students will read, study and discuss the literary expressions throughout the ages including one of the longest surviving Old English epic poems, Beowulf, and selected works of Shakespeare, Goethe, Wordsworth, Beckett, Whitman, Dickens, Twain, and Faulkner. **C (Sp)**

ENG 311 - Greek Tragedy in Translation

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course examines the extant tragedies of Aeschylus, Sophocles, and Euripides, and the world which frames these works. Students will explore philosophical issues of determinism and free will, moral law and man-made law, human nature under incredible strain, changing relationships of friendship and enmity, and overweening pride bred of success. The topics covered will consider the evolution and conventions of Greek drama and its influence on later literature, music, and film. (Cross-referenced with HUM 311) **C mc (F)**

ENG 320 - Advanced Writing for Health Professionals

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This intensive writing course focuses on the development of writing skills for the health care professional, emphasizing writing as a communication skill necessary in the healthcare field. This advanced writing course centers on writing based on reading, interpretation, and discussion of academic and literary texts from personal, literary, scientific, and technological sources. The course also emphasizes questions and responses that stimulate thought, relates the material to broader universal issues, and necessitates critical interpretation. As an advanced writing course, it demonstrates how reading and writing in standardized English assists in enriching one's life and includes vigorous review of grammar, mechanics, paraphrasing, essay structure and development of stylistic strategies and techniques often using group and collegial critiques. The course also includes compiling, organizing, and logically presenting scientific and health information in research paper format, using citation and references. In addition, students will be expected to read literature related to healthcare issues and respond in journal and essay format. Formerly listed as ENG 220. **CS aw (F, Sp)**

ENG 325 - Advanced Writing for the Business Professional

3 credits (PREREQUISITE: ENG 101 & 3 additional credits in composition)

This course is designed to improve the writing competence of the business student for management level communications. It will utilize rhetorical principles and strategies to help students shape their business writing and oral presentations ethically, for multiple audiences, in a variety of professional situations. There is an emphasis on applying these rhetorical tools to on-the-job communications and to the development and editing of documents appropriate to business. Students will examine major forms of business and industrial writing, including correspondence, memoranda, and reports, such as executive briefs and annual reports. Formerly listed as ENG 125. **CS aw (F, Sp)**

ENV 103 - Introduction to Environmental Science**4 credits** (PREREQUISITE: NONE)

This core course for the Environmental Studies Program will provide an overview of 1) scientific principles on which studies of the environment are based; 2) current understandings of environmental problems from a scientific perspective; and, 3) evaluation of scientific evidence. Occasional field trips will be required. **A (F, Sp, Su)**

ENV 110 - Environmental Ethics**3 credits** (PREREQUISITE: NONE)

This course examines diverse perspectives regarding values and environmental responsibility as well as the social factors and movements which embody them. Foci may include: Western Civilization and environmental ethics, environmental values in non-western cultures, environmental values in small scale societies, the aesthetics of nature, environmental values in fiction, and ecological ethics and technology. **C e/p (F)**

ENV 120 - Environmental Law and Regulations**3 credits** (PREREQUISITE: NONE)

This course provides the background and skills development needed to understand and apply environmental law and regulations. Topics include: vocabulary of environmental regulation; the framework of federal, tribal and state environmental laws; basic legal/administrative processes; science and techniques for setting environmental standards; reporting, permitting and enforcement; stakeholder and public involvement in the regulatory process; and, negotiation and conflict resolution methods. **(F)**

ENV 130 - Explorations in Riverine Ecology**4 credits** (PREREQUISITE: BIO 121)

Students will be introduced to the ecology of river and stream ecosystems. Analysis of biological communities, physical and chemical attributes, watershed dynamics and current ecological theory will be covered. The course will focus on student participation in literature reading and discussions, field investigations, and lectures on general principles in river ecology. Field investigation of the Connecticut and Hockanum Rivers and analyses of water and soil samples will be included as field and laboratory investigations. **(Su)**

ENV 140 - Water Utility Management and Operations**3 credits** (PREREQUISITE: NONE)

This course offers detailed information regarding all major areas of responsibility of a utility manager. Discussion will focus on why planning, organization, and recordkeeping are critical to virtually all aspects of utility management. Practical, up-to-date staffing guidelines presented in this course reflect widely accepted management practices for interviewing, hiring, supervising, and disciplining employees. Legal requirements of recent federal legislation such as the Americans With Disabilities Act (ADA) are

discussed, as is the importance of developing policies and procedures for dealing with harassment, grievances, and violence in the workplace. In addition, this course highlights the essential elements of effective oral and written communications, including formal and informal public relations programs. A major segment of this course focuses on the financial management of a utility. Topics discussed in this segment include assessing the financial strength and stability of the utility, budgeting, and funding capital improvements. **(Su)**

ENV 142 - Water Treatment and Operations**3 credits** (PREREQUISITE: NONE)

This course is designed to train students in the practical aspects of operating and maintaining water treatment plants, emphasizing safe practices and procedures. Information is presented on the importance and responsibilities of a water treatment plant operator, sources of water, reservoir management, and intake structures. Students will learn how to safely operate and maintain coagulation, flocculation, sedimentation, filtration, and disinfection processes. They will also learn to control tastes and odors in drinking water, control corrosion to meet the requirements of the Lead and Copper Rule, perform basic water laboratory procedures, and solve arithmetic problems commonly associated with water treatment plant operations. An important segment of the course provides operators information on overall plant operation and covers topics such as daily operating procedures, regulation of flows, chemical use and handling, records and reports, plant maintenance, safety and security, emergency conditions and procedures, handling complaints, and energy conservation. **(F)**

ENV 145 - Oceans and Human Health**3 credits** (PREREQUISITE: NONE)

This course examines the interdisciplinary nature of relationships between the oceans and human health. Global climate change, Harmful Algal Blooms (HABs), marine biopharmaceuticals, and the use of marine organisms as biomedical models will be some of the topics presented. Federal policies on oceans and human health will also be explored. Offered online. **(Sp)**

ENV 146 - Water Distribution Systems and Operations**3 credits** (PREREQUISITE: NONE)

This course is designed to train students in the practical aspects of operating and maintaining water distribution systems, emphasizing safe practices and procedures. Topics include the role and duties of water distribution system operators, procedures for operating and maintaining clear wells and storage tanks, components and characteristics of distribution system facilities, operating and maintaining distribution systems, maintaining water quality in the system, disinfecting new and repaired facilities as well as water delivered to consumers, and techniques for recognizing hazards and developing safe

procedures and programs. Students will learn to analyze and solve problems when they occur and perform mathematical calculations commonly associated with operating a distribution system. (Sp)

ENV 150 - Introduction to Sustainable Energy
3 credits (PREREQUISITE: NONE)

This introductory course provides information on global and national energy resources. The course explores the availability and consumption patterns of fossil fuels, nuclear fuels and alternative energy sources. The course will also investigate the topics such as electricity generation, transmission and distribution. Students will be introduced to concepts of transportation planning, sustainability and resource conservation as solutions to global challenges. (Su)

ENV 155 - Environmental Physics
3 credits (PREREQUISITES: MATH 130)

This course will introduce students to the application of core physics concepts related to energy and the environment, with special focus on: energy production, use and conversion; factors influencing the Earth's temperature; environmental monitoring techniques. The course should develop students' problem solving abilities, provide practice in the applications of physics and help to develop a critical awareness of the wider context of aspects of science and technology. (F)

ENV 168 - Introduction to Geography
3 credits (PREREQUISITE: NONE)

This is an introductory course in geography. The course encourages students to investigate the relationships between people, places and their way of life. Students will explore the topics such as physical earth (oceans, rivers, landscapes, mountains and deserts etc.); cultural patterns, how people live in different parts of the world, what they eat and why, what resources are available in which parts of the world, religions, languages, political divisions, economic activities and the interdependence of people. This course will make students aware of the physical world, maps, latitudes, longitudes and concepts of countries, city states and maritime boundaries. The course will also introduce various disciplines of geography such as human geography, physical, social, political and economic geography. (Cross-referenced with GEO 101) (F)

ENV 200 - HAZWOPER
3 credits (PREREQUISITE: NONE)

This course provides an overview of the technical fundamentals of hazardous materials management with emphasis on physical and regulatory aspects of this work. Successful completion of this course qualifies a student for a 40 hour OSHA HAZWOPER certificate. (Sp)

ENV 220 - Geographic Information Systems (GIS)
3 credits (PREREQUISITES: NONE)

Students in this course will explore the concepts of geography including natural features, population

distribution and cultural aspects. Concepts will be discussed using a global focus. Geographic patterns will be examined by introducing students to the theory and applications of GIS software. GIS facilitates the organization and analysis of spatial data for research and for resource management. Topics include geographical data input, storage, manipulation, maintenance, analysis and retrieval. Students will have the opportunity to experiment with existing natural resource databases using GIS applications to produce spatial distribution maps of selected natural resources. (F)

ENV 225 - Geology and River Geomorphology
3 credits (PREREQUISITE: ENV 130)

This course is designed to build a general understanding of the physical processes that shape the earth's crust such as core heat, plate tectonics, earthquakes, volcanoes, climatology, erosion and sedimentation including those processes that form and alter rivers and streams. We will examine formation of the varying types of geologic materials and structures and in particular the implications with respect to fluvial (river) geomorphology. The course examines the classic themes in fluvial geomorphology, including stream flow, river hydraulics, sediment transport and storage, channel shape and stability, riverine habitat and riparian vegetation, and stream corridor rehabilitation. This course coupled with a study of geography will provide students a global perspective on the interrelationship between the earth's physical processes and natural resources. (Sp)

ENV 230 - Aquatic Ecology
4 credits (PREREQUISITE: BIO 121)

An introduction to plant and animal life in the fresh water habitats of the Connecticut River, this course focuses on the biology and behavior of plants, animals, and microbes living in water. Studies center on freshwater inland lakes, ponds, rivers, brooks, and wetlands. All aspects of life in fresh water, from algae, to salmon, to plankton are involved. Laboratory and field work are included. (Sp)

ENV 232 - Principles in Floodplain Ecology
4 credits (PREREQUISITE: ENV 103)

During this course students will learn to study the flow dynamics of the Connecticut river and how they relate to global flooding concerns along major rivers. Topics covered include: the structure, function and value of river floodplain ecosystems; functioning of river floodplain systems (river continuum, flood-pulse, connectivity, disturbance and stability); energy and matter flux; global status quo of floodplain ecosystems; heavily impacted river systems, including ecological deficits, constraints of human needs and public interests to establish semi-natural conditions; and conservation and restoration strategies. Laboratory and field work included. (Sp)

ENV 234 - Site and Risk Assessment

3 credits (PREREQUISITE: NONE)

This course will survey the general principles and practices of environmental health risk assessment for chemicals in the environment and interactions with other factors continuing to human health risks. A variety of case studies will be used to demonstrate the basic methods and results of risk assessment, from hazard and dose-response assessment to uncertainty analysis and risk communication. (Sp)

ENV 235 - Remediation and Restoration

3 credits (PREREQUISITE: NONE)

Investigates pollution sources, fundamental principles of site assessment, and techniques, processes, and technologies commonly used to remediate and restore sites; covers how to assess the environmental parameters of a given site, develop site remediation plans and review site remediation and restoration case studies. (Sp)

ENV 240 - Special Topics in Water Treatment

3 credits (PREREQUISITE: ENV 142)

This course will encompass areas of specialized interest centered on changing knowledge and important issues in the field of water treatment. Topics covered will vary based on the most recent scientific information and regulations in water treatment. (Su)

ENV 242 - Special Topics in Water Distribution

3 credits (PREREQUISITE: ENV 146)

This course will encompass areas of specialized interest centered on changing knowledge and important issues in the field of water distribution. Topics covered will vary based on the most recent scientific information and regulations in water distribution. (Su)

ENV 250 - Environmental Contaminants and Sanitation

3 credits (PREREQUISITE: BIO 121)

This course looks at how water supply, wastewater disposal, solid wastes, air pollution, food, vectors, and radiation affect public health and communicable diseases. Students will be introduced to techniques of collecting appropriate water, air and waste samples for analysis and will learn how to review the laboratory data and assess how it relates to public health concerns. Course includes lecture and occasional field trips. (Sp)

ENV 252 - Human Health in the Environment

3 credits (PREREQUISITE: BIO 121)

This course studies the relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Topics include environmental pollutants; physical, chemical, and biological agents of environmental

contamination through air, water, and soil; solid and hazardous waste; susceptible populations and risk analysis; the scientific basis for policy decisions; and emerging global environmental health problems. (Su)

ENV 255 - Environmental Monitoring

4 credits (PREREQUISITE: BIO 121 and CHEM 110)

Students learn environmental sampling theory and techniques, data collection, field and laboratory instrumentation, quality assurance and documentation. They will study soil, water, air and biological sampling, and mapping and surveying techniques. Lecture, laboratory and field trips are included. (Sp)

ENV 299 - Environmental Studies Internship

3 credits (PREREQUISITE: COMPLETION OF ALL REQUIRED COURSES WORK OR PERMISSION OF PROGRAM DIRECTOR)

The internship experience will offer students an opportunity to carry class lectures, readings and research beyond the classroom, enriching their studies with new depth and complexity uniquely provided by first-hand experience. The internship requires 135 hours of work at a facility. The internship may be undertaken during the regular school year or during the summer; however, internship presentations and papers can only be evaluated during fall or spring semesters. At the beginning of the internship, students and the internship advisor will agree to a learning contract that establishes specific goals as well as a schedule for achieving them. Interns will meet collectively during the semester to share their experiences and to present brief reports. (F, Sp, Su)

ENV 310 - Environmental Public Policy, Theory and Practices

3 credits (PREREQUISITES: ENV 120)

This course presents an overview of major federal, state, and local environmental policy domains. Analyzes political, social, economic, and other forces influencing federal and state public policy responses to land use, natural resources, pollution, and conservation dilemmas. (Sp)

ENV 315 - Geography and Rivers of the World

3 credits (PREREQUISITES: ENV 2XX Geography and Geographic Information Systems)

Environmental geology encompasses natural science, social science and humanistic understandings of the Earth's environment from a global perspective. In this course we build on the study of physical and human geography undertaken in ENV 2XX and examine global differences in geology and geomorphology of river systems. Regional and global differences in geology and hydrology create variations in fluvial geomorphology with dramatically differing impacts on water availability, water quality, and aquatic resources. Collectively these factors directly influence human population distribution and relative well-being. Students will select a river system and explore in detail its geomorphology, natural resources and cultural implications. (Su)

ENV 320 - Environmental and Industry Toxicology**3 credits** (PREREQUISITES: CHEM 110 & CHEM 111)

Presents an overview of information needed to assess the relationship between the environment, workplace and health. Topics include facets of industrial hygiene, air and water pollution, radiation monitoring, toxicology studies, clinical occupational medicine and biologic monitoring. (Sp)

ENV 325 - Land Use and Watershed Management**3 credits** (PREREQUISITES: ENV 130)

The purpose of this course is to develop skills in watershed-based, economic and environmental problem-solving; to understand linkages between biological, physical, hydrologic and socio economic processes; and to develop an interdisciplinary perspective in evaluating and managing watersheds as a system. Students will explore the public policies and practices of watershed planning by examining case studies in water supply, water quality, drought, floodplain, and stormwater management in the Connecticut River basin. The watershed management curriculum will utilize a multi-disciplinary approach involving the fields of geography, environmental science, geology, public policy, urban and regional land planning, geographic information systems (GIS). (Sp)

ENV 330 - Principles of Environmental Health**3 credits** (PREREQUISITE: NONE)

This course provides an overview of some of the most important and current challenges to human health from environmental and occupational risk factors while teaching knowledge and skills used to assess, control and prevent them. Specific threats will be addressed, such as air pollution, toxic metals, and pesticides as well as occupational stressors. Emphasis will also be given to understanding the worsening environmental health impacts of industrialization and the effects of globalization. (Cross-referenced with HSC 330) (F)

ENV 420 - Environmental Health Planning**3 credits** (PREREQUISITES: NONE)

Study of strategic and operational planning methodologies employed by environmental health administrators, educators and planners involved with community environmental health agencies and programs. (Sp)

ENV 430 - Current Issues in River Conservation**3 credits** (PREREQUISITES: ENV 130 *Explorations in Riverine Ecology*)

This course will explore current issues in river conservation technology with a focus on the Connecticut River and its role as a regional resource. Guest speakers will address present day problems managing water ways on a local, regional and global basis. Students will work in groups to research watershed management techniques. (Su)

ENV 435 - Senior Seminar in River Conservation**3 credits** (PREREQUISITES: ENV 130 *Explorations in Riverine Ecology*)

This is a senior level course based on interactive dialogue, research papers and seminars. Students will identify a particular area of interest related to the problems of water sustainability, resource protection, watershed development, as examples, to develop a problem statement. Students will then undertake literature based research to develop and articulate our current understanding of the issue and the implications relative to public policy. Students will draw upon their class learnings and other experiences to identify the issue of interest to them, to prepare a research paper and to present the findings in a formal seminar setting to fellow students. (Sp)

ENV 460 - Capstone: Environmental Studies**3 credits** (PREREQUISITES: ENVIRONMENTAL STUDIES BS DEGREE CORE)

The Capstone course is designed to provide graduating seniors with an opportunity to integrate the sum of their learning and acquired skills in a particular study area and to demonstrate they have achieved the goals established by Goodwin and their department. Seniors will work with their respective department advisors to develop a specific project that may take a variety of forms; senior research project and paper; portfolio; or multi-faceted project. Oral presentations to peers and faculty will be required. Students wishing to pursue graduate school may choose a narrowly defined topic consistent with their career aspirations. (F, Sp, Su)

GEO 101 - Introduction to Geography**3 credits** (PREREQUISITE: NONE)

This is an introductory course in geography. The course encourages students to investigate the relationships between people, places and their way of life. Students will explore the topics such as physical earth (oceans, rivers, landscapes, mountains and deserts etc.); cultural patterns, how people live in different parts of the world, what they eat and why, what resources are available in which parts of the world, religions, languages, political divisions, economic activities and the interdependence of people. This course will make students aware of the physical world, maps, latitudes, longitudes and concepts of countries, city states and maritime boundaries. The course will also introduce various disciplines of geography such as human geography, physical, social, political and economic geography. (Cross-referenced with ENV 168) (F)

HIS 101 - American History Since 1900**3 credits** (PREREQUISITE: NONE)

This course provides a study of America's political, social, intellectual, and diplomatic history from its post-Civil War industrialization to the present. Topics cover the development of a city-based industrial economy, World War I, the interwar years, the New Deal, World War II, Vietnam, race relations, social and political conflicts, and later

economic changes of the 20th century. The course provides study of recent Presidential administrations and 21st century domestic and international issues, including the impact of a global economy on contemporary America. **G us (F, Sp)**

