

Bachelor of Science in Human Services

Make a difference in your life and the lives of others

A career in human services gives you the opportunity to make a positive impact on the lives of people of all ages. As a human services professional, you will witness the full spectrum of the human experience — the highs and lows, the joys and sorrows, the triumphs and tragedies. And you'll be there to help when people are facing challenges in their lives.

Struggling single parents will need you, as will recovering addicts, victims of abuse and neglect, people who are homeless, and those who are physically and emotionally challenged. You can be a beacon of hope for people in need and a source of support and direction for them as they rebuild their lives. In a wide variety of community organizations, clinical settings, group-home environments, and even in-home situations, the people you help will know that you care.

With strong connections to more than 500 human services organizations around the state, we can help to further your internship, networking, and job search opportunities. As you pursue your bachelor's degree in Human Services, you'll acquire the skills that employers demand — counseling, interviewing, assessment, intake, case management, public speaking, ethics, grant writing, and information literacy.

Bachelor of Science in Human Services
