

ASSOCIATE DEGREE IN OCCUPATIONAL THERAPY ASSISTANT

Ashley Fournier, OTA

WHAT IS OCCUPATIONAL THERAPY?

The Connecticut Occupational Therapy Association defines Occupational Therapy as a "skilled treatment that helps individuals achieve independence in all facets of their lives. It gives people the 'skills for the job of living' necessary for independent and satisfying lives."

DO YOU ENJOY CARING FOR OTHERS?

Our Occupational Therapy Assistant associate degree program will prepare you to care for clients who are limited by a physical illness or injury, an emotional disorder, a developmental disability, or the aging process. As an Occupational Therapy Assistant, you will work under the supervision of an Occupational Therapist and will apply functional activities and therapeutic modalities as methods of treatment. *Therapy focuses on assisting clients in restoring or maintaining independence in everyday life skills.*

You will gain hands-on experience through: training in activities of daily living; fabrication of splints; adapting home, work, and school environments; vocational training; and therapeutic use of functional activities. As part of your clinical work, you will learn from experienced, practicing Occupational Therapists and Occupational Therapy Assistants within a variety of health care and community settings.

For added flexibility, all Occupational Therapy Assistant courses are offered during the evening and on weekends as a cohort model. *You can complete your degree in 16 months full-time.*

Upon graduation, you will be qualified to sit for the national certification administered by the National Board for Certification in Occupational Therapy (NBCOT).

CURRICULUM

General Education Core - 28 credits		
ENG 101	English Composition	3
ENG 1XX	Writing Competency <small>(WR)</small>	3
COM 1XX	Communications Competency <small>(COM)</small>	3
CAP 1XX	Computer Literacy Competency <small>(CL)</small>	3

Deanne Anderson
 Program Director, Occupational Therapy

Upon graduation, you will be qualified to sit for the national certification administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, you will be a Certified Occupational Therapy Assistant. Connecticut requires a license in order to practice occupational therapy and the license is based on the results of the NBCOT Certification Examination. In addition to Connecticut, other states including Massachusetts and Rhode Island also require state licensure in order to practice after completing a program at an occupational therapy assistant school.

The Occupational Therapy Assistant Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220. ACOTE's telephone number c/o AOTA is 301-652-AOTA.