HIS 119 - Introduction to Early World History

3 credits (PREREQUISITE: NONE)

This course surveys the political, economic, cultural, and intellectual development of cultures across the world from earliest times to the Industrial Revolution. **G w (F)**

HIS 120 - Introduction to Modern World History

3 credits (PREREQUISITE: NONE)

This course examines the political, economic, cultural, and intellectual development of nations across the world in the years since 1900, as well as the emergence of non-governmental centers of power such as terrorist groups and international corporations. Topics include the Great Power Rivalries and World War I, the increasing importance of the United States in the world, Latin American issues, the roles of Japan, China and India in the Far East, the evolution of Israeli/Arab hostility, the independence movements in Africa, and global interrelations today. **G w (F, Sp, Su)**

HIS 210- Introduction to African American Studies

3 credits (PREREQUISITE: NONE)

This course provides an interdisciplinary survey of the African-American experience from pre-colonial Africa to the present. Topics will focus on key figures, a wide range of contemporary issues, and history of slavery and the struggle for freedom and justice. Formerly listed as HIS 110 **G us mc (Sp)**

HIS 235 - Global Issues

3 credits (PREREQUISITE: ECN 101)

This course introduces students to knowledge about the world and international issues. It explores general issues and trends facing the contemporary world involving ethnicity and global diversity, politics, economics, population, human development, environment, human ecology, human rights, technology, and peace and war. Students will explore significant issues that are shaped by global forces and international institutions and how the United States is impacted by and connected to those issues. (Cross-referenced with BUS 235) **G M (Sp)**

HIS 310 - Social History of American Women

3 credits (PREREQUISITE: Recommended HIS 101, but not required)

This course covers the social history of American women from colonial times through modern times. A diversity of women's and ethnic groups will be studied in terms of their specific experiences and how they have been affected by the cultural ideals and basic institutions of American society, including European Americans, Native Americans, African Americans, Latinos, and Asian Americans. The course also covers the history and present-day trends

involved with topics such as women and work, women and education, alternate gender orientations/sexualities, and female-headed households. **G us S mc (Sp, Su)**

HIS 315 - Minorities and Immigrants in the United States

3 credits (PREREQUISITE: HIS 101 & ENG 101)

This advanced, research-oriented course provides a study of the experiences of America's immigrants and minorities. Beginning with the first English and Spanish settlements and their effect on the earliest inhabitants then moving on to issues of slavery, and the Irish immigration. The main focus of the course is on developments since the 1880s covering well-assimilated Europeans and Russian Jews; new immigrants of Hispanic, Asiatic, Middle Eastern origin; and African Americans and women taking their place in American society. Students are required to do a major project using either oral history or written and literary sources on issues confronting newer ethnic or otherwise disadvantaged groups. **G us mc (F)**

HIS 320 - Topical Studies in Modern World History

3 credits (PREREQUISITE: HIS 101 or HIS 120)

Political, economic, and cultural causes of significant events and controversies in modern world history are analyzed, with emphasis on student research and use of primary sources. Topics include ethnic rivalries in the Balkans just prior to World War I and again after the Cold War; economic and political stresses on the post-World War I governments of Great Britain, France, Italy, and Germany; Marxism, Russian Communism, and Fascism as effective tools of national economic development; the rise of Japan and the internal political struggles within China and India; economic disparities, democracy, and dictatorship in Latin America; and the economic and political consequences of independence movements in Africa. Emphasis is placed on student investigation and reporting in seminar fashion. Students are required to write a major documented research paper and develop a classroom presentation on a crisis confronting a modern state since 1940. **G w mc (F, Sp)**

HIS 330 - Hispanic Culture and History

3 credits (PREREQUISITES: NONE)

Students will study how major historical events influenced the evolution of Hispanic culture. Students will also research and discuss relevant literature, music, art, theater, religion, politics and current events. Writing assignments will challenge students to consider the development of Hispanic values in the United States and around the world. **C G w (F)**

HLT 102 - Introduction to Histology

3 credits (PREREQUISITE: NONE)

Principles and practices of quality management, laboratory safety, professional conduct and laboratory information systems are outlined. This course orients the student to procedures, policies and manuals. Laboratory instruction will include explanation and demonstration of regulatory

agencies, glassware, solution preparation, troubleshooting, quality control, chemistry and safety procedures as well as precautions given in the laboratory setting. Care and use of a microscope, basic tissue identification to include sectioning artifacts. This laboratory experience demonstrates a working knowledge of instrumentation, supplies, and solutions. (F, Sp)

HLT 110 - Histologic Techniques

3 credits (PREREQUISITE: NONE)

This course introduces students to the various methods employed in sectioning of tissue, bone decalcification, mounting media, and embedding in the following media: paraffin, celloidin, and plastic. (F, Sp, Su)

HLT 111 - Basic Staining and Fixation

4 credits (PREREQUISITE: HLT 102 & HLT 110)

This course describes inorganic chemistry in relation to histology, theoretical and practical aspects of routine nuclear and cytoplasmic stains. Quality control of routine staining is also involved. Students are taught principles and concepts, which closely coincide with the laboratory content taught in the student lab. Detailed analysis of use and methods employed in fixation. Topics include primary fixatives, modifiers, mixtures, factors, oxidation, reduction, artifacts, compatible staining procedures, methods and instruments employed in fixation of tissue specimens. (F, Sp, Su)

HLT 112 - Histology Laboratory I

3 credits (PREREQUISITE: HLT 102 & HLT 110)

Throughout this laboratory experience the student acquires a working knowledge of sectioning biopsies, levels, serial and step sections, processing schedules, paraffin embedding of tissue, paraffin sectioning techniques, routine staining, mounting techniques, and troubleshooting. (Sp, Su)

HLT 210 - Staining II

3 credits (PREREQUISITE: HLT 102 & HLT 110)

This staining course closely coincides with chemistry and anatomy topics. Subject matter covers staining of: carbohydrates, microorganisms, nerve tissue, lipids, special cells, microincineration, eye techniques, hematopathology as well as primary reagents or dyes, mechanisms of actions and source of error in staining and appropriate corrections. (F, Sp, Su)

HLT 211 - Histology Laboratory II

2 credits (PREREQUISITE: HLT 102 & HLT 110)

This course is offered concurrently with staining II lectures, hands on application of dyes, and microscopic evaluations. (Sp, Su)

HLT 230 - Histology Capstone and Seminar

3 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

Principles and methodologies for all major areas commonly practiced in a modern histopathology laboratory are presented and performed. A seminar detailing the students

progression at the clinical site and summation project and portfolio will be presented by the students. (F, Sp, Su)

HLT 290 - Histology Clinical Experience

7 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

Students master the procedures and hone their technical skills at a clinical site under the supervision of an experienced technician. Clinical significance of laboratory procedures in diagnosis and treatment is applied. Students perform various routine duties (coverslipping, sectioning, staining, decalcification, and gross tissue handling, etc). This practical experience combined with techniques acquired in the student lab enables the student to become accustomed to applying histologic procedures to a scheduled arrangement of duties with established deadlines. (F, Su)

HSC 101 - Introduction to Healthcare

3 credits (PREREQUISITE: NONE)

This course introduces concepts that are fundamental to all healthcare occupations. Topics will include the structure of the healthcare system and current trends in healthcare. A variety of healthcare careers, including qualifications, educational requirements and personal characteristics will also be discussed. Finally, communication with patients and other professionals, lifestyle choices and ethical-legal issues will also be emphasized. (F, Su)

HSC 105 - Medical Terminology

3 credits (PREREQUISITE: NONE)

This 45-hour course teaches medical terminology through the presentation of root words, prefixes and suffixes. Correct spelling and pronunciation of these terms is stressed throughout. Introduction to common medical abbreviations, symbols and body systems will also be presented. Formerly listed as MED 101. (F, Sp, Su)

HSC 110 - Medicine and Society

3 credits (PREREQUISITE: NONE)

This course focuses on individual, community and institutional health care needs and issues from both the bio-medical and socio-cultural points of view. It explores issues regarding health care insurance, the uninsured and underserved, managed care and changes in healthcare marketplace, and provides an overview of major diseases, including epidemics, chronic and acute illness. Discussion of the role of health promotion and prevention will also be explored. (F, Su)

HSC 111 - Medical Law and Ethics

3 credits (PREREQUISITE: NONE)

This 45-hour course addresses medical ethics, medical practice acts, legal responsibilities of the health professional, professional liability and the civic duties of the health professional. The class makes use of the Internet, newspapers and other publications for the discussion of current events related to medical law and ethics. Formerly listed as MED 111. e/p (F, Sp, Su)

HSC 120 - Health and Wellness**3 credits** (PREREQUISITE: NONE)

This introductory course covers health and wellness models. It includes healthy life style goals, such as diet, nutrition, weight control and exercise. Additionally, risk factors to poor health such as alcohol, illegal drugs, drug abuse, and smoking will be discussed. The course also covers mental health issues and the special needs of this patient population, along with patient education techniques. (F, Sp)

HSC 205 - Plague, Epidemics and Society**3 credits** (PREREQUISITE: NONE)

This course explores various historical and modern epidemics, including the Plague. Students will be introduced to the means of transmission, the signs and symptoms of the disease, as well as the prognosis. Furthermore, students will gain an appreciation for how society reacted to the epidemic and the affected individuals. No previous science or medical background is required for this course. (Sp)

HSC 212 - Health Information Systems**3 credits** (PREREQUISITE: CAP 110)

Coursework includes organizational change issues in health care environments, resource management (inventory, tracking, and acquisition) and the role of policy formulation. Consumer issues, standards and security, and the provision of health information resources to health care workers will also be covered. Relevant applications and issues related to health services will also be explored. (Sp)

HSC 220 - Environmental Health Law and Public Policy**3 credits** (PREREQUISITE: NONE)

This course surveys the major issues in environmental health and related public policy, focusing on similarities and differences between US and international regulatory efforts. The role of government, industry, academia and advocacy groups is discussed. (F)

HSC 240 - Introduction to Alternative and Complementary Medicine**3 credits** (PREREQUISITE: NONE)

This course will examine the theory, philosophy and applications of complementary and alternative medicine within today's health care system. Students will learn about the many alternatives to traditional Western or allopathic medicine, and how these various models, systems and therapies impact on the delivery of health care in the United States. Students will become aware of the vast array of resources available and the type of training involved in license/certification. (F, Sp, Su)

HSC 299 - Health Science Internship Experience**3 credits** (PREREQUISITE: Departmental Permission)

This course is a 150-hour practical field experience that is based on theories and learning outcomes associated with the Associate in Health Science curriculum. It provides an

opportunity for students to blend theory and practice through an actual supervised work experience in a health services organization. Specific learning objectives for the experience will be developed through a collaboration of the student, host organization and faculty member. (Sp, Su, F)

HSC 302 - Public Health and Personnel Administration**3 credits** (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course covers selection and management of personnel in healthcare; effects and development of review systems and assessment. Discussions of accountability and productivity of healthcare employees. (Su)

HSC 305 - Ethical and Legal Issues in Healthcare**3 credits** (PREREQUISITE: ENG 101 and 3 additional credits in composition)

The course explores various ethical and legal issues faced by healthcare practitioners. The course provides the student with the framework for identifying ethical dilemmas in the professional setting, as well as the skills and resources for addressing them. Topics include basic principles of health care ethics, confidentiality, management of health care information, allocation of scarce resources, and autonomy versus paternalism. e/p (F, Sp, Su)

HSC 310 - U.S. Healthcare Delivery Systems**3 credits** (PREREQUISITE: ENG 101 and 3 additional credits in composition))

This course will explore the U.S. Health System focusing on its historical development, current configuration and future direction. Included will be the study of health system development, key influencers, accessibility, financing, changing components and the effects the system has on patients, providers, financiers, employers, government and insurers. Particular attention will be paid to the future direction of healthcare and what parts are likely to change. (F, Su)

HSC 312 - Organization and Administration of Long-Term Care**3 credits** (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course will include types and functions of long term care facilities and related providers are discussed. Students participate in critical analysis of long term care administration relating to reimbursement, resource use, quality assurance and ethical and legal issues. (F, Su)

HSC 320 - Health Administration**3 credits** (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course provides the knowledge and skills to management functions, tasks, and roles as they are carried out in the health service organizations. Discussion of emerging issues affecting the management of health services organizations is provided. This course uses the

case methods of analysis to develop critical thinking skills. (Sp)

HSC 330 - Principles of Environmental Health Science

3 credits (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course provides an overview of some of the most important and current challenges to human health from environmental and occupational risk factors while teaching knowledge and skills used to assess, control and prevent them. Specific threats will be addressed, such as air pollution, toxic metals, and pesticides as well as occupational stressors. Emphasis will also be given to understanding the worsening environmental health impacts of industrialization and the effects of globalization. (Sp)

HSC 340 - Physical Agents/Ergonomic Hazards in the Workplace

3 credits (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course will include discussions on problems with occupational exposures to physical agents. Health effects, evaluation and control of exposure to non ionizing radiation, noise, heat and ergonomics are covered. (Sp)

HSC 350 - Continuous Quality Improvement

3 credits (PREREQUISITE: ENG 101 and 3 additional credits in composition)

This course provides basic principles associated with Total Quality Management (TQM) and Continuous Quality Improvement (CQI). Aids identification and quality problem-solving found in all health care organizations utilizing CQI tools and techniques. Through the use of case studies, current events, and textbook materials, students will learn how to identify problems, recommend improvements, and collect data to demonstrate process improvement. (F)

HSC 410 - Epidemiology

3 credits (PREREQUISITE: ENG 101 and 3 additional credits in composition and STAT 167)

This course introduces epidemiology and its uses. It will introduce the basic methods for infectious disease epidemiology and case studies of important disease syndromes. This course provides discussion of epidemiologic topics, methods, measure of disease occurrences, common types and sources of data, problems unique to the study of health and the environment, education on issues of environmental exposures and their human health effects. (F)

HSC 420 - Methods in Research and Practice

3 credits (PREREQUISITE: ENG 101 and 3 additional credits in composition and STAT 167)

This course concentrates on the details of public health research design. It is designed to guide students through a step-by-step approach to qualitative, comparative, and quantitative research designs and analysis methods. Students will learn the language of research, various

methods for conducting research and how to identify and synthesize research literature. Course will build on concepts covered in the other courses in the public health/community health concentration. r, (F)

HSC 450 - Senior Capstone for Health Science

3 credits (PREREQUISITE: Departmental Permission)

As part of the completion of the B.S. in Health Science each student will be required to complete a capstone, or culminating experience, prior to graduation. A capstone experience is defined as one that requires a student to synthesize and integrate knowledge acquired in course work and to his/her learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice. This course provides an opportunity to study a practical and current issue selected by the students. Students will apply critical thinking, analytical abilities, and communication skills that integrate the core academic areas of public health including biostatistics, epidemiology, health education, health policy, and environmental health. The final course report acts as the official written comprehensive examination, the fulfillment of the culminating experience requirement. (By arrangement)

HSC 460 - Health Science Internship

3 credits (PREREQUISITE: Departmental Permission)

This course provides at least 150-hours of an internship in a health service organization. Under the supervision of a full time faculty member and an approved preceptor, students will work on a project related to management, development or administration in health science. This course allows students to demonstrate professional competency in health sciences. The internship is an integral part of the Health Science curriculum as it is intended to broaden students' perspectives and provide experience in applying the theory and content learned in their didactic course work. (Sp, Su, F)

HSC 470 - Health Science Study Abroad

3 credits (PREREQUISITE: Department Permission)

This independent study provides the student with the opportunity to have a short term study abroad experience. The student will study health care in an international environment. This course is intended for the student who is volunteering for a healthcare experience outside of the USA.

HSM 101 - Introduction to Homeland Security

3 credits (PREREQUISITE: Placement in ENG 099 or higher)

This course provides a general introduction to the field of Homeland Security. In addition to an examination of the events leading up to and occurring on 9/11, the effectiveness of the Homeland Security system and theories related to the topic are presented. Special emphasis is placed on the role of the U. S. Department of Homeland Security. (Sp)

HSM 102 - Introduction to Weapons of Mass Destruction (WMD)

3 credits (PREREQUISITE: NONE)

This course will provide a study of WMD to include the definition, the identification, the analysis, the threats (international and domestic) and a review of risk assessment issues. There will be a general recognition of chemical, biological, radiological, nuclear, and explosive agents, and defensive considerations and control issues associated with criminal incidents. This course explores the different types, feature and limitations of commercially available detection instruments for Weapons of Mass Destruction chemicals and materials. This course also covers decontamination options and requirements for victims and responders to a WMD incident. Hospital and personnel resources will be some of the main topics reviewed and discussed for activity, responsibility and requirements. (Su)

HSM 103 - Emergency Planning: Response, Preparedness and Testing for Critical Incidents

3 credits (PREREQUISITE: NONE)

This course addresses the special needs of emergency planners whether they be in response to natural disasters such as flooding, hurricanes, tornadoes, earthquakes, or volcanoes as well as planning and preparedness issues to address man-made terrorist threats. The concepts of mitigation, preparedness, response and recovery will be addressed as well as Continuity of Operations Planning (COOP), Continuity of Government (COG), and Business Continuity Planning (BCP) as well as many other aspects of emergency planning and management. (F)

HSM 104 - Domestic and International Terrorism

3 credits (PREREQUISITE: NONE)

This course introduces students to various aspects of international terrorism. Included will be the basic principles of terrorist investigation, Federal and state terrorism laws, prosecution of international terrorists, domestic security threats, malicious religious extremists, drug cartels, and the motivational factors and tactics that drive these organizations. **G us w** (F)

HSM 105 - Contemporary Ethical Perspectives

3 credits (PREREQUISITE: NONE)

This course will examine ethics and professional responsibility. Due to the power given to those in the criminal justice system, society has come to expect a higher standard of behavior and responsibility from those individuals. This course will discuss and examine how the work environment and a sense of ethics and professional responsibility can mutually exist. The concept of Just War and the ethical concepts associated with terrorism will also be discussed. (Sp)

HSM 106 - Investigative Report Writing

3 credits (PREREQUISITE: ENG 101 OR DEPARTMENTAL PERMISSION)

This course combines the basics of two disciplines— investigation and report writing, and bridges the gap between them in order to teach the basics involved in writing an investigative report. Fundamental guidelines for investigative reports are established through a set of rules that are easy to understand and apply in any type of report writing scenario. Topics include note taking, describing persons and property, crime and arrest reports, search warrants, and issues in writing. (Cross-referenced to CJS 106) **CS, comp** (F, Sp)

HSM 111 - Contemporary Issues in Crime and Prevention

3 credits (PREREQUISITE: NONE)

