

CERTIFICATE IN MEDICAL BILLING AND CODING

Ana Hernandez, Medical Billing and Coding Graduate

Are you an analytical and technical thinker? Do you want to work in a hospital or physician's office but don't necessarily want clinical patient experience?

Medical Billing and Coding is a rapidly growing area of the health care field. With today's advancements in medicine and technology and increasing government regulations, this field offers many career venues for individuals with a Medical Billing and Coding education. A Medical Biller and Coder takes health information and converts it into codes that allow the provider to receive reimbursement from health insurance companies.

With our Medical Billing and Coding collegiate certificate, you can get trained, certified, and working in the field in as few as 12-18 months. Students must sit for the Certified Professional Coder (CPC) exam in order to become certified.