This course will examine the cause and effect relationship between contemporary problems in our society and how they relate to crime and prevention. Issue such as substance abuse, domestic violence, DNA testing, the ACLU and the widespread use of the Internet will be discussed in their relation to the criminal justice system and Homeland Security. (Cross-referenced to CJS 111) (Su)

HSM 118 - Introduction to Fire Technology

3 credits (PREREQUISITE: NONE)

This course introduces students to the many areas of fire protection, using a systems approach. Overviews the system components of modern fire department responsibility and features the latest incident command system information. Introduction to Fire Technology explores such cutting-edge issues as homeland security, goal setting and accomplishment, life safety initiatives, recent laws affecting firefighters, and more. Progressive information on fire protection in the community from both the planning and application standpoints offers a well-rounded view of the fire service's function in community risk reduction. The course provides an understanding and tools for individuals seeking a career in the fire service. (Su)

HSM 120 - First Responder Training

3 credits (PREREQUISITE: NONE)

Students will be introduced to the knowledge and skills necessary to function as a trained First Responder and identify and manage the most common types of injuries and illnesses encountered in the pre-hospital setting. Students will also be exposed to concepts on responding to fire, hazmat, and evacuation operations and be given an overview in the incident command system. (Sp)

HSM 122 - Emergency Management

3 credits (PREREQUISITE: NONE)

This course is designed to help first responders as well as healthcare management professionals (including physicians and nurses with management responsibility) assess, mitigate and deal with the medical, physical and economic risks and challenges associate with terrorism

involving Weapons of Mass Destruction (WMD). Topics to be discussed include: risk analysis, OSHA and other regulatory standards, integration of hospital and community emergency management, special aspects of hazardous materials emergencies, and business and financial recovery planning. (Sp)

HSM 130 - Introduction to Computer Crimes and Security

3 credits (PREREQUISITE: NONE)

This course offers an introduction to information systems used within the national security system. A framework is provided for understanding the needs, types, capabilities and applications of management information systems. An overview of existing security information systems is presented with implications for the future requirements. This course will provide an overview of computer crime and the procedures forensic computing specialists, law enforcement investigators, and prosecutors must invoke to prosecute computer criminals successfully. Finally, the impact of science and technology upon security agencies and how information management systems will prepare for the latest challenges will also be analyzed and discussed. (Cross-referenced to CJS 130) (F)

HSM 131 - Data and Information System Security Protection

3 credits (PREREQUISITE: NONE)

This course provides a comprehensive introduction to computer security, including computer networks, issues, concepts and technologies. The core technologies of access control, cryptography, digital signatures, authentication, network firewalls and network security services and programs are reviewed. Issues of security policy and risk management are considered. (Cross-referenced to CJS 131) (F)

HSM 142 - Intelligence Analysis and Security Management

3 credits (PREREQUISITE: NONE)

This course examines intelligence analysis and its indispensable relationship to the security management of terrorist attacks, man-made disasters and natural disasters. It also explores vulnerabilities of our national defense and private sectors, as well as the threats posed to these institutions by terrorists, man-made disasters, and natural disasters. Students will discuss substantive issues regarding intelligence support of homeland security measures implemented by the United States and explore how the intelligence community operates. Students will be able to identify important components of Intelligence Analysis and Security Management. (Sp)

HSM 143 - Transportation and Border Security

3 credits (PREREQUISITE: NONE)

This course provides an in-depth view of modern border and transportation security. Topics of study will include aircraft and airports; trains, ground transportation and related terminals; ships and seaports; and major border-

crossing control points. Existing and emergent technologies needed to detect terrorists, their weapon, and inherent vulnerabilities in infrastructure will be a special emphasis of the course. Additional topics will include: legal, economic, political and cultural aspects of transportation safety and border security. The course will provide students with an understanding of the variety of challenges inherent in transportation and border security. (Su)

HSM 220 - National Incident Management System (NIMS)

3 credits (PREREQUISITE: CJS/ HSM 101)

This course is designed to illustrate how effective coordination, integration, communications and planning among local, state and federal response agencies are critical to effective response to mass-casualty, Weapons of Mass Destruction (WMD) or terrorist incidents. This course will focus on the special challenges faced by senior level incident managers in dealing with a WMD or terrorist incident. In addition, the National Incident Management System (NIMS), Incident Command, basic medical and law enforcement terminology will be discussed. (Sp)

HSM 230 - Cyber Crime: Identity Theft and Internet Vulnerabilities

3 credits (PREREQUISITE: CJS/HSM 130 OR DEPARTMENTAL PERMISSION)

This course will introduce and discuss the fastest growing crime - theft of a person's identity, the techniques and various ways criminals use to steal personal information. Prevention and ways to protect one's identity will be discussed. This course will also focus on the theories and techniques for tracking attackers across the Internet and gaining forensic information from computer systems. This course includes case studies of Internet-based computer crimes and addresses limits of forensic techniques. (Cross-referenced to CJS 230) (Sp)

HSM 231 - Information System Threats/Attacks/Defense

3 credits (PREREQUISITE: CJS/HSM 130)

This course provides an overview of the actors, motives and methods used in the commission of computer-related crimes and describes the methods used by organizations to prevent, detect, and respond to these crimes. (Cross-referenced to CJS 231) (Su)

HSM 232 - Computer Crime Forensics and Investigative Procedures

3 credits (PREREQUISITE: HSM 130)

This course presents an introduction to modern criminalistics and investigative techniques to solve crimes. The course includes an examination and evaluation of crime scenes with scientific analysis of physical evidence. Individual and group activities relating to professional practices of forensic science and computer science will be explored throughout the semester. (Cross-referenced to CJS 232) (Sp)

HSM 235 - Principals of Personal and Physical Security

3 credits (PREREQUISITE: CJS 101 OR DEPARTMENTAL PERMISSION)

This course will provide the student with a basic knowledge and understanding of personal and physical security to include the definitions, the need, the requirements, and review of the controls, techniques and tools. This course introduces participants to a broad, in-depth look at security planning and procedures. Students will develop skills in intelligence collection, surveillances, perimeter and crime scene security, principles of crowd and riot control, substance abuse recognition, theft, sabotage, and espionage. Additional topics may include computer security, electronic criminal investigations, firewalls and security software, as well as crime prevention techniques. (Cross-referenced to CJS 235) (Sp)

HSM 240 - Strategic and Tactical Considerations on the Fireground

3 credits (PREREQUISITE: HSM 118)

This course gives students a real-life approach to the topic of fire strategies and tactical considerations using a systems approach to guide them through the process of problem identification and solution response. From planning to incident scene control, this course provides knowledge that can be applied to a variety of complex fire situations including new material on Health Care and High Risk Populations and Commercial, Technical Operations, and Industrial Occupancies as well as scenarios, case studies to enhance student learning. (Sp)

HSM 241 - Principles of Fire Prevention

3 credits (PREREQUISITE: HSM 118)

This course addresses our nation's efforts at fire prevention and the importance of reducing fire loss, and it helps students understand the value of fire prevention, protection and associated programs. Coverage includes the origins of our national, state, and local fire prevention efforts as well as current examples that emphasize the need for stronger programs. In addition, the course discusses the elements of plan review, inspection and investigation, as well as the logistics of staffing and financial management of fire prevention. (Sp)

HSM 275 - Research Project

3 credits (PREREQUISITE: ENG 101 AND DEPARTMENTAL PERMISSION)

This course will require the student to identify an acceptable topic in homeland security, to conduct extensive research involving the identified thesis and result in a validated conclusion. With the instructor's approval, students may work individually or in small groups toward completion and presentation of the project. (By Arrangement.)

HSM 290 - Internship

3 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

This course provides a supervised internship of at least 150 hours in order to gain practical field placement experience in the homeland security area including law enforcement, fire service, corrections, public/private sector safety or security, protective services environments, or other Homeland Security career fields. Transportation to internship sites is the responsibility of the student. (F, Sp, Su)

HSR 101 - Introduction to Human Services

3 credits (PREREQUISITE: NONE)

This course provides a comprehensive introduction to the theory, knowledge, attitudes, values and skills necessary for one to become an effective human service professional. Topics include human services in the United States, historical perspectives in human services, populations served and needs addressed in human services. Students will also examine social policy and how various human services emerged and the forces that influenced their development. Human service careers, self-development and caring for oneself as a professional will also be addressed. (F, Sp, Su)

HSR 105 - Community Organization and Advocacy

3 credits (PREREQUISITE: NONE)

This course focuses on the practice of advocacy in human services. Students will learn key principles, strategies, and hands-on skills that are commonly used in advocacy in multiple settings. The course highlights strategies and tactics used in advocacy, and challenges and dilemmas organizers face in the field. Emphasis will be on agency, legislative, legal and community advocacy. Students will have an opportunity to design and execute an advocacy strategy within their areas of interest. (Sp)

HSR 106 - Interviewing and Counseling

3 credits (PREREQUISITE: HSR 101)

This course is a survey of interviewing and counseling techniques for paraprofessionals working in geriatrics, mental health, youth programs, rehabilitation, disability services, corrections, substance abuse and other human service settings. Students will learn effective interviewing techniques necessary for developing a plan of service and the techniques and application of counseling in human service work. Professional codes of ethics will also be reviewed. (Sp)

HSR 108 - Introduction to Disability Studies

3 credits (PREREQUISITE: NONE)

This course provides an interdisciplinary approach to the study of disabilities and will examine the social, cultural, economic, environmental and political forces that for years have served to marginalize and oppress people with disabilities. Through readings, lectures, films, guest presentations, assignments and group discussions, students will learn about the history of disability studies, gain familiarity with disability organizations, services and

policies, and analyze cultural attitudes and practices regarding people with disabilities. Topics include disability rights, relevant federal and state legislation and policies, legal and ethical issues, the delivery of services and support to people with disabilities, federal and state programs for persons with disabilities, disability culture and advocacy. Physical, emotional, mental and social dimensions throughout the lifespan will also be explored. Individuals with disabilities comprise approximately one-fifth of the total population of the United States and a greater understanding of disability is important professionally regardless of the field in which a professional plans to work. (Sp)

HSR 110 - Youth Development Practice

3 credits (PREREQUISITE: NONE)

This course provides students with an introduction to the origin, foundation, theory, framework and principles of youth development as well as a discussion of the history of the field of youth work. Current concepts and experiences that influence youth development will also be examined. Students will learn how to apply a holistic, assets-based approach to working with young people using a variety of models including the 40 Developmental Assets of Adolescents. Students will also examine the legal and ethical issues encountered by youth development professionals, including the importance of adhering to a code of professional ethics and establishing a balance between professional boundaries and personal rapport. Issues of confidentiality, agency protocol and mandated reporting laws will also be addressed. In addition, the status of youth development as a profession will be explored. (F, Su)

HSR 111 - Youth Development Connections

3 credits (PREREQUISITE: NONE)

This course will prepare students to implement current real world techniques and strategies to foster positive youth development. Various methods of communication will be examined as a foundation for establishing effective relationships with youth and families. Through self-exploration and classroom experiences students will develop an awareness of the role of culture in working effectively with youth and will learn ways of integrating a cultural framework into youth programs. The course will also examine a comprehensive approach to case management that takes a holistic view of youth. Students will learn the fundamentals of assessment, referral and follow up as well as best practices for the delivery of services. Students will also be introduced to the network of youth agencies within the local area and will explore a range of resources, services and systems that are available to help support the youth and families with whom they work. (Sp)

HSR 120 - Studies in Alcohol and Drug Abuse

3 credits (PREREQUISITE: NONE)

This course provides students with an opportunity to explore the causes and consequences of addiction as they relate to individuals, families, communities and society. Topics will include drug classifications, physiological and psychological effects of alcohol and other drugs, treatment, education and prevention. Students will explore the skills and techniques utilized by those working with individuals involved in drug abuse. The use of guest speakers and analysis of common treatment modalities will provide a further exploration of alcohol and drug abuse. (F)

HSR 121 - Topics in Nonprofit Management

3 credits (PREREQUISITE: HSR 101, BUS 101 or BUS 105)

This course explores management practices applied in nonprofit organizations. Topics will include short-term and strategic planning, decision making, fundamentals of organization, managing employees, board management, fundraising, legal and regulatory issues, program management and evaluation, ethics and leadership among other emerging management practices and issues. (Sp)

HSR 125 - Issues in Gerontology

3 credits (PREREQUISITE: NONE)

This course focuses on the needs of older adults, their families, partners and others in their support systems. Challenges related to retirement, health, financial security, transportation, housing and dying will be studied from both a service delivery and community resource perspective. (Formerly known as HSR 220) (Sp)

HSR 140 - Intake, Assessment and Intervention

3 credits (PREREQUISITE: HSR 101)

This course introduces the basic concepts and methodologies of conducting intakes, assessments and evaluations. Students will learn to conduct an intake interview and to gather, review, record, organize and integrate referral information in order to assess the needs of the persons seeking services. Methods of determining the adequacy, appropriateness, accuracy and relevance of information obtained from other sources will be examined. The course will also focus on a variety of assessment procedures including both traditional tests and observational methods. The selection of appropriate services and interventions will be examined. Ethical behavior related to conducting intakes and assessments will also be addressed. Formerly listed as Intake and Assessment. (F, Su)

HSR 202 - Case Management

3 credits (PREREQUISITE: HSR 101 and ENG 101)

Students will learn to integrate and utilize information obtained through intakes, assessments, and from other service providers to determine client needs and develop service plans. Emphasis will be placed on designing interventions based on the goals of those receiving services and evaluating the outcomes of the service provided. Organizing and documenting information will be covered as

well as the written and oral presentation of that information to all relevant stakeholders. Coordination with and referral to other service providers will be addressed and the role and importance of professional ethics will also be incorporated. (F, Su)

HSR 210 - Introduction to Research in Human Services

3 credits (PREREQUISITE: HSR 101, ENG 101)

This course will provide an overview of quantitative and qualitative research methodologies used in human services. Students will gain the knowledge and competencies necessary to evaluate existing research and to plan and conduct their own research in human services. Students will learn to prepare, plan, utilize research methods, organize and compose research papers on significant human service issues. The role of previous research and theory, experience, observation and related literature lead to the formulation of a hypothesis will also be explored. This knowledge will be applied to a unique written research project that will be presented in class. (F, Su)

HSR 299 - Human Services Internship

4 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

This course is a 180-hour practical field experience that is based on the theories and learning outcomes associated with the overall human services curricula. It provides an opportunity for students to blend theory and practice through an actual supervised work experience in a human services organization. Students will be supervised in selected human service settings under the direction of the staff of the organization and college faculty. Specific learning objectives for the experience will be developed through a collaboration of the student, host organization representative and faculty member. In addition to the 180-hour field experience, students will be required to participate in a bi-weekly seminar, led by various staff members, to further integrate prior classroom learning and internship experiences. (F, Sp, Su)

HUM 100 - Introduction to the Humanities

3 credits (PREREQUISITE: NONE)

This course provides a multi-disciplinary introduction to a global view of the arts and humanities. The emphasis of the course is on the interaction of art, poetry, literature, philosophy, music, and dance with the social issues of all cultures considered. (C, F, Sp)

HUM 150 - Fundamental of Art Techniques

3 credits (PREREQUISITE: NONE)

This hands-on course introduces students to the creative experience in a variety of art forms, including drawing, painting, printmaking, photography, sculpture, and architecture. The course is designed to help students develop their own creative and plastic skills; understand the elements and the principles of design; and appreciate the aesthetic and humanist values of the arts. Classes will be a combination of lectures and hands-on projects. This

course offers a practical approach to rationalizing many of the facets that visual art has to offer. (C, F)

HUM 201 - Music History and Appreciation

3 credits (PREREQUISITE: NONE)

This course intensively covers development of classical orchestral music, vocal music, opera, and ballet. Topics include modern dance, musical theater, jazz, and hip-hop. This course employs recordings, visual presentations, lectures, and discussions. Students are exposed to a wide variety of music forms; develop their own critical judgment and tastes in music and evaluate the impact of music on culture and their own lives. Formerly listed as HUM 101. (C, mc, Su)

HUM 202 - Art History and Appreciation

3 credits (PREREQUISITE: NONE)

This course introduces students to the arts, especially painting, sculpture, and architecture, from antiquity to the present. Students will develop their own aesthetic and humanist values, understand the elements and principles of design, and appreciate the arts. Formerly listed as HUM 102. (C, mc, F)

HUM 204 - Modern Popular Music: America and the World

3 credits (PREREQUISITE: NONE)

This course covers the development of contemporary music from its roots in early jazz to swing, bebop, rock, blues and country, rap, pop and music of the new millennium. It considers 20th Century music from a musical as well as a social, cultural, economic and political perspective in American and world society. Finally, it examines the relationship of specific issues of race, gender, ethnicity and age as they relate to contemporary music. Formerly listed as MUS 101 - Contemporary Music. Formerly listed as HUM 104. (C, mc, Sp)

HUM 242 - World Cultures and Foods: Italy

3 credits (PREREQUISITE: NONE)

This course combines a sampling of Italian regional cooking with the history, language, music, culture and traditions of the Italian people. Each class begins with a short exercise in Italian vocabulary and key phrases, then focuses on a prepared meal from one of the many regions of Italy, and the economic and geographic factors influencing the food of that area. The remainder of each class considers many aspects of Italian culture. Formerly listed as IS 142. (C, mc, F, Sp)

HUM 311 - Greek Tragedy in Translation

3 credits (PREREQUISITE: ENG 101 & ENG 102)

This course examines the extant tragedies of Aeschylus, Sophocles, and Euripides, and the world which frames these works; includes philosophical issues of determinism and free will, moral law and man-made law, human nature under incredible strain, changing relationships of friendship and enmity, and overweening pride bred of success. Students will consider the evolution and conventions of

Greek drama and its influence on later literature, music, and film. (Cross-referenced with ENG 311) **C mc (F)**

IS 110 - Portfolio Review for Experiential Learning and Credit

1 credit (PREREQUISITE: *Permission of Transfer Counselor*)

Students learn how to organize, assess and articulate knowledge and skills acquired through work and other life experiences and relate that learning to specific college-level curricula. Student will develop a Credit for Lifelong Learning Portfolio that they may submit to an Assessment Committee for possible award of college credit. **(Su)**

IS 150 - Career Planning and Development

3 credits (PREREQUISITE: *NONE*)

This course presents practical strategies that prepare students to confirm an appropriate career, to conduct a successful job search, and to lay the foundation for successful career development. Emphasis is on Career Action assignments to assess your skills and interests, to research prospective employers, to learn about current application requirements, to prepare resumes and cover letters, to practice meeting with business people in your targeted career field, and to practice interviewing. These assignments polish job search and career management skills so students can apply them directly to achieving immediate and future career goals. **(F, Sp, Su)**

IS 160 - Service Learning

3 credits (PREREQUISITE: *NONE*)

In this course, students will engage in public service in partnership with agencies or organizations in the Greater Hartford area. Through written work and class discussions, they will reflect on both the purposes of that work and also on how that work responds to specific needs within the community and within the more general context of social justice. Students will also explore issues of social responsibility and citizenship in the professions and business world in relation to the social problems they encounter through their community work. Class may be either online or on ground. **(F, Sp, Su)**

IS 170 - Urban Limits

3 credits (PREREQUISITE: *NONE*)

This course will engage students in an interactive study of Hartford and the surrounding metropolitan area. Course readings and assignments will provide students with the opportunity to view Hartford through a cultural, historical, and sociological lens. Students will study the city's history, music, art, architecture, and current government structure. **C, mc (Sp)**

MATH 098M, MATH 098C - Fundamentals of College Mathematics

0 credits (PREREQUISITE: *PLACEMENT EVALUATION SCORE*)

This course develops the basic math skills required for all of our mathematics courses. Topics include operations with whole numbers, fractions, and decimals, ratio, proportion

and percents, order of operations and solving equations, perimeter, area, volume, and the Pythagorean Theorem. This course is offered in two different modalities. Math 098M uses the Modumath self-paced, individualized, computer-based instruction and meets 3 hours weekly. Math 098C is a standard group-instruction class and meets 3 hours weekly. Math 098 does not count towards credit requirement for any certificate or degree programs. Formerly listed as Math 089. **(F, Su, Sp)**

MATH 099 - Introduction to College Mathematics

0 credits (PREREQUISITE: *PLACEMENT EVALUATION SCORE OR "C" OR BETTER IN MATH 098*)

This course provides the skills necessary for our college mathematics courses. Topics include signed numbers, algebraic expressions, first-degree equations (one variable), properties of exponents, and an introduction to solving and graphing linear equations. This course does not count towards credit requirements for any certificate or degree programs. Formerly listed as Introduction to Algebra. **(F, Sp, Su)**

MATH 125 - Mathematical Applications for the Health Sciences

3 credits (PREREQUISITE: *PLACEMENT EVALUATION SCORE OR COMPLETION OF MATH 099 WITH "C" OR BETTER.*)

This course is designed for those entering the health professions. It is an application-based problem solving approach to mathematical processes used in health related fields. Students solve linear equations, become proficient at converting a measure given in one unit to an equivalent measure in a related unit calculate a variety of prescribed dosage amounts, determine intravenous flow rates, and learn the proper preparation of solutions. Students read measuring instruments, including scales, thermometers, sphygmomanometer gauges, and syringes. **A (F, Sp, Su)**

MATH 130 - Mathematics for Science and Technology

3 credits (PREREQUISITE: *PLACEMENT EVALUATION SCORE OR COMPLETION OF MATH 099 WITH "C" OR BETTER.*)

This course provides the underlying mathematical concepts and processes applied in the fields of science and the technologies. Topics include scientific notation, the U.S. and metric systems of measurement, solving equations and graphing functions, perimeters, areas, volumes, the Pythagorean Theorem, logarithms, and right triangle trigonometry. A scientific calculator is required for this course. **A (F, Sp)**

MATH 135 - Contemporary Mathematics

3 credits (PREREQUISITE: *PLACEMENT EVALUATION SCORE OR COMPLETION OF MATH 099 WITH "C" OR BETTER.*)

A survey of a wide range of topics with an emphasis on critical thinking and problem solving, giving the student the opportunity to apply mathematics to the solution of

everyday problems. Includes simplifying algebraic expressions, solving linear and literal equations, graphing, problem solving with proportions and percents, perimeter, area, volume and unit conversion in both U.S. and metric units, discount, simple and compound interest, credit purchases, mortgages, and an introduction to probability. A basic calculator is required for this course. **A (F, Sp, Su)**

MATH 186 - Precalculus

3 credits (PREREQUISITE: PLACEMENT EVALUATION SCORE OR COMPLETION OF MATH 125 or HIGHER WITH A GRADE OF "C" OR BETTER)

This course is for students who want to expand on their advanced mathematics skills and acquire the foundation for Calculus. This course is especially appropriate for those pursuing careers in any of the sciences, engineering, business, pharmacy, economics, or technologies. Topics included are linear, quadratic, polynomial, rational, exponential, logarithmic, and trigonometric functions and applications thereof. A scientific calculator is required and a graphing calculator will be very helpful. **A (F, Sp, Su)**

MATH 254 - Introductory Calculus

3 credits (PLACEMENT EVALUATION SCORE OR COMPLETION OF MATH 186 WITH A GRADE OF "C" OR BETTER)

This course is for students who are interested in continuing their study of advanced mathematics. It is especially appropriate for those interested in any of the math-related fields including any of the sciences, engineering, pharmacy, business, economics, or technologies. Topics included are limits, continuity, the derivative and its applications. A graphing calculator is required for this course. **A (Sp, Su)**

MCD 213 - CPT ®-4 Coding I

3 credits (COREQUISITE: MED 115)

This course teaches the student to translate medical services, treatments, and procedures into a uniform numerical language to facilitate communication among healthcare providers and third-party payers. This course will concentrate on the 5-digit CPT codes and descriptors nomenclature in the areas of Evaluation and Management, Anesthesia, and Surgical Procedures. Healthcare Common Procedural Coding (HCPCS) and modifiers will also be emphasized. **(Sp, Su)**

MCD 214 - CPT ®-4 Coding II

3 credits (COREREQUISITE: MED 115)

This course teaches the student Anesthesia, Radiology, Laboratory/ Pathology, and Medicine Coding. Emphasis will be on accuracy in coding diagnostic and therapeutic procedures. **(Sp, Su)**

MCD 215 - ICD-9- CM Coding

3 credits (COREREQUISITE: MED 115)

This course concentrates on transforming verbal descriptions of diseases, injuries, and conditions into numerical designations, also known as Coding. Students will learn the complex activity of diagnostic coding and its

relationship to facilitate payment of healthcare services. **(Sp, Su)**

MCD 220 - Medical Coding Capstone

3 credits (PREREQUISITE: Departmental Permission)

This course is designed to prepare the student to sit for the Certified Professional Coding exam given by the American Academy of Professional Coders (AAPC). The course enables the student to conduct an in-depth study of diagnoses (ICD-9) and procedural (CPT-4) coding. The emphasis will be on accurately coding medical and operative reports using ICD-9-CM and CPT-4 coding guidelines and conventions. **(F, Su)**

MCD 299 - Medical Billing and Coding Internship

3 credits (PREREQUISITE: DEPARTMENTAL PERMISSION)

Students may elect to enroll in this 3 credit internship with permission of the department chair. Students will gain hands-on training in a billing and coding environment. This course provides students with the opportunity to utilize previously studied subjects and related skills. This opportunity provides the student with valuable employment experience and increased marketability. **(F, Su, Sp)**

MED 115 - Introduction to Medical Insurance and Coding

3 credits (PREREQUISITE or CO-REQUISITE: HSC 105)

This 45-hour course will introduce students to insurance terminology, types of insurance, and the eligibility and benefit structure of the insurance plan. The student will then utilize this knowledge to analyze and calculate patient medical insurance benefits for a variety of insurance types. In addition, this course will introduce the student to International Classification of Disease, 9th Edition, Clinical Modification (ICD-9-CM) and Current Procedural Terminology 4th Revision, (CPT®-4). Students will also gain an appreciation of the relationship between coding and financial reimbursement. Topics discussed include the Health Insurance Portability and Accountability Act (HIPAA), Medicare compliance issues, billing forms and applications. **(F, Sp, Su)**

MED 151 - Medical Assisting: The Medical Office and Patient Care

3 credits (PREREQUISITE: NONE)

This 60-hour course is designed to introduce the student to basic medical procedures; the student will gain an understanding of the cycle of infection, principles of medical asepsis, and importance of Universal Precautions. The student will also be taught how to create and maintain a medical record, including requirements for documenting in a medical record. The student will learn to accurately obtain and record vital signs, common mensurations, and patient information. The proper documentation in the medical record of these measurements will also be emphasized. Lastly, the student will learn to assist the physician with both an adult and pediatric history and physical exam, as well as establishing and maintaining the examination room. **(F, Su, Sp)**

MED 152 - Medical Assisting: Diagnostic Procedures**3 credits** (PREREQUISITE: MED 151)

This 60-hour course is designed to teach the student about various medical specialties and procedures; including Obstetrics and Gynecology, Ophthalmology, and Otolaryngology. In addition, students will become familiar with electrocardiography, radiology, and introduced to various first aid procedures. Students also learn various minor office procedure techniques. (F, Sp, Su)

MED 153 - Medical Assisting: Laboratory Procedures**3 credits** (PREREQUISITE: MED 151)

This 60-hour course is designed to fully acquaint the student to the clinical laboratory. The curriculum will focus on laboratory safety and skills. Occupational Safety and Health Administration (OSHA) and Clinical Laboratory Improvement Amendments (CLIA) regulations will be introduced. Guidelines for handling, transporting, and recording of lab specimens will be reviewed. The analysis of urine and its significance in total patient care will be theorized and applied. The student will learn and apply the theory of venipuncture and the various methods of performance. An overview of Hematology, Chemistry, and Microbiology will complete the curriculum. (F, Sp, Su)

MED 212 - Pharmacology**3 credits** (PREREQUISITE: NONE)

From this 45-hour course, students will gain an understanding of drug sources, legislation relating to drugs, and drug references. Forms of drugs, drug classification and actions, and schedules of controlled drugs will also be covered. The medication order, identifying commonly prescribed medications, and basic principles for the administration of medications will be emphasized. The laboratory component of the course provides practical application of the student's knowledge. Basic mathematical skills necessary for the safe preparation and administration of medications to adult and pediatric patients will be reviewed. (F, Sp, Su)

MED 250 - Medical Office Management**3 credits** (PREREQUISITE: NONE)

This 60-hour course is a medical office simulation where students will be able to successfully manage a mock medical practice. Students will learn Students will have the opportunity to complete all aspects of the billing process from registration to filing of the insurance claim. Medical office procedures, including scheduling appointments, accounting, mail processing, and confidentiality regulations are also covered. (F, Sp, Su)

MED 299 - Medical Assisting Internship**3 credits** (PREREQUISITE: DEPARTMENTAL PERMISSION)

The Medical Assisting Internship course is the culminating course of the Medical Assisting Program. During a 160-hour internship students are provided with hands-on training and career-related experience. This course provides an

extensive on-site experience in a physician's office, clinic, or other appropriate health care setting that allows the medical assisting student to utilize previously studied subjects and related skills. It gives the student the opportunity to put his/her class knowledge to practical use and to practice and enhance acquired skills. It provides students with valuable employment experience, increasing their marketability. (F, Sp, Su)

NUR 100 - Nursing Skill Development**6 credits** (PREREQUISITE: BIO 212)

This initial course provides the student with the fundamental skills for nursing practice. Concepts focus on human beings and their responses to the environment. The continuum of wellness is introduced in Nursing 100. Foundational concepts related to the nursing process are identified and defined. Special emphasis is placed on the development of basic communication skills, client physical and psychosocial assessment and specific nursing skills related to nursing interventions. Clinical experiences are provided in the nursing skills laboratory and in non-acute client care settings. (F, Sp, Su)

NUR 110 - Adults and the Wellness Continuum I**6 credits** (PREREQUISITE: NUR 100 & BIO 235)

This course provides the student with experiences in the care of adults with alterations in health status related to basic physical and psychological function. Emphasis is on care of adults with health problems related to nutrition, fluid and electrolyte balance, oxygenation, elimination, cardiac function and surgical procedures. Nutrition, pharmacotherapy, client teaching and ethico-legal issues are integrated throughout the course. Clinical experiences are provided in the nursing skills laboratory and in acute care settings. (F, Sp, Su)

NUR 195 - LPN Bridge Course**1 credit** (PREREQUISITES: NUR 190 AT Charter Oak State College)

This course is taken by Licensed Practical Nurses (LPN) who have been accepted into the Associate Degree Nursing Program and have completed the 12 credit NUR 190 course through Charter Oak College. This One credit course covers the key concepts of NUR 100 and NUR 110 and validates nursing skills. Taking this course is part of the state's articulation process and enables the student to advance place in NUR 200.

NUR 200 - Adults and the Wellness Continuum II**7 credits** (PREREQUISITES: NUR 110)

This course provides students with experiences in the care of adults with alterations in health status related to sensorimotor, musculo-skeletal, protective, endocrine, renal and reproductive function. Blood disorders, including human immunodeficiency disease, and burns will also be covered. The focus is on care of adults experiencing disruptions in health status associated with both acute and chronic health conditions. Students learn to apply the

nursing process to maintain wellness levels, restore clients to previous levels of wellness and prevent further alterations in health status. Nutrition, pharmacotherapy, client teaching and ethico-legal issues are integrated throughout the course. Clinical experiences are provided in the nursing skills laboratory and in acute and chronic care settings. (F, Sp, Su)

NUR 210 - Families and the Wellness Continuum Across the Lifespan

7 credits (PREREQUISITE: NUR 200)

This course introduces the student to the concept of family-centered care across the lifespan. It focuses on care of childbearing, childrearing and aging families. Physiological, psychosocial and spiritual dimensions of developmental stages of clients and families are explored and community-based resources are emphasized. Students learn to use the nursing process to promote and maintain health, prevent alterations in health care status and restore clients to previous levels of wellness. Nutrition, pharmacotherapy, client teaching and ethico-legal issues are integrated throughout the course. Clinical experiences are provided within acute, non-acute and long-term care settings. (F, Sp, Su)

NUR 220 - Integration of Nursing Practice: Adults with Complex Health Problems

9 credits (PREREQUISITE: NUR 210)

This culminating nursing course provides students with experiences designed to promote the integration of nursing methods in the care of adults experiencing complex alterations in physical and psychological health function. Students use the nursing process to promote restoration and rehabilitation and assist clients in achieving optimal levels of wellness. Emphasis is on care of clients with alterations in health related to neurological health, sepsis, cancer, multi-system failure, mental health and trauma. Nursing responsibilities in bio-terrorism and emergency preparedness are included. All nursing skills, including application of therapeutic and pharmacological modalities, psychomotor skills, teaching and communication are included and critical thinking and ethico-legal considerations are integrated. Clinical experiences provide opportunity for establishing priorities, decision-making, achieving increasing independence and care management in the provision of client care and are provided in acute, in-patient medical-surgical, psychiatric and rehabilitation settings. (F, Sp, Su)

NUR 300 - Foundations of Professional Nursing

3 credits (PREREQUISITE: (Acceptance into the BSN nursing program.)

This initial Nursing course introduces and orients the BSN student to the Nursing Conceptual Framework at Goodwin College, to baccalaureate nursing education and professional nursing practice. The role and expectations of the baccalaureate-prepared RN are explored and integrated into personal professional practice. This is a

hybrid course. Classes will be held on line and meet a minimum of twice on campus within the semester. Articulation credits will be awarded when student satisfactorily (C+ or higher) completes this course. Formerly known as NUR 245 (F, Sp)

NUR 310 - Health Assessment

3 credits (PREREQUISITE/CO-REQUISITE: NUR 300)

This course builds on the professional nurse's theoretical knowledge and skills necessary to perform a comprehensive health assessment. The focus will build skills of history taking and physical examination of clients across the life span. Each student will have the opportunity to perform a focused examination under the observation of the instructor. The Goodwin College Nursing Theoretical Framework and the Nursing Process will provide the basis to promote health and prevent/manage illness of the client. This is a hybrid course. Classes will be held on line and meet a minimum of twice on campus within the semester. (F, Sp)

NUR 350 - Seminar in Nursing Research

3 credits (PREREQUISITE/CO-REQUISITE: STAT 167; NUR 300)

Course introduces the research process and its application to scholarship and evidenced-based nursing practice. Qualitative and Quantitative methods are reviewed. Emphasis is placed on critical thinking and writing. This course enhances the student's ability to apply and integrate nursing conceptual frameworks, clinical research and evidenced-based practice. Student is prepared to be an informed consumer of nursing research. This is a hybrid course; Classes will be held on line and meet a minimum of twice on campus within the semester. r (Sp)

NUR 361 - Public and Community Health Nursing

3 credits (PREREQUISITES: NUR 300)

This course focuses on the client as a health care consumer and member of a community. The student will apply the Goodwin Nursing Conceptual framework to meet the needs of the client as well as the needs of the community. This course will focus on the role the nurse has in establishing partnerships with the public health system in customizing therapeutic care in order to protect, promote and restore optimal public and community health within the local, national and international domains. This is a hybrid course. Classes will be held on line and meet a minimum of twice on campus within the semester. This is a course that requires 45 clinical hours. mc (Su)

NUR 363 - Clinical Nursing Leadership

3 credits (PREREQUISITES: NUR 300)

The focus of this course is on the professional nurse as a change agent in the clinical setting to positively influence the patient's level of wellness. Review of the local and national systems and how they affect the practice of nursing and ultimately, patient outcomes will be analyzed. Utilizing the Goodwin College Wellness Model and criteria

from Quality and Safety Education for Nurses, students will develop, an evidence-based practice change for the clinical setting. This course allows the nurse to apply and integrate previously learned skills in research, leadership, management, and nursing and to transition to a more independent practitioner. This hybrid course will be held on line and meet a minimum of twice on campus. (Sp)

NUR 378 - Pharmacology in Nursing Practice
3 credits (PREREQUISITES: NUR 300)

This 12 week hybrid course is designed for the student who desires to elevate their level of theoretical knowledge of pharmacotherapeutics, and to establish an enhanced knowledge base for nursing management and patient/family education in relation to pharmacology. Significant focus will be placed on core pharmacology concepts; pharmacokinetics, pharmacodynamics, therapeutic uses of medications, and adverse reactions. The nursing process, cultural considerations, and age-appropriate techniques are utilized throughout the course. This course will meet a minimum of twice on campus.(Su)

NUR 440 - Independent Study in Nursing
3 credits (PREREQUISITES: NUR 300)

An individually designed experience by student and faculty, to give the student the opportunity to develop in depth knowledge in a select field of nursing. This course includes a clinical component and a research paper. Arrangements to take this course must be made a semester in advance . This clinical course requires 90 hours of clinical work. (By arrangement, one semester in advance)

NUR 460 - Seminar in Professional Nursing Leadership

3 credits (PREREQUISITE: NUR 300)

In this final required nursing course, the student will synthesize and apply basic concepts and theories needed for the effective management of client care as a professional nurse. Student analyzes organizational dynamics in relation to the theories of leadership and management. Review of case studies provides the foundation of theory integration. This is a hybrid course. Classes will be held on line and meet a minimum of twice on campus within the semester. (Sp)

NUR 468 - Contemporary Topics in Nursing
3 credits (PREREQUISITES: NUR 300)

This course allows the student to investigate a topic, issue or area related to or affecting nursing practice or the profession of nursing. Course will enhance skills in systematic investigation, literature review, critical thinking and other activities designed to seek increased understanding of the topic. This course is a hybrid course. Classes will be held on line and meet a minimum of twice on campus within the semester. (Sp)

NUR 470 - Nursing Study Abroad

3 credits (PREREQUISITES: NUR 300)

This independent study provides the student with the opportunity to have a short term study abroad experience. The student will study health care and professional nursing in an international environment. This course is intended for the student who is volunteering for a medical mission to a country outside the USA. (By arrangement, one semester in advance)

OS 101 - Team Dynamics and Individual Skills

3 credits (PREREQUISITE:NONE)

This course focuses on the organizational structure as it relates to individual and team contributions. The role of teams and their functions are explored to develop team based skill sets for contemporary organizations. This course looks at team processes, development, diversity and conflict management within the team. Students will learn and practice techniques for setting group goals, creating safe environments, managing groups effectively and encouraging the formation of group identity. Students will identify ethical concerns relating to teams. (F, Sp)

OS 160 - Leadership Practice and Theory

3 credits (PREREQUISITES: OS 101)

The focus of this course is on contemporary leadership theories and the dual role organizational personnel find themselves in as followers, team members and leaders. This course explores the dynamics and responsibilities of each role and the situational and ethical applications that may be encountered. Students will explore personal inventories and assessments to enhance self-awareness and personal leadership style. The leader's role in the organization's culture and ethics is examined. (F, Sp)

OS 180 - Organizational Supervision and Administrative Roles

3 credits (PREREQUISITES: OS 101)

This course focuses on the organizational essentials of supervising personnel and the connections with Human Resources, unions and the organizational mission. Topics include supervisory principles, the role of discipline, motivation and the practice of coaching, teambuilding and mentoring. Ethical concerns of supervision are discussed in case studies. Monitoring and assessing performance to detect and correct substandard performance is also examined. It further looks at management's role in the supervisory process and develops good decision-making approaches to supervisory challenges. Supervisory ethical considerations are explored. (F, Sp)

OS 210 - Organizational Communications

3 credits (PREREQUISITES: OS 101, OS 160, COM 1XX)

The focus of this course explores the variety of ways communications are carried out in the organization and the meanings and effects of those communications. The course provides an overview of contemporary communications theory, principals and practices that drive organizational effectiveness. Students will examine

effective communication planning for the organization as well as identify communication skills necessary to build their personal communication competencies such as persuasion, influence, negotiation and instructing. Students will explore the ethical considerations around the sharing of information and the communication process. Students will develop a communication plan. (F, Sp)

OS 230 - Organizational Ethics

3 credits (PREREQUISITES: All OS 100 level courses, PHIL 101)

This course focuses on the role of ethics in the organization and includes the study of ethical paradigms, the ability to make value judgments, think critically and apply sound problem-solving models to address ethical dilemmas within organizations. (F, Sp)

OS 250 - Understanding Worker Behaviors

3 credits (PREREQUISITES: All OS 100 level courses, PSY 112)

This course is designed to explore the variety of workplace structures that employees encounter and allows the participant to understand their worker preferences in structuring their work environment, whether as individual or team member, leader or follower. Developing a social perceptiveness to others' actions in the work place fosters more effective responses to workplace challenges, allows finding better fits between worker styles and tasks, and creating positive work environments. Participants also explore several personality traits of the worker as well as emotional intelligence in the workplace. Students examine the ethical aspects of worker behaviors and their impact on the organization. This course includes the development of a written analytical piece on worker hindering behaviors and solutions via the use of case studies and student observations. (F, Sp)

OS 315 - Organizational Theory

3 credits (PREREQUISITES: OS 210, OS 250)

This course explores classical and neoclassical theories of organizations along with the traditional and contemporary structures of organizations and provides insights into the dynamics of modern organizational structure. It further considers the interaction of personnel and organizational characteristics as they relate to job performance and attitudes in Human Resource Theory. Students also examine the effects of active learning and listening within the organization and the process of making the organization a learning organization through the lens of culture and environment. (F, Sp)

OS 320 - Cross-cultural Competencies in Organizations

3 credits (PREREQUISITES: All OS 200 level courses)

This course examines the diversity of the workplace and its connection to local and global communities. It develops a social perceptiveness and explores the realities of cultural differences across boundaries in the modern workplace and examines those implications. Strategies for effectively

building diverse workplaces are explored as are the ethical implications that arise in areas of diversity. (F, Sp)

OS 330 - Talent Development and Performance Assessment

3 credits (PREREQUISITES: All OS 200 level courses)

This course focuses on processes and approaches to ensure that organizational goals are met effectively and efficiently, building on the KSA's of OS180. Emphasis is placed on how to effect behavior and results, through a positive performance assessment process and develop personal development plans for career advancement within an organization or career field. Developing skills in personal planning, needs assessment and developing one's own talent within the organization is included. Students learn how behaviors and competencies support the organization vision and mission and how their productivity supports organizational goals. Students are also introduced to an holistic approach to understanding stakeholders in an organization that include both internal and external factors and focus on the methods and tools necessary to develop the commitment and relationships with stakeholders to solidify the organization's structure and mission. The ethical standards of performance assessment are also discussed. (F, Sp)

OS 355 - Project Management

3 credits (PREREQUISITES: All OS 200 level courses)

This course introduces students to the complexities of designing, initiating and managing workplace projects. Skills such as time management, resource management, problem identification, budgeting and finance, and coordinating group efforts are integrated into a semester long project. Use of project management software is also introduced. (Su)

OS 425 - Facilitating Groups

3 credits (PREREQUISITES: All OS 300 level courses)

This course is designed to develop the competencies of participants to work in groups effectively and produce results in a timely fashion. Leading groups or teams through facilitation takes a special set of competencies in communication, listening, group dynamics, coaching, problem-solving and conflict resolution. (Su)

OS 430 - Organizational Change

3 credits (PREREQUISITES: All OS 300 level courses)

This course focuses on the change process within an organization and exams that change through a variety of change models. Students learn about the mechanical side of change along with the human side. It also examines change behaviors and coping strategies for personnel engaged in organizational change, such as overcoming resistance. Students learn to identify critical elements of organizational change and the importance of excellent communications to facilitate sustainable change. (F, Sp)

OS 450 - Capstone: Strategic Planning for Organizations**3 credits** (PREREQUISITES: All OS 300 level courses)

Designed as a capstone course for the BSOS degree, this course incorporates many of the KSA's of the core into a final project where students analyze an organization's strategic plan to understand the construction and implementation process. It also examines the process of developing vision for an organization and defining its goals in light of the organization's mission. Students will learn the process of strategic planning for long-term viability of an organization and the dynamics that drive the strategic planning process. Understanding the role each member plays of the organization plays in developing and executing a strategic plan is explained. Developing critical decision making skills are a focal element of this course. The student must obtain a grade of B- (2.7) or better to successfully complete this course. (F, Sp)

OTA 100 - Foundations of Occupational Therapy and Task Analysis**3 credits** (PREREQUISITE: NONE)

This course provides an introduction to the profession of occupational therapy. The history and philosophy of the profession is presented with a focus on professional roles and responsibilities and standards of practice within a variety of treatment settings. Students are introduced to the Official Documents of the American Occupational Therapy Association and legislative acts that influence the practice of occupational therapy. In addition to exposure to various practice areas and the changing practice of healthcare. Students are introduced to occupational therapy media and its application to the specific life tasks of the disabled. Activity analysis and occupational activities are defined and explored. Students explore the foundations of treatment planning and activity adaptation. (F, Su)

OTA 101 - Foundations of Movement and Function**3 credits** (PREREQUISITE OR COREQUISITE: OTA 100)

This course provides students with an understanding of human movement as a vital component to occupation. The course presents the active and passive structures involved in movement. Students explore biomechanical analysis, neurodevelopment foundations to movement and function. Initial exposure to evaluation and intervention techniques used by occupational therapy practitioners. (F, Sp)

OTA 102 - Clinical Fieldwork I (FW I)**1 credit** (PREREQUISITE OR COREQUISITE: OTA 101)

This course introduces occupational therapy assistant students to the clinical requirements of fieldwork experiences. Students participate in a variety of learning experiences to prepare them for observation and participation opportunities in clinical and community settings. This course also introduces documentation practices, principles and practice of safety techniques and data collection. 40 hours on site and 5 hours didactic. (F, Sp, Su)

OTA 103 - Group Dynamics in Occupational Therapy**3 credits** (PREREQUISITE: PSY 112, PREREQUISITE OR COREQUISITE: PSY 212)

This course presents a theoretical basis and practical application of group treatment within the context of theories commonly used in occupational therapy treatment. The greater emphasis is on application of skills in psychosocial settings, however, focused discussion and application to behavioral and rehabilitation settings as well. (Sp, Su,F)

OTA 200 - Occupational Therapy Assistant and Adult Populations**4 credits** (PREREQUISITE or COREQUISITE: OTA 101)

Students study the principles and practices of occupational therapy for adults with physical and psychosocial disabilities. The impact of social, environmental and cultural influences in adult disabilities. Students are provided with an overview of various practice models employed in working with adults with disabilities. Additionally, this course presents the pathophysiology, etiology, clinical signs and implications for intervention of various conditions seen in adult disabilities practice settings. Models of reimbursement discussed. Lecture and lab. (Sp, Su)

OTA 201 - Occupational Therapy Assistant and Pediatric Populations**4 credits** (PREREQUISITE or COREQUISITE: OTA 101)

This course presents the principles and practices of occupational therapy for services provided for infants, children and adolescents. Student identification of the impact of social, environmental and cultural influences in development and delivery of services. Students study provision of occupational therapy services in medical, educational and community-based settings. Additionally, this course presents management aspects of occupational therapy practice in addition to reimbursement models. Lecture and lab. (Su)

OTA 202 - Occupational Therapy Assistant and Geriatric Populations**4 credits** (PREREQUISITE or COREQUISITE: OTA 101)

This course addresses the impact of environmental, cultural and community influences on the older individual, focusing on an ever changing occupational status through the influences of component skills. The impact of social, environmental and cultural influences in geriatric service delivery. Identification of geriatric physical and psychological diseases common to occupational therapy. The methods of treatment and reimbursement available to the occupational therapy practitioner within the context of health care and the community are addressed. Lecture and lab. (F, Su)

OTA 203 - Case Studies and Practice Applications in Occupational Therapy Assistant

3 credits (PREREQUISITE or COREQUISITE: OTA 200, OTA 201, OTA 202)

This course presents problem-based learning cases, to allow students to apply the Occupational Therapy Practice Framework to simulated practice situations. Students develop essential clinical reasoning skills and professional behaviors for future practice. This course also addresses clinical relevance of general health, safety procedures, models of reimbursement and documentation. (F, Su)

OTA 220 - Occupational Therapy Assistant Seminar 1 credit (PREREQUISITE: OTA 203; COREQUISITE OTA 250)

Provides for discussion of Level II fieldwork experiences and opportunity to apply logical thinking, critical analysis, problem solving, and creativity to application problems. Addresses preparation for registration and licensing as well as preparation for the role of professional on the job site. (F, Sp, Su)

OTA 250 - Advanced Fieldwork Level IIA

5 credits (PREREQUISITE: OTA 203, COREQUISITE OTA 220)

Provides an eight-week, full-time or a part-time (equal to eight weeks fulltime), supervised clinical internship to develop professional behaviors consistent with the profession standards and ethics, apply previously learned academic knowledge as an OT team member. The student will gain experience in application of the OT treatment process from admission to discharge for patients from a variety of socio-cultural backgrounds and ages in the practice area of physical disabilities. (F, Sp, Su)

OTA 260 - Advanced Fieldwork Level IIB

5 credits (DEPARTMENTAL PERMISSION)

Provides an eight-week, full-time or a part-time (equal to eight weeks fulltime), supervised clinical internship to develop professional behaviors consistent with the professions standards and ethics, apply previously learned academic knowledge as an OT team member. The student will gain experience in application of the OT treatment process from admission to discharging for patients from a variety of socio-cultural backgrounds and ages in the practice area of behavioral, sensorimotor, and/or developmental disabilities. (F, Sp, Su)

PAR 110- Becoming a Paraprofessional

3 credits (PREREQUISITES: ECE 101)

This course defines the roles and responsibilities of paraprofessionals related to the support of student instruction in a public school classroom environment. Specific attention will be given to the instructional role of the paraprofessional for facilitating conversations, building relationships, supporting the classroom curriculum and assisting in the classroom management. (Su)

PHB 103 - Introduction to Laboratory Services

3 credits (PREREQUISITE: NONE)

This introductory course will present the student to the various areas of the laboratory. Topics will include specimen processing, specimen handling, laboratory divisions, quality control, HIPAA, and legal issues. Finally, students will learn about CLIA regulations and practice performing CLIA waived tests. Formerly listed as HSC 103. (F, Sp, Su)

PHB 104 - Medical Terminology/Anatomy and Physiology

3 credits (PREREQUISITE: NONE)

This course teaches medical terminology through a review of anatomy and physiology of the body. Students will gain a basic knowledge of word building, use, pronunciations, spelling of medical terms, applying terms to the function and structure of body systems. Emphasis is placed on medical terms in periodicals, textbooks, and medical care areas. Formerly listed as MED 104. (F, Sp, Su)

PHB 120 - Principles and Practice of Phlebotomy

3 credits (PREREQUISITE: NONE)

This course introduces students to basic venipuncture techniques. Students will learn infection control, needle safety and general safety techniques. In addition, student will acquire the theory and skill required to safely draw blood using routine venipuncture techniques. Formerly listed as MED 120. (F, Sp, Su)

PHB 121 - Advanced Phlebotomy Skills

3 credits (PREREQUISITE: "C" or better in PHB 120)

The course builds upon the skills and knowledge acquired in PHB 120. Students will reinforce their routine phlebotomy skills, while acquiring new skills. Students will learn how to collect blood utilizing syringe techniques, as well as perform capillary collection. Formerly listed as MED 121. (F, Sp, Su)

PHB 299 - Phlebotomy Internship/ Seminar

3 credits (PREREQUISITE: "C" or better in all PHB Courses)

The Phlebotomy Internship/Seminar course is the culminating course of the Phlebotomy Certificate Program. Students gain practical experience in a clinical setting. This course provides extensive on-site experience in a laboratory setting that allows the student to utilize previously acquired skills. It provides the students with valuable employment experience, increasing the student's marketability. Additionally, students will be required to attend workshops and seminars specifically geared towards examining the role of professionalism in Phlebotomy. Finally, students will be required to attend CPR for the Healthcare Professional (F, Sp, Su)

PHIL 100 - Introduction to Philosophy

3 credits (PREREQUISITE: NONE)

This course introduces students to a broad range of philosophical issues; readings include major philosophers of the Western tradition: Plato, Aristotle, St. Augustine, St.

Thomas Aquinas, Descartes, Hume, Kant, Hegel, Marx, Kierkegaard, Schopenhauer, and Sartre. Students will consider issues of ethics, the nature of reality, religious philosophy and the nature of God, the limits of human knowledge, freedom and predestination, and the nature of the good life. **C e/p (F, Su)**

PHIL 101 - Introduction to Logic and Critical Thinking

3 credits (PREREQUISITE: NONE)

This course teaches how to identify, understand, and evaluate arguments by developing critical thinking and logic skills. The course emphasizes the distinction between fact and opinion, inductive and deductive reasoning, logical fallacies, and critical analysis of controversial social, political, and ethical issues with an emphasis on implications for business management and leadership. **C e/p (Sp)**

PHIL 103 - Ethical & Legal Issues

3 credits (PREREQUISITE: NONE)

Addresses both ethical theory and contemporary controversial issues that confront students and citizens today, through readings and essays on current issues such as euthanasia, abortion, sexual morality, equality, economic justice, the environment, and ethical considerations in science and technology. **C e/p (F)**

PHIL 105 - Ethics, Values, and Cultural Competence in Human Services

3 credits (PREREQUISITE: NONE)

This course will acquaint students with the professional and ethical issues that affect human service practitioners. Codes of ethics from various human service professional organizations will be studied and the course will also explore the role and importance of civility and values as they relate to providing services to people. In addition, students will develop an understanding of cultural competence and the need to reflect it when working with typical populations served by human service professionals. Other topics that will be studied include conscious use of self, clarification of values, awareness of diversity, choosing the least intrusive intervention in the least restrictive environment, client self-determination, confidentiality of information, recognition of the worth and uniqueness of the individual including culture, ethnicity, gender, religion, abilities, sexual orientation, and other expressions of diversity, and, belief that individuals, services systems, and society can change. **C e/p (F, Sp, Su)**

PHIL 301 - Contemporary Perspectives in Philosophy

3 credits (PREREQUISITE: ENG 101 & PHIL 100 or PERMISSION OF INSTRUCTOR)

This course provides students with the opportunity to investigate a number of timeless and more recent philosophical issues, through contemporary readings chosen to stimulate individual reflection, as well as classroom discussion and debate. Students will be

encouraged to refine their critical thinking, logic, and argumentation skills. **C e/p (Sp)**

PHY 110 - Medical Physics

3 credits (PREREQUISITE: MATH 101)

This course introduces students to the basic principles of respiratory care physics. Topics include work, energy, fluid dynamics, the mechanics of ventilation, and Starling's Law. Dimensional analysis, the kinetic theory of matter, the gas laws, associated chemical laws, and temperature scales will also be explored. **(F, Sp)**

PSC 101 - Introduction to Political Science

3 credits (PREREQUISITE: NONE)

This course provides an introduction to world governmental structures to acquaint students with a basic understanding of the principles and methods used in analyzing the social sciences with specific references to politics and government. Topics include the examination of fundamental concepts, the varieties of governmental structures, political philosophies and institutions, and contemporary political issues. **G w (F)**

PSC 201 - The Legislative Process

3 credits (PREREQUISITES: NONE)

This course reviews the basic structures of American national and local government, and then analyzes the lawmaking process in Congress and in the legislative branch of the government of Connecticut. Students will consider the role of public interest groups in educating public officials on the need for a bill, the mobilization of public opinion in favor of the bill through letters to newspapers and other organs of public discourse, appearing before legislative committees to advocate for the bill, considering the economic aspects related to the bill, and tracking the bill through the legislative bodies to passage and signing by the chief executive. The course also impresses on students the potential power each citizen has to influence lawmaking, and provides hands-on experience in lobbying and advocacy at the Connecticut State Legislature. **G us (F)**

PSY 112 - Introduction to Psychology

3 credits (PREREQUISITE: NONE)

This course introduces the fundamental concepts of psychology, including physiological psychology, neuropsychological principles, sensation and perception, cognition, learning, child and adult development, social psychology, personality, and abnormal psychology. Students will focus on understanding human behavior and its application to everyday life. **S (F, Sp, Su)**

PSY 115 - Child Development

3 credits (PREREQUISITE: Successful completion of ENG 099 or equivalent or Co-req of ENG 099)

Addresses the developmental characteristics, developmental processes, and developmental issues that have been identified as being of importance and/or typical for children in general and children with special needs from

conception through age eight. Employs both theoretical and applied strategies in the study of the social, emotional, cognitive, physical, and psychological development of the young child. **S (Su)**

PSY 201 - Group Dynamics

3 credits (PREREQUISITE: PSY 112)

This course provides an overview of current developments, research and theoretical bases of group behavior: stages of group development; structure, power and leadership roles and styles; group tasks, group maintenance; pressures for conformity and deviance; impact of individual member behavior on group dynamics; roles, intra-group conflict, group problem solving and decision making. Through interpersonal and small group interactions students will gain insight into themselves, their impact on others and examine expectations and assumptions about groups. **S (F, Sp)**

PSY 205 - Organizational Behavior

3 credits (PREREQUISITE: NONE)

This course provides theoretical and practical knowledge for understanding motivation, leadership, managerial decision making, group processes and conflict resolution within the context of organizational design and culture. Students will examine the complexities of human interactions, including individual and group behavior and human relations skills needed to succeed in social and work environments. Topics include communications, ethics, personal and organizational values and attitudes, social structures, and customs and taboos. Formerly listed as PSY 120. **S (F, Su)**

PSY 210 - Psychology of Learning

3 credits (PREREQUISITE: PSY 112)

This course provides a study of human behavior in learning situations, including theories of development and learning, individual differences, conditions for learning, and dynamics of achieving learning outcomes. Students will focus on working with individuals in a variety of educational and agency settings. **S (Su)**

PSY 212 - Life-Span Development

3 credits (PREREQUISITE: PSY 112)

This course presents the basic theories and concepts used in the study of the human lifespan, including physical, cognitive, personality, and social development from conception through death. Students will examine the cultural nature of human development and relevant socio-emotional processes. Topics will emphasize the understanding of human development from personal, theoretical and professional perspectives. **S (F, Sp, Su)**

PSY 215 - Abnormal Psychology

3 credits (PREREQUISITE: PSY 112)

This course provides students with a basic understanding of abnormal human behavior by examining an overview of psychiatric disorders. Students will examine the history, theories, models and classification of mental disorders and

approaches to their treatment. Familiarizes students with vocabulary and diagnostic categories currently in use including DSMIV-TR. Topics will cover the mental health profession and relevant legal, social and ethical issues. **S (F)**

PSY 218 - Adolescent Development

3 credits (PREREQUISITE: PSY 112)

The physical, cognitive and social-emotional development of adolescents, with special emphasis on major theories and research methods are examined in this course. Students will consider the influence of heredity, family, peers, school, media and community as contexts within which adolescents develop. Discussion will focus on diversity issues such as culture, socio-economic class, ethnicity, gender, and sexual orientation, as well as, common adolescent problems. **S (Sp)**

PSY 265 - Advanced Child Development

3 credits (PREREQUISITE: PSY 115)

This course is designed to help students gain a complex understanding of child growth and development for children beginning with conception and continuing through early adolescence. Students will explore how current practice has arrived at this level of understanding and how research in child development can be applied in the various settings in which children develop. Students will have opportunities to become familiar with many topics including but not limited to prenatal development, education theory and its link to child development, moral development, and working with families to development school and community partnerships. **S (Su)**

PSY 300 - Health Psychology

3 credits (PREREQUISITE: PSY 112)

This course serves as a comprehensive introduction to the field of health psychology. Students will address both theoretical and applied aspects of health psychology. Topics included, but not necessarily limited to: stress, pain and coping; behavioral factors in disease; health promotion; and research methods in health psychology. **S (Sp)**

PSY 302 - Infant and Toddler Growth and Development

3 credits (PREREQUISITE: PSY 115)

This course is an in-depth study of the growth and development of young children from conception through three years old. Students will examine developmental milestones and educational theory. Students will have an opportunity to connect theory and developmental milestones to curriculum and environmental planning. Students will learn about various approaches to working with infants and toddlers such as the R.I.E. approach and responsive caregiving. This course will also focus the many ways in which to connect with the families of our youngest children. Students will examine the findings of current brain research that impact the work with infants and toddlers. (Cross-referenced to ECE 302) **S (Sp*)**

PSY 305 - Psychology of Personality**3 credits** (PREREQUISITE: PSY 112)

This course provides an overview of the major personality theories and contributing research evidence. Students will examine the theoretical differences in the motivation and dynamics of behavior, analyze and critique the major approaches to personality theory (psychodynamic, learning, dispositional, humanistic/existential), and study research strategies specific to the study of personality. **S (F, Su)**

PSY 310 - Motivation**3 credits** (PREREQUISITE: PSY 112)

This course covers motivational processes underlying the arousal, direction and maintenance of behavior, evaluates major theories of motivation with an emphasis on recent empirical findings and their relevance for future research. Students will analyze social, biological, and cognitive factors involved in motivated behaviors and emotional states. **S (Sp)**

PSY 315 - Psychology of Death and Dying**3 credits** (PREREQUISITE: PSY 112 OR DEPARTMENTAL PERMISSION)

This is an intense course in both its emotional content and its learning activities. As Homo-sapiens we are the only species conscious of its own mortality. The course provides students with an understanding of the human processes of dying, death and bereavement; topics on attitudes and practices in preparation for death; understanding of and care for the terminally ill; funeral rituals, burial, mourning and grief practices; grief counseling; and suicide and euthanasia. To confront death and dying as a part of life helps to reduce unnecessary suffering, loss of dignity, alienation, and diminished quality of life – understandings essential for individuals as well as professionals in the field. Formerly listed as PSY 225. **S (F)**

PSY 320 - Group Counseling**3 credits** (PREREQUISITE: PSY 112)

This course addresses the use of groups in the practice of counseling. Its purpose is to help students become more effective group leaders, whether leading a therapy or a training group, and to be able to influence the process of groups in which they are members. To this end, students will participate on several levels of involvement: (1) Principles, theories, concepts, and techniques of group leadership will be investigated; (2) Group dynamics will be discussed and observed in external groups and in the class interaction; (3) Students will lead a group session with a co-leader; and (4) Students will be group members. Students will not be asked to self-disclose. **(Sp)**

PSY 330 - Tests and Measurement**3 credits** (PREREQUISITE: NONE)

This course addresses the basic theories, applications and issues in psychological testing. Topics covered include reliability, validity and norming common to all test construction; legal and ethical issues relevant to

psychological testing; major instruments used in the measurement of intelligence, personality, aptitude, and achievement; and, uses of testing in special situations (e.e., clinical and counseling settings, industrial/organizational settings). By the end of this course, students will be able to describe the theory and procedures that underlie the construction, validation and interpretation of psychological tests; demonstrate the administration, scoring, interpretation and reporting of selected tests; demonstrate competence in the use of Library & Internet sources of information about psychological tests; and, describe some of the issues involved in the actual use of testing for decision-making. **(Sp)**

PSY 340 - Exceptional Child II**3 credits** (PREREQUISITE: ECE 101 and ECE 201)

This course is designed to promote child development and learning by familiarizing students with the characteristics and needs of all exceptional learners. A continual introduction of terms and concepts within a more narrowly defined topic area with discussions of videos, case studies, and presentations of the review of related literature pertaining to exceptional children will be engaged. These activities will add to the emergence of terms and concepts associated with special education. The concept of Inclusion as a means of educating students with special needs will be deeply discussed and students will become familiar with the historical events and social reform that laid the background for this method of instruction. Students will have opportunities to ponder opposing viewpoints on special education issues. Students will investigate the use of drugs as a means of curbing inappropriate conduct of students with special needs and recognize symptoms, modify environments, and plan appropriately so that children can be successful. A large focus of this course will be on community outreach and family involvement. (Cross-referenced to ECE 340.) **(Su)**

PSY 350 - Cross-Cultural Psychology**3 credits** (PREREQUISITE: PSY 112)

This course is an introduction to culture's influence on human behavior and mental processes. Topics begin with an examination of theoretical definitions of culture, and cover a broad range of theories and research findings regarding cultural influences on human behavior and cognitive processes (life-span development, abnormal behavior and mental health, self-concept, emotion, motivation, learning, intelligence, perception, memory, communication, social cognition, and social behavior). Students will examine the diversity of human expression in contexts ranging from everyday modes of functioning to family and work relationships. Students are provided with a non-judgmental understanding of how culture influences human behavior and are better equipped to interact in a world where there is increasing contact among different cultures. Students will also gain

knowledge in cross-cultural research methodology. **S mc (F)**

RSP 110 - Cardiopulmonary Anatomy & Physiology
3 credits (PREREQUISITE: BIO 212)

An in-depth study of the anatomy and physiology of the pulmonary and cardiac system. Topics include but are not limited to: the circulatory system, applied physiology and physical principles of the respiratory system and gas exchange. **(F, Sp)**

RSP 112 - Principles of Respiratory Care

4 credits (PREREQUISITE: BIO 212)

This course introduces students to basic principles of clinical respiratory care. Topics include but are not limited to: medical gas therapy, patient assessment, OSHA and infection control standards, oxygen therapy, aerosol therapy, humidification, bronchial hygiene therapy, hyperinflation therapy, ethics and professionalism, and medical documentation. This course includes a skills practice lab. **(F, Sp)**

RSP 120 - Applied Pharmacology

3 credits (PREREQUISITE: BIO 212)

This course includes the study of the composition, dosage, modes of action, indications and contraindications for and effects of medication administered to patients treated in the field of respiratory care. Emphasis is placed on drugs prescribed for the cardiopulmonary, renal, and neurological system. **(Sp, Su)**

RSP 121 - Integration of Respiratory Care Skills

4 credits (PREREQUISITE: RSP 110, RSP 112, PHY 110)

The theory and administration of respiratory care procedures, airway management, monitoring devices, and clinical assessment of the respiratory patient. The clinical component includes supervised clinical application of principles learned in the classroom. Students will be scheduled for clinical rotations at various health care facilities. Topics include: medical gas therapy, patient assessment, aerosolized medication delivery, documentation, and chart research. **(Sp, Su)**

RSP 132 - Mechanical Ventilation

6 credits (PREREQUISITE: RSP 121, RSP 120)

A study of mechanical ventilators used in respiratory care with an in-depth explanation of function and application. Indications, hazards, and complications of mechanical ventilation, and weaning will be emphasized. This course includes a skills lab. The clinical component includes supervised clinical application of principles learned in the classroom. Students will be scheduled for clinical rotations at various health care facilities. Topics include bronchial hygiene techniques, bi-level positive pressure breathing and radiographic and laboratory assessment of the respiratory patient. Formerly known as Airway Management and listed as RSP 131. **(Su,F)**

RSP 221 - Principles of Critical Care

5 credits (PREREQUISITE: RSP 131; Corequisite: RSP 231)

A study of pulmonary and cardiac assessment, critical care monitoring and fluid and electrolyte balance as it relates to cardiopulmonary medicine. Topics include: EKG rhythm interpretation, central venous pressure monitoring, pulmonary artery pressure monitoring, and intra-cranial pressure monitoring. The clinical component includes supervised clinical application of the principles of continuous mechanical ventilation in adult critical care. Students will be scheduled for clinical rotations at various health care facilities. **(F, Sp)**

RSP 231 - Cardiopulmonary Pathophysiology I

3 credits (PREREQUISITE: RSP 131; COREQUISITE: RSP 221)

This course focuses on the etiology, pathophysiology, clinical manifestations, diagnosis, and treatment of cardiopulmonary abnormalities and diseases of the adult patient. **(F, Sp)**

RSP 233 - Respiratory Care Capstone

2 credits (PREREQUISITE: RSP 231; COREQUISITE: RSP 261)

This course is designed to prepare the student to sit for the Certified Respiratory Therapist (CRT) exam and the Registered Respiratory Therapist (RRT) exam offered by the National Board of Respiratory Care (NBRC). The course provides an in-depth review of respiratory care principles, airway management, and pulmonary and cardiac assessment, and respiratory care modalities used in the care of patients. **(Sp, Su)**

RSP 261 - Comprehensive Respiratory Care

7 credits (PREREQUISITE: RSP 221, RSP 231; COREQUISITE: RSP 232)

A comprehensive study of the respiratory care modalities used in the care of pediatric and neonatal patients. Topics include but are not limited to: diagnostic and therapeutic procedures, embryology, cardiopulmonary pathophysiology, ventilator management, and critical care techniques. The clinical component includes supervised clinical application of the principles of continuous mechanical ventilation as well as critical care monitoring in adult, pediatric, and neonatal critical care. Students will be scheduled for clinical rotations at various health care facilities. **(Sp, Su)**

SCI 110 - Exploring Life

4 credits (PREREQUISITE: NONE)

This course provides students with an introduction to life science. The focus is on 5 topics that form the foundation of biology: evolution, ecosystems, cells, homeostasis, and genes. As we explore these ideas, you will be introduced to the general principles of cell biology, chemistry, and biochemistry. Exploring Life will also develop an understanding of the principles of physical science as they apply to life science. The intent is to help you create a "mental filing cabinet," whose folders you will fill as you progress through this and other sciences courses, and to

emphasize the connections between ideas in life and physical science. In addition, this course allows you to learn and practice basic skills required for success in science. These include: critical thinking, safety procedures, identification, of lab equipment, microscope use, creation of lab reports (with accurate and appropriate data tables and graphs), application of the scientific method, and understanding, of the structure of the Periodic Table, and competent use of the metric system and scientific notation. (F, Sp, Su)

SOC 101 - Introduction to Sociology

3 credits (PREREQUISITE: NONE)

This course examines the theoretical perspectives, origins and history of sociology. Students will be challenged to do research and to think critically in examining cultural issues in American society and the world. Topics include human socialization, macro- and micro-sociological perspectives of social structure, class, status, stereotypes, groups, norms, and deviance; examines the impacts of technology, mass media, social inequality, gender, marriage, family, and social change. S (F, Sp, Su)

SOC 110 - Contemporary Social Problems

3 credits (PREREQUISITE: NONE)

This course considers contemporary social problems and their implications for human services from historical, sociological, political and economic perspectives. Students will focus on the development of critical thinking skills. Topics will cover poverty, educational underachievement, crime and violence, and emerging problems of under-resourced communities. Students will consider the impact of race, ethnicity, and gender as variables in contemporary social problems. S mc (F, Sp)

SOC 201 - Multicultural Issues

3 credits (PREREQUISITE: SOC 101)

This course focuses on heightening awareness and appreciation of diversity; considers political, religious, sexual and cultural identities as well as lifestyle differences, problems of race, nationality, regions and language patterns. Students will examine myths concerning group differences and assumptions regarding ethnicity and culture of the economically deprived, senior citizens, and children. This course looks at political and social oppression of minorities and their status in the U.S. Students will be expected to participate in open discussions and engage in scholarly readings. S mc (F, Su)

SOC 301 - Sociology of Aging

3 credits (PREREQUISITE: NONE)

This course examines demographic changes, role shifts, age stereotyping, age norms, stratification, retirement and institutionalization from a sociological perspective, and their implications for the treatment and status of older adults. Students will explore the processes of aging in the later years and the impact of the same on people's lives.

The focus of this course is on aging in American society. S (Sp, Su)

SOC 315 - Family-School-Community Partnerships

3 credits (PREREQUISITE: Departmental Permission)

This course explores the role of relationships between families, schools, and the communities in which families reside. Students will deepen their understanding of the importance of family involvement in the school system and examine creative strategies for including parents and families in the school. Students will also analyze contemporary family patterns and composition in order to more effectively connect with the families in their communities. Students will recognize that children are highly impacted by the environments in which they live. Topics in social studies will be explored as students have opportunities to discuss the importance of involving community partners, culture and diversity in the school system. Major theorists will be studied. This course also includes a 20-hour community volunteer project of the student's choice. (Cross-referenced to ECE 315) (F)

SPAN 101 - Elementary Spanish I

3 credits (PREREQUISITE: NONE)

This course Introduces students to spoken and written Spanish. In addition to the material in the text, a substantial focus is on Hispanic culture, including literature, music and art. Students will be provided with a foundation in speaking and writing the Spanish language and understanding Hispanic culture. No previous knowledge of the Spanish language is required. THIS COURSE IS RECOMMENDED TO STUDENTS WITH NO PRIOR KNOWLEDGE OF SPANISH. C (F, Sp, Su)

SPAN 102 - Elementary Spanish II

3 credits (PREREQUISITE: C- OR BETTER IN SPAN 101 OR PROFICIENCY EXAM)

This course continues to expand students' understanding and practice of spoken and written Spanish. Topics will emphasize building progressively complex grammar and conversational skills. Students will be exposed to Hispanic literature and culture with increasingly advanced scope and depth. C (Sp)

SPAN 103 - Spanish for Health Care Professionals

3 credits (PREREQUISITE: NONE)

This course focuses on teaching Spanish to students entering or currently in the medical field. Students will learn the terminology, phrases and information relevant to the medical work environment. This course includes an intensive study and practice of communication skills required in "real world" medical work situations and provides the fundamentals of the Spanish language. C (F, Sp, Su)

SPAN 206 - Spanish for Heritage Speakers

3 credits (PREREQUISITE: Native to Near Native Spanish)

This course is designed to specifically promote Spanish proficiency in Native/Heritage Spanish-for speakers who

plan to use their language in a Human Services setting. Students who are looking to write grammatically-correct Spanish, improve reading comprehension and expand their vocabulary in order to express themselves formally, are encouraged to take this course. These tools will help students become more proficient in the Spanish language and be able to use these skills in Spanish-speaker interactions. *Students who are interested in taking this course will be directed to talk with the Spanish Course Coordinator before signing up for the course. Please note: This course will be taught in Spanish. **C (F, Sp, Su)**

STAT 167 - Principles of Statistics

3 credits (PREREQUISITE: COMPLETION OF MATH 125 OR HIGHER WITH A GRADE OF "C" OR BETTER.)

This course introduces students to the basic concepts and processes of descriptive and inferential statistics. Topics that will be covered include the collection, organization, and graphical representation of data, measures of central tendency and dispersion, probability, discrete and continuous probability distributions, the normal distribution, sampling distributions, confidence intervals for population means, hypothesis testing for population means, and linear and regression and correlation. Students will be required to use a TI 83 or TI 84 graphing calculator. Formerly listed as MATH 167 A **(F, Sp, Su)**

Continuing Education Course Descriptions

ESL 010 - Beginning English I

1.5 credits (PREREQUISITE: NONE)

This course presents the basic grammar structures needed to help students understand, speak, read, and write basic English required for meaningful communication and interaction.

ESL 011 - English Vocabulary Studies I

1.5 credits (PREREQUISITE: NONE)

This course is designed to develop students' reading literacy by introducing readings of gradually increasing length and complexity while using a carefully controlled vocabulary and grammatical structure. The stories, which are written for and about adults, depict the lives, work, problems, and hopes of ordinary people.

ESL 012 - English Conversation Practice I

1.5 credits (PREREQUISITE: NONE)

This course creates situations that enable students to gain confidence in their oral development by sharing ideas while discussing stimulating topics. A variety of conversation techniques such as: classroom discussion, individual response, large group and small group interaction will be used while discussing real life situations.

ESL 013 - ESL Survival Skills I

1.5 credits (PREREQUISITE: NONE)

This course emphasizes the vocabulary and survival skills needed for adult learners to aid in their acclimation to American culture. Vocabulary for adult life-skill competencies such as the calendar, body parts, clothing, weather, and health will be explored in every day situations.

ESL 020 - Beginning English II

1.5 credits (PREREQUISITE: ESL 010, ESL 011, ESL 012, AND ESL 013 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course will instruct students in the formal rules of basic English grammar, as well as give them opportunities to apply those formal rules to practical situations. The future and past progressive tenses will be studied. Students will be introduced to the comparative and superlative forms of adjectives. They will also become familiar with the uses of can, may, should, have to, and must.

ESL 021 - English Vocabulary Studies II

1.5 credits (PREREQUISITE: ESL 010, ESL 011, ESL 012, AND ESL 013 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course is designed to develop students' reading literacy by introducing readings of gradually increasing length and complexity while using a carefully controlled vocabulary and grammatical structure. The stories, which are written for and about adults, depict the lives, problems, and hopes of ordinary people.

ESL 022 - English Conversation Practice II

1.5 credits (PREREQUISITE: ESL 010, ESL 011, ESL 012, AND ESL 013 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course creates opportunities for students to continue the development of speaking and listening skills that will aid in social and academic success. Students will gain confidence in their oral development by sharing ideas while discussing stimulating topics. A variety of conversation techniques such as: classroom discussion, individual response, large group and small group interaction will be used while discussing real life situations.

ESL 023 - ESL Survival Skills II

1.5 credits (PREREQUISITE: ESL 010, ESL 011, ESL 012, AND ESL 013 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course emphasizes the vocabulary and survival skills needed for adult learners to aid in their acclimation to American culture. Adult life-skill competencies such as family, food, social services, and various occupations will be explored in everyday situations.

ESL 030 - Intermediate English I

1.5 credits (PREREQUISITE: ESL 020, ESL 021, ESL 022, AND ESL 023 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course is designed to develop the grammar structures needed in order to speak, read, and write English accurately, meaningfully, and appropriately at a high beginner level. Grammatical structures will be introduced and practiced through conversations, readings, role plays, listening exercises, and interaction activities as well as structured practice exercises.

ESL 031 - Reading Skills and Strategies I

1.5 credits (PREREQUISITE: ESL 020, ESL 021, ESL 022, AND ESL 023 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course is designed to introduce students to reading passages on stimulating topics in order to reinforce comprehension, expand vocabulary, and develop critical thinking skills. The stories include a variety of moods, settings, and characters that portray real people in typical situations.

ESL 032 - Oral Communication Techniques I

1.5 credits (PREREQUISITE: ESL 020, ESL 021, ESL 022, AND ESL 023 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course helps students build confidence by successfully communicating and participating in meaningful discussions, seminars, and presentations. Students will become familiar with work-related vocabulary as they participate in a variety of oral activities such as

interviewing, following directions, and responding to comments and telephone situations.

ESL 033 - English Writing I

1.5 credits (PREREQUISITE: ESL 020, ESL 021, ESL 022, AND ESL 023 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course acquaints students with the process of writing basic sentences using proper spelling, grammar, punctuation, and structure. Students will be exposed to the beginning process of combining sentences into simple paragraphs.

ESL 040 - Intermediate English II

1.5 credits (PREREQUISITE: ESL 030, ESL 031, ESL 032, AND ESL 033 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course is designed to aid students in achieving grammatical correctness and building effective communication skills. Students will learn to refine and apply the mechanics of English grammar needed to succeed in American society.

ESL 041 - Reading Skills and Strategies II

1.5 credits (PREREQUISITE: ESL 030, ESL 031, ESL 032, AND ESL 033 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course introduces students to reading passages on stimulating topics in order to reinforce comprehension, expand vocabulary, and develop critical thinking skills as well as provide real life situations that aid in the acclimation to American culture.

ESL 042 - Oral Communication Techniques II

1.5 credits (PREREQUISITE: ESL 030, ESL 031, ESL 032, AND ESL 033 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course prepares students to build confidence in public speaking. By studying various forms of speech making, students will become familiar with writing and presenting talks in front of an audience.

ESL 043 - English Writing II

1.5 credits (PREREQUISITE: ESL 030, ESL 031, ESL 032, AND ESL 033 OR APPROPRIATE SCORE ON PLACEMENT EVALUATION)

This course further develops students' skills in paragraph writing. Students will review paragraphs to identify spelling and punctuation errors. Students will progress to writing multi-paragraph essays with a clear introduction and development of ideas.

Amy Beauchemin, Program Director of General Studies and Assistant Professor of Computer Literacy. (B.S., Western Connecticut State University; M.S., University of Bridgeport)

Lori L. Blake, Program Director and Associate Professor of Early Childhood. (B.S., University of Connecticut; M.S., Central Connecticut State University)

Paula H. Bowley, Nursing Clinical Instructor. (B.S.N., M.S.N., University of Hartford; Diploma, St. Mary's School of Nursing)

Kathryn Kleis Carbone, Assistant Professor of Criminal Justice. (B.S., University of Connecticut; B.A., Western Connecticut State University; M.A., John Jay College of Criminal Justice)

Colleen Connolly, Assistant Professor of English. (B.A., M.A., University of Wisconsin; Ph.D. University of South Florida)

Janice F. Costello, Department Chair and Associate Professor of Nursing. (R.N., Hartford Hospital School of Nursing; B.S.N., M.S.N., University of Hartford)

Paul Danese, Assistant Professor of Science. (B.S., University of Massachusetts; M.S., Ph.D., Princeton University)

Vinod Dhar, Associate Professor of Science. (B.S., Kashmir University; M.S. Kumaon University; M.Phil., and Ph.D., Kashmir University)

Paula Dowd, Program Director and Associate Professor of Health Science. (B.S., University of Connecticut; M.A., Hartford Graduate Center)

Zoe Durkin, Program Director and Associate Professor of Histologic Studies. (A.S., Centenary College; HT, University of Pennsylvania; M.Ed., Cambridge College)

Roger Ellsbury, Associate Professor of English and Mathematics. (B.A., M.A., University of Connecticut; C.A.G.S. 6th Year Certificate, Saint Joseph College)

Linda C. Fellows, Curriculum Director and Associate Professor of English. (B.A., Millikin University; M.A. Ed., Saint Joseph College)

William T. Forte, Assistant Professor of Business. (B.A., University of Connecticut; M.S.O.L., Quinnipiac University)

Joseph J. Gillen, Associate Professor of Social Sciences. (B.A., Fordham University; M.Phil., M.S., Ph.D., City University of New York)

Donna Sue Graesser, Assistant Professor of Science. (B.S., Valparaiso University; M.S., Ph.D., Yale University)

Rosemary Hathaway, Program Director, RN to BSN Program and Associate Professor of Nursing. (B.S., Boston College; M.S., Ph.D., University of Connecticut)

Carmen Hufcut, Assistant Professor of Health Science. (B.S., M.S.D.H, University of Bridgeport, Fones School of Dental Hygiene)

Andrew Jaffe, Curriculum Director and Assistant Professor of Mathematics. (B.A., New York University; M.A., Wesleyan University)

Heather Kies, Program Director and Assistant Professor of Medical Assisting. (B.S., Albertus Magnus College, M.H.A., University of Phoenix)

Edward Kobylanski, Associate Professor of Nursing. (A.D., St. Vincent's College; B.S., Daemen College; M.S.N., University of Hartford)

Paula Lackups, Clinical Instructor of Respiratory Care. (A.S., B.S. Quinnipiac University)

Randy Laist, Curriculum Director and Assistant Professor of English. (B.A., M.A., Ph.D., University of Connecticut)

Elizabeth A. Lane, Associate Professor of English. (B.A., M.Ed., American International College)

Paul J. LaRocca, Associate Professor of Humanities. (B.A., M.A., Trinity College; J.D., Cornell University)

Cathy Levey, Assistant Professor of Psychology & Criminal Justice. (M.A., City University of New York; M.A., Ph.D., Institute of Advanced Psychological Studies)

Teshia Levy-Grant, Assistant Professor of First Year Experience. (B.A., Wesleyan University; M.S., Connecticut State University)

Maria E. Lisboa, Nursing Clinical Instructor. (B.S.N., College of Our Lady of the Elms; M.S.N., University of Hartford)

Kim Mansfield, Assistant Professor of Early Childhood. (B.A., Eastern Connecticut State University; M.A.T., Sacred Heart University)

Donnette Martin, Practicum Coordinator and Assistant Professor of Medical Assisting. (A.S. Goodwin College; B.S., Charter Oak State College; M.S. New England College)

Jack Matthews, Program Director and Assistant Professor of Human Services Program. (B.A., M.Ed., Springfield College)

Cynthia McHale-Hendricks, Associate Professor of English. (B.A., Albertus Magnus College; M.A., Trinity College)

David Mirto, Assistant Professor of Computer Literacy. (B.B.A., M.B.A., Western Connecticut State University; M.S.E., University of Bridgeport)

Michelle B. Moeller, Assistant Professor of Nursing. (A.D.N., Holyoke Community College; B.S., Springfield College; M.S.N., University of Hartford)

Gaylynn Moore-Collins, Assistant Professor of Sociology. (B.S., Lamar University; M.A., Prairie View A&M University; M.Ed., Texas Southern University; Ph.D., Capella University)

Barbara Morey, Associate Professor of Nursing. (B.S.N., Central Connecticut State University, M.S.N., University of Hartford)

Bruce Morton, Program Director and Associate Professor of Environmental Science. (B.A., State University of New York at Plattsburgh; M.E.P.C., The Pennsylvania State University)

J. Brian Murphy, Director of Homeland Security and Criminal Justice Programs and Assistant Professor. (B.S., M.S., Western Connecticut State University, M.S. Cert., St. Joseph's College)

Debora Myers, Assistant Professor of Mathematics. (B.S., University of Pittsburgh; M.A., Providence College)

Vicky Navaroli, Assistant Professor of Science. (B.S., University of Connecticut; Ph.D., University of Illinois at Chicago)

Patricia Perritano, Program Director for Respiratory Care and Assistant Professor of Respiratory Care. (B.S., Quinnipiac University; M.S., University of Connecticut)

Joanne Plizska, Assistant Professor of Histologic Studies. (B.S., M.S., Higher Pedagogical School in Olsztyn)

Pedro Pozo, Assistant Professor of Science. (B.S., Eastern Connecticut State University; M.A., Central Connecticut State University)

Henriette M. Pranger, Chair of General Education and Associate Professor of Humanities. (B.A., Trinity College; M.A., Ph.D., University of Connecticut)

Debra A. Rajaniemi, Associate Professor of Science. (B.S., University of Texas; M.S., University of Connecticut)

Kimberly A. Reese, Associate Professor of Science. (B.S., Southern Connecticut State University; M.H.S., Quinnipiac University)

Michael P. Rotondo, Associate Professor of Business. (B.S., Central Connecticut State University; M.B.A., University of Hartford)

Jayanti Roy, Associate Professor of Psychology. (B.A., M.A., University of Delhi, India; M.Phil., Ph.D., Jawaharlal Nehru University, India)

Regina E. Salvio, Curriculum Director and Associate Professor of English. (B.A., University of New Hampshire; M.A.L.S., Wesleyan University)

Howard Satinsky, Assistant Professor of English, Communication & History. (B.A., Trinity College; M.S., Southern Connecticut State University)

Marcia Scanlon, Associate Professor of Nursing. (B.S.N., University of Massachusetts; M.S.N., St. Joseph College)

Salvatore Secondo, Associate Professor of Science. (B.S., M.S., Central Connecticut State University)

Cynthia Seiwert, Assistant Professor of Science. (B.A., Earl Ham College; Ph.D., Cornell University)

Cheyenne Seymour, Assistant Professor of English and Communication. (B.A., Long Island University; M.A., Trinity College)

Jason T. Shea, Assistant Professor of Mathematics. (B.S., M.S., Eastern Connecticut State University)

Diane Sperger, Assistant Professor of English. (B.A., Regina University; M.S., Central Connecticut State University; Ed.D., University of Hartford)

Clifford E. Thermer, Chair and Associate Professor of Social Science, Business & Education (M.P.A., University of New Haven; B.A., Ed.D. University of Hartford)

Catherine S. Thomas, Associate Professor of Nursing. (B.S.N., St. Joseph College; M.S.N., University of Hartford)

Cassandra Tierney, Assistant Professor of Science. (B.S., Fairfield University; Ph.D. University of Connecticut)

Lisa Toussaint, Field Work Coordinator of Occupational Therapy Assisting. (B.S., OTR/L, Quinnipiac University)

Teresa C. Twomey, Associate Professor of Nursing. (B.S.N., The Catholic University of America; M.S.N., University of Hartford)

Vita Vernace, Assistant Professor of Science. (B.A., M.A., State University of New York at Buffalo; M.Phil, Ph.D., The Graduate School and University Center City University of New York)

Pamela Walker, Associate Professor of Nursing. (B.S., University New York Regents; M.S.N., University of Hartford)

Tammy Webb, Assistant Professor of Psychology. (B.S., M.A., American International College)

Fred White, Assistant Professor of Mathematics. (B.S., Adelphi University, B.S., Dickinson College; J.D., Western New England School of Law)

Danielle S. Wilken, Chair and Associate Professor of Health and Natural Sciences. (B.S., M.S., State University of New York at Stony Brook)

Adjunct Faculty

Abby Alter, Instructor of Human Services. (B.S. State University of New York at Albany; M.P.A., New York University)

Elizabeth Acevedo, Instructor of Medical Assisting. (B.A., University of Puerto Rico; M.B.A., Metropolitan University)

Christina Alveras, Instructor of Science. (B.S., M.S., University of Connecticut)

Jeanne Ambrosio, Instructor of Medical Assisting. (B.S.N., Western Connecticut State College)

Prince Appiah-Yeboah, Nursing Clinical Instructor. (B.S.N., American International College; M.S.N., University of Hartford)

Steven Autieri, Instructor of Science. (B.S., Keene State; M.S., University of Rhode Island)

Robert P. Bagioni, Instructor of Science. (B.S., Central Connecticut State University; M.A., St. Joseph College)

David Banker, Instructor of Environmental Studies. (B.A., M.B.A., University of Connecticut)

Wanda Barreto, Instructor of Organizational Studies & Business Administration. (B.A., University of Puerto Rico; M.A., University of the Sacred Heart)

- Mark Barreuther**, Instructor of Science. (B.S., M.S., Southern Connecticut State University; Ph.D., Wesleyan University)
- Althea Bates**, Instructor of Human Services. (B.A., Temple University; M.S., Springfield College)
- Susan Beeching**, Instructor of English. (B.A., University of New Mexico; M.Ed., Bridgewater State College; M.Ed., Lesley College)
- Belinda Beeman**, Instructor of Medical Assisting. (B.S., M.Ed., Eastern New Mexico University)
- Leia Bell**, Instructor of Business Administration. (B.A., Binghamton University; M.A., National University; M.S. Saint Joseph College)
- Annjanette Bennar**, Instructor of Computer Literacy. (B.S., Central Connecticut State University; M. Ed., University of New Haven)
- Cynthia Berlin**, Instructor of Science. (B.S., University of Hartford; M.S., University of Bridgeport)
- Deborah Bianca**, Instructor of Medical Assisting. (B.S.N., M.S.N., St. Joseph College)
- Dawn Blake-Holmes**, Instructor of Nursing. (B.S.N., Russell Sage College; M.S.N., University of Connecticut)
- Chris Bogucki**, Instructor of Environmental Studies. (B.A., Hamilton College; M.S., University of New Haven)
- Evelyn Bollert**, Instructor of English. (B.A., University of Connecticut; M.A., Yale University)
- Stacey Bottone**, Instructor of Health Science. (B.S., Charter Oak State College, M.B.A., Salve Regina University)
- Geraldine Bouchard**, Instructor of Respiratory Care. (B.S., Central Connecticut State University; M.H.A., Western Connecticut State University)
- Linda Boucher**, Instructor of Medical Assisting. (B.S.N., Saint Joseph's College; M.A., Saint Joseph's College)
- Mara Braverman**, Instructor of Communication. (B.A., New York University; M.P.A., J.D., University of Southern California)
- Ashika Brinkley**, Instructor of Science. (B.S., Morgan State; M.P.H., Yale University)
- Jill M. Brown**, Instructor of Sociology. (B.S.W., Western New England College; M.S.W., University of Connecticut)
- John Browne**, Instructor of Homeland Security and Criminal Justice. (A.S., Housatonic Community-Technical College; B.S., M.S., Western Connecticut State University)
- Eric Brummit**, Instructor of Music. (B.A., University of Oregon; M.A. Wichita State University; Ph.D, University of Michigan)
- Frank Bruskey**, Instructor of Homeland Security and Criminal Justice. (B.A., St. Francis College; J.D., University of Bridgeport)
- Pamela Burke**, Instructor of Medical Assisting. (B.A., Northwood University; M.B.A., University of Phoenix)
- Jacqueline Burns**, Instructor of English. (B.A., Brown University; M.S., Southern Connecticut State University)
- Patricia Camp**, Instructor of History. (B.A., Rice University; M. Ed., University of Houston; J.D., University of Chicago)
- Harriett Canty**, Instructor of Spanish. (B.A., St. Joseph College; M.S., Southern Connecticut State University)
- Erika Cappelluti**, Instructor of Respiratory Care. (B.S., Virginia Tech University; Ph.D., M.D., Medical College of Virginia/Virginia Commonwealth University)
- Michael Carucci**, Instructor of Science. (B.A., Trinity College; D.C., University of Bridgeport)
- Ceylon Cicerco**, Instructor of Science. (B.S., M.S., Morgan State University; N.D., University of Bridgeport)
- Patricia Cherry**, Nursing Clinical Instructor. (B.S.N., University of Calgary; M.S.N., McGill University)
- Linda Ciarleglio**, Instructor of Medical Assisting. (A.S., Mattatuck Community College, B.S., Post University)
- Donna Clerico**, Instructor of Health Science. (B.A., New York University; M.S., Bay Path College)
- Margaret Concannon**, Instructor of Health Science. (B.A., Central Connecticut State University; M.Ed., Springfield College)
- Monica R. Connors**, Instructor of Human Services. (B.A., University of Massachusetts; M.S.W., Springfield College)
- Karen Contorno**, Instructor of Science. (B.S., M.S., Cedar Crest College)
- Rebecca Cormier**, Instructor of Mathematics. (B. A., St. Joseph College; M.A., Eastern Connecticut State University)
- Lauren Coughlin**, Instructor of Occupational Therapy Assisting. (B.S., University of Hartford; M.S., Boston University)
- Adam Craig**, Instructor of Science. (B.S., University of Massachusetts - Amherst; N.D., University of Bridgeport)
- Jill Cretella**, Instructor of Human Services. (B.S., Elmira College; M.S., Fordham University)
- Marisol Cruz-St. Juste**, Instructor of Psychology. (B.A., Eastern Connecticut State University; M.A. Canyon College)
- Angelina Dale**, Instructor of First Year Experience. (B.A., University of Connecticut; M.A., National University)
- Jeffrey DaMiano**, Instructor of Science. (B.S., M.S., Central Connecticut State University)
- Lois Daniels**, Assistant Professor of Nursing. (B.S.N., State University of New York at Buffalo; M.S.N., Yale School of Nursing; C.N.M., Yale School of Nursing)
- Thomas Davoren**, Instructor of Organizational Studies & Business Administration. (B.S., Charter OAK State College; MBA., Western New England College)
- John Day**, Instructor of Medical Assisting. (B.A., Ohio Wesleyan University; M.S., Southern Connecticut State University; M.B.A., University of Hartford)
- Susan Deane**, Instructor of Nursing. (B.S.N., Saint Joseph's College of Maine; M.S.N., University of Hartford)
- Geri Dees**, Nursing Clinical Instructor. (B.S.N., University of Maryland; M.S.N., University of California)
- Mary Deleo**, Instructor of Nursing. (B.S.N., Georgetown University; M.S.N., Columbia University; M.S.N., University of California)

- Kerry Ann Deschaies**, Instructor of Nursing. (B.S.N., Our Lady of Elms College; M.S.N., University of Hartford)
- Don DiGenova**, Instructor of Environmental Studies & Mathematics. (B.E., Stevens Institute of Technology; M.S., Rensselaer Polytechnic Institute; M.S., University of Connecticut)
- Connie Dills**, Instructor of Respiratory Care. (B.S., Florida Atlantic University; M.B.A. Albertus Magnus College)
- Andreea DiLorenzo**, Instructor of Sociology. (B.A., St. John's University; M.S., Baruch College)
- William Dove Jr.**, Instructor of Mathematics. (B.S., University of Virginia; M.S. Princeton; Ph.D., University of Rochester)
- Carolyn Egan**, Instructor of English. (B.A., Connecticut College; J.D., University of Connecticut)
- Lorraine Egan**, Instructor of English. (B.A., University of Connecticut; M.A., University of Chicago)
- German Escudero**, Instructor of Science. (B.A., Central Connecticut State University; M.H.S., Quinnipiac University)
- Greg Feeley**, Instructor of English. (B.A., Yale College; M.A., Southern Connecticut State University)
- Eileen Ferris**, Instructor of Communication. (B.A., California State University; M.S., University of Hartford; J.D., University of Connecticut)
- Deborah Finnegan**, Nursing Clinical Instructor. (B.S.N., Connecticut State College; M.S.N., University of Connecticut)
- Frederick C. FitzGerald**, Assistant Professor of Mathematics. (B.S.Ed., Westfield State Teachers College; M.Ed., Boston University)
- Richard Fritz**, Instructor of Respiratory Care. (B.A., University of Connecticut; M.S., M.Ed., Ed.D., University of Hartford)
- Agnes Garcia**, Instructor of Medical Assisting (B.S., University of Puerto Rico; M.P.A., Troy State University)
- Daniel Gasparino**, Instructor of Computer Literacy. (B.A., University of Hartford; M.A., University of Hartford)
- Casey Gatzki**, Instructor of Science. (B.S., Texas Tech University; M.H.S., Quinnipiac University; J.D. Quinnipiac University School of Law)
- Kathleen Gavin**, Instructor of Early Childhood Education. (B.A., Eastern Connecticut State University; M.S., Central Connecticut State University)
- Linda Gilbert**, Clinical Nursing Intstructor. (B.S.N., M.S.N., University of Phoenix)
- Debra Glover**, Instructor of Medical Assisting. (B.S.N., University of Connecticut)
- Mark Glover**, Instructor of Computer Literacy. (B.S., Eastern Connecticut State University; M.S., Rensselaer Polytechnic Institute)
- Joel Greene**, Instructor of English. (B.A., University of Connecticut; M.S., Central Connecticut State University; 6th year, University of New England)
- Levaniel Griffin**, Instructor of Business Administration. (B.A., University of Connecticut; M.B.A., Rensselaer Polytechnic Institute)
- Kathryn Hale**, Instructor of Environmental Studies. (B.A., Wesleyan University; L.L.M., J.D., New York University)
- Paula Hankard**, Instructor of Health Science. (B.S.N., St. Joseph's College; M.S., Rensselaer Polytechnic Institute)
- Arlene Harris**, Instructor of Sociology. (B.A., Wesleyan University; M.A., Ph.D., University of Connecticut)
- Lorraine Hawkins**, Instructor of History. (M.A., Louisiana State University; Ph.D., Binghamton University)
- Beth Hayes**, Instructor of Computer Literacy. (B.S., University of Connecticut; M.S., Central Connecticut State University)
- Brian Heavren**, Instructor of Homeland Security and Criminal Justice. (B.S., University of Maryland; M.S., St. Joseph College)
- Kathy Heim**, Instructor of Nursing. (A.D.N. Manchester Community College; M.S.N., University of Phoenix)
- Pamela Held**, Instructor of Respiratory Care. (B.S., University of Hartford; M.S., University of New Haven)
- Paul Hewitt**, Instructor of Computer Literacy. (B.S., M.S., Columbus State University)
- Tammy Hewitt**, Instructor of Computer Literacy. (B.S., Eastern Connecticut State University; M.B.A., Columbus State University)
- Heidi Higgins**, Instructor of Business Administration. (B.S., Pennsylvania State University; MBA., Rensselaer Polytechnic Institute)
- Sandra Hill**, Instructor of Science. (B.A., Hartwick College; M.S., Ph.D., University of Connecticut)
- Shani Hollins**, Instructor of Occupational Therapy. (B.S., M.S., Husson College)
- Kaitlin Impelluso**, Instructor of First Year Experience (B.A., Eastern Connecticut State University; M.S., 6th Year Certificate, University of Hartford)
- Todd Jensen**, Instructor of Science. (B.S., Sacred heart University; M.S., Quinnipiac University)
- LaShaune Johnson**, Instructor of Psychology. (B.A., Wellesley College; M.A., Ph.D., University of California)
- Michelle Joyce**, Instructor of Business Administration. (B.S., MBA., Bay Path College)
- Kathleen Keenan**, Instructor of English. (B.A., Loras College; M.A., Drake University)
- Vishnu Khade**, Instructor of Environmental Studies. (B.S., Indian Institute of Technology; M.S., M.B.A., Ph.D., University of Cincinnati)
- Kay King**, Instructor of Medical Assisting. (B.S., Excelsior College; M.S., University of Bridgeport; D.C., Palmer College of Chiropractic West)
- Maria Koistinen**, Instructor of Human Services. (B.A. Simmons College; M.S.W, University of Connecticut)
- Bujar Konjusha**, Instructor of Mathematics. (B.S., University of Prishtina; M.A., Central Connecticut State University)
- Bradley Korth**, Instructor of Environmental Studies. (B.S., University of Kansas; M.S., University of New Haven; M.S., Rensselaer Polytechnic Institute)

- Ellen Kramer**, Instructor of Nursing. (B.S., Kent State University; M.S.N., Pace University)
- Nicole Kras**, Instructor of Psychology. (M.S. Southern Connecticut State University; M.A., Albertus Magnus)
- Rose M. Kuhl**, Instructor of English and Mathematics. (B.S., Southern Connecticut State University; M.A., University of Connecticut)
- Dean LaPorte**, Instructor of Medical Assisting. (B.A., University of Connecticut; M.D., Saint Christopher's College of Medicine)
- Yannira Laviola**, Instructor of Nursing. (A.D.N., Greater Hartford Community College; B.S. Ed. University of Puerto Rico; B.S.N., M.S.N., University of Hartford)
- Laura Lemay**, Instructor of Nursing. (B.S.N., Western Connecticut State University; M.S.N., University of Phoenix)
- Joan C. Lester**, Instructor of Nursing. (B.S., Southern CT State University; M.S.N., Yale University; Ph.D., Antioch New England University)
- John Levesque**, Instructor of Science. (B.S., Truman State University; M.S., Barry University)
- Gil Linder**, Instructor of Mathematics. (B.S. Lehigh University; M.B.A., American University)
- Sarah Longstaff**, Instructor of Science. (B.A., Mount Holyoke College; Ph.D, University of Connecticut)
- Richard Lutz**, Instructor of Organizational Studies and Business Administration. (B.S., Sacred Heart University; MBA., University of New Haven; D.B.A., Argosy University.)
- Anthony Magnano**, Instructor of Science. (B.S., Charter Oak State College; M.S., Southern Connecticut State University)
- Patricia Maloy**, Instructor of Clinical Respiratory Care. (B.S., University of Hartford; M.Ed., Cambridge College)
- Lynn Mardon**, Instructor of Science. (B.A., Central Connecticut State University; M.A., University of Houston)
- Jeff Mathew**, Instructor of Computer Literacy. (B.F.A., University of Connecticut; M.A. University of Connecticut)
- Devi Mathur**, Instructor of Medical Assisting. (B.S., M.D., Saba University School of Medicine)
- Andrew McAllister**, Instructor of Human Services. (B.A., Trinity College; M.A.T., University of Chicago)
- Edward McAndrews**, Instructor of Medical Assisting. (B.A., University of Puerto Rico; M.B.A., Metropolitan University)
- Jean McGill**, Instructor of Organizational Studies and Business Administration. (B.A. University of Connecticut).
- Marcella McHugh**, Instructor of English. (B.A., Georgian Court University, M. Ed, Bloomsburg University)
- Matthew McNally**, Instructor of Homeland Security and Criminal Justice. (B.S., Western Connecticut State University; M.S., University of New Haven)
- Latoya McPherson**, Instructor of Mathematics. (B.S., Teikyo Post University; M.B.A., University of New Haven)
- John Mercier**, Instructor of Computer Literacy. (B.S., University of Connecticut; M.S., University of New Haven)
- Nancy Merkouriou**, Instructor of Health Science (B.S., Quinnipiac University; M.S., Rensselaer at Hartford)
- Kim Miller**, Instructor of Human Services. (B.A., University of Massachusetts; M.A., University of Connecticut)
- Tarold Miller**, Instructor of First Year Experience (B.S., Southern Connecticut State University; M.Ed., American Intercontinental University)
- Donald S. Mitchell**, Instructor of Environmental Studies. (B.A., University of Connecticut; M.P.H., Southern Connecticut State University; Registered Sanitarian)
- Kelson Modeste**, Instructor of Science. (B.S., Trinity College; M.D., Howard University College of Medicine)
- Mark Mogayzel**, Instructor of Mathematics. (B.S., M.B.A., University of Massachusetts; M.S. Colorado State University)
- Amy Morgan**, Instructor of Health Science. (B.S., Boise State; M.S., The Ohio State College)
- Jonathan Morrison**, Instructor of Environmental Studies. (B.S., Eastern Connecticut State University; M.S., University of Connecticut)
- Nichelle Mullins**, Instructor of Business Administration. (B.A., University of Michigan; J.D., Syracuse University College of Law)
- Louise Murray**, Instructor of Medical Assisting. (B.S., M.S., Eastern Connecticut State University)
- William Muskett**, Clinical Instructor of Respiratory Care. (B.S., University of Hartford)
- Lorraine Nahabedian**, Instructor of First Year Experience. (B.A., American International College; M.S., Adelphi University of New York)
- Kathy Nazario**, Instructor of Human Services. (B.A., Central Connecticut State University; M.S.W., University of Connecticut)
- Judy Nielsen**, Instructor of Nursing. (A.S.N., Capital College; B.S.N, M.Ed, M.S.N. University of Hartford)
- Lauren O'Leary**, Instructor of First Year Experience and Psychology. (B.A., St. Joseph's College; M. S., 6th Year Certificate, University of Hartford)
- Melissa Olsen**, Instructor of Occupational Therapy. (B.S., Quinnipiac University; M. S., Southern Connecticut State University)
- Yvette Onye**, Instructor on Computer Literacy. (B.S., Westfield State College; M.M., Cambridge College)
- Michelle Pantaleo**, Instructor of Sociology. (B.A., M.A., Saint Joseph's College)
- Anthony Paquette**, Instructor of Paramedic. (B.S., Charter Oak State College; M.P.H, University of Connecticut)
- Lynn Patarini**, Instructor of Computer Literacy. (B.S.G.S., University of Connecticut; M.A., Wesleyan University)
- Thomas P. Paterna**, Instructor of Organizational Studies and Business Administration. (B.S., Long Island University; MSM., MBA., Albertus Magnus College)
- Rebecca Pauluk**, Instructor of First Year Experience. (B.S., M.A., University of Connecticut)

- Michael Pence**, Instructor of Science. (B.S. Benedictine University; M.S., Pennsylvania State)
- Christopher Percy**, Instructor of Psychology. (B.A., Franciscan University of Steubenville; M.A., University of Hartford)
- Bonnie Petrovich**, Instructor of Organizational Studies. (M.Ed., Cambridge College)
- LaShanda Powell**, Instructor of Psychology. (B.A., Hampton University; M.A., Psy.D., University of Hartford)
- Natasha Progonati**, Instructor of Mathematics. (B.S., University Egerem Cabej; M.A., Central Connecticut State University)
- Carrie A. Rametta**, Clinical Instructor of Nursing. (A.D.N., Quinnipiac College; B.S.N., Central Connecticut State University; M.S.N., University of Hartford)
- Stephen R. Rascher**, Instructor of English. (B.A., Central Connecticut State University; M.A., Trinity College; Ph.D., University of Connecticut)
- Yamalia Roberts**, Instructor of Science. (B.S., M.S., University of Connecticut)
- Ken Rosa**, Instructor of Sociology. (B.A., Western New England College; M.S., University of New Haven; M.P.A., Marist College)
- Robert Rosa Jr.**, Instructor of Business Administration. (B.S., Central Connecticut State University; M.S., Rensselaer Polytechnic Institute)
- Kendrick Roundtree**, Instructor of Human Services. (B.S., Springfield College; M.A., Springfield College)
- Barbara L. Rutigliano**, Instructor of Health Science. (B.A., University of Connecticut; M.S., Southern Connecticut State College)
- Melissa S. Ryan**, Instructor of Environmental Studies. (B.S., University of Connecticut; M.S., Clayton College of Natural Health)
- Melody Ryan**, Instructor of Human Services. (B.A., Saint Joseph College; M.A., Antioch Graduate School)
- Rebecca Ryznar**, Instructor of Science. (B.S., M.A., Central Connecticut State University)
- David Samuels**, Instructor of Paramedic.
- Maria Santos**, Instructor of Nursing. (B.S.N., M.S.N., University of Hartford)
- Howard Satinsky**, Instructor of English, Communication & History. (B.A., Trinity College; M.S., Southern Connecticut State University)
- Denise Schuey**, Instructor of Occupational Therapy. (B.S., University of Hartford; M.A., St. Joseph's College)
- Virginia Senapti**, Instructor of Science. (B.S., University of Texas at Arlington; M.S., University of Connecticut)
- Cheyenne Seymour**, Instructor of English and Communication. (B.A., Long Island University; M.A., Trinity College)
- Leah Simmons**, Instructor of English. (B.A., M.A., Bay Path College; MiT, Sacred Heart University)
- Joseph A. Spadaro**, Instructor of Business Administration. (B.S., Trinity College; MBA., University of New Haven; J.D., University of Connecticut School of Law)
- Diane Sperger**, Instructor of English. (B.A., Regina University; M.S., Central Connecticut State University; Ed.D., University of Hartford)
- Elkin Spitia**, Instructor of Spanish. (B.S., Eastern Connecticut State University; M.A., University of Connecticut)
- Christa Sterling**, Instructor of Business Administration & Computer Literacy. (B.F.A., Central Connecticut State University; M.B.A., Rensselaer Polytechnic Institute)
- Carol Stewart**, Instructor of Mathematics. (B.S., University of Maine; M.A., Fairfield University)
- Marcie Stock**, Instructor of Health Science. (B.S., State University of New York at Albany; Doctor of Chiropractic, Life Chiropractic College West)
- Karl Stocker**, Instructor of Philosophy. (B.A., Ohio State University; M.A., University of Connecticut)
- Milaim Tahiri**, Instructor of Mathematics. (B.S., Charter Oak State College; M.A., Central Connecticut State University)
- Robin Taylor**, Instructor of Human Services. (B.A., Eastern Connecticut State University; M.S.W., University of Connecticut)
- Robert Teraila**, Instructor of Health Science. (B.S., University of Connecticut; D.P.M., Ohio College)
- Robert Tierney**, Instructor of Mathematics. (B.A., Ithaca College; M.Ed., Worcester Polytechnic Institute)
- Estherline Toby**, Instructor of Science. (B.S., University of Connecticut; M.S., Drexel University College of Medicine)
- Mary Turley**, Instructor of Respiratory Care. (B.S., University of Hartford; M.S., Saint Joseph College)
- John Tyszka**, Instructor of Mathematics. (B.A., B.S., M.S., Eastern Connecticut State University)
- Lewis P. Vasquez**, Instructor of Homeland Security. (B.A., Norwich University; M.P.A. University of Hartford; M.B.A., University of Hartford)
- Alice Walker**, Instructor of Histologic Studies. (A.S., Goodwin College; B.S., Sacred Heart University)
- Harvey Wall**, Instructor of Environmental Studies. (B.S., M.B.A., Colorado State University - Pueblo)
- Raymond Ward**, Instructor of Medical Assisting. (B.A., University of Connecticut)
- Michael Walters**, Instructor of Communication. (B.A., North Carolina A&T; M.Ed., Cambridge College; M.S., University of New Haven)
- Pamela Weiman-Kudra**, Assistant Professor of Science. (B.A., University of Connecticut; M.S., Central Connecticut State University)
- John Wertam**, Instructor of Environmental Studies. (B.S., University of Maine; M.S.L., Vermont School of Law; J.D., University of Connecticut School of Law)
